PAINTS, OILS, GLASS, PUTTY, ETC.

SOLE AGENTS IN PRINCE EDWARD COUNTY FOR

WOOD FIBRE PLASTER

PICTON, ONT.

December 6th 1911.

Pinchin-Johnson & Co. (Canada) Limited,

Toronto, ONT.

Gentlemen:-

We have now on our shelves the stock of Pinchin-Johnson Paint ordered from you, and are very proud of the fine appearance it makes. It is a matter of pleasure for the writer to sit in a Picture Show, as he often does, and when the slides are put on advertising Pinchin-Johnson Paint, and our name appears as Agents, to hear the remarks, "That's the new Paint Moxon & Son are selling; I am going to try it. It must be good or they would not advertise it so." Almost daily we have parties coming in from the country asking for a color card of MINERVA Paints. They have seen the signs.

We have handled one make of Paint for over twelve years before making the change to MINERVA, and can say in all truth that we have had more enquiries re the Pinchin-Johnson Paint since we took the agency, (and this is only a few months), than we had for the other Paint all the years we handled it. I also find my clerks are far better satisfied. They speak proudly of your Counter Album showing colors, of the color cabinet to hold folders, the fine arrangement of slats and window displays, until at the present time I wonder how I ever got on and did a paint business with the line I handled.

We have already booked a number of good jobs to be painted with MINERVA in the Spring, and unless we mistake greatly next Spring will be a banner year for Pinchin-Johnson MINERVA Paints in Picton. I have but one regret in making the change. We had quite a stock of the other line of Paint we handled when we took your agency. I instructed my clerks to run it off at most any price in order to get rid of it, but since the advertising of MINERVA Brand, though we try to push it, we find it a hard proposition.

I once wrote to the Gurney Foundry Co. of Toronto as follows:- "After a careful consideration of every line now marketed in this country, I have come to the conclusion that nothing will make a name for my store - nothing will make friends for me like the line of Stoves and Ranges made by the Gurney Foundry Co."

I might say in conclusion that I feel the same regarding MINERVA Paints; they appeal to me as being two winners not only as to name, but backed up by quality, and we only hope all who have taken the agency for your MINERVA, Paint are as well satisfied with the goods, and the treatment tendered them as we are.

Yours truly,
John Moxon & Son.

Minerva Paints are ground and mixed with scientific accuracy —they have been recognized as the Standard of Quality for 78 years—and your customer gets Full Imperial Measure in each can —not wine or short measure.

Our many dealer selling-helps have made "Minerva" Brand a real live wire for aggressive dealers.

Through Each Others' Eyes

What we like best about these Annual Conventions of the Hardware Men, are the opportunities they give us to get into personal touch with you who meet the shaver face to face, and to see the GILLETTE Safety Razor as you see it.

As you know, this GILLETTE business has develòped into a mighty profitable one for all who take a hand in it.

The GILLETTE **saves your customer** who buys it a great deal of time, and, if he has been going to a barber, a substantial sum of money.

The GILLETTE **pays you** a good, protected profit (for there's no price-cutting). It sells easily because it is so vigorously advertised and so widely known. Purchasers, well pleased, come back to you from time to time for more blades.

The GILLETTE **pays us** well enough so that we have been able to erect in Montreal one of the best designed and most perfectly equipped razor plants in the world, where we plan to turn out, if possible, better Gillettes than ever.

We are keen on talking the GILLETTE over with you, seeing it from your point of view, and getting your suggestions, so that, working together, we can make the GILLETTE earn more profits for both of us in 1912 than it has ever done before.

We'll have a GILLETTE Exhibit at the Convention, and will be looking for **you**.

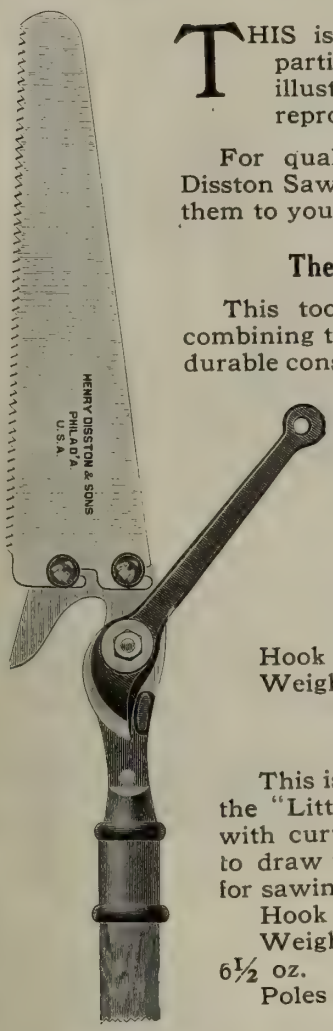
DISSTON PRUNING SAWS



"LITTLE GIANT"

THIS is the season for Pruning Saws, and your particular attention is called to the full line illustrated in our catalog, of which we herewith reproduce a few.

For quality of material, workmanship and efficiency the Disston Saws cannot be equalled. You can fully recommend them to your customers.

The "Little Giant" Pruning Hook and Saw

This tool meets general requirements. The economy of combining two tools in one will be appreciated. Its simple but durable construction and great efficiency have made it the most popular of all our pruning tools---especially for the heavier work.

Both the Knife and Saw are made of our best Crucible Steel. Although possessing great strength, it is light in weight---a feature that makes it desirable where extensive work has to be done.

The Saw Blade, which is attached to the Hook by two clamp-screws, is easily detached when large limbs are not to be sawn. We can furnish this style of Hook without Saw attachment if so desired.

Hook will cut branches ¾ inch in diameter.

Weight of "Little Giant" Pruning Hook and Saw, 2 lbs. 3 oz.

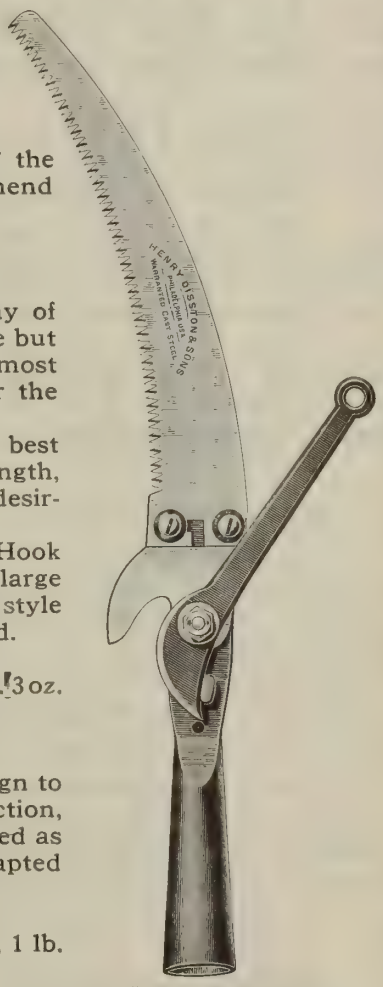
"The Orchard" Pruning Hook and Saw

This is of same quality and somewhat similar in design to the "Little Giant" except that it is of lighter construction, with curved blade having long, slender teeth, so formed as to draw the saw into the wood. It is particularly adapted for sawing of the smaller branches in general pruning.

Hook takes in branch ½ inch in diameter.

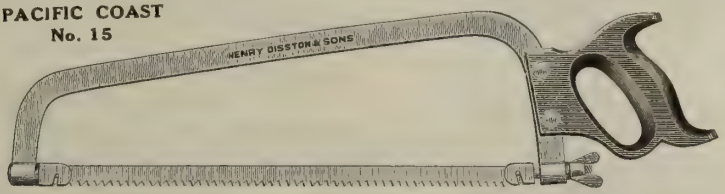
Weight of "The Orchard" Pruning Hook and Saw, 1 lb. 6½ oz.

Poles not included with above pruners.



"THE ORCHARD"

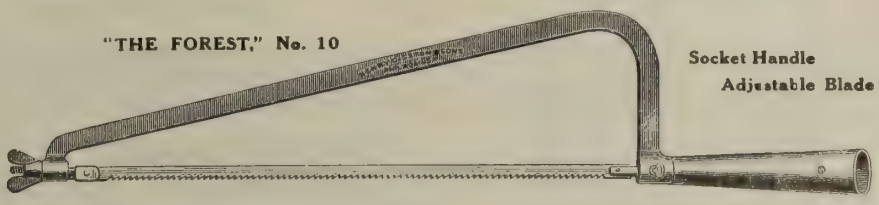
PACIFIC COAST
No. 15



The No. 16 Pruning Saw tapers to a point, otherwise it is similar to No. 15.

"THE FOREST," No. 10

Socket Handle
Adjustable Blade



These three Pruning Saws have Polished Steel Frames, Crucible Steel Blades, Nos. 15 and 16 Hardwood Handles. The blade of each is 14 inches in length centre to centre of holes.

The above are specially desirable Pruning Saws, the shape of Frame permitting their use in narrow spaces.

An Article Imitated is Quality Intimated

and we particularly call the attention of dealers to the attempts to imitate our

Stewart Ball Bearing Clipping Machine

Since Stewart machines were first put on the market a certain English manufacturer has never advanced any new or original feature in clipping machines. He has confined himself to imitating, so far as possible, the new inventions embodied in our product.

The inferior imitations have not found favor at home, and we feel certain the dealers of Canada will neither sanction nor support them.

When you handle Stewart machines you know you have the highest quality clipping machines, and priced fairly—machines that carry our unqualified guarantee that they must satisfy every purchaser or no sale—a policy quite contrary to that of a house whose imitations give continual trouble.

Most jobbers of Canada carry Stewart machines exclusively. Watch for a list of them next week.

Write for 1912 catalogue showing the world's largest and most modern line of clipping and shearing machines.

WHY A TYPEWRITER

Modern business methods insist that all business correspondence shall be typewritten.

Invoices and statements when typewritten secure more attention—prompter payments.

The typewriter saves time and work. Pen work is laborious.

Typewritten personal letters increase business.

MONARCH VISIBLE

WHY THE MONARCH

The full visibility of the work all of the time is an aid to the operator.

The common sense, complete appliances for all classes of work make typewriting easy.

All the very latest improvements.

Splendid durability.

Terms to suit the purchaser.

The MONARCH TYPEWRITER COMPANY, Limited

TRADE MARK

MAGNOLIA ANTIFRICTION METAL

TRADE MARK

METALLIC CONTACT

When a bearing is not lubricated, or the oil film has broken down and the shaft rests directly upon the bearing, they are in metallic contact.

It is a common occurrence for the weight of the shaft to squeeze out the oil film over night, and when the Engine is started up, heating and abrasion take place before the trouble is discovered. An ordinary bearing metal can be used successfully if kept thoroughly lubricated, but as this is difficult, unless the lubrication is forced, it is neither safe nor economical to use such metals. We recently published a letter showing that Magnolia Metal had been running on a motor drive head shaft for sixteen years, and for six years of that period it had not received a drop of lubrication. We also recently published a letter showing 50% saving in oil, because the engineer had been able to use his oil over and over again "until it was all used up" and everybody knows that filtered oils lose their lubricating qualities. We also published test made by the United States Government using **water** as a lubricant.

These letters and test, and many others, of similar character, go to show that Magnolia is largely independent of lubrication, and therefore is not liable to injury from scant or inferior lubrication and stands up where other bearing metals go down. The use of Magnolia will end your bearing troubles.

SPECIAL OFFER

PRACTICAL ENGINEER POCKET BOOK, 680 pages, over 2000 subjects. Price 40c. post paid. We do not aim to make a profit on these books. We buy them in large quantities as an advertising medium and give Engineers benefit of low price. They are highly spoken of by Engineers. Address Montreal office.

Convention Arrangements Completed

Details Which Should be Noted by All Who Intend to Take in the Convention at Guelph—A List of the Exhibitors—Committees Appointed to Take Charge of Each Phase of the Work.

Everything is in readiness for the Seventh Annual Convention of the Ontario Retail Hardware and Stove Dealers' Association, which opens at Guelph on Monday, February 19, continues until Friday. Monday will be devoted to executive meetings and to the work of getting the exhibits in shape. The first session of the convention proper will take place on Tuesday afternoon.

The programme of the convention has been arranged as follows:

Tuesday afternoon, at 2.30—opening session.

Tuesday night—Smoker and concert in the City Hall.

Wednesday afternoon — Convention session and open discussion on "Retail Salesmanship," in which manufacturers, jobbers and travelers will join.

Wednesday night — Question Box Session.

Thursday afternoon—Business session with election of officers and consideration of reports.

Thursday night — Progressive euchre party, with one hundred tables and one hundred prizes.

Tuesday, Wednesday, Thursday and Friday mornings the exhibition will be open to the hardwaremen only. The hall will be thrown open to the public on Wednesday night and Thursday afternoon.

A Civic Luncheon.

It has been intimated that the city of Guelph will take some steps to entertain the visitors. Although nothing definite has been heard, it will probably take the form of a civic luncheon. The arrangements for the same are in the hands of Mayor Thorp.

The Smoker.

The smoker on Tuesday night will be in charge of a committee consisting of J. S. Weichel, Elmira; W. J. Carter, Picton; Geo. Ecclestone, Bracebridge; A. Gingerich, Woodstock; and D. B. Westwood, Toronto.

The planning of the programme has been left in their hands. It is intended to make the smoker an informal affair, so that the members will have a chance to get acquainted with one another.

"At Home" Committee.

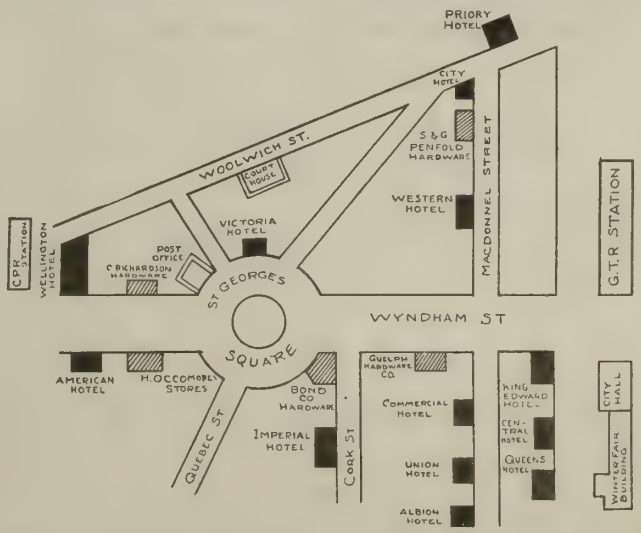
The committee in charge of arrangements for the progressive euchre party on Thursday night is headed by T. A. Keatinge, of the Bond Hardware Co., associated with him are E. Brockelbank, Arthur; W. J. Bell, Beeton; W. T. Earle, Oneida Community, Niagara Falls; Geo. M. Allan, Carborundum Co., Niagara Falls; J. S. Conover, Martin-Senour Co., Toronto; Hub Penfold, Guelph.

The Open Meeting.

A committee has been appointed to arrange for the open discussion on Wednesday afternoon on "Retail Salesmanship." A. A. Bittues, Gillette Safety Razor Co., is chairman and associated with him are T. Wright, H. S. Howland, Sons & Co.; E. Holt Gurney, Gurney Foundry Co.; C. F. Smallpiece, Taylor-Forbes Co.; Milton Bergey, Lowe Bros.

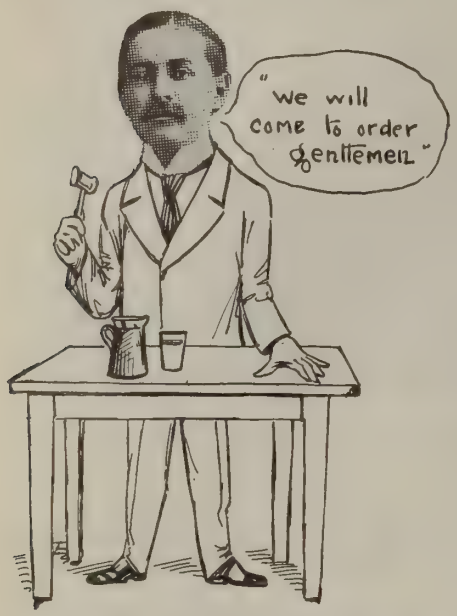
Could Not Come.

It is not yet certain what will be done in the matter of a window dressing feature. The contest inaugurated at Peterboro was found impracticable this year and an effort was made to secure W. J.



Plan of Business Section of Guelph, Which will be of Assistance to Visitors.

A Few of the Men You Will Meet at the Guelph Convention



President Chown will Preside over the Meetings and can be Depended upon to Keep Things Moving.

If There Isn't Hard Ice at Guelph, D. A. Macnab will be Disappointed. He's a Devotee of the Roarin' Game.

J. W. Peaccok Audits the Books of the Association.

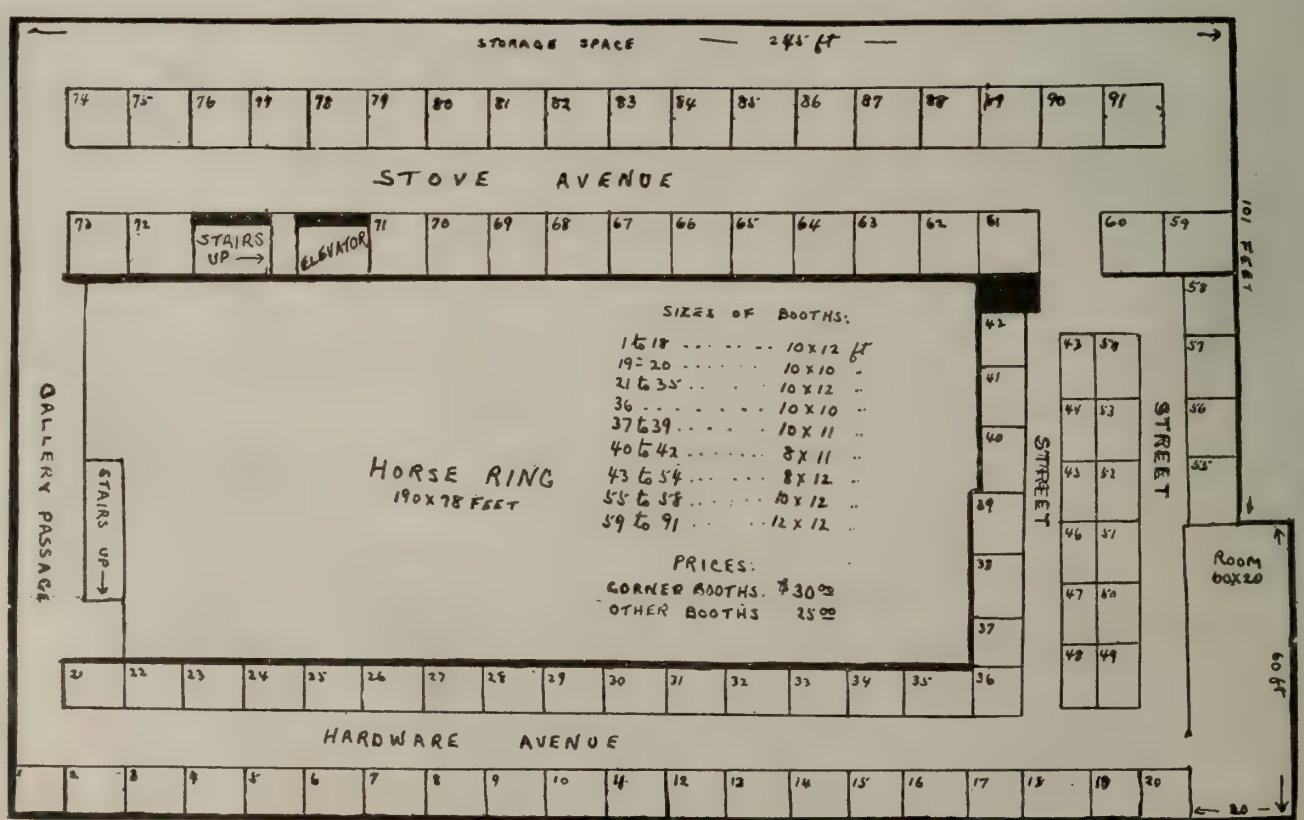
Illsey, of Winnipeg, to give a series of demonstrations on window display work. Mr. Illsey has been unable to accept the invitation.

A committee has been appointed to confer with Mr. Black of the Bond Hardware Co., Guelph, and make, if possible, arrangements for some window displays or demonstrations. The committee consists of Messrs. Whitton, of Bracebridge; Flintcroft, of Stanley Mills & Co., Hamilton, and Geo. Mathewson, of Toronto.

The Question Box.

The Question Box section will again be a feature of the convention. A committee has been placed in charge of this work with Ed. Wanless, of Chatham, in charge. Associated with him will be Wm. Magladery, of New Liskeard, F. E. Hendershott, Mount Forest, D. Chalmers, Palmerston; J. W. Zavitz, Wallaceburg; James Macgregor, Caledonia, and A. R. Dundas, Cobourg.

Mr. Wanless will act as chairman. He is a progressive hardwareman and can



Plan of Manufacturers' Exhibit, Showing the Spaces Alloted.

Portraits From the Gallery of Hardware Notables

Harry Occomore will be there with the Glad Hand.

John Caslor Guarding the Association Gold—Members with Fees to Pay may not Recognize the Worthy Treasurer now that He has Shaved off His Moustache.

Would a Hardware Convention be Complete Without Fred C. Lariviere? We Trow Not.

be relied upon to keep the discussions going.

Parcel Post Discussion.

It is anticipated that the most important phase of the proceedings will be the discussion on "Parcels Post." The debate may be enlivened by the presence of a number of the hardwaremen who have been elected to seats in the House of Commons and Ontario legislature. Invitations have been extended to all and replies have been received from practically all stating that they would like to attend and would undoubtedly make an effort to be on hand. No definite assurance has been received in any case, however.

The presence of Hon. Frank Cochrane and Hon. Mr. Kemp, members of the Canadian government was particularly desired. It is not likely that Hon. Mr. Cochrane will be able to get away on account of his heavy departmental duties. It is hoped, however, that Hon. Mr. Kemp will find it possible to attend for a day. Others who may be on hand are Mr. Weichel, member for Waterloo, Mr. Blain, of Peel, and Mr. Marshall, of Monck, Provincial House.

The question of hotel accommodation will not prove as difficult as it was at first feared it might. There are thirteen hotels in the city with accommodation for as many as five hundred people. The Wellington and King Edward charge from $2 to $2.50 per day and the rate is $1.50 in the following houses: Commercial, Victoria, Priory, City, Queen's, Central, Union, Albion, American, Western, Imperial.

The Railroad Rate.

All railroads have granted a single fare rate on the convention certificate plan from points as far west as Fort William and all eastern Ontario, Quebec and the Maritime provinces. Tickets will be good going from February 15 to 21 and returning up to February 27 inclusive.

A point to be borne in mind is that a certificate should be obtained on buying the ticket.

The Manufacturers' Exhibit

The spaces in the manufacturers' exhibit have been pretty well taken up.

The exhibitors are as follows:—

1-4—Taylor-Forbes Co., Guelph.
5—F. W. Bird & Son, Hamilton.
6—Ohio Varnish Co., Cleveland.
7—Dominion Register Co., Toronto.
8—J. Wiss & Son, Newark, N.J.

90—McClary Manufacturing Co., London.

A separate room has been also thrown into exhibit spaces and the firms showing are the Walker Bin and Store Fixture Co., Berlin; Ontario Desk and Supply Co., Elmira; National Cash Register Co., Monarch Typewriter Co.

There is also a Galt section made up of the following firms:

Shurly-Dietrich Co.
Allan Hills Edge Tool Co.
Canadian Brass Co.
Potato Machinery Co.
Galt Robe Co.
Goldie and McCulloch.
Galt Art Metal Co.
Kaiting Washing Machine Co.

Arrangements Completed in Guelph

By H. Occomore, 2nd Vice-president.

GUELPH, Feb. 12.—At time of writing, one week before the opening of the convention, arrangements have been pretty well perfected. The Winter Fair building is beginning to take on a different look. The carpenters are busy erecting the booths and the work of decoration has already been commenced. It is expected that everything will be in A1 shape by Friday of this week. Heat will be in the building by that time and everything will be ready for the exhibitors to go in. It is hoped to have all the exhibits complete by Monday night.

The Housing Problem.

The city will be found quite capable of looking after all the visitors during exhibition week. We have become accustomed to the task of housing large crowds here in Guelph. Every year during Winter Fair, thousands are accommodated and we have reduced things pretty well to a science.

The hotels will handle a large proportion of the visitors. Those who cannot get rooms there will be accommodated in private homes. A billeting bureau will be established in the city hall, probably, in charge of Industrial Commissioner Macdonald. He will have a list of fifty or more houses where it will be possible to secure rooms. Visitors applying there will be promptly attended to and will be escorted to their quarters by messengers provided by the city. The hardwaremen need not fear that they will have any difficulty in getting their meals. We have fed as many as four thousand hungry farmers in a day.

Reception Committee.

A strong reception committee has been appointed as follows: J. R. Hambly, Barrie, (chairman); D. Brocklebank, Arthur; D. Cinnamon, Lindsay; W. J. Scott, Toronto; F. C. Lariviere, Montreal; Mayor Thorp, Guelph; Ald. Carter and Occomore, J. M. Taylor, of the Taylor-Forbes Co.; James Millar, of the Bond Hardware Co. In addition, Mayor Thorp has been asked to add the names of any other civic officials who can meet the trains and in any way assist the visitors in getting to their hotels.

The officers of the other retail and jobbers' associations will be honorary guests.

An address of welcome will be delivered at the opening session by Mayor Thorp on behalf of the city.

In conclusion, it may be said that, as far as the exhibition and the social side of the convention are concerned, the success of the event is assured. But the other half—the convention proper—which, by the way, is the more important—will depend very largely on the members themselves. It will be absolutely necessary for the members to come prepared to take a deep interest.

Work of The Past Year: Some Questions Now Pending.

The Parcels Post Problem Has Been Given Consideration by the Officers—an Effort Made to Effect Amendment to Weights and Measures Act—Some Presidential Advice.

By R. C. Chown, President.

The past year has been a most prosperous one. I trust that my fellow hardwaremen have shared liberally in the prosperity that has been so noticeably in evidence.

The selling of hardware, with the many kindred lines which have been added from time to time, is not what it was twenty-five or thirty years ago. In former years we had little other than local competition to contend with and could get along with short lines; whereas to-day, we encounter such heavy and often unfair competition that, to carry on business with success, requires the exercise of all the shrewdness and resource that we can summon to our aid. It necessitates adding to our stock every other line consistent with good conservative merchandising. Many profitable lines have come to the front of late years, which many hardwaremen have, unfortunately, failed to recognize or stock. Their obtuseness leads to the abandonment of these lines to outside competition or to such as carry the goods.

Don't get into a rut and permit your competitors to prescribe your prices and methods of doing business. Specialize; be original Give your business an intense individuality which will attract attention as surely and as successfully as extensive advertising. May the suggestion be advanced that membership in the O.R.H. & S.D.A. will help toward the accomplishment of this end? You can learn at convention much about the new goods on the market and their selling points.

The object of all association work is to prove of constructive, protective and educative good to the members. It is constructive in securing beneficial legislation. It is protective in defeating adverse legislation, which would seriously handicap the membership. It is educational in the fact that it brings men together for the exchange of new ideas and the discussion of new methods.

Trade associations are organizations of business men, banded together, not in restraint of trade, but rather to stimulate and better trade relations. We might possibly be termed the mediators between the farmer, the manufacturer and the jobber. We are the timekeepers of material progress.

Our associate members, the commercial travelers, have been of great assist-

President. R. C. Chown.

ance to us in building up our membership.

Parcels Post Problem.

One of the most important questions before the executive this year, and still before us, for that matter, is the parcels post problem.

We feel that should legislation ever be passed making parcels post operative in Canada, it would prove the ruination of the country store-keeper and the retail merchant in all lines. It behooves us, therefore, to plan some definite action to fight the proposition. We should begin at once by writing the members of Parliament and the Senate, expressing our stern opposition and asking their support.

We have been in communication with a number of our representatives, and are pleased to report that they have pledged their support to our cause. One of our members in the House of Commons has suggested that we ask the Government to take over the express companies, the idea being that this would remove any necessity for the establishment of a parcels post.

Fighting for Amendment.

We have also been fighting to secure an amendment to the Weights and Measures Act, whereby the charge of re-inspection of scales and measures will be borne by the public, instead of the individual. At present, the Government inspector makes a town every two years, inspects all scales and charges the same up to the dealer. It is as much in the interests of the consumer as the dealers to have these weights and measures right, and we are of the opinion that the Government should stand the expense.

Both of these questions should be threshed out on the floor of the convention. They are of vital importance, and we should voice our opinions openly and forcibly.

Just a word as to the manufacturers' exhibit. It will pay our members to look over these exhibits carefully and learn all they can about the goods which are on display. This will enable them to more intelligently pass on the ideas thus obtained to the consumer. The ability to explain the use of an article is one of the strongest factors in salesmanship.

The one important feature at the convention, above all others, is the Question Box. Its purpose is to assist the individual retailer to conduct a better business, to make a better profit and, incidentally, become bigger men. Here we have men in the same line, with the same or very similar problems, with the same or similar experiences, the same

A Parcels Post Juggernaut.—From the Montgomery (Ala.) Advertiser.

customers, similar places of business, meeting together on a common ground for the good of all and the individual good of each. The recital of experiences, problems, plans and ideas of our fellow merchants has given some of us many valuable pointers. We can get ideas to improve our store service, which enable us to look after the many details which arise with comparative ease.

What Lies In the Future? Some Points to be Considered.

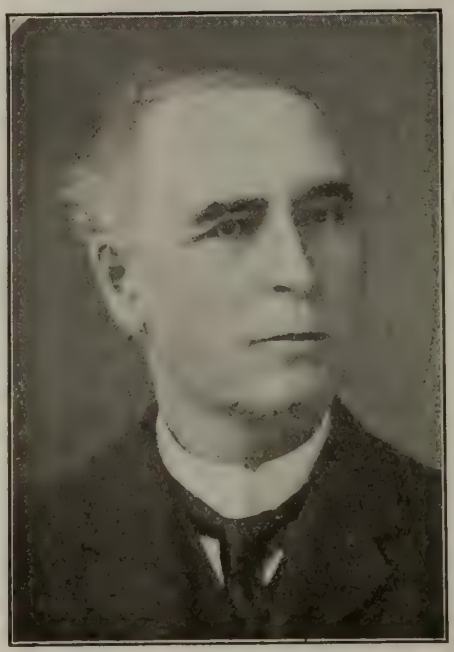
Officer Urges That the Members Must Take a More Practical Interest in the Work—More Discussion in Meetings is Needed—Suggested that Committee be Appointed to go Into Question of Place of Meeting.

By M. S. Madole, First Vice-President.

Before attempting to analyze what lies in the future for the Association, it would be well to cast a retrospective glance over what has been done in the past. When we review the work of the Association, its teachings and its workings, it becomes apparent that good has been accomplished. The members, however, have not put themselves to work and got the very best out of it that it would seem possible to obtain. Still, interest has been growing. If we review the several conventions that have been held, we realize that there has been an advance shown in respect to the interest taken. For instance, the last convention at Peterboro showed a marked advance over the preceding one in regard to the manufacturers' exhibit. The display made by the manufacturers and wholesalers was as fine a collection as anyone might desir and it was generally conceded that, as an education to the retail dealer, it stood without a rival at any of the national exhibitions.

Now as to the future of the Association, it appears to the writer that if success is to be won the members must take a "practical" interest. They must endeavor to secure information at the conventions which they can use in their business afterward and to make these yearly gatherings a clearing house of ideas. Mutual assistance is the real object of such gatherings. The members will not continue to take an interest in the work of the Association unless they find that they have reaped real tangible benefits from their connection with that body.

In my opinion there has not been enough interest taken in the business sessions of the Association. What the writer would like to see would be the meetings opened on time with full attendances. Interest should be taken at every step and the resolutions should be discussed freely and at length. It is in this way only that we can get the fullest good. It is by debating questions affecting the hardwareman from a financial basis that the members can learn and benefit by the experience of others, applying what they have heard later in the management of their own concerns. I would like to see the sessions in future characterized by full discussions of every point that arises which may be in any respect contentious. The members should not be afraid



First Vice-President Madole.

"to speak out in meeting." I would like to see each member come to the convention ready to take part in the discussions and prepared with suggestions. That is the proper spirit. May we all catch it in the future.

Keep Interest Up.

In dealing with the future, I also would like to suggest that the interest of the members should not be centred exclusively in the convention. After the big yearly event is over, we should not forget all about the Association until the next year. Association work should be kept up the whole year around. Questions affecting the trade should not be left over until convention. They should be dealt with, as far as possible, when they arise. The Association should be recognized as a "force" in dealing with questions which threaten to adversely affect the trade. We should endeavor in the future to maintain the interest of the members from convention to convention without permitting it to lag in any respect.

The Place of Meeting.

Another consideration looms large in speaking of the future. Where should the conventions be held? This is a matter of paramount importance. It is frequently said that our members do not care to attend when they have to travel too long a distance. In fact, this has been shown and the more central the place—for all concerned—the more successful the Association will be. When the convention is held in the West, our Eastern members do not enthuse. We can hardly afford to have more than one convention for all Ontario, so we must consider our members in New Ontario, and in the northern and eastern sections of the province. This question should be taken up at the convention in Guelph.

In this connection I have a suggestion to make. Would it not be a good idea to appoint a committee say of three or five, giving each part of the province due representation, to take up this matter thoroughly? The committee could go into the question of distances and endeavor to devise some means of meeting the difficulty and finding some way to prevent the hardships frequently entailed on members living in certain sections. The members in the districts I have indicated are enthusiastic and should be encouraged in every possible manner.

Finally, permit me to say that the officers of the Association hope that every hardwareman in Ontario will show personal interest in the work by attending the convention at Guelph. We trust that the attendance will be large and that the whole convention will be a success. All indications point that way. The Exhibition promises to surpass that of last year, both as to number of exhibits and quality.

Not only come yourself but see that your neighbor comes. When you do come, be prepared to take part in the discussions. I cannot forbear from urging this point again, so important is it, in my mind.

Come prepared to reap practical benefits and to help benefit others.

Convention Notes.

An invitation to attend has been extended to Col. J. B. MacLean, publisher of Hardware and Metal, who was made a life member at last year's convention.

Would it not be a good idea to have a register so that all members could sign? The lack of this has been felt at conventions in the past.

J. M. Taylor, of the Taylor-Forbes Co., cannot be present in the city during convention week and will, therefore, not be able to act on the reception committee.

Guelph : Its People, Profits and Prospects

A Few Remarks Which go to Explain Why the Tax-gatherer May Some Day be Abolished in Guelph—Public Ownership, a Success There, the Authorities Having Developed the Midas Touch—Something About the People.

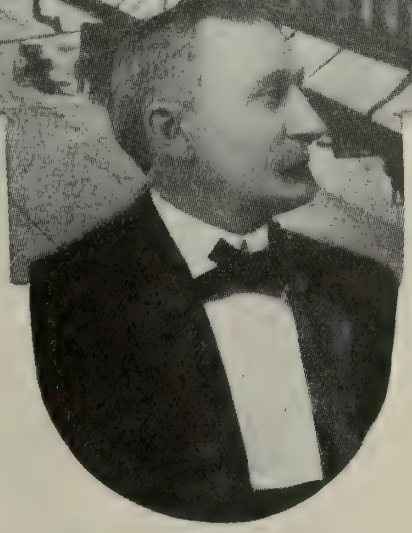
The Main Business Street of Guelph and St. George's Square, Hub of the Municipal Street Car Service.

Guelph is an interesting city to visit at any time, even when it lacks the attraction of a hardware convention.

It is pretty, quaint and solid. The first impression that strikes you on dropping off your train is the stability of the store buildings on every side. They appear to have stood there for half a century or more. Most of them have. They seldom have fires in the Royal City, and until a few years ago, an amateur fire brigade was all the city could boast. Just here it might be mentioned that they still have only four policemen in this city of orderly, law-abiding Scotchmen.

It is just possible that they may awaken during the hardware convention to the fact that their police force is uncommon small. But this is a digression.

The outstanding feature about Guelph is the fact that its citizens are ardent



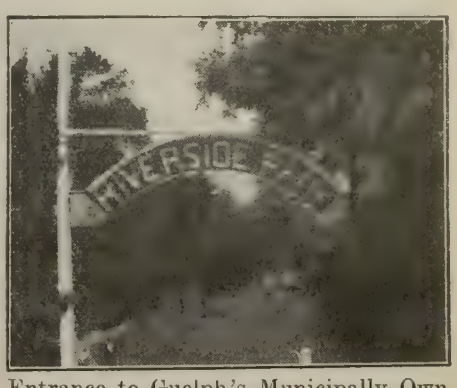
Mayor Thorp of Guelph.

advocates of public ownership. There are some dissenters, but they constitute an insignificant minority. This is accounted for by the fact that Guelph owns about everything in the way of public utilities that it can lay its hands on and is making money on them all. Guelph has found what alchemists of old sought in vain—the Philosopher's stone. Everything the city touches turns, literally speaking, into gold. The men who direct these utilities seem to have acquired the Midas touch.

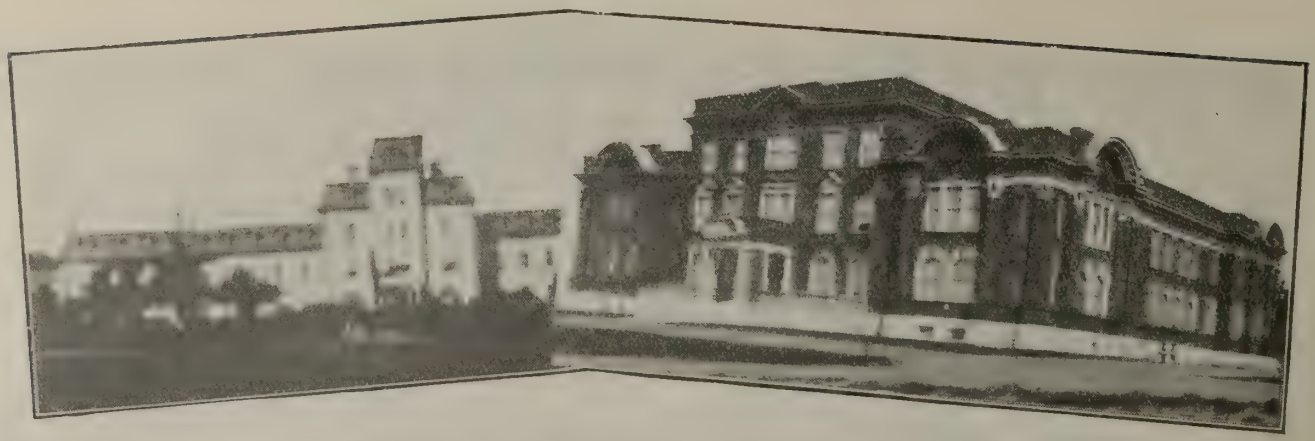
Guelph owns her street railway system, electric light and gas plant, waterworks system, a sixteen-mile stretch of rail called the Guelph Junction Ry., which links up the G. & G. with the C.P.R., several pleasure parks and a municipal skating rink. Everything is on a strictly paying basis. The receipts have enabled Guelph to keep the civic tax rate lower than that of other cities; in fact, the rate was put down to fourteen mills a couple of years ago and it was freely predicted then that if the civic administrators, like the wheels of the gods, ground "exceeding small," it would be possible to keep on reducing the rate. It transpired, however, that the desire to run had come before the power to walk. The rate had been reduced too low and the following year a higher figure was fixed. The setback was purely temporary, however.

There are many who believe that the future will see the profits on the various public utilities grow to such an extent that the revenue will counterbalance the expense of municipal management; in other words, that the time will come when the worthy citizens will not have to foot tax bills. They are weaving dreams of the day "when tax gatherers cease from troubling," of an Utopian era in the not far distant future when the chronic kicker and civic iconoclast

County Court House and Gaol.



Entrance to Guelph's Municipally Owned and Operated Pleasure Park.



Guelph is an Educational Centre—To the Left is seen the Main Building of the Agricultural College—To the Right Macdonald Institute.

will have to find some other vent for their spleen than the civic tax rate.

This may or may not come to pass. We are not convinced that it would be entirely a good thing for taxes to be removed, pleasant though that prospect may seem. Everybody would be moving to Guelph for one thing. It must be admitted, however, that the future holds out a rosy promise for the citizens of the Royal City. It is not mere extravagant optimism bred of temporary success, that impels Guelphites to look forward to a gradual improvement of their financial status; they have the figures to prove it.

The Guelph Junction Railway.

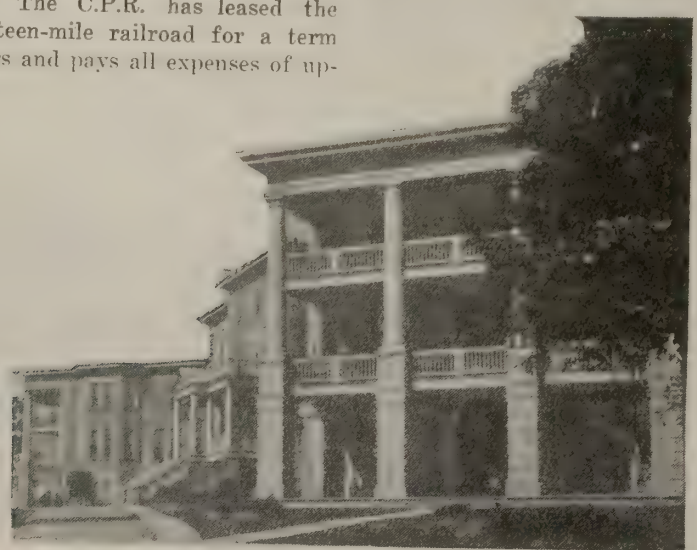
In the first place, look at the asset the city has in the Guelph Junction Railway. Sixteen miles of road connecting the C.P.R. with the Guelph and Goderich, a recent addition to the C.P.R. network of lines. Goderich is the terminus of the G. & G. and the point which connects rail and water on the most direct route for the shipment of wheat from the North-west. Every car of wheat shipped that way must pass over the Guelph Junction. The C.P.R. has leased the city's sixteen-mile railroad for a term of 99 years and pays all expenses of upkeep, the city getting 40 per cent. of the gross revenue. After the interest on the original investment is accounted for, the city has a tolerably comfortable margin of profit—and the margin is getting bigger every year.

The Church of Our Lady, Guelph.

Then there is the street railway. It began as a private enterprise, but seemed doomed to failure from the very start. The owner—a public-spirited citizen—sank a fortune in the road before the city took it over and established a board of commissioners to look after it. The road looked like a colossal white elephant. For some time it did not pay but the commissioners had the satisfaction of reducing the losses each year. About four years ago they were able to triumphantly demonstrate that receipts had pulled ahead of expenses and from that time on the yearly balance has gradually increased. It will soon be paying a neat profit.

The commissioners have built a pleasure park at one end of the line to coax traffic, in summer, and a skating rink at the other end to perform a like service in winter. One of their latest moves is the building of a line through a new industrial section and they have beaten Toronto to the pay-as-you-enter system.

The Light and Heat Commissioners and the Waterworks board report surpluses with pleasing regularity, but the benefit will be reaped by the users. If the profits increase, the light and water rates will probably be put down, not the tax rate.



A View of the Homewood Sanitarium, Guelph.

Something About the City.

But enough of this theme. Guelph has other interesting features to present. It

The Historic Priory Building, First House Erected in Guelph, and for Years Used as Station for Guelph's Municipally Owned Railroad.

is a city of ups and downs. If you are not toiling up hill, you are certain to be moiling down. On the brow of one of the steepest hills is the Church of Our Lady, one of the most handsome edifices in Western Ontario. Just outside the city on top of another hill is the Agricultural College and Macdonald Hall. The Homewood Sanitarium is reached by climbing a third hill situated at the other extreme. That is a characteristic of Guelph; you have to climb a hill in order to reach anything interesting. But it is always worth while when you get there.

The Agricultural College and Model Farm are well worth a visit. If one has failed to realize the fact that farming is a science, which can be governed by rules and formulas just as much as mathematics, a visit to these institutions of learning will prove absolutely convincing. No hardwareman should neglect, by the way, to visit the Agricultural College.

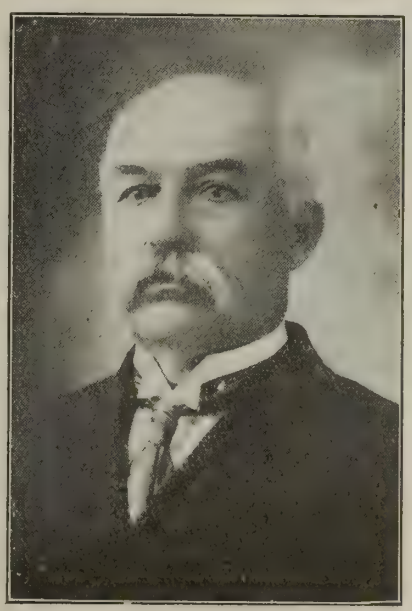
It may not be too late to give a little past history. Guelph was founded by John Galt and the old Priory building still stands on the spot where the first tree was felled. The Priory was the first house built in Guelph and is a typical relic of pioneer architecture—a picturesque pile of rudely-hewn logs. For years the old building was used as the C.P.R. station, but this perversion of so historic a spot for commercial purposes came to an end when the new station was built some distance away. They have erected stock-pens around the Priory now.

Guelph Hardwaremen.

Guelph hardware stores are all worth a visit. That of the Bond Hardware Co. is one of the finest in Western Ontario and visitors will be able to learn much from a study of the interior arrangement. The linoleum department will prove a novelty to many hardwaremen. S. & G. Penfold have an extensive implement business and the stores of the Guelph Hardware Co. and Geo. Richardson present interesting features. Harry Occomore and McCormick and Robinson have creditable stove stores.

The hardwaremen of Guelph are progressive in their business methods and many of them take an active interest in municipal affairs.

Harry Occomore prefixes "Ald." to his name now. He is, in addition, a past president of the Retail Merchants' Association.



Industrial Commissioner Macdonald of Guelph, Who has Solved the Accommodation Problem.

Sam Penfold is also an alderman. Geo. Penfold has served many terms on the council board.

Geo. Richardson is a member of the Board of Trade and a prominent worker in St. James Church.

T. A. Keatinge and Jas. Millar, of the Bond Hardware Co. are well-known citizens, the latter being active in musical circles. W. Howell, retail manager of the Bond Co., is one of the city's best soloists.

MUTUAL FIRE INSURANCE.

The question of mutual fire insurance will come up at the convention. The committee delegated to carry on that work will report that they did not find the interest taken sufficient to warrant them in launching this much-discussed project. Instead, an advisory committee on fire insurance was appointed.

It is not known whether any effort will be made next week to arouse the interest of the delegates to the point where active support will be promised. In the opinion of many of the members, a final effort should be made. They feel that the matter is one of such vital importance that it should not be allowed to elapse. An interesting debate on this point is promised.

It would be wise for all hardwaremen who are intending to be present, to go into this question fully within the next day or so. If they were to consider how they stand in the matter of insurance and figure out just how a mutual system would affect them, they would go to the convention in a better mood to discuss the question. It would be possible then to get "down to brass tacks."

The question is undoubtedly one in which all hardwaremen take a big interest. It is of vital importance in the retail business. It is evident, however, that the majority of the members of the association have failed to show the proper interest, or Chairman Brocklebank and his committee would have been enabled to get down to a definite basis by this time.

TO RESTRICT SALES.

Regina, Feb. 10.—The provincial government of Saskatchewan are following the lead of the Ontario government in drafting legislation to govern the sale of offensive weapons.

The new act was introduced recently and is attracting considerable attention. It provides that no person under the age of eighteen years may purchase a revolver and further that all purchasers must first obtain a recommendation from a commissioner or superintendent of mounted police or from the chief constable of city or town. The latter clause is similar to that now in force in Ontario.

The proposed legislation is creating much discussion among the trade in this province.

THE ONTARIO CONVENTION.

In this issue, Hardware and Metal has devoted a great amount of space to the seventh annual convention of the Ontario Retail Hardware and Stove Dealers' Association, to he held next week at Guelph. The signed articles by the president and the two vice-presidents of the association will be perused with considerable interest. These gentlemen have given good advice which members of the association would do well to heed.

Mr. Madole puts emphasis on the fact that conventions in the past have been lacking in the spirit which he believes should be thrown into the business sessions. He urges that, if permanent success is to be achieved, the members should manifest a more practical and tangible interest in the discussions. He would like to see the discussions more general and informal, believing that in this way more useful informotion can be elicited for the benefit of the individual members. The point is a good one and has been frequently urged by Hardware and Metal in the past. A freer and more general discussion on all points which come up at Guelph will serve to give the convention a deeper and more practical interest.

Mr. Occomore takes up somewhat the same point, urging that the rank and file of the members take a more active part and thereby assist the officers.

President Chown deals with the importance of the Question Box session, which he rightfully designates as the one feature above all others which has a practical interest. Hardware and Metal has always urged that full prominence should be given to this department and, therefore, most heartily endorses what the president has to say on that score. The success of the Question Box will depend to a great extent on the interest that the individual members show. Each member should submit questions, picking out those on which he most desires information. Also the members should not be afraid to speak out when they feel that they have something to say which will help to make clear the point under discussion. Another point which the committee in charge should bear in mind is that a limit should be set on all speeches and that no question should be debated longer than a certain time. The long-winded member is likely to prove more of a drag than the mute one. To make the debates sharp, pointed and business-like and to carry the discussion over a wide range of subjects, sums up the policy which will make the Question Box session a thorough success.

A number of questions of vital importance will be before the convention. The most vital will be that of Parcels Post. The necessity for decided action is recognized by all hardwaremen and it is practically assured that a firm stand will be taken on that question.

THE DANGER AND THE REMEDY.

Merchants are beginning to waken up to the fact that their future is being menaced by the parcels post agitation. They begin to realize that the danger is tangible and immediate. It is no mere chimera, a possible development in the distant future. On the contrary, it may make itself felt at any moment.

That members of the mercantile class are aware of the imminence of the danger is evidenced by letters received from various sections and the uneasy comments heard on all sides. It has been not evidenced so far by the taking of any definite steps to block the movement, however. This laxity is to be regretted. The danger is sufficiently great to warrant the voicing of an emphatic protest. Coming from so influential a class, the objections would carry due weight.

A retail dealer in a small western town writes to the MacLean Publishing Co. as follows:

"We see by the daily papers that a movement is on foot in Parliament to amend the laws re weight and cost of parcel post, making it immensely in favor of the mail order houses. . . . We trust you will use you great influence in your several papers to block the scheme and confer a lasting boon on the many thousand merchants throughout Canada."

The retail merchants can rest assured that everything an influential trade newspaper can do will be done by Hardware and Metal and the other MacLean papers. At the same time, it must be borne in mind that prompt individual action on the part of the merchants themselves would suffice to nip the movement in the bud. If every retail dealer were to write his own representative in the Commons, nothing further would be heard of parcels post.

THE VALUE OF THE PAST.

Many arise to extol the virtues of the man who can mind his own business; yet to-day it is the man who can mind another man's business in so far as it is connected with his own—who is making the greatest success.

Recently a traveller for an English firm called upon a Montreal paint manufacturer. He wanted to get an order for whiting, but the paint man put him off. "It is too early yet," he said. "But," remarked the traveler, "you had trouble last year getting your whiting over on the first boat." "That's so," agreed the manufacturer. "I had better book in time this season. Send me fifty tons."

The whiting traveler got his order because he knew the other man's business. He brought up afresh an old grievance.

Similar things are occurring daily. Travelers are regularly reminding their customers that they had to wait for certain goods last year, because they had not booked their orders in time. They are anxious that such things should not occur again, for they are a source of annoyance to all.

But there are dealers who do not see travelers at regular intervals. They must remember their own troubles for themselves, as in this way only can they

guard against their recurrance. It might be a good thing for hardwaremen to note down the time at which all classes of goods are ordered, and if they come on time. Delays mean loss. To guard agains them it is worth the dealers' while to study the year before carefully, just as it is worth the travelers while to study the recent history of his customers. Yesterday is gone, it is true—but the remembrance of yesterday has a real value.

TINPLATE CONSUMPTION GROWING.

The world's industrial development is strikingly evidenced in the growth of tinplate consumption. It is a significant fact that Welsh tinplate exports during 1911 showed a large increase despite the fact that the principal market, America, has been practically lost. Owing to the rapid building up of the home industry, the importation of Welsh tinplates into the United States is now almost at a standstill. Furthermore, the Americans are beginning to invade other markets and have despoiled the Welsh trade of a large part of the Canadian demand. One would think that the loss of their best customer and a very heavy falling off in shipments to the fifth best customer, Canada, would have seriously affected the Welsh tinplate trade. On the contrary, the Welsh exports during 1911 broke all previous records. This constitutes a most significant evidence of the recuperative power of the trade, and also of the vast growth in the consumption.

It is quite apparent that this growth is of a permanent nature. The world is ever finding new uses for tinplate. The tendency to sell all kinds of commodities in tin receptacles is responsible largely for this state of affairs. As public favor has been inclined to this method of merchandizing goods, the demand for tinplates is pretty certain to keep on growing with accelerated rapidity.

THE TRADE'S APPRECIATION.

The real value of a publication can best be appraised by its regular readers.

On another page in this issue a number of opinions from readers of Hardware and Metal are reproduced. They represent a fraction only of the unsolicited testimonials which have been received at this office during the past few months. It is significant of the hold that Hardware and Metal has on the hardware trade in all parts of the country that, when a subscriber writes in to renew, he most frequently feels impelled to express his appreciation of the paper. Many of our subscribers have been reading Hardware and Metal week in and week out for a score or more of years. It is an old friend and counsellor to them. Within the last two weeks, a note was received from a prominent manufacturer stating that he had been reading the paper from its first issue.

Among the testimonials which we have published is one from a prosperous Ontario hardware dealer who declares that the market reports alone have always been worth five times the subscription price to him. Another states that he knows of no way of investing his money better than to subscribe to Hardware and Metal for his clerks. We have quoted but two instances; the others are equally enthusiastic and cordial in their expressions of regard for the paper they have read and profitted by from the time that they started in business, in most instances.

Another significant feature is the fact that these testimonials came from all parts of Canada. As many have been received from the far West as from Ontario, demonstrating effectually the truth that Hardware and Metal covers the Canadian field from coast to coast.

POINTED EDITORIALS.

Contestants in our Christmas window contest need not despair. The results will be announced shortly.

* * *

The name "Winter Fair Building" has a foreboding sound. But don't worry. It is steam heated and will be found comfortable.

* * *

Carry a copy of Hardware and Metal in your pocket on the way to Guelph so that fellow-hardwaremen will recognize you.

* * *

Conservationwill soon be a crying need in the tin industry. The consumption is growing out of proportion to the visible supply.

* * *

The address by E. F. B. Johnston of Toronto defines with legal conciseness the status under the law of trade associations to-day. It is well worth reading.

* * *

It will be quite an innovation to see locks, bolts and stoves displayed in the haunts heretofore sacred to the placid shorthorn and the noisome rooster.

* * *

If all retailers were as successful in keeping down overhead expenses as the city of Guelph, merchandising would consist for the most part of pleasure and profits.

* * *

The merchant who loses his temper, loses several things at the same time.—The immediate sale, the goodwill of the customer and the future business of that customer and his friends. And he gains nothing.

* * *

Nothing is sure but death and taxes. In Guelph they are cutting the last part off the old proverb and concede infallible regularity to the Grim Reaper only. They are working to put the tax gatherer on the retired list.

* * *

The first article in the new tinshop series appears in this issue. Follow the series closely. We feel confident in stating that it is the most complete of its kind yet published.

* * *

We refer readers to a cartoon appearing in this issue, depicting Parcels Post as a huge Juggernaut car. It will be much easier to prevent that car from starting than to stop it when it has once started.

* * *

All readers who have been following the Carson articles—and who have not?—have been struck with the immediate success of the dealer who began business on a proper basis. The rapid relegation of the second dealer, who started operations on the promiscuous credit basis, to the financial discard carries with it a moral which none can avoid.

* * *

An Eastern Ontario hardwareman has no name over his door, and no display in his windows to give a clue to the business done inside. This retiring way of doing business may be all right for such a well-known and exclusive house as Tiffany of New York, but it is not likely to secure for this town dealer what new business is coming to the place.

Complete Course in Sheet Metal Work

Number 1.

It is not our purpose to teach you a lot of arithmetic, algebra, history of architecture, etc., etc. What we aim to do is to teach you how to draw patterns for anything made in sheet metal, how to construct work by the best methods known to the trade, and how to erect metal ceilings, roofings, etc.

The ability to read and write, understand simple arithmetic, a willingness to work, and some perseverance are all the stock in trade you need. We will furnish the rest.

Before beginning to draw, you must, of course, have some drawing instruments. These can be of the cheapest, and are fully described and illustrated in the first part of the course.

Your first drawing begins with fig. 13. From this up to fig. 23 are simple exercises to bring into play the different tools.

The first thing necessary in pattern drafting is, of course, a drawing outfit. When the student has mastered the details and principles of pattern drawing, he can then afford to get an expensive outfit, but for the start the cheapest of instruments will do.

First, get a drawing board. This should not be a toy affair, but should be large enough for practical work, say about 2½ or 3 feet wide by 4½ or 5 feet long.

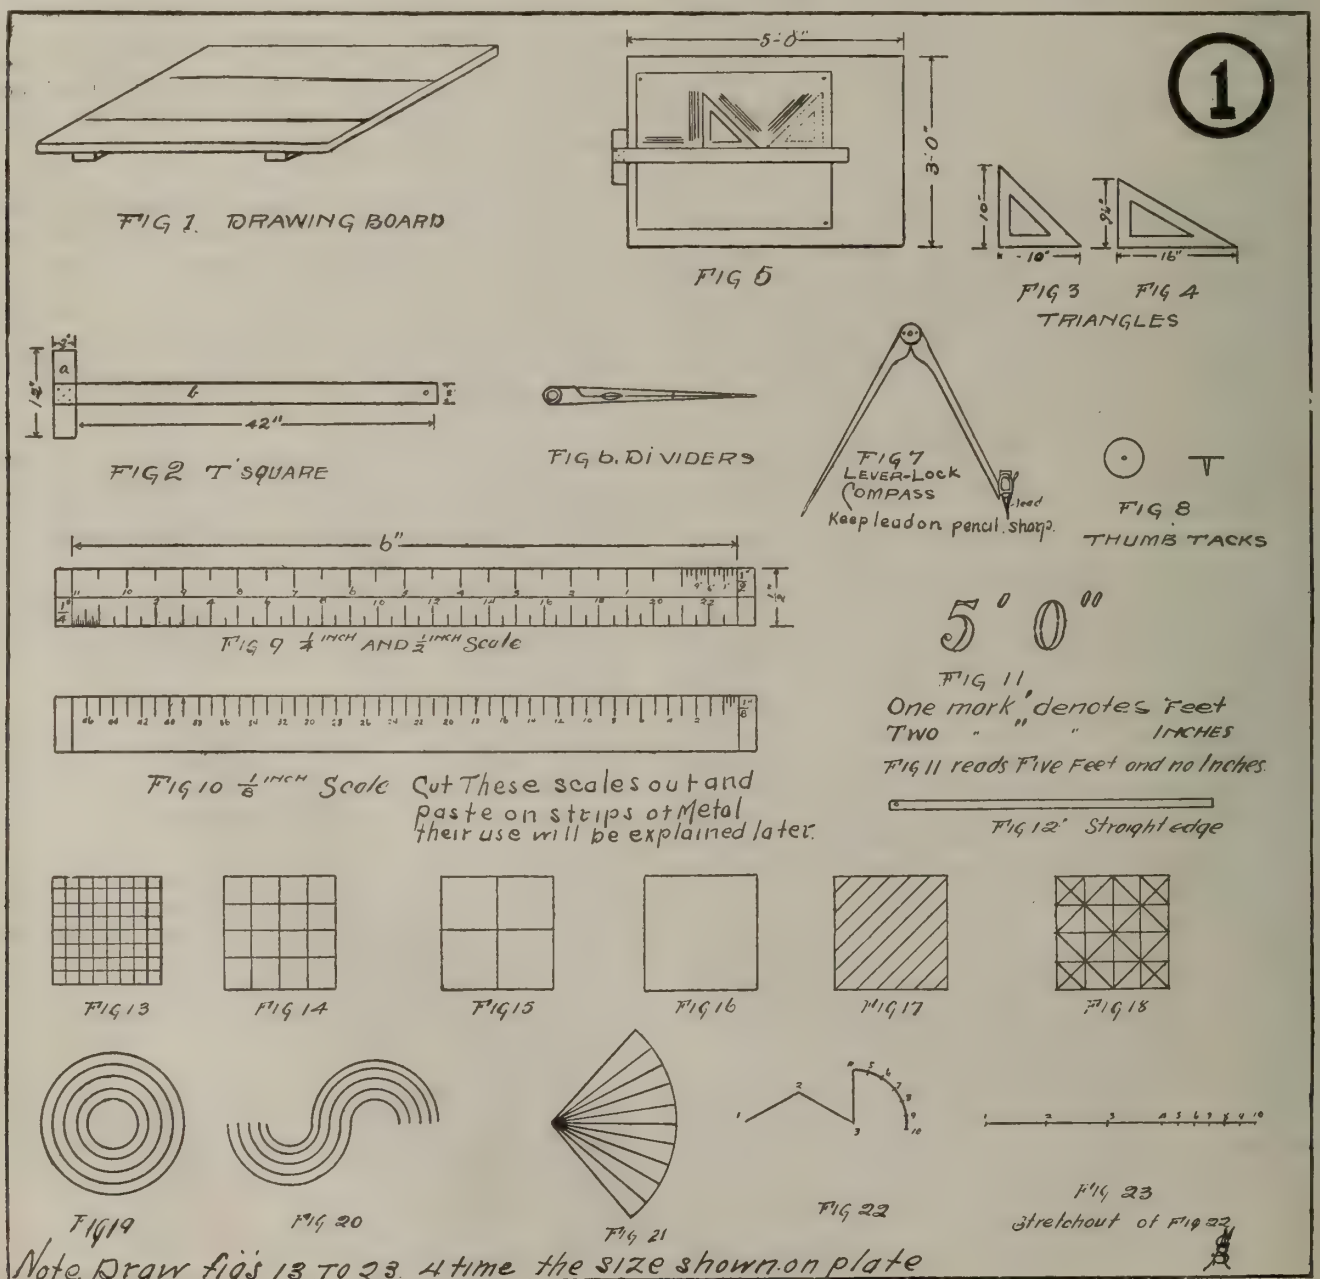
Some schools recommend their students to get boards about 18 in. x 24 in. This size is of no benefit to anyone learning sheet metal pattern drawing.

The student should develop all of his patterns full size, transfer them to metal, cut them out and form them up, and solder them together. In this way only will he learn to draw patterns for anything he wants in sheet metal.

The drawing board should be made of soft and well seasoned pine, tongued and grooved or well joined, and should have battens across the bottom to keep it from warping. See fig. 1.

It should be a perfect rectangle; that is, all of its sides should be right angles. It would be well to have a carpenter square this.

Next a T square is required. See fig.



2. This should be of hardwood, and should be about 3-16 of an inch thick. The head "a" should be at right angles to the blade "b." It should also have a movable head, which would allow the blade to be turned at any angle when required. Put a hole in the end to hang it up by to keep it from warping.

Next a triangle, shown by fig. 3, is required. (Fig. 4 is not necessary for the present). This triangle should be of the same material as the T square. Square its two straight sides with a steel square.

A pair of dividers is required for dividing and transfering spaces.

A par of compasses for drawing circles and curves.

Some thumb tacks for holding down the drawing paper.

A medium hard lead pencil, say about a 2-h. Keep a long, sharp point on the pencil. Accurate work cannot be done with a poor point.

Use soft rubber for erasing, and touch light.

A 2-foot rule with ⅛, ¼ and ½ divisions.

A straight edge or good, thick yard stick will be found useful.

Some light colored paper for drawing on. This can be ordinary wrapping paper, or better still, tailors' pattern paper.

The scale rule shown by figs. 9 and 10 can be cut out and pasted on a piece of wood or metal, and though small, will serve to illustrate the use of the scale rule later on.

Draw the exercises shown by figs. 13 to 21. These are intended as exercise for the different tools.

In figs. 22 and 23, we have a simple problem in sheet metal work.

Fig. 22 represents the detail of an irregular shape which we wish to form up on the brake.

Fig. 23 represents the stretch out of girth of fig. 22.

Draw fig. 22, and off to one side draw a straight line for the stretchout or girth. Set one point of the dividers at 1 and the other at 2, and transfer this distance to the straight line; do the same with the distance 2 to 3 and 3 to 4.

We cannot transfer the distance from 4 to 10 in one operation, so we divide the curved part into equal spaces and transfer each part separate. The stretchout represents the exact width of metal necessary to form fig. 22.

Screen Doors Once Without Handlers

Hardwaremen Could Not See the Possibilities These Offered—A Furniture Man Finally Introduced Them, Then Others Flocked to Wholesalers to Buy—Similar Cases Noted To-day—Some Dealers Slow to Grasp New Lines Which Are the Life of Trade, Helping as They Do to Sell the Staples.

For screen doors there has come to be a regular demand. Every spring, those living in country and city alike, ask for them. Only lack of means, indeed, prevents all from purchasing these comfort bringers. With the hardwareman, therefore, it is not a question, will he secure some screen doors, but merely how many of them will he need?

This is the position of things to-day; yet there was a time when a different state of affairs obtained. There was a time when screen doors were not carried by every hardwareman, when the demand for them had not arisen; and when the dealers were unable to see the coming of that demand. There was a time when wholesalers who had purchased some screen doors had to fairly beg hardwaremen to take these; a time when their prayers were of no avail.

Now, it seems strange that there ever should have been a day when dealers failed to recognize the possibilities that there were in screen doors; yet the leading salesman of a large Montreal wholesale house states that only some sixteen years ago he had a hard fight to get any retailer to take hold of some samples which his house had bought. These doors were new then, and apparently the hardwaremen could not see that there was an opportunity for them to make money by handling such novelties.

Refused Time and Again.

"I went around from store to store," says this salesman. "The dealers were inclined to laugh at me when I showed them the door. They thought these would be more bother than they would be worth, and that the people would not buy. They thought the price asked was exorbitant. I could make no headway with them. Finally, I went to the owner of a furniture store. I talked screen doors to him. He was not enthusiastic but he thought there might be a chance of working up a demand for them. He was not sure, however, that it would be worth the trouble.

"Well, I offered to help that man. I got him signs; 'Put up these doors and keep out the flies.' Those appealed to him and he agreed to handle the line. He put samples in his window. The people came with a rush. It almost seemed those doors had been the very things they were looking for. The very hardware merchants, who had refused to handle the line, woke up. They came to us with their orders, but before they could get their stock that furniture dealer, who had been the only one I could find who was willing to try this new line, had sold over one hundred doors."

All this was fifteen or sixteen years ago. It seems hard to understand as occurring even then, yet this chief salesman vouches for the fact. And he goes further. He says dealers to-day are sometimes as hard to convince of the wisdom of taking on a new line. They may not be as blind as those who failed to see the possibilities of screen doors, yet they are not quick to grasp the chance for expanding their business—the chance given by a new class of goods, which will appeal to the people. Of course, there is always the question, what class of goods will appeal to the people? It is pretty hard to find an answer, but according as a dealer is skilled in solving that riddle will he be successful in broadening his field.

How New Lines Pay.

Undoubtedly, new lines are worth the most careful study. "It is from these new lines," stated a veteran, "that the profit is secured nowadays." He referred especially to tools, but his remark applies to all departments. For the staples—the goods which have been manufactured for years—there is a steady and constant demand. They give a good profit. But the man who is to make, out of his business, more than a living is forced to deal in more than these lines. He must attract people to his store. If he does not do this, people will get even the staples from stores to which they were attracted by the specialties. It is an age when the new appeals to all. A woman sees some new cooking utensil. She is struck by it, and entering the store buys not only that, but perhaps two or three ordinary pots and pans which she sees. It was the novel line which brought about the sale of the other pots and pans. A mechanic sees a new tool. He is interested. He goes inside and asks to see that line shown in the window. He buys one, and also buys one or two staple articles which he needs, but which he would perhaps not have thought of had the specialty not attracted his attention; or which he might even have bought elsewhere.

Help Sale of Staples.

So it goes. Novelties bring about the sale of staples. Novelties bring profits themselves, but by effecting the sales of the standard lines they must be credited with compound profits.

Veteran Figures in the Hardware Field

NO. 8—J. H. A. SYLVESTRE, MONTREAL.

Once upon a time—yes, we are going to borrow a fairy story to start off—well, once upon a time there were two mice. Going one night on an excusion to the cellar of the house in which they lived, they found two pails of milk, and each, climbing up to drink, fell in. Now one of the mice was faint-hearted. "I am done for," he cried. "I can't climb the sides of this pail. I cannot swim for long. I might as well die right away." And he sank to the bottom and was drowned. The other little mouse was made of sterner stuff. "There must be some way out," he thought. "I'll try to devise a plan, and in the meantime I'll keep swimming." So the mouse thrashed about in the rich cream until finally this was churned to butter, and he was not only able to jump out, but sold the butter to the other little mice for a good profit.

The Point of Similarity.

Now, it may seem strange to mention these mice, and J. H. A. Sylvestre, of Montreal, in the same breath, yet the secret of this game little mouse's success is the secret of the success which has come to Mr. Sylvestre. Under difficulties, both held that things must come right, and Mr. Sylvestre, like the little mouse in the fairy story, worked hard to make things come right.

Forty-four years ago H. Sylvestre started a hardware store in La Prairie, Que. A few years later his little son entered the establishment. For 18 years the father and son worked together. Then, seventeen years ago, moved to Montreal, establishing a store at 1111 St. Lawrence Boulevard, well in the centre of the city now, but at that time on the outskirts.

District Seemed Unfavorable.

The district was quiet, and it did not seem that the Sylvestres, father and son, would met with great success. But it was soon evident that none need worry on their account. They were ready to face conditions as they found them—were ready to take the steps needed to draw business to that quiet stand.

H. Sylvestre retired shortly after coming to Montreal, but the son kept at his work. How he succeeded in getting business is told graphically by a Montreal traveler—a man who knows well nigh everyone in Montreal and the province.

"It was the mechanical devices that J. H. A. Sylvestre would arrange which brought him his trade," said this traveler. "There was no telling what contrivance he would have. There would be

Trying with Mr. Sylvestre meant scheming to secure some means of bringing his goods favorably to the attention of the people.

moving windmills, water wheels. One time, I remember, a miniature toboggan slide in full swing. The children going to school would stop and watch what was happening in that window for minutes at a time. Mr. Sylvestre was certainly responsible for many of the late marks those children got, but he attained his end. He got everyone in the neighborhood talking about his store. Then he displayed special lines to show the people what they could get inside. He had a patent ash shifter at work. A wringer washed clothes. I couldn't begin to tell what this man would think of. I would urge him to take a certain amount of some class of goods. 'I can't do it,' he might say. Then he would agree to try. Trying, with Mr. Sylvestre, meant scheming to secure some means of bringing the goods favorably to the attention of the people. He didn't wait for people to come to the store. He didn't go out to the people either. He just used his ingenuity to arrange displays which would transform his windows into sirens to draw people inside."

Interior Bright, Too.

The interior of Mr. Sylvestre's store, while not of great size, is well arranged, and always in perfect order. There he has the goods which the people need—the staples and the exceedingly useful new lines. But it is to his window displays, his mechanical devices, which Mr. Sylvestre himself gives credit for the success he has attained.

"I don't really know how I plan these displays," he remarked, in response to a question. "I suppose it is natural to me, but I work hard over some of these. They don't come all at once. I'm planning a mechanical paint display now. I know the idea, but all the details are not clear to me yet. They won't be, either, until the contrivance is at work in the window."

One Fad—His Business.

Mr. Sylvestre has had one fad—his business. He has stuck to it for years, and hopes to stick to it for years more. "A man has to give his business pretty close attention these days," he remarked, "if he is going to make money out of it. Competition is pretty severe. Then, so many want credit."

"Don't you give credit?" was asked.

"No. Not for four or five years," came the answer. "Not even contractors get time from me. They ask for thirty days, but they don't get it. Lost business? Well, I may have lost some because of this, but I have gained more, I think. I've lost enough money by giving credit. I'll lose no more."

THREE FIRMS MERGE.

The announcement is made that the firm of Defriez & Woodman, Limited, have decided to locate in Alliston, Ontario. The company consists of a number of concerns which have been merged together after considerable negotiations. The firms merged in the new combination are the Crescent Silver Plate Co., West Toronto; The J. H. Pugh Jewelery Co., Toronto; and the Defriez & Woodman Co., of Toronto. They have an authorized capital of $100,000. Their head office and showrooms will be at Toronto with Canadian branches in Montreal and Winnipeg. They also have offices in London, England; Paris, France; and Berlin, Germany.

The factory at Alliston is now in operation, the firm employing from seventy-five to one hundred hands.

The company will manufacture all varieties of hollow-ware in silver goods but no flatware will be made.

FACTORY TO EXTEND.

Galt, Feb. 12.—The Goldie & McCulloch Company will spend $80,000 increasing the plant of their machinery works, and will also build a large addition to their boiler shops. This will mean the employment of about 150 more men.

The Management of a Retail Business

CASH DISCOUNT AND CREDIT.

By H. C. Carson, F.S.S.

We have now reached June, the sixth month of operation of these two stores, and, as forecast in last week's article, the shopkeeper No. 2, has found real difficulties staring him in the face. Of his accounts payable, amounting to $2,-317.67, all but $900 is past due, and statements received indicate that a number of his creditors are growing tired of his dilatory tactics.

He is compelled to crave their indulgence, which, of course, is granted, but naturally further purchases are not encouraged. His chief necessity now is to sell so much as possible for cash, and to collect his outstanding accounts receivable. But cash customers are no longer attracted to his store. It has lost that spick and span appearance which is at least an outward semblance of prosperity, and those who have the cash invariably exercise the function of choice as to where they will spend it.

Cash Trade Disappearing.

His trade, therefore, is almost wholly restricted to credit patronage, and under the circumstances it would seem that the less goods he sold, the better off he would be. But he has not realized this. Nor has he realized that insolvency may be brought about by other means than an excess of liabilities over assets. And so he blunders on in his stupid way, extending more credit while his is shut off at the buying end.

In the meantime his stock has been seriously depleted (purchases amounting to only $150) both in quantity and variety, and he cannot fill his customers' orders completely, even if he would. His sales on credit for June have amounted to $1,500, and for cash to only $200. His collections, notwithstanding special effort put forth, have reached only 20 per cent. of the total amount due, or $650, out of which he has been compelled to settle his local personal accounts, $300, as shown previously, store expenses for the month, $150, and living expenses. $50, being half his usual amount. To 12 of his creditors he has forwarded remittances of $30 each on account, as a peace offering, and all thankfully received by them, no doubt, but with a mental reservation, in all probability, to secure the balance as speedily as possible, and to sell him only for cash in future.

A Belated Regret.

The full seriousness of his situation has at last dawned upon him, and as he proceeds to cast up his accounts at the end of the month, he is filled with regret that he did not stick to the trade at which he had been trained—a skilled mechanic—instead of venturing on the troublesome sea of business, without even an elementary experience to guide him through the commercial shoals and quicksands. Scores are wrecked in the same way each year.

Business capital consists of two things —knowledge and money, the latter being more the adjunct or accessory than the former, and the records of the mercantile agencies show that inexperience is the basic cause of a big majority of the failures. The accounts of No. 2 stand as follows:—

Merchandise.

Stock on hand June 1	$2,375.00
Purchased during month	150.00
	$2,525.00
Sales $1,700 at 75 per cent cost.	1,275.00
Stock on hand June 30	$1,250.00

Receipts and Disbursements.

Cash on hand June 1	$33.00
Received on acct.	650.00
Cash sales	200.00
	$883.00
Paid creditors on acct.	336.00
Wages and other expenses	150.00
Personal accts. and cash	350.00
	$836.00
Cash in hand June 30	$47.00

Balance Sheet.

Assets.

Cash in hand	$47.00
Acct. receivable	4,083.64
Merchandise	1,250.00
Fixtures	1,000.00
	$6,380.64

Liabilities.

To sundry creditors	$1,807.67
Net worth	$4,572.97

The books show, therefore, that he is worth $1,072.97 more than when he commenced business, that he is apparently solvent, but, nevertheless, in such a condition that he cannot continue business successfully. His stock is lower than the original installation by exactly 50 per cent., and he owes nearly $2,000, all past due, with only $47 cash in hand.

Consults His Creditors.

He has only one alternative, and he takes it. The state of affairs is laid before his creditors by his solicitor. They are kindly disposed towards him, for he has been honest in all his transactions, and offer to assist him in liquidating the business. His competitor, No. 1, offers 80 cents on the dollar for the stock, which is accepted with the approval of the creditors, and the landlord is generous enough to pay him $500 for his fixtures. With the proceeds of stock and fixtures, amounting to $1,500, and cash on hand $47, he pays his creditors off, all but $260.67, which balance he contrives to collect from his outstanding accounts, making settlement in full.

He has retired from business, a sadder, but wiser man. Instead of $3,500 cash with which he started, he now owns accounts receivable with a face value of $3,822.97, and is free from debt. It would serve no useful purpose to pursue his course further. He is probably back at his trade, which he should never have left, while his lawyer is making the usual effort to collect the delinquent accounts. If he nets $1,500 from these he will be lucky, on which basis his six months' venture will have cost him $2,-000, in lost capital.

The Merchant Prospering.

Merchant No. 1, in the meantime, continues to prosper. He is adhering to the rules he has laid down for his guidance, and his trade is increasing week by week in consequence. His business is now well organized. His credit is established, and we will leave the trading and financial end of the enterprise, and take up, next week, improvements in equipment and system, which will enhance the efficiency of his service, reduce waste to a minimum, and otherwise add to his reputation as a successful merchant.

OPEN WESTERN BRANCH.

The Galt Art Metal Co., Galt, Ontario, have opened a branch warehouse at Winnipeg, at 839 Henry Ave., taking over the business of Nobbs & Eastman, who have acted as their Winnipeg agents. H. F. Nobbs has been engaged as western manager.

By "Mack."

One of the very wisest maxims that I was asked to memorize when a school boy extolled the virtue of silence.

"Speech is silver, but silence is golden!"

Surely not a very great tax on the memory but though easily acquired by heart, as we say, it is one of the first of our good rules of conduct to elude our prudent resolve in active practice.

Think of this the day after engaging in a dispute or political argument when if the application of this precautionary measure had been made we should have less occasion for remorse for the things which were better left unsaid.

The story of the English butler who had effected a matrimonial alliance with his master's family is another evidence of the potency which results when the habit of saying little is once established.

He had applied for directions, to his late employer, regarding future deportment in his new surroundings and was told to wear a correct coat and observe silence.

He is said to have passed as a cultured gentleman and there can be little question that a man enjoying the advantage of a wide acquaintance with the highly educated class to which he was promoted by fortune, should acquire the outer polish of associates with whom he is constantly in contact.

It is plain homely advice to keep one's mouth shut.

Furthermore to control the desire for expression until there is something to say is advice, it should seem that is a good substitute if the other cannot be endured.

The pages of Hansard in the Dominion Parliament are understood to contain the records of numbers of oratorical efforts delivered for no especial purpose other than others were doing the same thing and admiring constituents expected to hear from their recently elected representative.

Years afterwards perhaps the words of some unfortunate member are reproduced by a vindictive gentleman opposite.

If it were possible to deny having given to the world such nonsense as the early impressions of public questions seemed then, this escape from embarrassment is barred by Hansard's verbatim reports.

The bitter memory of such uncomfortable moments may explain long years of unbroken silence on the part of our Solons who do not indulge in the arts of rhetoric.

Applying the moral, one concludes that the retail hardwareman will profit if on proper occasions he employes a discreet silence rather than indulges in ill-advised loquacity. Too much conversation can annoy more than too little. Of course, the oyster is not an ideal type of salesman. A man must know when to talk; but it is better to err on the side of brevity than on that of verbosity.

Hardware Letter Box

Air Brake Compound.

P. A. O. Sankey, Vancouver.—"Can you inform us who handles Marvin's air brake compound in Canada?"

Can any reader supply this information?

Malleable Fittings.

G. H. Wright, Penetang, Ontario.—"Can you give us the address of the manufacturers of the Crane and "P" malleable fittings?"

The Crane Co., Chicago.

Can any reader give the name of the makers of "P" malleable fittings?

Skis and Snowshoes.

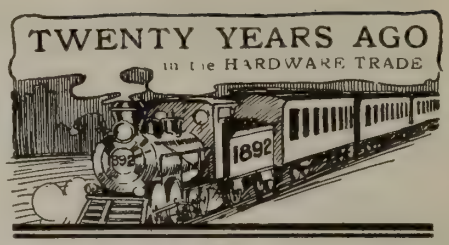
Edwin Chown & Son, Kingston.—"Can you give us names of makers of skiis and snowshoes?"

Walter Dean, Toronto, makes skiis. Among the makers of snowshoes are the G. O. Holland & Sons Co., Montreal; Henry Ross, Indian Lorette, Que.; J. B. Lalibert, Que.

Shelf Boxes.

W. J. Douglas & Co., Windsor.—"Please give us the list of manufacturers of hardware shelf boxes that appeared in the Jan. 27 issue."

Cameron & Campbell, 578 Queen Street West, Toronto; J. D. Warren & Co., 55 State Street, Chicago; Walker Bin & Store Fixture Co., Berlin; Jones Bros., Adelaide Street West, Toronto.



The following items are taken from the issue of February 13, 1892:

"The firm of Chown, Towell & Co., hardware dealers, Belleville, has been changed to W. W. Chown & Co."

Editor's note.—The firm of W. W. Chown & Co. is still in existence, being conducted by no less prominent a personage than R. C. Chown, president of the Ontario Retail Hardware and Stove Dealers' Association.

H. S. Howland, Sons & Co., have taken an agency for a first-class English bicycle, the Overstone, made by Lloyd, Read & Co., Coventry.

Editor's note.—This was about the time that the big boom in bicycles began. Bicycles were handled very largely by hardware dealers in those days, and there is every reason to believe that it proved a paying department. The relaxation came when bicycles were not handled very much by hardwaremen, but the pendulum is swinging back again, and more hardware dealers are again taking up the bicycle trade.

"Four Canadian broom factories have failed in a month, because of the high price of broom corn."

"Tatham & Co., of Listowell, the purchasers of the Cubitt stock of hardware, at Sarnia, have taken over the stock. It is the intention of the firm to make large additions to the same."

"The Metallic Roofing Co. and the Polson Iron Works Co., both of Toronto, have named Lewis Skaige their Montreal agent."

Elevators.

Taylor Bros., Almonte.—"Kindly let us know the name of manufacturer of hand and power elevators."

Otis-Fensom Elevator Co., Toronto.

Fireless Cookers.

Huntsville Hardware, Ltd., Huntsville.—"Who are the Canadian agents for fireless cookers?"

Adams Furniture Co., Toronto.

Clear Exposition of Association Status

E. F. B. Johnston Defines the Position of Trade Organizations—What They Can and What They Cannot do Under the Law.

Toronto, February 14.—An address of singular interest in its bearing on the legal status of trade associations, was delivered by E. F. B. Johnston, K.C., before the Dominion Wholesale Grocers' Guild at their annual meeting. His topic was "The Rights of the Trade and Manufacturers."

One of the chief contentions of Mr. Johnston was that men could unite for the purpose of self-preservation; that in the work of self-preservation prices might be raised. But, he declared, prices could not be unduly enhanced simply and solely with that one object in view. Neither could a body of men unite to create a monopoly in restraint of trade.

"In all movements," he said, "underlying whole schemes there were some principles that must be considered on the erection of the foundation, having respect to the future.

"The whole success of a body of men depended in the first place on unity. The United States and Dominion of Canada were a combination of units. Unless unity exist among the various parts the whole will fail. Workmen who unite succeed because they acknowledge a sovereign head, with the result that they are standing to-day against capital in a way they never stood before."

Unity Must be Permanent.

Besides unity, continuity was necessary. "The working out of the final end needs unity for 365 days in the year, and not simply at your conventions here once a year. Continuity has built railways against all obstacles. Persistent struggle has given us our civil and religious rights, and it is needed in your association," said Mr. Johnston.

"The individual in the association, to make it successful, must be subservient to the government of the body. There should, too, be an observance of trust and confidence and business morality; and lastly, no organization can succeed unless possessed of business courage.

"These result in the object desired and ultimate success of such a body of men as the Grocers' Guild.

Law Gives Right to Unite.

"You have the right by law to unite. You can form a union at any time under any circumstances, if you bear in mind that what you do in your union is necessary to your self-preservation.

"If men unite for the sole object in view to raise the price of sugar from 5 to 7 cents per lb., then that is a conspiracy against trade and is illegal.

"But if necessary for your self-preservation and the general welfare of the trade, I take it, that the law justifies the reasonable raising of prices. Combines are not illegal on that basis. They are only illegal when they unduly enhance prices or prevent competition.

"When prices are raised under the two methods named, although the results may be the same, the motive power is entirely different. One is done without any necessity therefor, and is illegal; the other becomes necessary in the interests of trade, and is legal."

Trade a Condition, Not Fact.

Mr. Johnston gave some strong arguments why changes in methods of trade were necessary to illustrate the contention that trade was not a 'law,' but merely a 'condition.'

"Trade is not a law," he said, "nor a contract, nor a principle, nor anything existing as a fact. Trade is a condition of affairs, an evolution of certain conditons resulting from the manufacturing, wholesaling and retailing of goods.

"What was good trade 40 and 50 years ago is not good for to-day. We improve conditions, and in order to succeed it is necessary to improve the conditions of trade.

"The law says if that is the object it is not illegal to unite and not punishable. You have to meet the varying changes in conditions that you or the retailer or consumer do not suffer. You have the right of co-operation with certain lawful principles in view. You have the right to co-operate for purposes of economy, better facilities for running your own business and right to co-operate in the interests of wholesale grocers in Canada.

The Making of Profits.

"You also have the right to make your terms and profits, so long as you are not unreasonable. You are justified in making them more advantageous to your general welfare, and in doing so you are beyond the reach of the law."

The complication of trade through wholesale and retail channels made much consideration necessary. The wholesaler and retailer in a way were agents of the manufacturer. The latter wanted, of course, to get as much profit over cost of production as possible. But he has competition to meet and so must place his product at a reasonably low figure to secure his share of business. Whole salers had to purchase through the manufacturer and pass the goods on to the retailer at a fair margin, and at the same time see that the retailer could sell those goods as cheaply as possible to the consumer.

Making Living Profit.

"Your test should be: 'Is the price enough to enable me to have a fair profit?' You must go on amending until you have that living profit. As long as the increase is not more than a living profit it does not come within the law. If you are ever called to court, that is the point you will have to explain."

Desires of Humanity Reign.

"If we could limit the desires of humanity we would have lower wages and cheaper goods. The mode of life, the method of dressing have all been advancing and wages are a great deal higher to enable people to live."

"You want a handling profit on the goods. You must have a margin for losses, interest, discounts; you want a margin of safety for the future. That is your position. The manufacturer wants the highest price he can get because you can only get the article through him. If there were no competition, prices on many goods would be much higher than they are."

Commission on Trade.

A board or commission was suggested similar to the Railway Commission to settle matters of dispute or argument in trade. The only place to settle such matters now is in the criminal court, whereas they should be settled in civil courts.

Mr. Johnston made a strong arraignment of the Combines and Investigations Act of 1910. "It must have been hewn out of a block of wood by a broadaxe," he declared. Six men had power to hale a suspect before a judge, who, if he thinks there is enough evidence, commits him to a Board of Investigation for trial on stated facts, gazetted, etc. If the alleged offence is continued after 10 days a fine is imposed at so much per day. Later on the defendant may be acquitted in court. "There we have two tribunals and different verdicts and different penalties for the same offence—a state of law which is an outrage."

Term "Combine" Not Defined.

The same Act, he stated, gave different definitions of combines. It would be only justice, he considered, that if the alleged "combine in restraint of trade" were found not guilty, the six complainants should shoulder the costs.

In closing, he urged the trade to be honest with themselves in the observance of the Secret Commissions Act, which should be made clear to everyone.

Progressive Hardware Retailing

Ashdowns Show Window Containing Articles all Priced at 75 Cents — Island Hardware Co. Hold Opening Sales—Pushing the Sale of Tools.

A SIGNIFICANT AD.

Vancouver, B.C.—W. C. Stearman is a firm believer in the possibility of selling stoves the whole year around. His belief goes to the extent of advertising stoves steadily through the winter. One of his recent advertisements was headed "Held Up", which had a local significance in view of the fact that there have been a large number of hold-ups and robberies in that vicinity of late. The advertisement goes on to explain that "a great many people are held-up when buying a range, simply because it is not as the merchant represents. It soon burns out, thereby requiring a big outlay for castings;" and then demonstrates that there is no danger of a "hold-up" where the ranges handled by W. C. Stearman are in question.

PUSHING SALE OF TOOLS.

Boissevain, Man. — Johnson Bros., hardware dealers, are conducting a vigorous campaign which has for its object the sale of tools. They are advertising heavily and effectively, which has resulted in a stimulation of interest. Another factor in their sales-making campaign is the offer of discounts on all tools ranging from 20 to 40 per cent.

A good quality argument is inserted in their advertising to the effect that "the value of a tool is measured by the service it gives."

75-CENT WINDOW.

Winnipeg, Man.—The retail store of the Ashdown Co. is running so capable a series of window displays that the advertising slogan has been adopted, "Watch the Windows."

A special window was trimmed recently which contained nothing but articles priced at 75 cents. Among the goods shown were razor strops, shaving mirrors, manicure scissors, fancy shaving mugs, brushes, hones and soap.

Another window display has been given up to stoves and, despite the fact that this is not the stove season, good results have been noted.

A MOVING SALE.

Kingston, Ontario.—Simmons Bros. are preparing to move into their new premises by holding a series of sales to reduce the stock they are carrying. They now announce a 20 per cent. discount sale in enamelware to last through the month of February.

NEW STORE STARTED.

Victoria, B.C.—The store of the Island Hardware Co., was opened here on Wednesday, February 3. The opening was largely attended, particularly as the company had advertised it liberally and had offered a number of inducements to attract trade.

One of the inducements put forth was to help in the sale of stoves. On opening

day and during the first week, purchasers of two special varieties of stoves were given their choice from the new stock of white, grey or green enamelware or tinware to the value of $5.

In addition to this, the firm offered one or two reductions from regular prices as opening specials and inducement to sample their goods

DOING ELECTRICAL WORK.

Richmond Hill, Ontario.—At the municipal elections, the people of Richmond Hill adopted the electric lighting by-law. The opportunity thus presented for profitable trade was patent to the Richmond Hill Hardware Co. and they, accordingly decided to take up electrical work. They are now advertising the fact as follows :

"On January 1st it was said 'Let There be Light' and nearly all the people voted yes.

"We beg to announce to the people of Richmond Hill that we will be prepared to do Electric Wiring of all kinds in the latest approved manner, and also furnish fixtures and material at the lowest prices. Call and see us before placing your orders."

GIVING SAMPLES.

Sudbury, Ontario. — The Cochrane Hardware Co. are advertising an article for use in sweeping floors, carpets and rugs. They advertise that they have secured a carload and are going to give some of it away. One day has been set aside when sample packages will be given to all who call at the store.

SELLING WIRE FENCE.

Daysland, Alta.—Whyte & Orr are now featuring their stock of woven wire fencing. They announce that they have made an extra large purchase of wire fence and are prepared to sell at special prices. The prices they are offering will remain in force until March 15 only. After that date it will not be possible to buy at such favorable terms. All fencing bought in this way must be taken out before May 1.

This plan of inducing early buying of wire fencing is proving quite effective.

NEW COMPANIES.

Among the new companies incorporated in Ontario are: The Northern Bolt & Screw Co., Owen Sound, capital $200,000; Sanitary Mfg. Co., Woodstock, capital $50,000; Provincial Motors, Ltd., Toronto, $70,000.

A license has been granted to the Northern Aluminum Co.

S. F. Kempthorne, of Saskatoon, who recently sold his hardware business to Faucett Bros., is on his way east to take a well earned rest.

Current News of Hardware Trade

Arrests are Made.

Ottawa, Ont.—A number of arrests have been made in connection with the burglary in the Charleson hardware store, Rideau street. One of the prisoners, when arrested, had on his person several boxes of razors and knives.

Laid at Rest.

The remains of Roger C. Percival were laid at rest in the Merrickville cemetery on Thursday of last week. Mr. Percival had been connected with the hardware trade for a long time, for the past fifteen years being President of the Percival Plough and Stove works. He was seventy-five years of age.

Tax Mail Order Houses.

Wiarton, Ontario.—The Wiarton Board of Trade at a recent meeting concurred in the action of the Goderich Board of Trade in petitioning the Legislature to permit municipalities to tax mail order houses doing business in these municipalities.

Burglars Got 5 Years.

Berlin, Ontario.—Two youths named Cooper and Preuss who pleaded guilty to having stolen 2 revolvers, 2 rifles and a considerable amount of ammunition from the hardware store of H. Wolfhard & Co., were sentenced to terms of 5 years.

Fire Losses.

Pefferlaw, Ont.—Fire destroyed the hardware store of Thomas Bradley, and spread to an adjoining barber shop and jewelry store. Mr. Bradley narrowly escaped death. He jumped in his night clothes from the second storey to the street below. Fortunately his wife and children were in Toronto. A bucket brigade secured water from the neighboring hand pumps and thereby prevented the fire from spreading. The total loss is estimated at $5,000, most of which is covered by insurance.

Owen Sound, Ontario.—Fire in the factory of the Owen Sound Wire Fence Co., did damage estimated at $20,000. Repairs will be made quickly and, as there was a large manufactured stock on hand, there will be no delay in filling orders.

Business Changes.

Medicine Hat.—The Marshall Hardware Co. have sold out their business.

Calgary, Alta.—A. G. Campbell has started in the hardware business here.

Erin, Ontario.—G. F. Sutton & Son, hardware dealers, have sold out.

Ochre River, Man.—The Ochre River Hardware Co. have been incorporated.

Winnipeg, Man.—The Plumbers' Supply Co. have started in business here.

Montreal, Que.—The McClary Manufacturing Co. have moved to their new quarters, at 23 Wellington Street.

Mannville, Alta.—Cecil Frank has disposed of his hardware business to J. R. Barnes, of Winnipeg.

Hamilton, Ontario.—The stock of H. C. C. Sweeney, dealer in stoves and tinware is to be sold.

Rush Lake, Sask.—R. T. Storry, formerly with P. A. Sharpe & Co., of Earl Grey, Sask., has opened a hardware store here.

Dryden, Ont.—Hayes' hardware store is now located in new premises opposite the old stand. The new store was opened on Monday.

Arcona, Ontario.—Otto Schmidt, formerly with McDermid & Kyle, Stratford, has come here to open a hardware store. He was with McDermid & Kyle for 12 years.

Radville, Sask.—The hardware and implement firm of Duignan & O'Conner have dissolved partnership. Mr. Duignan will continue the hardware business and Mr. O'Connor the implement.

Acton, Ont.—R. F. Johnstone, of Acton, has disposed of his hardware business to James Symon, of the same town. Mr. Symon takes possession after stocktaking on Feb. 20. He was formerly a traveler for the James Smart Co., Brockville. Mr. Johnstone is leaving for Saskatoon about April 1, where he will start in the contracting and building business.

Saskatoon.—S. T. Kempthorne has sold out his hardware business to T. W. Fawcett, who will organize a joint stock company under the name of the Fawcett Hardware, Ltd. The new concern takes possession on March 1. The members of the firm will be T. W. Fawcett, S. E. Fawcett, for 12 years with Wood, Vallance, and with Marshall Wells & Co., and O. W. Fawcett with the Ashdown Hardware Co., in Saskatoon.

Additions and Extensions.

The Beach Foundry Co., of Winchester, have recently made an addition to the mounting shop.

Merrickville—To cope with the growing demand for their stoves, the Percival Plough & Stove Co., of Merrickville, have increased the size of their mounting shop. This will necessitate the employment of more men when the spring rush starts.

Merrickville—Owing to the recent amalgamation with the Tudhope-Anderson Co., of Orillia, the Percival Plough & Stove Works have somewhat changed their method of operation. The ploughs are now being made in Orillia, and the stove plant has been moved to the old plough works. But these—though much larger than the old foundry—are not large enough, and plans are now being made to increase the size of the mounting department. The work will be undertaken as soon as spring opens.

Personal Notes.

J. T. Craig, of E. T. Wright Co., was in Montreal during the past week.

J. Gilbert, of St. John, New Brunswick, spent part of the week in Montreal on a buying trip.

F. O. Lewis, sailed from Liverpool on the Olympic, on the 7th of February, and arrived in Montreal this week.

F. R. Oliver, manager of Tudhope & Anderson Co., Orillia, is leaving next week for a business trip through the west.

George Caverhill, of Caverhill & Learmont, Montreal, sails for England this week on the Oceanic. He is accompanied by his wife and daughter.

Mr. Lindsay, of the Lindsay Hardware Co., Vulcan, Alta., has returned from High River, where he has been rereiving treatment at the hospital.

C. Castleman, of Landers, Soule & Castleman, Chesterville, is spending the winter in California. He will be home about the middle of March.

Among the visitors to the Montreal wholesale houses this week were: J. A. Paquin, of St. Eustache, J. R. Deschambeault, of Terrebonne, Que., and H. Corriveau, of St. Sebastien.

J. T. McDermott, accountant in the Molsons Bank at Winnipeg, is returning to Diamond City, Alta., to take a position with the Alberta Hardware Co., of which he is a shareholder.

Mr. D. D. Campbell, who recently sold his hardware business at Fillmore, Sask., to S. G. Norris, left recently for Redvers. Mr. and Mrs. Campbell expect to spend the balance of the winter visiting friends in Manitoba.

John Irwin, assistant manager of Brandram-Henderson Paint Co., has returned from a trip to Kingston, Ont.

The Montreal Sales Co., jobbers of "Everything on Wheels" have removed to more spacious showrooms, at 61 St. Sulpice St.

What Readers Say of Hardware and Metal

The following are a few of the letters which have come unsolicited to Hardware and Metal, telling of the place it occupies in the minds of hardware dealers in all parts of the country.

Worth Five Times Price.

Acton, Ontario.—"I have sold out so please discontinue my subscription. However, let me say a word of appreciation of your paper. I would never think of running a hardware business without Hardware and Metal. Not only are your predictions on the markets worth five times the price of subscription but your articles on business management are very helpful and interesting. I know that I will miss its visits every week."—R. F. Johnstone.

Will Always Subscribe.

Hamilton, Ontario—"Enclosed please find cheque for payment of subscription. Started business a year ago last November and will always subscribe for Hardware and Metal, as found it a great help in many ways."—B. E. Webster.

Like the Paper.

Fort William, Ontario.—"We want to compliment you on the improved appearance of the late numbers of Hardware and Metal." Gerry Bros.

Find Paper Valuable.

Huntingdon, Que.—"We value your paper very highly."—Braithwaite Bros.

Something in Every Issue.

Adanac, Sask.—"We look forward to receiving every issue as we learn something from each one."—Moorlend & Son.

No Better Way.

Toronto, Ontario. — "I am working with sheet metal products and want to keep posted in the hardware trade. I know of no better way than reading Hardware and Metal." — Horace H. Carrie.

Has Missed Paper.

Ardath, Sask. — "I have just commenced business in this new town. Kindly send Hardware and Metal, as I miss it very much, being accustomed to receiving it in the east at Creemore, Ontario."—Albert Akitt.

Clerks Read It.

St. Hyacinthe, Quebec.—"It is with great pleasure that I enclose you my cheque in renewal for next year. I find all numbers very interesting and each of my clerks reads every number with attention."—E. Boucher.

Clerks are Interested

Gunton, Manitoba—"We look forward to receiving Hardware and Metal, as our clerks take great interest in it."—E. Williams.

Would Not Miss It.

Lemberg, Sask.—"Kindly find enclosed cheque for Hardware and Metal which we would not miss for double its price every year."—J. Landreth.

How to Get Returns.

Red Deer, Alta.—"We need a couple more of your issues for our clerks. We don't know of any way of spending four dollars that will give us as good returns as putting Hardware and Metal in the hands of live clerks."—Smith & Gaetz.

Best Publication.

Renfrew, Ontario.—"I would not be without Hardware and Metal, as I consider it the best publication for anyone connected with the hardware or stove business."—H. D. Moss.

LEADING BRITISH MANUFACTURER SPEAKS HOPEFULLY OF CANADIAN TRADE.

That the British manufacturer should keep in close personal touch with his customers in all parts of the world, is the opinion of S. R. Lysaght, managing director of John Lysaght, Limited, Bristol, England, one of the largest manufacturers of galvanized sheets, in the world.

Mr. Lysaght is now on his third trip around the world, visiting his branches in different parts of the Empire, and other members of his firm have also made this trip in the past, with the object of knowing the market at first hand.

"I can see nothing but prosperity for Canada," exclaimed Mr. Lysaght when seen by Hardware and Metal at his hotel in Toronto. "You have great resources and an energetic people to develop those resources."

"The preference given by your tariff to British manufactures, puts them at least on an equality with United States products, which would otherwise have an advantage owing to more favorable freights. There is no danger of the British manufacturer losing his grip on Canada, if he keeps in close touch with the demand in this country, and supplies what the people want."

So far as his own line is concerned, Mr. Lysaght is glad to notice that the demand is more and more for a high quality of galvanized sheet. In this respect, Canada may yet learn something from Australia, where galvanized sheets have been a staple building material for many years and the economy of good sheets in the long run has long since been demonstrated.

A recent development in the John Lysaght industry, was the construction of a new plant at Newport, which is among the most up-to-date mills in the world. Here the firm take their own iron ore, and convert it into galvanized sheets through all the necessary processes of manufacture. They are now turning out about half the steel bars required in their sheet mills.

Asked whether his firm had any intention of manufacturing sheets in Canada, Mr. Lysaght said: "At the present time, it would not be politic to establish mills in this country. The demand is as yet too limited. However, whenever conditions warrant it, we will not be found lagging behind."

TRADE CATALOGUES.

(See also page 59.)

Marine Engines.

The Ferro Machine & Foundry Co., Cleveland, Ohio, have sent out a large and elaborately designed catalogue on "Ferro Machines," dealing with marine engines and equipment. It is printed on heavily coated paper, illustrated large-in several colors, and is bound in a brown embossed cover. It contains graphic descriptions of the lines made by the company, including gasoline engines and all accessories. It is in every respect "a practical treatise on marine engines."

Auto Accessories.

The Canadian General Electric Co. have issued a supply catalogue, illustrating their ignition appliances and auto accessories. As the hardware trade is rapidly taking up these lines, the catalogue will prove of considerable interest.

The goods shown include electric auto lamps, electric light outfits of all descriptions, including head, tail and side lights, spark coils, low-tension magnetos, high-tension magnetos, ignition and lighting cables, spark plugs, storage batteries, lighting switches, testing instruments, horns, generators, carbureters and other accessories for automobiles and motor boats.

Standard Ideal Booklet.

"Artistic Sanitation in the Home," is the title of a fine booklet just issued by the Standard Ideal Company, of Port Hope, Ont. It deals with their ware—baths, lavatories, closets, laundry trays and other enamelled iron sanitary fixtures.

The booklet contains a good description of the processes of manufacture—the forming of the mould, the casting of he iron shell, he smoothing of the rough surfaces, the enamelling process and the firing on of the snow-white coat. A large part of the book is devoted to illustrations of bathrooms, fully equipped.

James Purvis, of Purvis Bros., one of the pioncer hardware men of Algoma will be present at the Guelph convention.

Weekly Western Market Report

Business is Better With the Change in Weather Conditions—It is now Expected That Trade Will Catch Up—Some Changes in Price are Noted.

Winnipeg, February 14. — Trade throughout the entire West shows considerable brightening with the change in weather. At last the severe cold spell has been broken and during the last week mild weather has been enjoyed in all quarters of the West. This was a decided relief to all classes of business. If present conditions, however, continue for another few weeks, it is expected that a great amount of lost time will be made up. While it is still a little early for spring business, yet, the general trade has opened up as good as usual and prospects are very bright. Shipments West have already started and while it must be understood that the rush is by no means on hand, yet, cars of hardware are going out to country points where local merchants desire to secure their spring supplies and have their stocks properly arranged and installed before the spring season opens. Several large orders for Regina, Saskatoon, Edmonton and similar points West are now waiting shipping orders and will be forwarded as soon as these are received.

There has been a sharp advance of rope; several lines having advanced as high as ½c a lb. Pure manilla is the only line to remain unchanged at 10¾c. New prices in other lines will be noted in the quotations.

The barbed wire market is also being watched with interest at the present time as mills in the United States have announced an advance of 5c per 100 lbs. It is not likely that this will affect the Canadian market as the mills to the south are the Canadian source of supply. No advance has however, as yet been made on the western market and at the present time the situation is being watched with interest. Wire nails have also advanced 5c per keg at mills across the line. It is not expected, however, that this advance will affect the Canadian market as these mills do not form the source of supply for Canadian buyers.

The movement in stoves still continues and spring orders are going out fairly freely. As yet no definite rush has started but it is expecetd that within a week or two it will commence.

Quotations in general lines are as follows:—

Winnipeg Hardware Quotations.

Axe Handles.—Oval and octagon, s.g. hickory, $3.50 ; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½ ; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts, 77½.

Bar Iron—Bar iron, $2.50 ; Swedish iron, $4.25 ; sleigh shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs., $8.50 ; Jessop, $15.

Blocks—Steel, 50 per cent ; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg ; $2.35 Fort William.

Copper.—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire 3 inch gage, 24c, to 20 inch gage 29c.

Crowbars—4½c. per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87 ; 26 gauge, $4.18 ; pressed standing seamed roofing, 28, painted, $2.84 ; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40 ; 8-inch, $4.65.

Clevices—7½c. per lb.

Enamelware—Canada, 50 ; Imperial, 60 ; Premier, 50 ; Colonial, 60 ; white, 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80 ; 18, $3.85; 20, $3.90; 22 and 24, $4 ; 6, $4.20 ; 28, $4.60 ; 30 gauge or 10¾ oz., $4.80 ; Queen's Head, 20, $4 ; 24, $4.20 ; 26, $4.60 ; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.25 ; ½ in., $4.05 ; ¾ in., $5.00 ; 1 in., $7.20 ; 1¼ in., $9.80 ; 1½ in., $11.80 ; 2 in., $15.30.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90 ; No. 2, and larger, $4.65 ; snowshoes, No. 0 to No 1, $5.15 ; No. 2 and larger, $4.90 ; steel No. 0 to 1, $5.35 ; No. 2 :and larger, $5.10 ; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30 ; 4, $3.80 ; 5, $2.75 ; 6 $3.30 ; 7, $3.05 ; 8, $2.85 ; 9, $2.75 ; 10 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $8.75 ; grass, $1.70.

Iron Washers—Full box, 40 per cent., smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15 ; ¼ in., $2.30 ; ⅜ in., $2.35 ; ½ in., $3.15 ; ¾ in., $3.80 ; 1 in.,$5.45 ;1¼ in., $7.45 ; 1½ in., $8.95 ; 2 in., $11.55 ; 2½ in., $18.40 ; 3 in., $24.15 ; 3½ in., $32.25, 4 in., $36.75; 4½ in., $42.50 ; 5 in., $47.50 ; 6 in., $61.50 ; 7 in., $95.50 ; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6 ; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7 coppered, $9 ; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope.—Sisal, 8½c; Pure Manilla 10¾c; British Manilla, 8½c; Lath yard, 9¼c.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½ ; brass, 77½ ; round head, iron, 82½ ; brass, 72½ ; coach, 67½ per cent.

Terne Plate—I.C., $9.75 ; I.X., $11.75

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25 ; ½ box, $5.50; I.X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $13.50 ; ½ box, $8 ; I.X., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½ ; pieced, 25 ; japanned ware, 35.

F. E. MUTTON RESIGNS.

Toronto, Ont.—Frank E. Mutton, manager of the Canadian district of the National Cash Register Co., has resigned his position. He has served eighteen years with the N.C.R., ten years in the capacity of Canadian manager. Mr. Mutton's plans for the future are unsettled, it being his intention to take a rest. He will take a trip through Europe shortly.

The Canadian N.C.R. selling staff had a farewell convention on Saturday, February 3, at which they presented him with a beautiful gold hand-painted vase, as a further token of the pride and esteem they hold for their chief.

Weekly Market Report --- Metals

FIRMNESS NOTED.

A firm tone is noted all through the metal market, a slight decline in tin not being accepted as any evidence of weakness. Spelter and lead are particularly firm at present writing. In connection with spelter, it is said that a number of smelters are sold right up until May.

Short stocks are reported in a number of lines but nothing serious has developed.

MONTREAL.

Montreal, Feb. 16.—These are quiet days—and as this is the quiet season nobody expects an extra large amount of business to be done. Not a great deal of buying is reported, and it has been said that the lack of snow in certain districts, which is often blamed for a temporary cessation of busy times, is to blame in this instance also.

A firmness has characterized the market. Tin has had its little ups and downs, as usual, and, while a little firmer at 46c, no change in price is made from that quoted last week.

Raise Has Been Held.

Lead—The raise in price which was noted last week has held good, and no change is noted. Business appears to fulfil expectations, considering the time of year.

Copper—One or two large orders have been received for this metal, but the volume of business done cannot be designated as large. Prices remained unchanged.

Tin—Tin has had a rest during the past week, as far as fluctuations are concerned. It has not jumped around in its usual manner, although it has not been quite still—this would be well nigh impossible. Price remains the same at 46c.

Spelter—While it is true that there is not much spelter to be had, this is not affecting the market, owing to the fact that the demand is not great. Any sudden demand for this commodity might cause a change in price, but it is expected that before this demand makes itself apparent the supplies will be augmented.

Iron—While this metal may be said to occupy a place entirely different to the one above mentioned, the condition of the markets seem to be somewhat similar. There are no very large stocks on hand, that is certain, but it is thought unlikely that any shortage will occur.

TORONTO.

Toronto, February 16.—The metal market shows greater activity than at any time since the first of the year. In fact, trade is gaining impetus with the advance of the season. Each week sees a larger consumption in practically all metals.

A firm tendency is noted in all metals with the exception of tin where a fractional drop has been made. Supplies are sufficiently ample to relieve the metal supply houses of all worry, even if the demand has exceeded the records of previous years.

Tin down ½ Cent.

Tin.—The tin market has been erratic. A drop on the London market brought about a reduction of ½ cent in the local price. Despite this fact, however, it cannot be said that tin is weak. There are practically no bears in the market. The all patent increase in the world's consumption and the equally apparent absence of new sources of supply has brought about an impression that tin is up to stay. The price may fluctuate up and down on a narrow scale but the general tendency seems to be upward.

Locally there has been a good demand for tin.

Lead Very Firm.

Lead.—"Very firm" expresses the present state of the local lead market. The weakness noted a few weeks back has been recovered from most effectually and there is no trace at present of another break. Big business is being done locally. Stocks have remained light as a result of the large consumption but no fears are expressed on that score.

Still Active.

Plates and Sheets.—The demand is as active as ever. Last week it was stated that the consumption had attained to record figures and subsequent business has borne this out. For the time of year, there is a heavy consumptive demand, which is being met, in some cases, with difficulty.

Copper.—Locally copper has been firm. This condition has also obtained, due to the fact, in all probability that the metal has been improving statistically. The reports are encouraging to both buyers and sellers.

The demand here has shown an improvement quite in keeping with that of other metals.

Sold Up to May.

Spelter.—Spelter is very much in demand; perhaps more so than in any other branch of the metal industry. It is reported that many smelters are sold out up until May and the output of all others is in heavy demand. Here spelter has been going strong. The price naturally has been firm and, considering all circumstances, an increase does not seem improbable before long.

Steady Demand.

Pig Iron.—There is a steady demand for pig iron in carloads. Prices remain unchanged as follows:—Canadian Foundry, No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $50.25 for Clarence No. 3. Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

GOOD TREND GENERALLY.

Cleveland, Ohio, Feb. 15.—The Iron Trade Review to-day says:—

Despite the fact that the pig iron market has remained dull almost to lifelessness, furnace operations in some districts have increased, and production on a heavy scale is being maintained steadily, with shipments corresponding to a large extent to the output. Absence of any considerable buying is not shown in the attitude of the furnace interests, for prices hold fairly firm in face of the show of dullness. Semi-finished steel demand continues at a high rate of production and consumption, the bulk of which is going into the lighter finished lines, and prices are firm. The heavy demand for plates and shapes on orders in the hands of makers has been unbroken and mills are well supplied with bookings for some months, but new business is not appearing yet, except in tentative form and this has caused some interests anxious to secure a share of the business going, to offer inducements. Slightly better showing is made in the tin plate trade, where orders are being placed more freely and a better tone is noted in the transactions. What weakness has been developing in this line, it is believed will have been effectually checked by the appearance of the usual spring contracts covering a large volume of business.

Weekly Market Report --- Hardware

STEADY BUSINESS.

It was not anticipated that February would prove a brisk month, but such is turning out to be the case. There is a steady business being done in all lines. Shipments are reported to be heavier than usual at this time of year, and the booking for spring delivery presages an active spring trade.

MONTREAL.

Montreal, Feb. 16.—Among the hardware jobbers the demand for winter lines is giving way to the spring and summer lines. Skates and similar goods are no longer asked for, and other lines are taking their place. A large number of orders for lumbermen's calks for early spring use are now coming in, and the fact that the warm days will soon be with us again is evidenced by enquiries for lawn mowers and ice cream freezers.

Business in general is reported to be good, and steady buying appears to keep the jobbers well satisfied with trade.

The market is firm in tone, and no price changes have been noted.

Heavy buying is reported in sap spouts, pails and kindred lines for the sugaring season. The sap will commence to run in a few weeks now, and retailers are stocking up in anticipation of a good season.

Spring Lines—From western points orders are now coming in for lawn mowers, screen doors, fence wire and other spring goods. The demand in the east for these lines has not developed to any extent yet. Enquiries are being received and advance booking has become general.

Builders' Hardware—While the season is still a little early, builders' hardware has started to move well. Orders from the city are increasing in volume almost daily, indicating that the buildng season has begun briskly. A continued spell of mild weather will cause these lines to move freely. There will be an immense amount of building started all over the country as soon as spring opens up. Jobbers express themselves as quite satisfied with the amount of orders coming in at present moment.

General shelf hardware is moving well. There has been a steady consumptive demand right along; in fact, the usual midwinter slump not having manifested itself as markedly as in former years.

Household Goods—Some good assortments of enamel and tinware have been sent out. The market is firm in tone.

Sporting Goods—This is a slow line just now. The demand for hockey supplies is practically over. Spring and summer goods have not arrived yet to any extent.

TORONTO.

Toronto, Feb. 16.—Although February is always conceded to be one of the dullest months of the year, if not the very dullest, the local wholesale houses are not finding any room for complaint in the volume of business being transacted at the present time. Trade has been surprisingly well maintained. There is no particular line which is busier than others, orders being impartially distributed over all lines more or less. "We are doing a good sorting business in everything," was the way one jobber summed it up.

Prices are steady and there does not seem to be any reason to anticipate any immediate change in level, although it is felt that, in some lines, the prices are lower than the situation warrants.

Seasonable Goods.—The number of orders sent out this week which contained any winter lines were few in number and small in bulk. The slight thaw of the last few days led to a certain demand for snowshovels, and the wholesale houses shipped a few. It is quite apparent, however, that trade in such lines has practically come to an end.

Spring Goods Shipped.

Booking continues brisk in spring lines, and a little shipping is being done. Poultry netting and goods of a similar nature are now being sent out, although only in a few cases. In about a week or ten days shipments of spring goods will start in real earnest.

Building Goods in Demand.

Builders' Hardware.—There has been a systematic and highly satisfactory demand for builders' hardware and supplies. Enquiries indicate that there will be an exceptionally brisk spring demand.

Jobbers report that they are selling a large amount of roofing and building paper at the present time. Big shipments are being made to all parts of the province.

Household Goods.—Demand is getting larger in all lines of household goods. Enamelware, tinware and dairy supplies are being shipped out in large bulk. There is a particularly steady call for dairy and laundry supplies. Spring booking is active in refrigerators and ice cream freezers.

Heavy Hardware.—Booking is now exceptionally active in all lines. Nails are in good demand. Price quotations are:—Discounts on carriage bolts, 3/8 and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Dull Season Reached.

Sporting Goods.—Business cannot be said to be very active. The call for skates and hockey supplies is now light; in fact, has just about come to an end, only sorting orders of rather slender proportions being placed. At the same time, the spring demand has not made itself felt to any extent yet. Orders are being booked for future delivery for baseball goods, lacrosse supplies, etc. Rifles, revolvers, ammunition and trapshooting supplies are not in large demand yet, though interest is beginning to manifest itself.

Catalogues and Booklets

DEMING SPRAY PUMPS.

The D. Deming Co., Salem, Ohio, have issued their 1912 catalogue of spray pumps and accessories. It is neatly printed and most completely illustrated, containing a great amount of information, easily accessible. The book is printed in two colors, with an attractive three-color cover. The fact that compulsory spraying laws have been adopted in some sections serves to focus attention on these lines.

TOOLS AND FREEZERS.

North Bros. Mfg. Co., Philadelphia, Pa., have issued their 1912 catalogue, showing their "Yankee" tools, ice cream freezers and other lines. It contains 117 pages and makes a neat and serviceable booklet.

Among the lines shown are ratchet screw drivers, automatic drills, breast drills, tool sets, push braces and all attachments for these tools. In addition to the ice cream freezers, the catalogue contains descriptions of packing tubs and cans, ice breakers, ice shaves, ice chippers and fluting machines.

SCREEN DOORS.

The Continental Co., Detroit, Mich., have issued a neat catalogue illustrating their full line of Continental screen goods.

Late Bird Secures Late Stove Trade

Dealers Who Keep Ranges on Stock Through the Winter Reap Good Profits—Some Concrete Instances — A Smith's Falls Dealer Sells a Furnace in Mid February Because He Had One on Hand—A Montreal Stove Man Sells Several Heaters in the Leap Year Month Because He Could Supply These Immediately—It is the Part of Wisdom to be Prepared for a Winter Demand.

Boy Scouts, now to be found in hundreds of towns and cities throughout Canada, have as their motto, "Be Prepared." It is refreshing to discover a motto in good English instead of Latin, Greek, or some modern foreign language, but aside from this the Boy Scouts, tersely expressed principle is appealing. It applies to men handling stoves as much as it ever applied to the Scouts. To be prepared means to be ready for profit or loss, but by being prepared the profits are multiplied and the losses cut in two. Experience in the stove business has shown this.

So much has been heard about that early bird, that people have come to think that the worm caught is the only one to be had. But there are late worms too, and the bird which stayed up after the dew fell would find a good harvest too. The pickings might not be quite so easy, yet they would be good pickings all the same.

This is the case with the men who handle stoves. Those who are in the field early, get the first of the fall demand—and a fine demand it is. But there is a late demand—a demand which is even now being felt—which comes to those who are prepared.

Afraid of Left Over Stock.

There are dealers who are exceedingly fearful of having a stove or two left on their hands. They make their late orders small, so that they will sell completely out, and not be forced to carry one or two ranges over until the spring. Undoubtedly there is something to be said in favor of this method of procedure, but there is also much to be said against it; and principally it may be remarked that selling out completely leaves a dealer unprepared. If a customer wants a stove he can not supply it. So the customer's faith in the hardwareman is somewhat shaken, for there is nothing so annoying as to ask for a staple and to find the dealer "out of it."

Now there is no particular reason why a hardware man should dread being left with a stove or two on his hands. These do not depreciate. The merchant would need some new ranges for the spring any way, and having a model or two left merely assures him of having a stock to meet the very early demand. Then those left over models may not be left over as long as might be expected. Take the case of Mr. Leacock, of Smith's Falls, as an example.

How a Furnace Was Sold.

Mr. Leacock deals in furnaces as well as stoves, and reports that this winter has been one of the busiest he remembers. It is not strange that this should be so, for Smith's Falls has been going ahead rapidly. Last summer a number of new houses were erected, and in a good number of these furnaces were installed. But near the last of the season Mr. Leacock placed another order, which he expected would leave him with three furnaces on his hands. He was willing to carry that many over, for he knew he would be able to dispose of them in the spring. But there will be no need of this spring disposition. Here it is only the middle of February, and every one of those furnaces has been sold. Two went in houses late in being finished. It did seem that one was to remain on stock; but last week, after the severe weather, a man entered Mr. Leacock's store and declared he "was not going to freeze any more." "I thought those stoves would heat my house," he declared. "But they won't. I want a furnace, and the quicker you can put it in the better."

Where Order Might Have Been Lost.

Now the furnace which remained in stock just enabled the filling of this order. Had his supply been exhausted, Mr. Leacock would have lost that job. No man would wait for a furnace to be brought in at this time of year. "Why," he would think, "it will be spring by the time it gets here and is installed."

But not only would the order have been lost, if there had been no furnace on hand, but the would-be purchaser undoubtedly would have been disappointed. He would have been displeased with Mr. Leacock, and displeasure on the part of customers means loss of profit for the dealer. Certainly it pays to be prepared.

This example relates to furnaces, but much the same thing is true of stoves. A Montreal dealer tells of three men hurrying in for heaters which the cold weather had made them feel were necessary. This depleted his stock; but he secured two more models, and sold them in the same way within a week.

Another Hurry Up Call.

A Richmond hardwareman tells of a sale he made late in January. The range in a farm house proved faulty. Neighbors recommended a model they had bought early in the fall, and the farmer went to town that Saturday to bring back the stove. Had the dealer not had the range in stock that would have been a disappointed farmer, and a good sale would likely have been lost.

But while it must be conceded that to have models on hand the winter through is the part of wisdom, it must also be admitted that to carry too large a stock is a mistake. It means tying up a lot of capital, and prevents the dealer getting the advantage of any change in price, or any newer patterns which may come in spring.

Keep Stoves on Castors.

It is also impossible—or at least unwise—for the hardwareman to give stoves as much prominence in winter as he does during the spring and fall. Yet he must have his models where he can readily show them to an inquirer. R. Hawkins, of Smith's Falls, says the best way he has discovered of attaining this end is by putting the stoves on castors. Then, though they may be rather hidden by other goods, they can be wheeled to a vacant floor space in a moment. This system has worked well for Mr. Hawkins, for he has sold a number of ranges this winter.

The stove problem is widening with the passing years. Still spring and fall are the great periods, but the dealer who devotes all his attention to these two seasons, and who neglects heaters, ranges and furnaces at other times, is going to be the loser—moreover he will not only lose the sale of a range or furnace, but he will lose the prestige which that sale gives. Possibly in no other line do sales bring sales so largely as they do with stoves. Indeed, all things considered, it would seem that to secure the best results the man handling stoves can do no better than to remember the Boy Scouts' motto, and "be prepared."

Methods of Retailing Paints and Varnishes

Paint Has Prevented Winter Stagnation

Campbellford Merchants Have Shown What the Dealer Can do to Keep Business Active in the Inactive Months—The Man in the Store Can't do Everything to Effect Sales, but he Can do a Great Deal—Women are Becoming Very Large Winter Buyers.

"It's the man behind the counter who sells the paint."

This somewhat epigramatic statement was made by the manager of a Peterboro hardware store this week, when discussing the activity in mixed paints. He meant, by his assertion, a good salesman will be able to convince a customer that the line he carries will be quite satisfactory. There is something in the contention of this hardwareman, but there is also something to be said on the other side.

A Salesman's Duty.

"A man or a woman comes in here and asks for a certain class of paint," remarked the Peterboro merchant. "Suppose it is a line we do not carry. Does the salesman say, 'Madam, we do not carry what you want?' If he did he wouldn't sell for me long. What he does do is to show a line which he knows meets the requirements of the purchaser. He will say, 'This is not what you asked for, but it is practically the same thing.' He can tell the strong points of this paint or varnish to show that it is quite as good as that for which a request was made."

The Use of 'Something Else.'

Undoubtedly sales are made this way, and undoubtedly it is wise for salesmen to show customers 'something else' if they have not got the article asked for. Nevertheless the very fact that another line was requested shows that it is not only the man behind the counter who effects the sales; but that there is some other force — something which has brought a certain paint so vividly to the attention of the purchaser that he goes to the hardware store and asks for that one particular line. Usually it is advertising which has done this, and such resultful advertising is of great importance to the hardwareman. It not only helps him with his paint sales, but with other lines, for people coming to a store to buy paint are likely to purchase a brush or some other article before leaving.

Three Points to be Considered.

Recently the sales manager of a Montreal paint house was advocating the use of his goods before a number of hardwaremen. "You have to consider three things in determining upon your line," he said. "Quality, margin of profit, and advertising helps." This man, it would seem, summed up the whole question in a sentence.

No, it is not the man behind the counter alone who sells the paint; yet the man behind the counter—working with the manager or owner of the store—can do much toward booming sales. A fine example of this is presented in the Town of Campbellford.

What Competition Has Done.

Competition, it has been said, is the life of trade. Certainly, competition in Campbellford has resulted in some fine hardware stores, and in every one of them is paint handled largely.

"How has paint been going this winter?" The question, asked of many hardwaremen, brings forth the statement that there is nothing doing in winter. Such is not the expression of these Campbellford dealers. They do state that the winter is a quieter season than spring and fall, yet one and all state that they have had a good sale the winter through. Undoubtedly they have themselves to thank in no small measure for the continued demand. With the coming of snow they did not relegate paint to the background. One and all kept it on the shelves near the front. They kept the shelves well stocked, moreover, so that those coming inside would see lines which they could well use in the cold weather, when regular work about the farm was impossible.

Much Buggy Painting.

T. S. Tait has felt a good demand from the farmers, who are taking the opportunity winter affords to brighten up their buggies. Also, he has sold a good deal of barn paint—a line which he has brought prominently to the fore. Painting outside in frosty weather is not a particularly wise proceeding, but there have been many days this winter when the frost was not severe, and when small jobs in outhouses and similar buildings could well be done.

Floor paint, too, has sold readily, simply because it was kept well before the people. Not a great many will think of painting their floors if they don't have this suggested by paint displays in the hardware stores, or by seeing floors which have been painted. That is one great thing about winter painting. There is more visiting done at that season of the year than at any other. Women see the improvement their neighbors have made by the use of a pot of paint, and they just naturally decide to do something similar.

Women Large Buyers.

E. T. Morton, another Campbellford hardwareman, declares the women have been large buyers of paint this winter. D. W. Douglas remarks the same thing, while A. Owen declares the farmers' wives are getting to be larger users of ready-mixed paints every year.

And the women always will be large buyers of paint, and its possibilities, is brought to their attention. A woman's great interest is her home. Perhaps she can't induce her husband to paint the outside of it, but she can brighten up the interior herself; and brighten it up she will. Especially is she anxious to do this in winter, for a variety of reasons, ranging from her desire to utilize the greater spare time she then has to the desire to have the house spick and span for the inspection of her interested visitors.

No Stagnation.

Men, too, have their delight in painting things. No wonder, therefore, the Campbellford dealers have obtained results by keeping paint before the people. The only pity is that others have not taken the chance that has been theirs to keep the paint trade from stagnating during the winter.

START EARLY CAMPAIGN.

Alliston, Ont.—The Cain hardware store is conducting a campaign at the present time to boost their sales of interior finishes. It is contended that, as the housecleaning season is not so far off now, the householder should commence to prepare for that momentous event. One of the measures proposed is to use a lacquer handled by them for the general improvement of the interior of the house. In a recent advertisement it is pointed out that this lacquer is "designed for beautifying and preserving old furniture, marred and soiled woodwork, dingy and dirt-stained floors and a hundred and one varnishing odds and ends that, worn and abrased, disfigure the living rooms or clutter the storeroom or attic. It not only restores old and lustreless wood surfaces to their pristine tone and tint,

but covers up original defects and oblitrates the scars of usage and abuse."

This course shows that the firm are determined to create an early demand for paint specialties. The argument that people should brighten the interior of the house before housecleaning is a good one. By doing so, they would lighten the labors of housecleaning and improve the results very materially.

CHANGE AT A. RAMSAY & SON.

An important change has just taken place in the firm of A. Ramsay & Son Co., of Montreal, a firm, by the way, which is this year celebrating the seventieth anniversary of its inception. Edwin Dowsley, for some years General Manager and Secretary Treasurer is retiring, and Walter B. Ramsay is taking the position thus rendered vacant.

WALTER B. RAMSAY,
Who Becomes General Manager and Secretary-Treasurer of A. Ramsay & Son Co., Montreal.

For well over thirty years Mr. Dowsley has been with this pioneer paint house. It was not a young firm by any means when he joined the staff, yet he has seen the business grow larger and larger, and has watched the territory covered, widen and widen, being himself responsible in no small measure for this growth. Mr. Dowsley grew with the concern. From a junior in the office he rose step by step, until the knowledge which he had gained, and the ability he had developed, made him the man for the General Manager's chair.

Mr. Dowsley now feels that he needs a rest, and intends taking a good holiday.

Walter B. Ramsay, who is assuming the duties of Manager and Secretary-Treasurer, is a young man, yet he too has had a wide experience—an experience stretching over a dozen years. Like Mr. Dowsley he started in the business at an early age, and at the bottom, working steadily up from post to post.

As well as understanding the office work thoroughly, Mr. Ramsay has passed through the factory and the warehouse. He knows what is in Ramsay's paint and how it is made. He has also been on the road, travelling through the West for three years. During this period Mr. Ramsay's headquarters were in Winnipeg, but for the past little time he has resided in Montreal, where he will remain to do his utmost in furthering the interests of this old and successful house.

DISPLAY OF WALL FINISH.

Perth.—Rogers & Nicoll are now booming the sale of a finish for walls and ceilings. In one of their windows they have a great display of this material, numerous cards telling its various uses. The display is simple but attractive, and Mr. Rogers says it is bringing results.

VISITED TORONTO OFFICE.

Joseph R. Henderson, president and managing director of Brandram-Henderson, Ltd., paid a visit to the Toronto office of that firm this week. He returned east Thursday night.

HAD KEPT THE LAW.

Kingston, Feb. 14.—"The Kingston hardwaremen are observing the law in this respect, and the second-hand dealers will have to do so as well."

This was the comment made by Magistrate Farrell, in police court, in hearing the case of Henry Sugarman, second-hand dealer. The latter was charged with selling a revolver to the late Charles E. Heroux, of Casselman, Ont. Heroux committed suicide, in the waiting room of the Kingston & Pembroke railway station, a few weeks ago. Police Constable Samuel Arniel made an investigation, found that the revolver had been purchased at Sugarman's store, and thus had the accused summoned to the court, charged with a violation of the Offensive Weapons' Act, passed by the legislature, in April last. This was the first case of the kind to come before the magistrate.

Heroux went to a number of the local hardware stores, and endeavored to purchase a revolver, but the hardwaremen refused to give him one, as he did not have the necessary permit from the chief of police as is required according to the Act. Finding that he could not get what he wanted, in the hardware stores, he then went to Sugarman's store, and there made the purchase of the fatal revolver.

Owing to the fact that he had a good record, the magistrate allowed Sugarman to go on suspended sentence, but gave out a general warning to all dealers that future cases would be severely dealt with. He stated that the minimum fine was $25. In disposing of the case, the magistrate paid a warm compliment to all the hardwaremen, stating that they had kept the law well in respect to the Act.

Turpentine Limitation Advised

Limitation is the keytone in the turpentine industry. It seems to be generally recognized among the producers of pure spirits of turpentine that curtailment of the production would result in an improvement of conditions generally.

There has been a larger stock on hand at the primary points of distribution this winter than usual. This has been due, not so much to the fact that production was so much larger, but rather because the extraordinary high price of turpentine last year brought substitutes to the fore and reduced the demand for pure spirits. The price is now lower than the producers care to see and they are inclined to talk curtailment with more earnestness than ever.

The significant statement was made at a recent meeting by a manufacturer interested in the new cup system of gathering turpentine that his company sold no fewer than 24,000,000 cups last year and that this output could be increased fifty per cent. during the coming year, but the company preferred to limit their production to last year's figure. As Laws exist now in some sections which compel the use of the cup, this looks like a highly effective measure to enforce curtailment. Limitation of the sale of cups would undoubtedly result in the limitation of the output.

Another tendency noted is the unmistakable trend toward conservation. Old methods of gathering turpentine are being discarded and in some sections, as stated before, are illegal. New methods tend to lengthen the life of the trees, decrease the danger of fire and render the percentage of gum lost very much smaller. This conservation of resources had pretty effectually banished the fear that the demand would rapidly outgrow the visible supply.

Wise Dealers Handle the ML Line Because They are Honest Goods That Build Trade.

Our New ML DECORATIVE AID DEPT. Helps You to Get Trade.

ML Paints—make good because they are made good—there's 19 years of practical experience mixed into them. **ML Paints** defy weather and last, and last, and last!

ML Floorglaze—a brilliant, quick drying, flint hard finish that withstands scruffing and scratches. Washable like glass. In solid and transparent colors.

Elastilite Varnish—the one varnish you can guarantee just as though you were its maker. Good for use indoors or out. Elastilite will get and hold the best varnish trade for you.

GET OUR HELP
Our Decorative Aid Dept. answers your problems in house decoration and painting with free color suggestions, estimates, stencil designs, etc. Stencils sold. You get the right goods in the right shades for best effects in any house. Send for Booklet.

Weekly Market Report --- Paints

AN ACTIVE TONE.

Everything points to an exceptionally busy year in paints, varnishes and oils. Business booked for spring delivery is well in excess of the usual amount, and present shipments are undeniably heavy. On the whole, the situation is good and the manufacturers express themselves as well satisfied.

Prices have remained remarkably steady for the last fortnight. Coal oil is quoted higher.

MONTREAL.

Montreal, Feb. 16.—"If the amount of business done this year in comparison with that done in the same period in previous years can be taken into consideration, this is going to be the best season we have ever known." These are the words of a prominent paint man in Montreal, and give a very good idea of the feeling which exists among the manufacturers regarding prospects for the coming season. All the factories are busy, and the shipping departments are kept alert in order to keep pace with the orders which are now coming in in large quantities. Many of these orders call for immediate shipment and the manufacturers have their stock arranged so that goods can be shipped on the same day as order is received.

Prices have been steady—the only change to be noted is a reduction of 2c in the price of linseed oil. This action has been taken by the jobbers without any reduction in price to them from the mills.

Oil Down Two Cents.

Linseed Oil—The price is now quoted at 93c for raw and 96c for boiled—a reduction of 2 cents. The reason for this change is that oil has not been showing any great strength. Demand, although steady, has not been out of the ordinary for this season of the year. Quite a little booking is done for spring delivery.

Activity in Paris Green.

It is stated that there has been heavy booking in paris green, despite the fact that the unrest at present affecting the American market has made it impossible for a definite price to be arrived at here. Most of the orders, of course, are for spring delivery. The price situation is a little uncertain. Some state that the depressing influence of the American trade will not be felt here to any material extent.

Steady Turps Trade.

Turpentine—No developments have taken place in the turpentine situation during the past week, the price remaining the same at 70 cents. Conditions are reported to be the same as at last writing. Business is fairly steady. Some orders for immediate requirements have been filled, but the bulk of the business is for spring delivery.

White Lead—A fair amount of white lead has been sold, but the big orders will not commence to arrive until the weather moderates a little. Building operations will then commence. There can be no doubt that the severity of the weather has served as a drag on the market. The price has remained firm and presents no prospect of a change in that respect.

A Heavy Demand.

Mixed Paints—The greatest demand is being shown in this line at the present moment. Orders are coming in steadily and, while the bulk is for April 1 shipment, quite a little is for immediate shipment. As a result, the manufacturers are busier than usual at this time of year.

TORONTO.

Toronto, Feb. 16.—The milder weather has brought a larger volume of business than for some weeks past. There is a good all-round demand for immediate requirements, although the bulk of the business is for April 1 delivery.

Manufacturers and jobbers speak confidently of trade prospects. They report that business so far has been in excess of last year and that, so far as they can tell, the spring booking shows a bigger increase than can be accounted for by the steady growth of the paint industry in Canada. In fact, the situation is very satisfactory in every way.

The market has been exceptionally steady during the past few weeks, practically the only changes being in coal oil and gasoline.

Turpentine Steady.

No developments are reported in turpentine, the same price level, 68c, being maintained. There have been fluctuations on the primary market, both up and down, but never going more than a cent either way, and local quotations have not been affected, therefore. It is difficult to predict just what trend the future will take. Foreign consumption of American spirits has been lighter this year, but reports from France indicate that the demand is heavy there and that the stocks are not larger than in other years. At Savannah the stocks are still heavier than usual. It is probably safe to say that no radical change in price either up or down need be expected for some time.

Linseed Oil the Same.

The price asked for linseed oil is still 94c for raw and 97c for boiled. Sales are small and it is probably the fact that demand is purely nominal that keeps the price at the present level.

Increases Here.

There have been advances in the price of coal oil and gasoline. Petroleum prices locally are now: Prime white, 12½c; water white, 14c; Pratt's Astral, 15½c. The consumption of coal oil is now about at its highest level.

Motor gasoline is selling at 18c in barrels.

White Lead Firm.

The price of white lead remains firm and there seems to be every reason to believe that it will stay that way. Pig lead seems to have come back to a permanently strong basis again, thereby precluding any possibility of lower quotations on white lead.

Glass—A small amount of business is being done and considerable spring booking is reported.

Putty—Business has shown more activity and some spring booking is being done. Standard putty is quoted as follows: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same: Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

Prepared Paints—Spring booking is the order of the day. The travelers report that business prospects seem good and they are turning in large orders in proof of that statement.

Varnishes are equally active.

MONTREAL HAS BUS SERVICE.

Montreal now boasts of a motor bus service. A motor bus owned by the Taxi Cab Co. is now running from Green Ave., Westmount, to Beaudry St., in the east end by way of St. Catherine St. A fare of ten cents is charged, and as the service is quick, a good business is being done, and it is expected that a better service will be put on shortly. The bus presents a very fine appearance, and is of the latest model costing $6,000. At the head of the company which is inaugurating this service, is Joseph Versailles, who will be remembered as an old hardware man. Mr. Versailles' rise has been rapid, as it is not very many years since he was connected with one of the wholesale hardware houses in this city.

B-H Paint Calendar, size 11½ in. by 8 in., printed in four colors

Mr. T. M. Nash, agent for B-H "ENGLISH" PAINT at Wellington, Ont., writes under date of January 19th, 1912, as follows:

"Am very much pleased with B-H Paint Calendar for 1912, and am sure it will be a big sales help to all B-H Paint Agents.

"I may say that I have been called on by a good many other paint firms trying to get me to take up their agencies, but I would not think of it, for I know that B-H 'ENGLISH' PAINT is the very best made. I can always bank on my customer's paint trade after he buys his first can of B-H 'ENGLISH' PAINT."

This attractive calendar is mailed to all property owners whose names are given us by B-H "ENGLISH" PAINT Agents. This calendar is part of a mail advertising campaign that we will conduct in your territory that will bring paint buyers to your store, and as Mr. Nash states in his letter printed above, "you can bank on your customer's paint trade after he buys his first can of B-H "ENGLISH" PAINT.

B-H "ENGLISH" PAINT is 70% Pure White Lead—30% Pure White Zinc---mixed ready for use with Pure Linseed Oil, Pure Turpentine and dryer and nothing else.

Dealers Can Reap Good Profits

BY SELLING

Rogers' Portland Cement

This is a cement upon which every architect can absolutely rely as it has proved its superior weather-resisting qualities by its past service.
ROGERS' PORTLAND CEMENT has great strength, sets evenly and is absolutely uniform in action.
All orders receive prompt attention. Our service is quick and efficient.

ALFRED ROGERS LIMITED

28 WEST KING STREET, TORONTO

N. J. DINNEN & CO., Western Sales Mgrs., WINNIPEG

This Illustration was made from a photograph of a Bowser installation for Mr. Samuel Hobbs, 1434 Queen St. W., Toronto, Ont.

This system handles
Canadian Coal Oil
American Coal Oil
Raw Linseed
Boiled Linseed
Turpentine
Gasoline
Benzine
profitably.

It pays him and it will pay you.

You Can Make a Better Profit on Paint Oils if You Handle Them Right

Now is the time to get ready for your spring paint trade. Investigate the Bowser NOW. Your fellow merchants are using them profitably—so can you. Put in a Bowser and get a bigger profit next year. Ask for book No. 15.

Amatite ROOFING

Mineral Surfaced—
Needs No Painting

EVERYTHING about Amatite appeals to the man with common sense. He can see its superiority at once—the real mineral surface *which never needs painting;* the two layers of Pitch which is the greatest waterproofing material known; the two layers of heavy Tarred Felt—all these contribute to the popularity of Amatite.

We can make Amatite better and cheaper than anyone else on account of our greater facilities, and consequently we sell it at a surprisingly low figure.

Simply the fact that it needs no painting is enough to make a man sit up and take notice—especially the man who has spent time and money in painting and repainting smooth surfaced roofings.

Every dealer should push it. Write to-day for further information.

Queen City Water White Oil

GIVES PERFECT LIGHT

FOR SALE BY DEALERS EVERYWHERE

See The Pratt & Lambert Varnish Exhibit at Guelph

If your varnish sales for last year didn't come up to expectations—if you feel that your varnish department should be paying you more profits, see the Pratt & Lambert exhibit at Guelph. Talk to the Pratt & Lambert representative. Let him show you how the Pratt & Lambert Line means increased varnish sales and greater profits.

A Promise Made Good

300 Per Cent. Sales Increase Selling Assistance

Last Fall we promised Pratt & Lambert Dealers to triple the sales on Vitralite, The Long Life White Enamel, in three years—just as we have done with "61" Floor Varnish before. Odds were against us. Trade conditions were said to be bad. We went ahead with a systematic, definite, mapped out campaign of action—going straight after the varnish trade through every possible conceivable channel.

We reached the painters with our special Pratt & Lambert Painters' Magazine, Varnish Talks, reaching practically every painter in the Dominion – also through advertising in the painters' papers.

Then we went after the ultimate consumer through the great magazines reaching thousands and thousands of individual varnish users in the Dominion.

In addition we connected all this up with the dealer's store—with elaborate window and store display matter—with booklets, slips, newspaper electros, etc.

We went further. We furnished the dealer with personal service. Wrote his advertisements for him—planned special local campaigns for him.

Then our Architectural Department got into action. It went after the Architects to get them to specify Vitralite and Pratt & Lambert Varnishes on all new building work.

We Went Past The Mark

Now you ask how near to that 300% on Vitralite, our three years' mark did we get in these few months ? **We not only got near it—we got it—got it in six months !** And all this in the face of adverse conditions. That's how the profits are made for Pratt & Lambert dealers—how they can be made for you.

Pratt & Lambert Varnishes pay large yearly profits through quick turnovers and quality that makes trade that sticks. We want you to consider this ; you must consider it or your competitor surely will.

And Now at Guelph

Find out ! Remember you can talk with us about your varnish business. We want you to have the facts. The rest we'll leave to your good judgment.

The Paint Proposition

IF all the paint and varnish advertising that is printed in the Canadian trade papers and elsewhere is read, it must be confusing to the reader to understand it. Practically every advertiser claims to have the purest and the best—claims his line is "superb," "supreme," a "sure winner." Apparently all a dealer has to do is to stock it and he'll become rich.

Plain facts and truthfulness count for more than high-sounding words and extravagant claims, we think. Here are a few simple facts concerning the paint that is most widely known and sold.

The Sherwin-Williams Paints are as good as paint can be made. They are not described as "Superior," "Superfine," "Extra," or even pure, because these high-sounding names are meaningless in the paint business, and every dealer or consumer of experience knows it. The paint with the highest sounding name is usually the one that is poorest in value and results; therefore The Sherwin-Williams Paints are called simply "The Sherwin-Williams Paints." They are in a class by themselves.

The Sherwin-Williams Proposition, which includes our entire line of products and our selling methods, has proved to be the most successful in Canada, in the United States, and in the export field, of any yet introduced.

That is why The Sherwin-Williams Organization is the largest—very much the largest of its kind in the world.

The Goods and the System did it—not claims, but *facts*.

Our chief aim and purpose is to continue to make our paints and varnishes as good as it is possible to make them, and to keep our proposition strong and effective. We aim always to go forward, and we can say in truth we have never gone backward. Our business is growing today in Canada faster than ever. We expect and intend it will grow still faster, because our proposition is stronger than ever, and, measured by results, is still the best.

Glidden

Challenges Comparison

Our terms are Sixty Days—some varnish houses give four months.

Why should you deal with Glidden?

There's just one answer, Mr. Merchant: The quality of the goods and the profits to you.

The Glidden discount is so much more generous than the discounts made by other varnish houses that *the discount discounts the terms.*

The discount we offer the trade on Green Label Varnishes, Stains and Specialties makes it possible for you to *make more money* absolutely regardless of four months' - five months'—or six months' terms, and Glidden's Green Label Varnishes are in a class by themselves.

Have you been reading our advertising in the painters' publications?

We challenge any painter in the land to send us a sample of any exterior varnish equal in quality to Glidden's M.P. Durable Exterior, or any interior varnish equal to Glidden's M.P. Durable Interior, or any floor varnish equal to Glidden's M.P. Durable Floor.

We are giving this challenge bold advertisement in the Master Painter, The Painter and Decorator, The Modern Painter, Practical Decorator, Painters' Magazine, Cement World, American Carpenter and Builder, etc.

That is the sort of challenge that shows *faith* in the quality of our goods, and the painters know it.

Write for our New and Most Generous Proposition to the Trade on Green Label Varnishes, Endurance Wood Stains, Endurance Colorspar, and Specialties. Use the attached coupon.

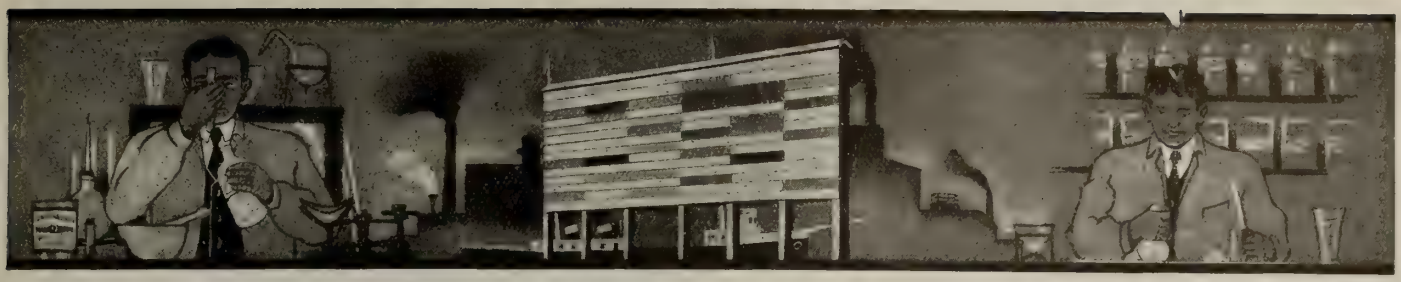
Name .....

Address .....



Why do the Martin-Senour Paints bring customers back?

See what we are doing to keep up their quality, then answer that question for yourself.

Our chemists test all Linseed Oil and Dryers before they go into our storage tanks. If they do not test perfectly pure they are rejected. This protection for the dealer takes a slice from our net profits, but we have found it pays in the long run to co-operate with him by looking out for his interest.

The finished product is thoroughly tested to withstand the bite of inclement weather — to defy the destroying elements of sun, rain, and the gnawing tooth of time.

Martin-Senour Paints are not merely a mixed compository, but they are paints that are built upon a scientific basis — to render a given amount of service.

Permanent Color is just as important to the dealer as the durability. Even though the paint may protect the surface, if the color fades the property owner thinks the paint has lost its protecting qualities. Every shipment of dry colors is carefully tested — if it comes up to the standard it is passed on to the mills, otherwise it is rejected.

We believe you can now guess the answer very easily.
Don't you think this protection is a feature that deserves your worthy consideration, and is a very good asset to your paint business?
We also have an advertising campaign that sends you *new customers.*
Let's hitch together, we'll make a good team.

Don't Take Any Chances

If your customer knows anything about varnish he will probably ask you for DOUGALL VARNISH. But if he is not well informed on the subject he will, in nine cases out of ten, be willing to be guided by your recommendation.

Don't take any chances with this man, Mr. Dealer, give him DOUGALL VARNISH and then rest assured that he will not be disappointed. You can also rest assured that man's faith in you is increased and that he will be all the more willing to accept your recommendation in the future.

If you recommend Dougall Varnish—your customer will benefit—you will benefit—and incidentally we shall benefit.

EVERY TOOL GUARANTEED

Maxwell's "Blue Belle" Washer

is easily the best of its type. The upper rubbing board revolves in one direction while the tub, with its rubbing surfaces, turns the opposite way, making it wash very fast. Powerful coil springs underneath the tub keep it going with very little effort on the part of the operator. A feature of the "BLUE BELLE" is that there is nothing about it which can possibly tear the clothes. Tub made of Red Cypress and finished in fine style.

A New Market

Every progressive and wide-awake dealer is looking for an opportunity to expand his business and add a quick-selling and profitable line.

In Our HARDWALL PLASTERS

You Have That Opportunity.

They cost your customer no more when on the wall than the old crumbly lime mortar. They are many times stronger and more easily mixed and applied. They save two-thirds of the time required for plastering and are not subject to the many troubles of lime mortar.

We can ship straight or mixed cars of

PARISTONE—Neat, Hair, Hardwall Plaster.
PULPSTONE — Wood-fibre, Hardwall Plaster.

Does the Public Know—Really Know—and Immediately Recognize the Varnish Labels on Your Shelves?

There's a tremendous advantage in selling goods that the customer knows.

With Berry Brothers' Varnishes there is something more than a known reputation.

The label itself is also known—known and recognized at sight through the pictures in our big-space magazine advertisements.

If you have Berry Brothers' Cans on your shelves you have varnish that practically sells itself. The customer sees in them an old friend that he is ready and willing to trust.

Berry Brothers' Business Builders

The Big-4 with which every dealer can most easily satisfy the quality-demands of his trade.

TRADE MARK **LIQUID GRANITE**
For finishing floors in the most durable manner possible.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Call For The Wrench You Need

You'll Find it in the W. & B. Line

Every little twist and turn of "W. & B" Wrenches has a meaning, resulting from some specific requirement. "W. & B" Wrenches are designed to the minute and have the distinction of holding first place wherever wrenches are used.

Look up some unusual wrench job then notice the trade mark on the wrench. Ten to one it's a **"W. B."**

The demand for these wrenches is growing as a result of satisfactory service. Tons of "W. & B" Wrenches are shipped to every part of the globe to meet the demands of exacting wrench service.

Get them from your nearest jobber or send order direct.

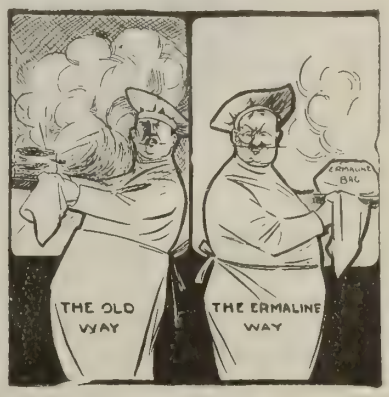
INTEREST HAS BEEN AROUSED



The public have heard about the new method of cooking with ERMALINE Paper Bags and are interested enough to try it.

The dealer can make money by stocking ERMALINE Paper Bags.

Your customers will buy them to try and will be so pleased that a steady trade will result.

REMEMBER

No Waste
No Dirt
No Odor

The food does not shrink as in ordinary cooking methods and in addition it is rendered more tasty.

SAMPLES FROM YOUR JOBBER— OR FROM

Edward Lloyd, Limited

508 Eastern
Townships Bank Building
MONTREAL

The **Western Union Telegraph Company** decided to supply all operators with typewriters. A Commission of eight expert Mechanical Engineers were appointed to examine into the merits of the best machines.

After a thorough investigation and comparison of all machines, in which each was subjected to the most severe and exacting tests, this Committee reported in favor of the Underwood.

10,000 New Underwoods Purchased At One Sale

The entire organization of the Western Union Telegraph Company will now be equipped with Underwoods. The order calls for 10,000 new machines—the largest purchase of typewriters ever made in history. The Underwood is the

WORLD'S BEST TYPEWRITER

It is made in many different models, for many different classes of work. It is the machine you will eventually buy.

United Typewriter Co., Limited, 7 & 9 Adelaide St. East, TORONTO
And all other Canadian Cities.

Corbin Glass Knobs

are like beautiful jewels in fine settings. Large variety of designs. Particulars on request.

SUCCESSORS
The American Hardware Corporation
NEW BRITAIN, CONN.

"Safe-Lock" Wire Fence

is the easiest fence to sell, because it is by far the strongest fence made.

The strand wires of the "Safe-lock" Fence are not kinked—thus each wire retains its full strength.

And just note how the stay wires interlock where they wrap the strand wires. This lock absolutely prevents the slipping of the stay wires along the strands or in any other direction from any cause whatsoever.

A local agency for the "Safe-lock" Fence will bring you the bulk of the fencing business in your locality.

Be wise—write us to-day for Catalogue and particulars.

Automatic Hand Power Vacuum Cleaner

Sells at an Attractive Price and Yields Good Profits

The "Double Tank" Means Less Work

The Double Tank (an exclusive feature of the Onward Automatic Hand Power Vacuum Cleaner) separates 95% of the dust without the use of screens, baffles or water. Only 5% of the dust is screened, which means the screening device offers but 5% resistance to the pump, assuring a very easily operated machine.

The Automatic Hand Power Vacuum Cleaner has the greatest air displacement, is the easiest to pump, easiest to empty, easiest to carry and is the most durable on the market, being made entirely of malleable iron and steel. We invite comparison with any other make.

An absolute guarantee accompanies each machine. Get our discounts and circulars.

The True Sportsman Wants the Best Rifle Made

The Ross "High Velocity" leads in all rifle essentials.

The possession of a Ross High Velocity is a matter of pride and its use a matter of enjoyment.

RETAIL PRICE, $70.00

Other Ross Rifles sell from $25.00 up

As these rifles are known to sportsmen throughout Canada there will be a steady demand for them all the year round.

Dealers will find it the part of wisdom to be able to supply a customer at any time.

Send for Catalogue and trade discounts.

ROBERTSON

SOCKET HEAD

WOOD SCREWS

have a new and very important feature in the square hole. It is a feature that wood workers are quick to notice, as it not only preserves the screw, but also saves much of their valuable time, as it does away with all possibility of the screwdriver slipping. It is certain to create a large demand in your vicinity after once introduced.

We also manufacture Hand Drivers, Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails, Wire and other high grade products.

Big Ben Store Helps

In order to enable Canadian dealers to get the maximum benefit from the Big Ben campaign now running in Canadian magazines, we are packing Big Ben specially for Canadian trade, six in a carton with a full set of store selling helps (two posters, two show cards, two metal signs.)

On an order for 12 we add a solid mahogany display stand. On an order for 24 or more, we print your name on dials, give the posters, display stand, and a beautiful metal sign lithographed in five colors.

Big Ben and his selling helps are being carried in stock by 54 wholesale Canadian distributors. We will be glad to let you have their names upon request. Any one of them will tell you Big Ben is the best selling alarm that's ever been put out.

In broken and dozen lots, $2.20 less 5%. In lots of 24, $2.10 less 5%.

The Western Clock Co., La Salle, Ill.

A CASE OF PROFIT

The Carborundum Triangular Display Case and a Stock of CARBORUNDUM Sharpening Stones

YOU can put a lot of ginger into your sharpening stone sales by using Carborundum displays---the Triangular Display Case for instance---put it on your counters or in your window---it will talk to your customers---let them know you are a Carborundum dealer---case is made of quartered oak, glass panelled---stones shown on attractive background of black cloth---it's a great sale stimulator. Given free to dealers with stock of Carborundum Sharpening Stones. Glad to send you all the details.

The Carborundum Company

Niagara Falls, New York

THE LIGHTNING AND BLIZZARD

FREEZERS

stand ready to serve you in the same satisfactory manner in which they have served both trade and consumer for over a quarter of a century. The construction is of the same high class. They run easy, freeze quickly and take the smallest amount of ice and salt of any freezer made. The extensive advertising from season to season has created a permanent demand. They bring trade and help you keep it.

Better let your Jobber quote at once.

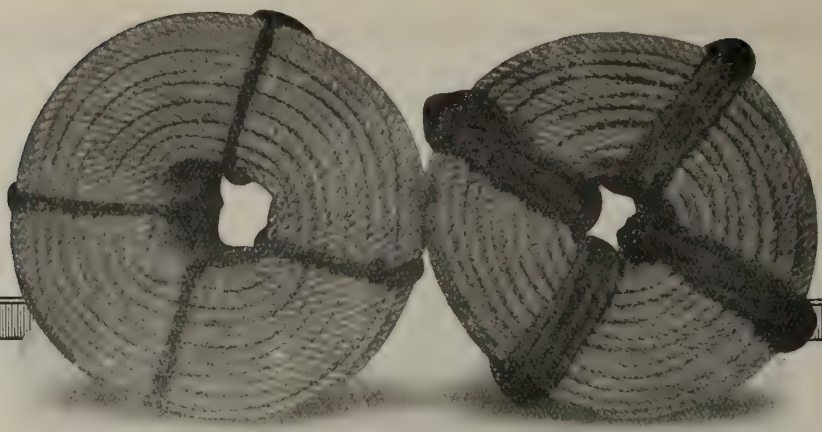
LEWIS BROS. LIMITED, MONTREAL

OTTAWA TORONTO VANCOUVER



"A"
PLYMOUTH MANILA

"B"
Rope sold as "MANILA"

Two Kinds of Manila Rope Always Available

One is very cheap rope — so poor in quality that it's expensive at any price; the other is very good rope — so strong and durable that it's always a good investment for your customers.

The difference is shown by this comparison of these two coils of one-half inch diam. rope; bought in an open market; stripped of coverings, photographed, and then tested. The coil marked "A" is —

PLYMOUTH ROPE
"The Rope You Can Trust"

"B" is some of the "so-called" Manila rope.

THE COMPARISON SHOWED:	"A"	"B"
Length of rope in coil of 97 lbs.	1250 ft.	1070 ft.
Weight of lashings	1 lb.	3 lbs
THE TEST PROVED:		
Weight per 10 ft. of rope	13⅜ oz.	14⅛ oz.
Strength at breaking point	2907 lbs.	1450 lbs.
(Use formula: Actual Strength ÷ Wt. per 10 ft. = Value)		
Comparative value ("A" worth 100%)	3477 or 100%	1642 or 47%

It is obvious that "A" is worth more than twice the value of a rope like "B". Yet PLYMOUTH costs but a very little more. Can you conscientiously offer your customers a rope like "B" when you can give them so much more for their money? PLYMOUTH makes good friends and customers for you. Ask your jobber about it.

CANADA STEEL GOODS CO., Ltd., - Hamilton, Can.

THE "CANADA" MILK CAN

THE MOST SANITARY MILK CAN MADE

SEAMLESS BODY

The body is pressed out of one piece of 18 gauge steel retinned.

Entirely smooth on the inside, no crevices, seams or corners for dirt and sour milk to collect in. Easily kept clean and sanitary.

Fitted with massive wrought iron upright handles, or malleable drop handles as desired.

SEAMLESS COVER

The bottom is well protected by a heavy welded iron hoop and the can is further strengthened by an additional hoop which encircles the body at the breast.

The Cover is also seamless, and fits tight and flush with the top of the breast, preventing milk from splashing around in transit.

HOLDS---8 Gallons Imperial Measure

Unexcelled in durability—Used in many of the finest Dairies throughout the Country.

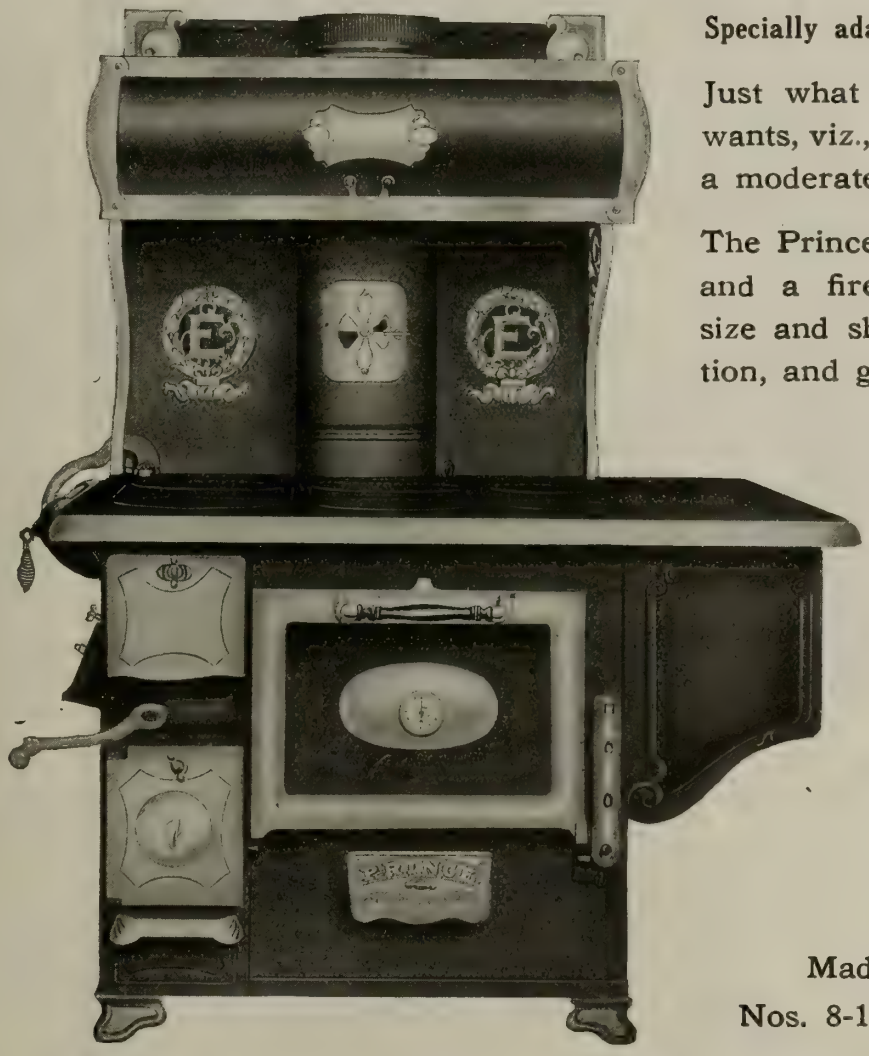
The Enterprise Prince Steel Range

A TRADE WINNER



Specially adapted for Western trade.

Just what the up-to-date dealer wants, viz., a high-class Range at a moderate price.

The Prince has very large flues, and a fire box just the right size and shape for quick operation, and great economy in fuel.

In appearance and finish it leaves nothing to be desired. The design is chaste and simple and in accordance with modern ideas.

Note some of the special features:

Oven Thermometer
Key Plate Top
Controller Damper
Pouch Feed
Duplex Grate
Contact Reservoir

Made in four sizes:
Nos. 8-14; 8-16; 8-18; 9-18.

Ask for special circular, which illustrates and fully describes this beautiful range which has been on the market only one year, but in that time has developed a demand which has been a surprise both to ourselves and our agents.

You will be interested in it.

F O R D	THE *ONE* BEST BIT	F O R D

YOU HAVE NO IDEA how rapidly and easily a **FORD** bores until you use one. You can accomplish twice as much work with it, and smoother, more accurate work as well.

Never tears or scrapes and positively will not clog. Its action is free and easy under every condition. Bores straight through knots and even a nail won't stop it.

We guarantee **FORD BITS** to do better work than any other Bit. They're made of the finest steel in the world—made so well they can't break.

Experienced electricians use and recommend them—all the leading jobbers sell them.

Send for descriptive circulars and free catalogue 8A.

Keep on the Right Side of the Builder

by supplying him with our guaranteed

LEEKNOTT ROOFING

as it will be nearly as good as new when most of the ready roofings are forgotten. It will cost you no more to stock Leeknott and it is by far the cheapest and most profitable in the long run.

Its high quality is due to the work of experts—the experts use the very best of long fibre woollen felt, which is thoroughly soaked and coated with the genuine Trinidad Lake Asphalt, specially prepared and tempered for the purpose. Leeknott has the wonderful weather and fire resisting qualities, qualities that most roofings lack. Every roll is absolutely guaranteed. Rust-proof, galvanized special roofing nails, extra quality lap cement, and illustrated printed directions packed in every roll. Anyone can successfully lay "LEEKNOTT."

We make sales easy by supporting the dealer and supplying him with circulars, etc. Our rolls are more attractive and are certain to invite enquiries.

Seventh Annual Ontario Convention

Guelph Crowded With Visitors, Although Number of Retailers in Attendance Was Not as Large as Had Been Hoped for—Manufacturers' Exhibit Proved the Big Feature—Accommodation Was Found Satisfactory, But Winter Fair Building Presented Many Drawbacks.

The seventh annual convention of the Ontario Retail Hardware and Stove Dealers' Association was held at Guelph this week, opening on Monday and winding up on Friday.

The outstanding feature of the convention was the remarkable growth shown in the number of manufacturers' exhibits, and the equally noticeable improvement in the quality of the individual exhibits. Discontent ran rampant among the exhibitors, however, culminating in the formation of an organization to guard their interests in future. The discontent extended to the arrangements made for housing the exhibits and the general work of allotment. This matter and the basis of arrangement reached will be treated elsewhere in this issue.

The number of retailers in attendance on the first two days was not as large as had been hoped for; and the storm on Wednesday almost completely cut off the arrival of any members who had planned to take in the last two days. What the delegates lacked in numbers, however, they made up in ginger. The sessions were characterized by lively discussions. Criticism on a number of vital points were advanced and, as a result, some useful reforms were decided upon.

Convention badge made and presented by the Taylor-Forbes Co., Guelph.

OUR CONVENTION REPORT.

Despite the fact that Hardware and Metal goes to press almost before the convention concludes, this issue will be found to contain a comprehensive and complete report of the proceedings. Such quick work is rendered possible only by the utilization of a large staff and by vigorous measures.

Hardware and Metal gives the news while it is news.

Undoubtedly the retailers who attended found the convention one of deep interest. The exhibition was in itself sufficient inducement to secure the attendance of progressive hardwaremen. The manufacturers had put forth every endeavor to make their displays practical and indicative of the trend of trade. By a careful study of all the booths, the retailer was enabled to acquire most valuable information on the latest goods on the market and to meet the manufacturers and their representatives. The sessions of the convention also were marked by a number of discussions replete with useful suggestions and practical information.

The Arrangements.

The meetings were held in the Guelph City Hall and the exhibits in the Winter Fair Building. The meeting hall was found comfortable and of good size, but the same satisfaction cannot be expressed on the score of the Winter Fair building. One half of the exhibitors were located in a section of the building which was inadequately heated. When the storm came on the roof began to leak, and this did not add to the comfort of the exhibitors.

The civic officials and the Guelph manufacturers and hardwaremen did everything in their power to make the convention a big success. The city was handed over to the visitors, and nothing was too good for anyone wearing a convention badge.

It is conceded that the hotel accommodation was better than expected; better also than was experienced last year. The Guelph hotels were found quite capable of handling the great bulk of the visitors and, although in some cases it was found necessary to put four and five men in one room, the accommodation afforded was good under the circumstances. Many visitors availed themselves of the services of the city billeting department to secure rooms in private houses. Industrial Commissioner Macdonald, who had that work in charge, provided splendid accommodation for several score of late arrivals.

Monday witnessed the arrival of most of the exhibitors and the officers of the association, but the retailers did not start to arrive in numbers until the next day. The first day was devoted largely, therefore, to executive meetings and the preparation of the exhibits. Although many booths were completed by Monday night, quite as many more were found in a state of semi-readiness. This was due to delay in the carpentering work and, in some cases, to the non-arrival of the necessary goods for exhibit.

The Public Interested.

The public showed a rare degree of interest. Whenever the exhibition hall was thrown open, large crowds attended.

A feature that attracted interest was the fine variety of window displays shown in local hardware stores. Some of the displays were by Guelph hardwaremen, but most were originated by manufacturing representatives.

Opening Session of the Convention

Addresses of Welcome by Guelph Mayor and Aldermen—Reports of Officers Submitted—Parcels Post Comes in for Some Discussion.

The opening session of the convention was held in the city hall. It had been scheduled to start at 2 o'clock and President Chown did his best to get the clans gathered sharp on time. Delay ensued, however, on the non-arrival of the welcoming contingent from the Guelph City Council and it was probably 2.30 when business began.

Letters and telegrams were read from the following expressing their regret at their inability to attend; J. G. Lewis, Robert Hobson, A. G. Nott, Geo. Davis, D. H. Howden, Peleg Howland, H. J. Walker, Richard Blain, M.P.; Hon. A. E. Kemp, W. H. Gilverson, Col. J. B. MacLean, S. R. Kennedy, J. W. Peart, C. C. Ballantyne, S. H. Alexander, A. Hatch, J. A. Beaudry, A. A. Bittues. Letters were received from a number of other well-known men in the trade expressing their intention of being on hand.

In opening the meeting, President Chown stated that the thanks of the association were due to the City of Guelph for the hearty welcome which had been extended.

The City's Welcome.

Mayor Thorp, in extending the greetings of the city, expressed the hope that the members of the association had found everything to their liking. The Council had endeavored to make adequate preparations and, if anything had been left undone, he trusted that they would let him know and it would be rectified.

"I am glad to address a body of business men," he declared, paying tribute to the importance of the retail dealer. He went on to enumerate the many hardware manufacturers in the City of Guelph—the makers of a famous lawn mower, and the stove manufacturers. The hardware stores of the Royal City came in for some mention also at the hands of the worthy Mayor.

In conclusion, he gave it out that the keys of the city had been handed over. "Do what you like," he declared, "and I'll fix it with the police." (Laughter.)

Ald Howard added a word of welcome, dilating on the great growth of the country and giving due credit to the merchant for the part that he was playing in the development of Canada. In one of his most eloquent passages, Ald. Howard swept the table with his arm and inadvertently rang the bell. "Time's up," said President Chown, amid laughter. The speaker joined in the laugh and brought his peroration to a close.

Short addresses were contributed by Alds. Lawson, Carter and Mahoney.

In responding on behalf of the association, Vice-President Madole expressed the pleasure he felt that the convention had been brought to the beautiful city of Guelph. He had found it quite as fine, quite as thriving as he had been led to picture it. No city in the province, perhaps in the Dominion, exerted more diligence in instilling the spirit of progressiveness into all civic entrprises. Branching onto a wider theme, Mr. Madole depicted the wonderful growth of Ontario and the rapidly increasing importance of the Dominion of Canada. He concluded by expressing the belief that the association would confirm the citizens of Guelph in their impression of the high calibre of the members and the importance of their deliberations.

"After the addresses of the Mayor and his confreres, we feel right at home," said William Magladery, who also responded. Guelph was well known to hardwaremen, he declared, from the fact that it contained so many important manufacturing concerns. "We're tickled to death that your jail is not finished," concluded Mr. Magladery, "although, of course, it would not have been needed for our accommodation." (Laughter.)

A vote of thanks to the City of Guelph was put through unanimously and Mayor Thorp responded briefly, explaining why Guelph was known as the "Royal City."

Fred C. Lariviere, President of the Retail Hardware Association of Montreal, was called to the front at this stage. As James Hardy had also arrived, Mr. Lariviere insisted on the latter bearing him company to the front. Mr. Lariviere spoke briefly, but felicitously, expressing the desire to be known among them as one of their own members inasmuch as he had been elected a life member of the Ontario body.

The Cartage Question.

James Hardy, the Secretary of the Wholesalers' Association, made a number of important points in the course of a brief address. He touched first upon the question of cartage charges. There had been friction in the past because it had been found necessary to charge for cartage to the station. "All we can say is that we will endeavor to secure the right to add the charge to the freight rate at the other end," he declared.

Mr. Hardy also touched upon the very evident and striking prosperity prevailing throughout the country. One man had told him that his business had increased 25 per cent., another professed to have gained 33 per cent., and still a third had made a gain of upwards of 50 per cent. The hardwaremen would doubtless secure their share of the prosperity.

In concluding, he gave a word of advice, epitomizing in the words, "know thy competitor," the whole strength of all association work.

The President's Address.

Before commencing his address as President, R. C. Chown urged upon all the members the necessity of remembering the association throughout the years, and not only at convention times. Suggestions, he thought, should be sent to the executive officers whenever an idea occurred to a member. Only thus could the best results be attained.

"At the outset," said the President, "I wish to thank all the members of the executive for the loyal support they have given me during the past year, and for the many helpful suggestions made by our officers to make our work as an association more effective. It is not my purpose to hand out roses promiscuously; still, there is one officer of the association on whose efficiency much depends. It is therefore a pleasant duty for me to commend to the association the faithful and efficient services of our secretary, Weston Wrigley, and recommend that we extend to him our sincere thanks for his untiring energy and enthusiasm in our behalf.

"The hardwaremen of this province who have become saturated with the association spirit are making better merchants and better citizens, as by meeting their fellow-hardwaremen at these annual gatherings they have opportunities to discuss together many commercial problems, both giving and taking advice. The necessary result is that they take a broader and better view of life, and are in a position to meet with comparative ease the many perplexities which confront them. But in order to derive the greatest benefit from an organization of this kind we must emphasize the fact that we are to meet our competitors as friends, discarding the prejudices that have no right to exist in the mercantile field. This understood, we can meet, talk over business matters, and agree to adopt certain fixed prices on many staple lines of goods, so that instead of selling at reckless prices, we can arrange a fair profit on all lines. Thus the consumer will know one price only in the community, and the merchant, in turn, will

Some impressions by Hardware and Metal's artist.

make sales more readily and will have a larger profit on the year's operation. I might also add some of the other considerations that would make for our permanent success, and extend our usefulness as individuals in the community. These are Politeness, Patience, and Perseverance.

"Politeness is by no means an unnecessary thing for business men to exercise in this age of sharp competition. Men don't care to do business with a man who is glum or who cannot make them feel at home in his presence or in his store.

"Patience is another virtue much needed in our business, and diverse and numerous are the occasions upon which we have the opportunity of exercising it. The provocations of the merchant are many—goods returned—unreasonable demands—old accounts unpaid—pressing bills to meet—besides the restraints of insufficient capital, poor help, lack of floor space—all these and many more call for patience, and without it business would become absolutely paralyzed.

"I add but one other suggestion. Perseverance. Take, for example, the Hebrews who do so large a business in this country to-day, against great odds. The chiefest factor in their phenomenal success has been the eternal vigilance which characterizes their race.

"Let us not then be content to plod on, leaving business to run on the same plane upon which our fathers conducted it many years ago, but let us follow the beacon star of progress, and by diligent pursuit of the knowledge of men and their needs, of goods, their quality and fitness, become real factors in the world's uplift.

"As your representative, in company with our Secretary, Weston Wrigley, I had the pleasure of attending the eighteenth annual convention and exhibition of the New England Hardware Dealers' Association in Boston last March. This association, being one of the oldest and strongest organizations in the United States, has, through years of experience, adopted many practical suggestions which were of great assistance to the exhibitors and members in making this affair such a success. We are putting into force a number of these ideas this year, and I trust that we will be able to take up some others before long.

"One thing that struck me particularly in connection with that gathering, was that the members were nearly all men who conducted large businesses, ranging from $75,000 to $500,000 per annum. If these men receive benefits from a hardware association, surely it should be of much assistance to us.

"The matter of mutual insurance was fully discussed at our executive meeting held in Guelph on Easter Monday. Mr. E. G. Wright, an insurance expert, was present, and gave us much information on the insurance question, after which is was decided not to proceed with the organization of a mutual insurance company in connection with our association at present, but to establish an insurance department, with the idea of securing more information on this important subject.

"The parcels post problem broadens under the discussion to which it is subjected. To many persons it seemed at first very desirable that parcels should be carried through the mails at a trifling charge for postage. This would be of material advantage to the large mail order houses, who would welcome it with glee as it would give them added opportunities for doing business ten or a thousand miles away from their stores at the same charge for handling their business. This would naturally affect the general store and the hardware merchants and would be the means of centralizing business with the large mail order houses, which would mean the ruination of the small merchant in the country town. On reflection, parties who were once in favor of it, can readily see the disadvantage of such a system, as it would be playing into the hands of a few millionaires. It behooves us, then, as an association, to begin an active campaign against the enactment of any such legislation.

"We are also endeavoring to secure an amendment to the Weights and Measures Act, whereby the retailer will not be called upon to pay for the re-inspection of weights and measures after they have been passed by government officials at the place of manufacture. This inspection, which is made every two years, we feel should not be borne by the individual retailer, as it is in the interests of the general public to have these weights and measures correct. We are, therefore, petitioning the government to abolish this tax on the individual retailer, and maintain this department out of the revenue received from the general public.

"In conclusion I desire to say that I have great faith in the future of this association. It has in it the kind of timber that makes for success. Its possibilities for the future are limited only by the measure of our enthusiasm and energy. Therefore, let us strive to make the Ontario Retail Hardware and Stove Dealers' Association the best on the American continent, ever mindful of the duties and obligations of a higher and better citizenship which has come to us as a result of our connection with association work; and let us strive to enter into and become an integral part of all that is best in our home cities."

Harry Martin, President of the British Columbia Retail Hardware Association, when called to the platform at once asked that the Ontario Hardware Association send one or more members to the Western Association. He thought the Ontario members would have something to learn from the West, and he was sure the Westerners would learn much from Ontario.

Executive Committee's Report.

Thanks are due the Taylor-Forbes Co., Guelph, for the handsome badge donated for use at this convention, the bells worn being produced in Taylor-Forbes own factory.

The large amount of space available in the Winter Fair Building made it possible for your committee to give larger space to exhibitors at this convention than at any previous exhibition. The floor space of each booth at London exhibition was 68 square feet, at Peterboro 120 square feet, while at Guelph a large percentage of our exhibitors have been given 144 feet without any increase in the charges made. Our association erected and decorated the booths and supplied each exhibitor with a sign. This year your Executive went a step further and placed several thousand dollars insurance on the goods on display in order to protect the exhibitors should any damage be caused by fire.

Your Executive went fully into the question of mutual fire insurance at its Good Friday meeting, and after advice by experts that there was little chance of establishing a mutual company at this time, it was decided that the question should be left in abeyance and an insurance department established.

Your Executive also took up the matter of restricting the sale of fire arms, but finding that the retail hardware trade throughout Ontario took little interest in the matter the Provincial Secretary's Department was approached and an understanding arrived at that our association will be consulted before similar restrictive legislation is introduced in future.

The question of securing the abolition of the fees charged in connection with re-inspection of weights and measures also received considerable attention, and on two occasions petitions were sent to every hardware merchant in Ontario. We regret to report, however, that only about 100 retailers have shown sufficient interest in the matter to secure signatures to the petitions and return same to our Secretary. We recommend that this question be given further attention by next year's Executive, and that retailers who have not yet shown an interest in bettering trade conditions in this respect, secure from our Secretary copies of the petitions and have same signed by the retailers in their respective towns.

As our brother hardware merchants in Quebec province are holding a convention in Montreal next week, we suggest that

the incoming executive send a deputation of the new officers to attend the said convention.

Secretary's Report.

The report of the Secretary was then submitted, in part as follows:—

Six years ago when a few of us gathered together in the Rossin House, Toronto, to discuss the question of organizing the retail hardware trade throughout Ontario we had hopes and ambitions that an association would be formed which would some day compare favorably with the successful retail hardware associations which have done so much to bring about better feeling and better conditions for the retail hardware trade throughout the United States.

Every year has seen progress made and each year sees an increasing number of hardwaremen at our annual conventions determined to spend a profitable three or four days together to enjoy fellowship and secure advice from kindred spirits conducting business similar to their own in other towns and cities in various parts of the province.

Three years ago at Hamilton, two years ago at London, and a year ago at Peterboro, we felt that we had marked a milestone in the progress of our association work. We had, and we have reached another at this Guelph convention, indications already pointing to its being the largest, most enthusiastic and most profitable gathering yet held by this or any other retail association in the Dominion of Canada.

You did not come to Guelph to hear long speeches or lengthy reports. My Sixth Annual Report will, therefore, be as brief and concise as possible.

While the somewhat inconvenient location of Peterboro, where last year's convention was held, prevented many of our members from the western parts of the province from attending, and membership receipts suffered as a result of their non-attendance, there has been an encouraging increase in new members. Quite a number of really successful firms in various parts of the province, many of whom have held off from joining for several years, are now enrolling in our association, and with over 130 travelling salesmen as associate members, each using his influence to assist in establishing a more co-operative spirit amongst retailers, the outlook for a substantial increase in membership is very encouraging.

The finances of the association are also in very satisfactory state, the Auditor's report showing an excess of assets over liabilities of over $800. A steady demand continues for the collection letters, stove lien notes and plumbing estimate forms, supplied to members of the association and from the Secretary's office at $1 per hundred, which is approximately the cost of printing and mailing.

Numerous retail firms testify to the good results secured from the use of the association collection forms, etc., and one firm, Pow & Wilcox, Tillsonburg, suggest that we go further and establish a collection department on similar lies to the Detroit collection agency, which collects accounts on commission for those associated with the organization. This matter might be considered by the Resolutions Committee of this Convention.

Your Executive Committee and subcommitties of the Executive met several times during the year and considered various questions dealing with the business of the association. President Chown and your Secretary attended New England Hardware Convention at Boston last March, and the Canadian Wholesale

President Chown, who Presided.

Hardware Convention at Hamilton, in November, taking advantage of each opportunity to gather ideas and information to assist in developing the work of our organization. The members of the Wholesale Association have signified their willingness to co-operate with our association in opposing the proposed parcels post system which wealthy newspapers owners elected to Parliament have on several occasions endeavored to crystalize into law. This parcels post matter should be given special consideration at this convention, and a strong resolution passed outlining the dangers of our national government passing legislation which will assist in depopulating the farm districts and force additional population into overcrowded cities. In this connection consideration might also be given to the proposal made by the Goderich Board of Trade that a method of taxation be devised which will force mail order houses to pay their fair share of taxation in each community in proportion to the volume of business they transact.

During the past year your Secretary has received consistent support from every member of our Executive and Officers of our association. President Chown has been indefatigable in working to assist in the development of the organization, and the other members have shown equal interest.

Your Secretary has investigated the possibilities of holding our next convention in Hamilton, St. Catharines, Niagara Falls and Belleville, as well as having endeavored to secure permission to use the Armouries in Toronto for our annual exhibition. Militia officers have declined to grant us the use of the Toronto Armouries, although same might be secured by pressing the application at Ottawa.

Hamilton and St. Catharines cannot offer a suitable building for our convention and exhibition, while Belleville seems to have all the local advantages necessary, a large armouries, a fine opera house adjoining and one of the best hotels in Ontario, just across the road from the armouries. It is understood that an invitation will be extended to this association to hold its 1913 convention meeting at Belleville and London. Claims of both cities should be carefully considered before reaching a decision.

While it might be said that our Ontario Association has failed to accomplish some of the things it has set out to do, the officers who have attended conventions at Detroit, Toledo, Buffalo and Boston unite in agreeing that our association is doing more to bring about a feeling of brotherhood and a willingness to assist each other by advice and information than any of the organizations visited. This work should be extended during the coming year if possible by holding district meetings at which many retailers who have never yet attended our provincial conventions could be met and consulted with, and in this way most valuable work could be done and the benefits of our association work could be greatly widened.

Many members have been asking when another summer excursion would be arranged. The National Retail Hardware Association is holding its convention at Detroit next June and if a sufficient number of Ontario Hardwaremen express their desire to participate, your Secretary can arrange, at reasonable cost, an excursion trip, beginning at Toronto, boat or rail to Niagara Falls and Buffalo, boat to Cleveland, boat to Detroit, and boat to Sarnia, making the trip last about a week in all, and giving excursionists time and opportunity to visit many large and important hardware, paint and kindred industries in the points visited. If this suggestion meets with

favor your Secretary would suggest the organization of a committee to act with the Secretary in making the necessary arrangement.

Auditors' Report.

Secretary's Financial Statement.

Receipts—	
Membership fees during 1911	$ 576.00
Peterboro Convention and Exhibition	2,005.70
Supplies	111.20
On Guelph Exhibition account	50.00
	$2,744.90
Disbursements—	
Paid to Treasurer	$2,744.90

Treasurer's Report.

Receipts—

Toronto, Jan. 8, 1912.

Committees Appointed.

The committees appointed were as follows:—

Reception.—Past Presidents Hambly, W. G. Scott, D. Brocklebank, D. Cinnamon, F. C. Lariviere, Jas. Millar, Ex.-Ald. Kelly, Ald. Carter.

Exhibition.—M. S. Madole, C. W. Conn, W. F. Macpherson.

Railway Certificates.—A. T. Black, E. A. Whitten, Geo. Matthewson.

Window Competition.—A. T. Black, E. A. Whitten, Geo. Matthewson.

Card Party.—Herb. Penfold, Ed. Brocklebank, W. T. Bell, T. Keating, W. J. Bell, J. H. Conover, W. T. Earl.

Resolutions and Legislative.— W. W. Bennett, W. F. Macpherson, Ed. Wanless, Geo. Matthewson, Reg. F. Scott, Robt. Smith.

Question Box.—Ed. Wanless, Wm. Magladery, Jas. McGregor, J. W. Zavitz, F. E. Hendershott, D. Chalmera.

Nominating.—G. A. Binns, F. W. Otton, W. J. Bell, Wm. Rankin, Milton Adams, Jas. Purvie, S. M. Burt.

Salesmen's Afternoon.—T. Wright, C. F. Smallpiece, Holt Gurney, M. Bergey, Jas. Hossack.

Smoker.—M. Weichel, A. Ginergich, Geo. Ecclestone, Geo. Honsberger.

The vexed question of parcel post being opened, reference was made to the suggestion of Major Currie, namely, that the government take over the express companies. Some held there was a danger in this, as it might be a step toward cheap parcel post.

M. W. Howell, a member of the Board of Trade of Goderich, was called upon to explain a proposal recently made by that Board, to the effect that there should be a tax placed upon catalogue houses sending goods into a community. Mr. Howell said little more than a proposal to this effect had not yet been made. His remarks were short in the extreme, and yet they brought about a keen debate.

H. C. Martin, President of B.C. Association.

M. S. Madole, upon hearing the Goderich member's statement, moved "that this association enter into correspondence with the Ontario Government with a view to seeing if some equitable means of taxing catalogue houses cannot be secured."

"Mr. Proudfoot, of Goderich," said Mr. Madole, "has said that he is considering this question of taxing catalogue houses. I hope he will be able to get a measure through the legislature. I wrote him to see if he is prepared to push this question at once, or if he has met difficulties. I have not received an answer, but hope that Mr. Proudfoot has not dropped the question. If we can get any way to stop parcel post," stated Mr. Madole, "I'm for it. Why, take my own town (Napanee), we have as good a dry goods house as I know of, yet we learn that hundreds and hundreds of parcels come in from Toronto and Montreal. The merchants of our town must pay their taxes—water rates, assessments and the like—yet their trade is curtailed by the competition of these outsiders."

"You're going to the wrong place," declared James Purvis, of Sudbury. "This question comes under the head of Trade and Commerce, and surely should be dealt with by the Dominion Government. But even if it were a question for the Ontario House, Mr. Proudfoot is on the wrong side to get results."

"This question," immediately replied Mr. Madole, "deals with taxation upon ratable property within the bounds of the province. Surely it is a question for the Ontario House."

This question was not settled, but Wm. Magladery brought out a new phase, stating that taxing catalogue houses upon goods sold in outside communities might have an effect little realized. It might mean that every concern would be taxed for goods sold without their own little sphere. "To a great extent," said Mr. Magladery, "I think a retailer can defeat the evils of the parcel post. In our line at any rate if a retailer goes right out and works he can stop the inroads of the department houses."

W. F. MacPherson, of Prescott, took a somewhat similar view. "I don't think," he said, "you could impose such a tax as is proposed without hurting us all. How could you tax a catalogue house for selling goods in an outside district without also taxing the small dealers of a nearby place for selling goods there? I, like Mr. Magladery, am afraid this might result in a number of tariff walls springing up to make trade difficult."

Did Not Press Point.

Mr. Madole pointed out that he did not desire to press his motion. He had introduced it to open the discussion and, while sorry that it had not been taken up with more zest, he had no intention of forcing the issue.

Jas. Purvis, of Sudbury, gave it as his opinion that opposition to rural mail delivery would be "opposing the spirit of the age." It was coming, he declared, and nothing could stop it.

Mr. Madole:—"Parcels Post and rural mail delivery are widely different. We are not opposing rural delivery. I would like to see every farmer in the country enjoy the benefits of having his mail delivered at his door."

Greetings of Wholesale Body.

Mr. Lawson, President of the Wholesale Hardware Association, was introduced to the meeting. He extended the greetings of the body of which he had the honor of being the head and put the gathering into happy mood with a humorous ancedote or two.

"Retail Salesmanship," the Theme

Wednesday Afternoon Devoted to a Discussion of Sales Methods—E. Holt Gurney Gives Many Practical Pointers on the Handling of Stoves—Milton Bergey Leads Paint Discussion.

The session on Wednesday afternoon started badly but developed into one of the most interesting of the whole convention. "Retail Salesmanship" was the theme of the discussions and it brought out a cross-fire flow of ideas and suggestions of an eminently practical nature. The discussion on the sale of stoves was particularly good.

It was unfortunate that the meeting started so late. Billed to begin at 2 o'clock, it was nearly three when Tom Wright, of H. S. Howland, Sons & Co., who officiated as chairman, called the meeting to order. He commented on the fact that the delay was due to the absence of the officers of the Retail Association. It was very discouraging to the travelers, declared Mr. Wright, to have such a delay occur and he could not understand why it should have occurred.

The officers who had been in attendance at the civic banquet, returned a few minutes after and the discussion began.

Hand-picked Men.

"I have had an experience of 30 years in the hardware business," said James Purvis, of Sudbury, the first speaker. "I have found that the commercial traveler is a strictly hand-picked man. Now we retailers are not hand-picked. We just grew up like Topsy. (Laughter.) I claim that the traveler deserves a courteous and fair reception. We cannot give orders to all who call on us, but we can give courtesy."

He proceeded to enlarge that idea, advancing the opinion that the travelers' proposition should be given consideration, even if orders are not placed. His advice was to give appointments to travelers as early as possible, so that they can make their train connections. It was not fair to keep a man hanging around only to turn him down in the end. He went on to point out that the traveler could do a lot for the retailer, giving him useful pointers and insuring the best attention.

Mr. Purvis then proceeded to delineate the qualities which make up the other kind of traveler—the one who swaggers in and tells the retailer how to run his business. The retailer knew how to get rid of men of this type. He, himself, knew the way.

Splendid Stove Pointers.

E. Holt Gurney, of the Gurney Foundry Co., Toronto, took up a number of problems connected with the stove business, dealing first with the question of hardwaremen carrying stove departments. His first point was that the dealer who sold a stove to a woman secured that woman as a permanent customer in all hardware lines. He advocated the establishment of what he termed a "stove inspection department." The delegation of a clerk to visit every home in which a stove had been placed, every two or three months or so, would keep the firm in touch with these customers and ultimately lead to business in other lines.

Mr. Gurney went on to depict conditions in the United States where the furniture houses were taking up stoves because they found that by selling one article to a customer they could sell others. It would be but a step to enamelware and other lines, so the hardwareman would have to look sharp to hold their trade.

The value of adequate display was touched upon. "It is better not to handle stoves at all, unless you are going to handle them right," said Mr. Gurney. Some dealers used stoves as tables and shelves. He went on to give a number of instances to show what proper display methods could do.

Mr. Gurney touched upon the reasons why the manufacturer must assist the dealer, taking occasion to point out the loss that the dealer suffers who finds no better use for "selling helps," than the use of them in making bales. Mr. Gurney referred to an article which had appeared in Hardware and Metal, showing the average loss which occurs in fuel consumption and food spoilage where old or cheap stoves were used. He believed that the dealer who made use of these figures could go out among the people and do a lot of missionary work, and perhaps induce people to invest in new stoves who would not otherwise have thought of purchasing for some time.

"The department store trade," said Mr. Gurney, "is pretty spotty. I know towns where department stores are selling a great many stoves. I know other towns where the retailer is keeping the trade because he is up-to-date, using advertising and the selling helps."

Advertising, Mr. Gurney thought, is a great help to selling, but cannot take the place of personal salesmanship. Personality, he declared, is the great thing. The department stores must lean on advertising entirely, and that is a disad-

"We, the manufacturers, and you, the dealer, must work more together," stated Mr. Gurney. "You must keep after us to help you. It is to our benefit and yours to help you to create trade."

Know Your Stores.

Mr. Hambly, of Barrie, thought that one of the most essential things in selling stoves was to get clerks to go right into the subject and find out all about them. A stove salesman should not be afraid to dirty his hands. He advocated the handling of one line of stoves and sticking to it. "And stick to your price," he concluded.

"Regarding that one line proposition," said Mr. Gurney in reply. "I am reminded of a man in Ontario, who used to write up on a board the names of those who bought stoves. I was in his store one day and a woman came in, looked at a stove and then spoke of a stove sold by a catalogue house. "Do you see here," said the dealer, showing the board. 'Bob McDonald, 1905; Sam McDonald, 1906.' "Why," said Mr. Gurney, "it was good-night for the catalogue house. As for showing the stoves," continued Mr. Gurney, "you, gentlemen, must remember that the purchase of a $50 stove is an event in the lives of the majority of people. A man selling a stove should show everything. He should be dirty all over if necessary when he got through."

Special Salesmen.

Mr. McGregor.—"Would you advise making all our clerks good stoves salesmen or should we have one clerk specialize in that line?"

Mr. Gurney.—"If it is possible to have

BRIGHT BITS OF THOUGHT.

"Travelers are hand-picked men. We retailers just grew up like Topsy."—Jas. Purvis, Sudbury.

"Avoid a price war with the other fellow."—E. Holt Gurney, Toronto.

"Lines which advertise themselves should be given prominence."—Milton Bergey, Toronto.

"The man who tells 75 per cent. truth is just as troublesome as the man who tells 125 per cent. truth."—Mr. Kennedy, Dayton, Ohio.

"Don't be too technical in talking to customers."—E. Holt Gurney.

all clerks efficient I would advise that. It would be better, however, to have one crackerjack than a number of amateurs."

Send Clerks to Factory.

Harry Occomore thought that it paid to spend money on drilling clerks in a knowledge of stoves. He had a new clerk now and intended to send him to the factory to learn all that he could about stoves.

Mr. Gurney spoke of the woman, who is "just a looker," who is "just in to look around," and who may come back later. Before she goes away give her a catalogue, and tell her you need it back. That will give you one more try at her, for if she doesn't come back you can send for that catalogue.

"As far as explaining stoves goes," continued Mr. Gurney, "a salesman must remember to make his demonstration simple. It is so easy to talk duplex drafts, etc. Why you might as well talk about the chemistry of steel."

Keeps Record of Sales .

Fred Otton stated that he had kept record of all the stoves he had sold since 1897. This helped in selling new stoves and also in supplying repairs.

J. A. Mosely thought it a good idea to have the stoves on an upper floor or in some place where it was possible to get customers without fear of others "chipping in," and thus distracting attention.

Percentage of Profit.

President Chown asked what percent age of profit should be added.

Mr. Gurney replied that it was hard to answer, as conditions varied in different sections. He did not believe that the majority of dealers added a sufficiently large margin. Some dealers did; and he admired them.

E. J. Creeper, Owen Sound, thought it might be wise for the manufacturers to set a retailing price. This he declared to be necessary because dealers in neighboring towns are now selling the same stove at different prices.

"I agree," Mr. Gurney answered. "It seems to me any manufacturer might well fix a price, and if any dealer won't maintain them, why he should cut them off."

"A stove salesman is hard to make," said Albert Welch, of Toronto, whose record of 49 stove sales in one day has probably never been equalled. One of his assistants, he stated, had made probably half the sales on that memorable day. He believed in having one good and thoroughly efficient salesman. One line of stoves was the proper policy to pursue.

C. W. Conn suggested that the association should take up with the stove manufacturers the subject of fixing retail prices upon all stoves. This would prevent improper competition, he thought.

Mr. Gurney.—"Often a difference of neighborhood makes different retail prices absolutely essential." He believed the matter could always be satisfactorily settled when such cases arose.

Paint Salesmanship.

Passing on to the subject of paint salesmanship, Milton Bergey declared that the department has the greatest possibilities of any line of goods carried. There is a limit to the sale of stoves—this is limited to some extent by marriages and stoves wearing out. With paint it is different. In Guelph it is impossible to go down the street without seeing houses which could be improved by paint. "I suppose," said Mr. Bergey, "all these places are insured. Fire may or may not come but people prefer to insure against it. Should they not more use paint to insure against rain, snow and bleaching heat which is bound to come?"

"There are three elements of importance in selling paint," proceeded Mr. Bergey. "There is the store, the paint and the salesmanship. Take the store for example. Don't you think you should have it nicely painted? How can you urge people to brighten up their homes with paint when your own store is dingy. If the outside is bright, and the inside artistic you can point to the work which has been done by the paint you are carrying. That will bring sales.

Window displays, too, were mentioned by Mr. Bergey. There is only one business which can prosper without window displays, he said, and that is the blind pig. A hardware store needs the window display. The space outside the window should be made attractive, too, so that people will be willing to pause and examine the trim. The trim, too, should be such as will catch and hold attention.

Then inside the store, Mr. Bergey pointed out, the paint should not be relegated to a back corner. By keeping it well forward—using trims which show the effect of a proper use of paint—by seeing these women will have the desire of making their homes look somewhat similar, then a good salesman can effect a sale.

The paint department was, in his opinion, the most neglected in the hardware store. So few clerks were in a position to give practical and intelligible advice.

The department, to be successful, required greatest thought and attention. The retailer should make more use of the literature and "helps" supplied by the manufacturers; by studying them, he would get ideas which would be invaluable.

Mr. Bergey went into the question of quality, urging that the dealer should always endeavor to sell his best goods. He divided efficient clerks into several classes: the student, the adept, the masters. This classification did not include the clock-watcher, and the chair-warmer.

Mr. Robinson took up the necessity of dealers making their paint department more progressive, more attractive, less like junk shops. The paint manufacturers were doing their best to assist the dealers. Hardwaremen were bringing the paint out of the cellars and putting it in the front, for the sole reason that the manufacturers were making their stock up more attractive than any other line. Branching on to the question of advertising, he stated that the manufacturer could not spend $1 for advertising for every $2 worth of paint sold. The maker could not give something for nothing. He could not sup-

Russell Chown steps down and M. S. Madole takes possession of the hardware throne—As seen by the Hardware and Metal artist.

ply literature and helps all out of proportion to the amount of paint handled.

Tell 100 Per Cent. Truth.

"I am a Canadian and proud of it," said Mr. Kennedy, of Dayton, Ohio, before taking up the question before the gathering. Speaking of paints, he advocated study. A dealer who could tell 100 per cent. truth about his line to customers, was sure to make his sales. The man who told only 75 per cent. truth was as troublesome as the one who told 125 per cent.

Mr. Kennedy made a strong point in the matter of paint turn-over. A certain dealer had turned over his stock three times in the year and had thus made a very handsome profit on the year.

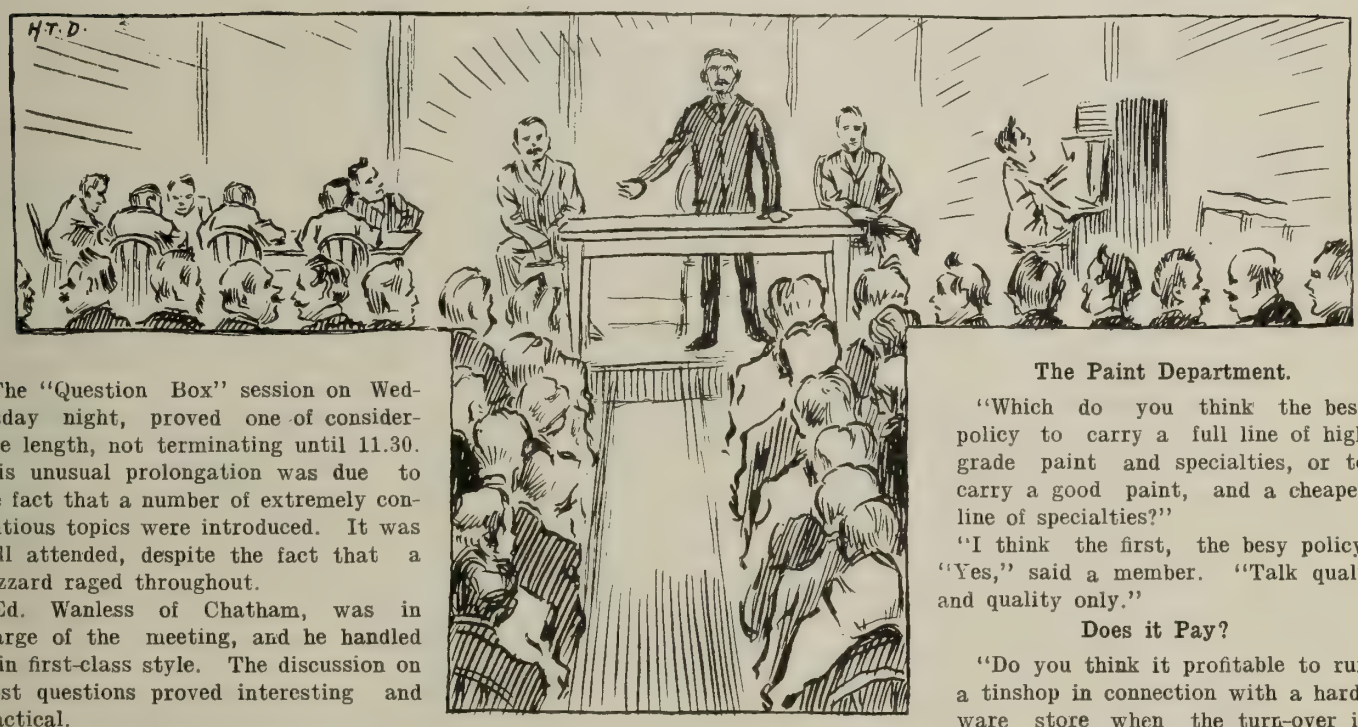
Greetings From the Coast.

Harry C. Martin, of Martin, Finlayson & Mather, Ltd., wholesale and retail hardware merchants, Vancouver, B. C., being called upon to speak on the paint subject, undertook to paint a picture of his province, British Columbia, dealing especially with the B.C. Association, of which body he is president. He told how the members meet once a month at a little dinner; declared that this had done much to promote good feeling among the dealers, and explained that price-cutting practically ceased to exist since these meetings were started. Mr. Martin also put in a plea for fairer treatment of travelers.

F. C. Lariviere speaking upon the subject of profits and how to figure. A full report on this address will appear in a later edition.

Question Box Session Was Spirited

Many Topics Threshed Out—Should Wholsalers Sell to Dealers Not in the Trade?—Members Ask That Full Financial Statements be Published.



The "Question Box" session on Wednesday night, proved one of considerable length, not terminating until 11.30. This unusual prolongation was due to the fact that a number of extremely contentious topics were introduced. It was well attended, despite the fact that a blizzard raged throughout.

Ed. Wanless of Chatham, was in charge of the meeting, and he handled it in first-class style. The discussion on most questions proved interesting and practical.

Outside Salesmanship.

"Does it pay to canvass for business?"

Wm. Magladery stated that it was impossible to make a hard and fast rule. Personally he would not be able to do business without canvassing. It is much easier to close a sale if you go out to a man's house than in the store where there are others around.

How Many Hands?

"How many hands do you consider it necessary to have in a hardware and tinshop doing a $20,000 business yearly?"

Mr. Wanless pointed out that the question was a little hard to answer as it did not state what amount of tinning work was being done.

Mr. Conn thought a mechanic and a helper would be sufficient in the tinshop at most seasons. In the fall an extra man or two would probably be required.

Offering Premiums.

"Does it pay to offer stoves to winners of contests?"

Mr. Wanless thought this usually brought good results. He had found it worked well. No one else present had tried the scheme.

Keeping Blankets.

"What is the best way to keep blankets in summer time?"

Mr. MacPherson stated that they stored away their stock of robes, blankets, etc., with plenty of tar paper. This always proved effective.

The Paint Department.

"Which do you think the best policy to carry a full line of high grade paint and specialties, or to carry a good paint, and a cheaper line of specialties?"

"I think the first, the besy policy." "Yes," said a member. "Talk quality and quality only."

Does it Pay?

"Do you think it profitable to run a tinshop in connection with a hardware store when the turn-over is $2,500 and the expenses $1,200 a year?"

Mr. Wanless gave it as his opinion that if the $1,200 represented wages only, the dealer would certainly lose money.

The Calendar Question.

"Do you consider the giving of calendars any good for advertising?"

Cries of "yes." D. A. McNabb stated that embossed calenders are cheaper in the long run. The only trouble I find with calendars," said Mr. McNabb, "is that people we don't send them to are annoyed. Calendars bring new business to the store. We don't give them indiscriminately, but keep track of those we send them to."

Jas. McGregor held that calendars are so common that their usefulness as

ads. has passed. "I was in an office recently and my calendar was the fourth under. I think it better to get out a thermometer, something which will be kept from year to year and which will keep your name constantly before the people."

W. F. MacPherson.—"I believe in calendars. I have seen those I have sent for the last three years hanging in a house. That is of great value. I make it a policy never to buy the first time a traveler comes.

Mr. Purvis has been giving calendars for twenty years and has been increasing the number that he gives. He thought so little of the advertising value of the calendar that he frequently puts his advertising matter on the back. Nevertheless he thinks the calendar is indispensible and wouldn't discard it for double the value.

Mr. McGregor said he had been sufficiently magnanimous to put his name on the back one year. He had found, however, that people forgot where they came from.

Mr. McNab thought that if a man had never gone into the calendar business, it would be wise to keep out of it. Once undertaken, however, it paid to do it well.

Chairman Wanless stated that he had tried it once but had quit it. He did not know half a dozen firms in Chatham who were giving calendars.

Cash Discounts.

"Would it have a tendency to lessen credit accounts to give a cash discount, and what discount would you allow on staple hardware?"

Will Magladery:—"I think the discount a wise rule, but hard to work. What we do is to charge people interest after 30 days. We all do that, so there is no trouble."

J. S. Allen:—"I issue tickets, and give 3 per cent. discount when customers have cheques which amount to $10. Three per cent. is too much on staple hardware, but I want to get the money fast."

"I give a cash discount of 5 per cent. —only since I have put my business on a cash basis," stated G. A. Binns, of Newmarket. "This system has been working only a few months, and I don't know how it will work out." In answer to a query as to why he gave a discount, he stated that it was offered as an inducement. He could afford to offer it, as he got cash for everything.

Jas. McGregor, like Mr. Magladery, believed in adding interest, after 30 days, instead of giving cash discount.

Jas. Purvis stated that he gave a cash basis on stoves only. He did not think it possible to stick to a cash basis permanently. The system he follows is to have credit slips which must be countersigned by himself before a credit account can be opened.

W. W. Bennett stated that he had tried the cash discount system, but had found that it did not increase his cash sales. Only those who had always paid cash took advantage of it.

A. Welch:—"I tried adding interest after 30 days, but didn't find it successful at all. You have to work pretty hard to get that interest."

D. A. MacNab stated that he could not understand how hardwaremen could sell stoves on credit after adding 5 or 10 per cent. He couldn't do it. His experience had been that the easiest and surest way to sell stoves was to offer 10 per cent. off for cash. It pleased the customer and closed the deal in short order.

A. Welch:—"If my friend comes down to my store we'll show him how we do it. We put a price on our stoves. If a man asks the price, we say it is $41 cash or $46 if settled by payments. And they give the extra money, too. I always take a lien, for I have found that some of those who are so respectable that we are almost ashamed to ask them for a lien, are hard to get the money from. They aren't dishonest, but slow."

The point was raised that it was sometimes hard to take back a stove on which a lien had been placed. One man stated that he had found he could not seize a stove because his name was not painted on the back.

Mr. Wanless pointed out that, if the note were drawn up proper and the name of the maker on the stove, there would be no difficulty in getting the stove back, if payments were not made.

A Contentious Question.

"What course should we pursue toward manufacturing concerns who sell to department stores lower than they do to us?

"What course should we pursue toward manufacturers who sell us goods, and then with another set of travelers go out and beat us to it?"

The first member to speak took the view that if a jobbing firm sold to his customers or to competitors at a lower price, he would undoubtedly cut that firm out.

Another stated that he had experienced trouble of this kind in the past, and had very promptly cut them out.

One man stated that a keeper of a Fair in his town, one of a string of many stores in Ontario, was getting a price on some lines 10 or 15 per cent. better than was quoted to his firm. This same dealer gets the first chance on any slightly damaged goods. In one case, this keeper had offered goods for sale at 65 cents, which he (the speaker) bought at 63 cents and could not sell at less than 85 cents.

One dealer thought the name of the firm who gave this preference to the Fair should be given, and that all members of the Association should "turn them down."

He also spoke of a firm from which he had inquired the price of glass. He had told them to whom he wanted to sell the glass, and because he got the stock from another house, the first concern tried to beat him out of the business.

"It is the first time in my experience of the Association that I have heard real business discussed," said a member. A great deal of business was being done, he declared, which the dealers did not get. He believed that the Association should get the facts on such cases and let the firms in question know that the facts are known. Every member of the Association learning of such instances should notify the head of the Association and he in turn should notify every member. A plan he had followed was to refuse to handle goods which the catalogue houses were listing. If the members would insist on firms with whom they deal putting restrictions on catalogue houses it would be of material assistance. He had joined the Association with the idea of seeing such measures put through. He concluded with a plea for some decided action on the part of the Association.

Another member urged that all specific cases should be reported to the secretary. He quoted one instance where a wholesale firm had sold goods to a contractor in his town. He had protested and it had never been repeated.

Attention was devoted to the practice followed by some firms of selling goods at a price which enabled pedlars to cut below the cost price to the retailer. Sometimes these goods were marked as "seconds"—but they were mighty good seconds.

The suggestion was made that the resolution committee prepare a resolution recommending that makers of this kind be referred to the secretary.

The assertion was made by a dealer that he had found it necessary to buy his tinware from Jews last spring. The Jews had secured the goods forty per cent. lower than he could get it.

The question of wholesale firms selling to small general stores was taken up also.

One dissentent voice was then raised. The speaker did not see how they could prevent the travelers, when they failed to sell to the hardwaremen, from

going to the blacksmiths and getting orders. He thought the meeting had been too pessimistic. Look after your own business and never mind what the rest are doing," was his advice.

Another speaker referred to the question of tinware. "All manufacturers," he said, "have a certain amount of junk. If you are his customer you have the privilege of sorting it out. The Jews buy this up in job lots. Why, a great deal of it is stuff that we wouldn't have in our store. I think the majority of hardwaremen try to walk a straight line."

A third speaker voiced his belief that some of the firms mentioned tried to act fairly by the trade. The trouble, he believed, was that too many hardwaremen bought from six or seven wholesale firms and could not therefore do any of them justice.

The question of the Fairs was brought up again. "Why," asked a member, "are these Fairs able to get a better price than we?"

"Well," answered another member, "if one dealer buys as much as the 27 stores of the Fair he would get as good a figure as the Fair. It is purely a question of quantity. I can cite an instance. One of these Fairs went to a candy manufacturer asking his price for 1,000 lbs. of candy. Then they asked for 5,000 lbs., and were quoted a lower price; for ten, fifteen and twenty thousand, prices were asked and each time quoted lower."

"But," interrupted another member, "isn't the trade of the members of this association worth more than the trade of 27 stores belonging to a Fair?"

"Yes," came the reply, "but it costs a great deal more to secure, and that means the necessity of charging a higher price."

The Installment Plan.

"Does it pay to sell stoves on the big city plan of $1 down and $1 a week?"

Mr. Zavitz thought it was largely a matter of locality but he did not believe it would pay to sell on such terms. He always endeavored to get a deposit of a third of the value.

W. A. Rankin explained that firms who sold on the $1 a week plan generally did so large a business that they could employ a collector.

Monthly Meetings.

"Would the association derive any benefit from the selection of central points for monthly or quarterly meetings? Would suggest Ottawa, Peterboro', Hamilton, Toronto, London and a northern point."

C. W. Conn thought this a fine idea, but believed it one to be left with the executive.

Another member declared his belief that the Association has not a large enough membership as yet to make this seem advisable.

Mr. Smith of Bolton defended the idea on the ground that members would be gained and it would be possible to sustain interest. There were questions continually arising which could be settled at these regular meetings better than at a general convention.

Mr. Carscallen believed that financial statements should be sent out to the members to let them know where their money was going. The members never saw anything to let them know how the money was spent. It was outrageous that he had been compelled to pay an extra dollar to allow his clerk to attend the meetings.

"It is a little hard to set on a member like that," said W. A. Rankin, "but as a matter of fact, there has never been a detail statement. I have heard a lot of complaints lately, and I think we should have a full statement."

"I have a question on this point," said Mr. Wanless. "Would it not be advisable to have a detail statement of expenditure printed in both hardware papers?"

"I think," remarked Mr. Wanless, "that this would be a wise plan."

Treasurer Caslor stated that he had intended to suggest that the books be audited every month and statements sent out regularly. He had not been satisfied with the system followed in the past.

M. S. Madole: "I believe every member has a right to the very fullest report. I believe it should be printed, and I am satisfied that it will be printed. Only I am sorry that if this has been rankling in the bosoms of any that they have not come here to unburden themselves."

Mr. Rankin believed that the list of expenditures and receipts should be given to the members but he did not think it would be wise to publish the statements in the trade papers. Treasurer Caslor coincided with this view.

"I do not think so much should be left to the executive," said Roy Carscallen. "I do not think the decision of those who are to be sent to represent the Association at certain conventions should be left to the Executive. And I don't think the executive should have the decision upon where we are to convene."

Mr. Madole pointed out that the members necessarily had to place reliance in the executive. If dissatisfied they could elect others. The executive had to look after all matters coming up from convention to convention.

Mr. Rankin pointed out that an expenditure of several hundred dollars had been incurred to send delegates to other conventions. The members did not know what the results and benefits of these trips had been.

Treasurer Caslor showed that the item referred to covered the cost of bringing executive members to meetings during the year.

Mr. Carscallan then explained that he had no intention of insinuating that any officers of the association were not doing right, but he did object to so much business being done by the executive. Let us have it done in open session. He did not think they had used the exhibitors fairly. Their exhibit had been fine and the members should have had more time to visit them.

Cost Him More.

Wm. Magladery stated that the auditors looked over the accounts very minutely. However, he believed in sending detailed statements to the members. He declared that the exhibitors objected to the fact that they were not allowed sufficient time to interest the retailers in their goods. With regard to traveling expenses, he stated that he had had one free trip during the year. It had cost him more money than it had cost the association.

Secretary Wrigley explained that the system of bookkeeping had been improved each year. He gave comparative figures to show that the exhibitors were not paying as much for their spaces as was charged elsewhere. He proceeded to tell of the trips made during the year and the ideas secured in that way. With reference to the decision to hold the convention in Guelph, he pointed out that the matter had been decided in convention last year.

Mr. Caslor pointed out that they had collected a little over $2,000 from exhibitors at Peterboro and had spent $1,500 in fixing up the spaces.

ONE ON RANKIN.

Jas. Purvis, while speaking to the travelers, told a good one on W. A. Rankin, of Ottawa. Mr. Rankin had been telling about a funeral of a stove man in Ottawa which was attended by all the hardwaremen of the city. "Said Mr. Rankin, "that funeral showed the good feeling that exists between the dealers."

"Not at all," Mr. Purvis had told him. "Why, if you were to die all the hardwaremen of Ottawa would have great pleasure in attending the funeral."

Retailers Accept Manufacturers' Proposition

Dealers Willingly Comply with the Manufacturers' Request that They be Given Charge of the Exhibit—A Committee of Retailers and Manufacturers will Decide Upon Place and Time of Meeting—Invitation Brought from Belleville through the Mayor—M. S. Madole, of Napanee, elected President of Retailers Association.

Guelph, Feb. 22.—Without any objection, indeed during the absence of a good many of the members, the Retail Hardware Dealers' Association this afternoon met the request of the manufacturers; agreeing that they should have entire charge of the exhibition, hereafter; and endorsing the suggestion that a joint committee from the Retail Association and the Manufacturers' Association, should henceforth arrange the date and place of meeting of both associations. The intention is to have the gatherings go on together as at present. But they are to be under entirely separate control, and the manufacturers will invite all retailers, members of the Association or not, to visit the exhibition. The Association, on the other hand, it was declared, will do its best to get some of these visiting hardwaremen to join the Association.

M. S. Madole Explains.

It was a quarter to two when President Chown called upon M. S. Madole to explain the result of the conference which had taken place between manufacturers and members of the Retail Association in the morning.

"The proposal of the manufacturers," said Mr. Madole, "is exceedingly reasonable, and to-day the following resolution was passed:

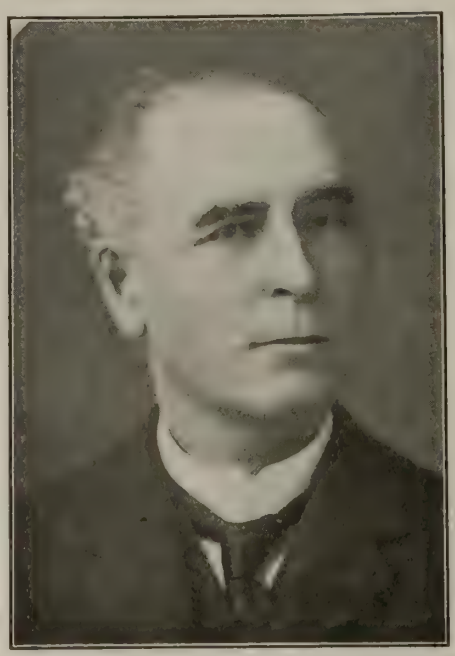
" 'That we, the Executive Committee of the Ontario Retail Hardware and Stove Dealers Association have received from the Hardware Manufacturing exhibitors, Limited, a proposition in regard to future exhibitions, which will be explained to you by Mr. Madole of our association and Mr. Tobin of the manufacturers, which we recommend for your adoption.' "

Mr. Madole declared it to be only right that the manufacturers should have some voice in saying where the exhibits should be held.

That the manufacturers should want retailers outside the Association to attend he thought only proper. All should have the opportunity to see the exhibits. Moreover, by bringing outside hardwaremen to the exhibit, the ranks of the Association would almost certainly be augmented, for those viewing the booths would see the advantage of the Association.

The Question of Revenue.

"It is true," said Mr. Madole, "that we have been getting a good revenue from the manufacturers, but their separating from us—or rather, starting to exhibit under their own management—will relieve us of a great deal of expense. It will not leave us in bad financial position."



M. S. Madole, the New President.

F. M. Tobin, Vice-president of the newly formed Exhibitors' Association, added something to what Mr. Madole had said, pointed out that they could draw many more retailers than have been attending the conventions. They could use their travelers to boom the exhibition and the men once there the members of the Association could boom that.

"We will relieve you of the details of managing the exhibit," continued Mr. Tobin. "You will have all your time to give to your regular business. As far as expenses go it will be for us to see that the Association does not suffer in that regard."

Joint Committee to Decide.

Mr. Madole later explained that there would be a committee, composed of members from both the Manufacturers and the Retail Dealers Associations, which would decide upon place and time of meeting.

"Would that committee have control of finance?" asked Jas. Purvis.

He was informed that the expenses would be kept entirely separate.

Mr. Tobin then spoke on the question of expense. "You don't know, perhaps," he said, "but this exhibition is costing the manufacturers about $30,000. When we are spending that we would not object to $1,000 more to help carry along the gathering."

W. F. MacPherson remarked that all the explanation about the change had been by verbal statements only. He suggested that a resolution be put in writing so that it might appear properly on the books. There seemed much wisdom in Mr. MacPherson's suggestion, for no one off the platform seemed to well know what the manufacturers were asking. However, it was decided to accept the arrangement approved of by the executive.

Mr. Lariviere Speaks.

F. C. Lariviere, of Montreal, before starting his address on "Waste in the Hardware Store," spoke briefly on insurance. He referred to the advisability of taking the 80 per cent. of stock, insurance rate.

"What does that mean?" asked a member.

"Just this," replied Mr. Lariviere. "Suppose you have $10,000 stock, and insure for $6,000. If you have a partial loss you will only get from the insurance company 2-3 of that loss. That is, by insuring for only $6,000, instead of $8,000, you take 1-3 risk."

Turning directly to the subject of waste, Mr. Lariviere referred to many of the little leaks which cause loss to the dealer. "Often," he said, "we see outside awnings rolled up while still wet. It means rot. They should be allowed to dry first.

"Recently," he remarked, "I visited a store, and going to the cellar, I found no one there, but three lights burning. It means waste.

Later Mr. Lariviere spoke of pricing. He ridiculed the habit some men have of adding a certain per cent. to the buying cost, to get the selling cost. He thought each article should be taken separately. Sometimes an article should be sold very close. Sometimes a three or four hundred per cent. profit is quite proper. What a man has to consider is what an article can be got for elsewhere.

Waste of Energy.

One other phase referred to was waste of energy. "Take goods which are not priced," said Mr. Lariviere. "If a clerk has to say to an inquiring custo-

mer, 'Wait and I'll find out the cost,' he at once loses 50 per cent. of the customer's confidence, and the clerk has to use 50 per cent. more energy to make the sale. Better to let the clerk put a price on that article at once, then as soon as the customer is gone find the correct price and put it down."

Guarding Against Sun.

The waste caused by allowing carvers to lie in a sunny window was also cited. "The inside of the cases fade," said Mr. Lariviere. "It necessitates a reduction in price or the securing of new cases."

Another point made was that care should be taken to guard goods displayed on the floor from depreciation. "Often," Lariviere declared," water is swept on to spades, as a clerk cleans out the store. That means a great amount of rust and infinite loss. It is something to be guarded against."

Immediately after his address, Mr. Lariviere had to leave for Montreal, but not before he was tendered an enthusiastic vote of thanks for the part he had taken in making some sessions of the association helpful.

Invitation to Belleville.

Mayor Vermilyea, of Belleville, entering the meeting, was at once called to the platform, and in a very few words invited the association to hold their next convention in that city. He spoke of the good railroad facilities, of sixteen good hotels; of the Armoury, in which exhibits could be held; of the sights worth seeing.

W. Deacon, president of the Belleville Board of Trade, backed up the Mayor, mentioning a number of the attractions on the Bay of Quinte city.

The Resolution Committee had evidently not found their task exceedingly difficult. Their reports dealt with parcel post, trade grievances, district meetings and measures of thanks. But the resolutions, as here given, speak for themselves.

"Resolved, that this association do hereby express its opposition to the proposed parcels post legislation, and that the Executive Committee are hereby authorized to take necessary steps to make its opposition known, and, if possible, to associate with other interests now working against enactment of any such legislation, also recommending that every retailer be earnestly requested to write to their local Member of Parliament, expressing opposition to proposed legislation."

"Resolved, that the secretary of this association on receipt of any specific complaint, from a member of this association in good standing, against any jobber or manufacturer, be authorized to correspond with said jobber or manufacturer, with a view to amicable adjustment, and that the reply of the jobber or manufacturer be sent to the complainant, and further be presented to the executive of this association."

"That the efforts of this association to have the fees for reinspection of weights and measures abolished, be continued, and that every member be earnestly requested to have a petition, containing all names of users of weights and measures in their locality, filled up and returned to association at earliest possible moment, and that the Legislative Committee be authorized to have such petitions circulated as widely as possible."

"Resolved, that the matter of holding district meetings in different parts of the province, be referred to the Executive Committee, for further discussion, and that, if deemed practicable, a meeting be called at some central point, to ascertain if a step in this direction would have sufficient attendance to warrant formation of districts."

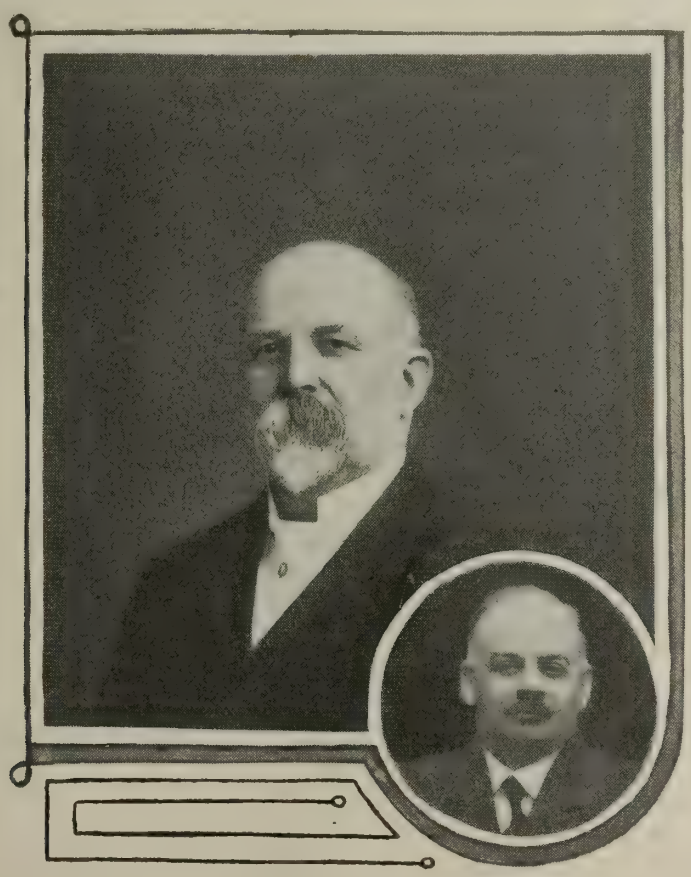
"Resolved that the sincere thanks of this association be tendered to Mayor Thorp, the Civic Council and officials, for the courtesy extended to this association on the occasion of this convention, and that the secretary of this association be instructed to send a copy of this resolution to Mayor Thorp.

"Resolved that this association tender its hearty thanks to the manufacturers; express its appreciation of their excellent displays; acknowledges the great benefit to the association by their co-operation, and suggests that the secretary be instructed to send a copy of this resolution to the secretary of the Canadian Hardware Manufacturers' Exhibition Company, Limited."

No Discussion.

No discussion whatever took place on any of the resolutions; nor was comment aroused by the report of W. J. Black, chairman of the Window Display Committee. Mr. Black proposed that next year a temporary window be built in the Association Hall, and that in this, trims should be made, which could be criticised by the members, and from which much might be learned. He spoke of the window competition carried on in Hardware and Metal at Christmas time. A splendid thing, he believed, but one which might be extended. Mr. Black suggested that the association should hold a competition itself.

As usual, the elections passed over quietly, the recommendations of the Nomination Committee being approved by the association, the following officers thereby stepping into control:—



Mayor Vermilyea, of Belleville, and President Deacon, of the Board of Trade.

President—M. S. Madole, Napanee.

First Vice-President—H. Occomore, Guelph.

Second Vice-President—W. F. Macpherson, Prescott.

Secretary—Weston Wrigley, Toronto.

Treasurer—John Caslor, Toronto.

Executive—W. Magladery, New Liskeard; W. W. Bennett, Gananoque; D. A. MacNab, Orillia; Ed. Wanless, Chatham; C. W. Conn, Tillsonburg; F. W. Otton, Barrie.

Auditors—J. W. Peacock and S. M. Burt, Toronto.

The election formality over, "See Him Smiling" being sung, and the addresses of the new officers heard, the question of the next place of meeting was considered. Mr. Madole stated that there was to be a meeting with the manufacturers to discuss this subject. He wanted to know what place the members thought would be best.

Left With the Committee.

D. Cinnamon thought Belleville the place. W. J. Sampson declared the exhibit should be held regularly, either in Hamilton or Toronto, or alternately in these two places. The general opinion, however, was that the whole matter should be left in the hands of the executive—that they should go to the executive of the manufacturers quite free. Being put to the vote, this motion was carried.

The Manufacturers Form an Association

Dissatisfied With Management of Exhibition—The Exhibitors Incorporated—Select A. A. Bittues, of Montreal, as President —Will be ready to hold entertainments.

Guelph, Feb. 22.—Feeling dissatisfied with the manner in which the exhibits, held in connection with the Retail Hardware Association, have been managed this year and during the last few years, the manufacturers who have been exhibiting in Guelph decided that a change must be made. As a result they gathered yesterday afternoon, and there formed the Canadian Hardware Manufacturers Exhibitors, Limited. The object of the new association was clearly stated. It is to deal with any exhibitions that may be held from time to time, to look after entertainments given by the manufacturers for some other organization or for some visitors; to extend the activities of hardware manufacturers, and to enlarge the scope of these.

The following officers were elected:—

President—A. A. Bittues, Gillette Safety Razor Co., Montreal.

First Vice-President—F. M. Tobin, Tobin Arms Mfg. Co., Woodstock.

Second Vice-President—W. J. Nahrwold, Canadian Yale & Town, St. Catharines.

Third Vice-President—Chas. E. Stewart, Stewart Mfg. Co., Woodstock.

Fourth Vice-President—M. R. Griffiths, Canadian H. W. Johns-Manville Co., Toronto.

Chairman Exhibition Committee—R. B. Johnson, Pinchen, Johnson & Co., Canada, Toronto.

Chairman Entertainment Committee—Adam Taylor, Taylor-Forbes, Guelph.

Temporary Secretary-Treasurer — F. M. Tobin, Tobin Arms. Mfg. Co., Woodstock.

This executive is to hold meetings with the executive of the retailers' association, and will make arrangements for next year's exhibition.

The decision to incorporate the new association was reached, because it was felt this will better enable the body to transact all business pertaining to it.

SOME OF THE SOUVENIRS GIVEN BY MANUFACTURERS.

Everyone has the souvenir habit more or less highly developed. Some make collections of hotel towels, restaurant silverware and such little nick-nacks. It is safe to say there were no collectors of that kind at the Guelph convention. Yet, while there were no such cranks present, many added to their store of goods at the convention, for a number of the exhibitors gave away attractive souvenirs.

Among those giving souvenirs were:—The Oneida Community Silver Co., Coles, Phillips Pictures, the International Varnish Co., carnations for the ladies, for the men, watch fobs and a leather bound want book; F. W. Bird & Son, Hamilton, gave watch fobs. The Ohio Varnish Co., Cleveland, gave out wallets and Chinamen stick pins. The Minerva Paint Co. distributed beautiful sterling silver cuff links, tie pins and tie clps, each bearing the head of Minerva. Boeckh Bros., Toronto, gave away hat brushes of their own manufacture. The Glidden Varnish Co., Toronto, handed out perpetual calendars. Pratt & Lambert distributed aluminum match boxes. Martin-Senour had a unique combination folding palette knife and can opener. Shurley-Dietrich, Galt, had a fine sterling silver maple leaf pin, a saw engraved across it. Brandram-Henderson, too, gave out sterling stick pins of exceedingly pretty design. Jas. Stewart & Co. had copper cigar trays, which were eagerly sought. The Onward Manufacturing Co. distributed fountain pens. Atkins Saw Co. had an attractive tie-pin —a miniature drill. Lowe Bros. gave a number of souvenirs, H. & S. pennants, key chains and phone blotters. The McClary Manufacturing Co. gave out a gas lighter—an unique contrivance. The Moffat Stove Co. distributed ash trys, while the Gutta-Percha Rubber Co. handed out miniature rubber boots.

RETAILERS AT CONVENTION.

Chas. W. Conn, Tillsonburg; W. F. MacPherson, Prescott; W. S. Madole, Napanee; W. W. Bennett, Gananoque; R. C. Chown, Belleville; Jno. Caslor, Toronto; R. L. Shields, Kincardine; Jas. N. McGregor, Oakville; D. Mistele, Rodney; S. L. Adolphe, Listowel; J. S. Weichel, Elmira; E. V. Kalbfleish, Mildmay; M. W. Howell, Goderich; B. F. Aherns, Hanover; Fred Adams, Fordwich; M. E. Beetger, Monkton; S. Vogan, Walkerton; Harry Card, Elora; G. A. Richardson, Guelph; Russel Wells, Dresden; W. Magladery, New Liskeard, Ont.; W. W. Baker, Granton; J. E. Harrison, Parkhill; E. T. Coleman, New Dundee; R. Nicholson, Hickson; J. Dandie, Streetsville; R. M. Clements, Milton; W. A. Rankin, Smith's Falls; L. Fowler, Sudbury; R. Hawkins, Smith's Falls; E. Brocklebank, Arthur; F. C. Lariviere, Montreal; John Roger, Atwood; J. E. Mosely, Huntsville; T. M. Nash, Wellington; E. V. Whitten, Bracebridge; H. Lendon, Leamington; M. A. Gendron, Penetang; F. G. Moxley, Kingston; J. A. Hoar, Barrie; H. W. Bate, St. Catharines; H. E. McClung, Trenton; D. H. McCoy, Kingsville; Jas. D. Smith, Baysville; F. W. Karn, Woodstock; W. G. Pow, Tillsonburg; J. S. Millar, Guelph; Reg. F. Scott, Forest, Ont.; J. F. Zimmerman, Collingwood; W. H. Bartlett, St. Marys; F. W. Silvester, Stouffville; W. H. Manning, Ross Manning, Coldwater; Albert Wideman, Markham; W. A. Stevenson, Toronto; W. E. Anthony, Brampton; J. L. Lochead, Forest; W. D. Stinson, Omemee; J. Purvis, Sudbury; R. E. Young, Hanover; R. Zilliax, Gravenhurst; Fred W. Otton, Barrie; H. W. Ralph, Dundas; W. J. Bell, Beeton; E. J. Creeper, Owen Sound; F. E. Hendershot, Mt. Forest; N. B. Phillips, Orillia; R. H. Blackmore, St. Thomas; W. J. Bowes, Markdale; R. J. Walkem, Tottenham; G. E. A. Robinson, Elora; R. C. Puddicombe, Ayr; Chas. R. Penfold, Guelph; A. Welch, Toronto; G. Gordon, Listowel; H. Field, Mitchell; W. F. Mickus, Preston; Wm. Conrad, Waterloo; S. R. Peart, Rockwood; Thos. D. Vance, Port Rowan; W. H. Hunt, Thorold; Wm. J. Keyes, Sault Ste. Marie; W. J. Stirrett, Toronto; J. R. Meyers, Stratford; Fred F. Haximan, Stratford.

Manufacturers' Exhibit a Big Feature

Interesting Displays of All Kinds of Hardware Lines—A Brief Description of Each Booth and a List of the Exhibitors in Attendance.

The manufacturers exhibition was a strong feature of the convention. It drew the retailers in attendance at every stage and was in reality the central point of interest of the convention.

The number of exhibits was larger than ever and the quality of the displays was undoubtedly better than in past years.

Walker Bin and Store Fixture Co., Berlin, had an admirable display of their line of hardware store fixtures.

G. L. Griffith & Son, Melbourne, Ontario, showed their lines of harness. H. L. Griffith was in charge.

Canadian Potato Machinery Co., Galt, showed cattle stalls and staunchions. W. Rush was in charge.

Kaitting & Son, Galt, showed power washing machines and sprayers. Geo. Kaitting and Herb. Kaitting were in charge.

Goldie & McCulloch, Galt, showed a line of their safes. Wm. Trapps was in charge.

Pinchin-Johnson Co., Toronto, had a unique booth, which showed a pyramidical formation of their household lines of paint. The main feature, however, was the showing made of selling helps. All their selling helps could not be shown on account of the lack of space but the more important were strikingly displayed. The new color card catalogue of this firm and a counter album were among the most interesting of the helps. R. B. Johnson was in charge and with him were F. L. Wemp and A. M. Towe.

International Varnish Co., Toronto, had a very striking display of the many lines that they manufacture. The goods were arranged to splendid advantage and were set off by attractive lithographs. W. H. Davy was in charge and H. V. Johnston was also in attendance.

Canadian Yale and Towne, St. Catharines, showed locks, keys and builders' hardware. Wm. J. Nahrwold was in charge.

The McClary Manufacturing Co. of London, had a display of Interchangeable wood, gas and coal ranges. Those in charge were, W. J. Thompson, A. Mackenzie, W. W. Nobbs and A. M. Smith.

D. Moore and Co., of Hamilton, showed a fine line of heaters and ranges. S. D. Robinson, J. L. McMartin and A. L. Robinson were in charge.

The Queen City Oil Co., Toronto, used their lamps to splendid effect, the booth being brilliant at night. In charge of the lamps, heaters and stoves was H. N. Glover; while C. S. Griffith, P. J. Booth and W. B. Irwin displayed the lubricating specialties.

The Invincible Fencing and Gate Steel Company of Canada showed its product in atractive form. In the booth were L. Krieger and W. Cameron.

The Imperial Steel and Wire Co. had on exhibition the various classes of wire goods turned out in the Collingwood factory. Major Currie, M. P. and J. T. Duguid explained these goods to the many who paused to examine them.

The William Buck Stove Company, Brantford, displayed the Happy Thought range as well as the Radiant and the Home. In the booth were, Edward E. Orr, Geo. Bray and T. H. McCormick.

The Flexible Conduit Co., of Guelph, showed the Broiduct product. J. S. Wheeler was in charge.

The Victor Electric Iron Co., of Guelph, showed up-to-date electrical labor savers in many designs. To explain the goods there were present, A. Wicks, J. Wilson and Alex Rose.

The Gurney Foundry Co., Toronto, as well as showing their various coal and gas ranges, conducted a demonstration of Ermaline Paper Bag Cookery. In this booth were, F. W. Spry, Allen Ross, D. W. Rose and E. H. Gurney.

The Stratford Manufacturing Company showed step ladders, extension ladders, and various styles of lawn seats and swings. Chas. Moore and Roy E. Harris were present to explain the goods.

The Dunlop Tire and Rubber Co., Toronto, showed mechanical rubber, fire and garden hose, and bicycle and automobile tires. In charge were, C. M. Woodburn, H. C. Austin and Mac Campbell.

The Northern Aluminum Company, Toronto displayed a wide variety of aluminum cooking utensils, conducting a drawing contest for a chafing dish. In charge were,, O. W. Schoffner, R. H. Osborne, G. B. Ogden and W. H. Konold.

The stock displayed had the advantage of being, in some cases, new goods and considerable interest centered on this booth as a result.

The Canadian Brass Company, Galt, showed high-grade brass goods for plumbers, gas companies and water works. In the booth were, T. H. McLaren, M. A. Schroder and J. A. McLaren.

Wondershine, Toronto, had a tastefully arranged booth with H. H. Speare, J. M. Waller and J. W. Hall in attendance.

Philip Carey Co., Toronto, showed roofing, asbestos papers, felts, and linofelt. In charge of the exhibit were, H. E. Rowell, Jas. Clarke and John C. Kyle.

J. H. Connor & Son, Ottawa, showed washers and wringers. I. L. Connor and J. T. Jeffrey being on hand to explain the machines.

The Jas. Stewart Mfg. Co., Woodstock, displayed furnaces, steel and cast iron ranges, heaters and registers. At the booth were C. E. Stewart, T. C. Stewart and E. McDougall.

The Gutta Percha and Rubber Manufacturing Co., Toronto, showed mechanical rubber goods, shoes and automobile tires. T. W. McKenney and H. E. Wiles were present to meet the many who paused to inspect the display.

The Onward Manufacturing Co., Berlin, had a display of "Onward" goods —Vacuum cleaners, sliding furniture shoes and the like. A. L. Hixon and T. A. Witzel were in charge.

The Hall-Zryd Foundry Co., Hespeler, displayed their furnaces, stoves and ranges. Z. A. Hall, O. Zryd and A. W. Cain were in charge.

The Moffat Stove Co., Weston, showed water heaters as well as the latest models in gas and coal ranges. T. L. Moffat, J. K. Moffat, F. W. Moffat, J. A. Sinclair and A. Staples were in the booth during the convention.

Clare Bros. & Co., Preston, showed their furnaces, stoves and ventilating boilers. To explain various points were present, H. L. Clare, A. N. W. Clare and J. Lochead.

Sanderson Harold Co., Paris, gave a large amount of space to refrigerators, but did not forget their screen doors and windows. In charge were, O. H. Miller and John Harold.

The Burrow, Stewart & Milne Co., Hamilton, displayed hotel ranges, as well as regular kitchen, gas and coal

ranges. Edward Goff and W. J. Carson were in attendance.

J. Wiss & Sons, Newark, N. J., showed their complete line of shears and in addition a stock of tools manufactured by C. Kraeuter & Co. W. M. Leith and E. W. Myers represented the company.

Dominion Register Co., Toronto, showed the McCaskey system of bookkeeping and cash accounting. J. C. O'Connor was in charge of the booth and the others in attendance were, J. E. Dennie, F. J. Nelson, W. H. Hunter.

Oneida Community Ltd., Tonawanda, N.Y., had a double space booth in which they displayed an attractive line of cutlery and their game trap window display suggestion. Those in charge were, W. T. Earle, S. A. Griffith, S. T. Hudson.

The sparkling silver on display proved one of the most attractive lines shown by any firm.

Page Wire Fence Co., Walkerville, showed all sizes and varieties of Regina vacuum cleaners, both electric and hand. J. C. Love and W. D. Love were in charge of the booth.

Canadian Gate Co., Guelph, showed some fine specimens of their product, H. R. Steele and N. J. Cabeldu were in charge.

The Ontario Desk and Supply Co., Elmira, had on exhibition mantels, flat top desks, typewriter desks and filing cabinets. J. L. Weichel and Andrew Edwards explained the goods to all interested.

The Harriston Stove Co., Harriston, showed a number of ranges and heaters. John E. Cave and Fred G. Blacker were in the booth.

The Brantford Roofing Co. had on exhibition samples of their product. In charge were, Fred. Chalcroft, J. A. Virtue, D. H. Smith, C. G. Secord, G. N. Huff and A. B. G. Tisdale.

A miniature house, covered with roofing, was a striking feature of this exhibit.

Benjamin Moore & Co., Toronto, showed Muresco wall finish, Sani-flat oil paint, Moore's cement coating and varnish stains. In charge of the display were, W. Howard, R. P. Barrington and M. Patterson.

The Canadian Carbon Co., Toronto, displayed dry cells, flash lights, spark plugs and accessories. Wm. A. Harris and J. A. Noice were in charge.

The Irving Electrical Supply Co., Guelph, had an exhibit of heating goods, percolators, chafing dishes and vacuum cleaners; with Henry Irving and H. D. Palser in charge.

The Sovereen Mitt, Glove & Robe Co., of Delhi, displayed samples of their product. N. B. Misener and W. M. Whitside attended to those who paused to examine the goods.

Lundy Shovel and Tool Co., Peterboro, had arranged their spades and shovels in attractive form. J. D. Lundy and F. C. Thomson were in the booth.

The Galt Robe Co., Galt, had a nook in the hall which made all the weary feel like taking a rest. Hammocks were swinging, while robes and other products of the company gave the booth an exceedingly pretty appearance. H. Sutcliffe and J. H. Bennett were the only ones who had the privilege of using the hammocks.

The One Minute Washer Co., Toronto, displayed washing machines and wringing machines. In charge were F. J. Ehrhardt, John Sawyer and John Weighton.

Taylor-Forbes Co., Guelph, had a large booth in which was shown all the new styles in builders' hardware. Adam Taylor, J. M. Taylor, Jr., Geo. Waters and C. F. Smallpiece spent some time in the booth.

The Ohio Varnish Co., Cleveland, had a demonstration showing the methods of using "floor finishing." W. H. Sauva, of Cleveland, was in charge of the booth.

The E. C. Atkins Co., Hamilton, had an electrical figure using one of their saws. C. R. Hubbard and J. A. Ross were on hand to show the full line of carpenter tools displayed.

Brandram-Henderson showed their Dutch process of manufacturing white lead. Those in charge of the exhibit were, A. W. Poole, H. B. Shuttleworth, W. B. Gillespie and O. M. Hodson.

Great interest was shown in the exhibit and those in charge were kept busy explaining how the corroding process was carried out. As an educational feature it was appreciated.

Lowe Bros. showed a wide variety of their paints and advertising helps. In the booth were, Frank H. Brown, Jas. Mac Martin, E. Thomson, N. S. Van Zant and Milton Bergey.

The Lowe Bros.' display covered two spaces and showed their line to best advantage. Wall space at the end of the passage had been obtained for a striking poster.

The Down Draft Furnace Co., Galt, had fire places, furnaces and ranges arranged to good advantage. J. Lohrt and T. Parnell were in charge of the exhibit.

The Gendron Manufacturing Co., Toronto, brought bath room fixtures prominently to the attention of those attending the convention. Express wagons and go-carts were also shown. W. H. Bateman and T. Chadwick were on hand to demonstrate the goods.

Stanley Rule and Level Co., New Britton displayed the wide variety of tools made at their Rexton Pond Canadian factory. Bedrock Jones and X. Gooszen were in charge.

The Standard Paint Co., of Canada, Montreal, displayed Ruberoid Roofing. In the booth were H. H. Coward and D. Kirkpatrick.

The Tobin Arms Manufacturing Co., Woodstock, showed in their large booth arms and high speed bits. In charge were, F. M. Tobin, C. D. TenEycke and F. M. Tobin, Jr.

Dominion Roofing Co., Toronto, had a booth full of Mule-Hide Roofing with G. L. Bailey and Earl R. Maltby in charge.

The "Mule-Head" trade mark was strikingly displayed. The general arrangement of their stock was unique.

The National Equipment Co., Toronto, showed Peerless water service systems and Wayne oil tanks. Marben Quinn, C. J. Wilson, A. McGregor and C. Potter demonstrating these.

The Canadian H. W. Johns-Manville Co., Toronto, displayed roofing and asbestos pipe covering. W. J. Commins, E. S. Baum and J. H. Shaver were in the booth.

The Gilson Manufacturing Co., Guelph, had in their booth gasoline engines, pumps, jacks and accessories. P. Charlton and E. Banelman were there to demonstrate.

Louden Machinery Co., Guelph, displayed all kinds of barn fittings. H. B. Calendar was in charge.

Shurly-Dietrich Co., Galt, had no booth, just a space on the wall, but it was exactly what was needed to show saws of all kinds. Percy Dietrich and E. C. McMurtry explained their products to all interested.

The Carborundum Co., Niagara Falls, showed all kinds of sharpening stones for the hardware trade. W. C. Schwab, Fred Rose and D. Morrison explained the various lines.

Buffalo Sled Co., Preston, brought swings, snow shovels and sleds to the attention of the members. M. E. Seaman was in charge.

Martin-Senour Co., Montreal, showed their full line of paint and their selling helps. J. H. Conover was in charge and associated with him were E. J. Cookson, W. T. Fleming, C. F. Kendall. W. H. Gerke, the manager, also paid a visit to the convention.

The arrangement of their double-space booth had been most effectively carried out. A great quantity of paint of all varieties was shown.

Ontario Lantern & Lamp Co., Hamilton, had one of the most striking exhibits of all. Some very handsome electric fixtures were shown and as these were connected up, it was possible to show them lighted. In addition, a complete line of lamps and lanterns was shown. Those in charge were W. D. Ginder, W. F. Kelly and F. Goodwin.

Glidden Varnish Co., Toronto, had a very striking display of their various lines and showed in addition a variety of selling helps. Considerable literature relating to the retailing of varnishes and inside finshes was handed to visitors. The arrangement of the goods is deserving of special metion. Those in charge were E. J. Hofford, R. D. Blackwell and F. H. Velling.

DESCRIPTION OF EXHIBITS.

The Down Draft Furnace Company, Galt, showed prominently a fire place—just a sample of the new line the concern is turning out in various finishes and designs. The Perfect Banner Steel Range, with its special water front was also shown, as was the Banner Chieftain Steel Range. J. Sohrt was on hand to explain the stoves.

The Taylor-Forbes Manufacturing Co., Guelph, had a large display showing a wide line of builders' hardware—door knobs, coat hooks, and similar necessities in many finishes. Lawn mowers, too, were displayed; a new model among these, which has three speeds, much like an automobile. This machine enables the securing of much better lawns.

A beautiful mould of "The Lord's Supper," worth $5,000, though not large in size, was shown in the booth, and attracted a great deal of attention. In the booth at various times were Adam Taylor, J. M. Taylor, jr., and C. Smallpiece, of Montreal.

The James Stewart Manufacturing Company, Woodstock, had an exceedingly impressive display. At the back, but well in view, were arranged radiators; some fine lines in new finishes. In the front was a new model "Good Cheer Steel Range," and a "Good Cheer" water pan furnace. Many stopped to examine the various ranges, the furnaces and the radiators, and these were shown the good points by Chas. E. Stewart and others.

Cummer-Dowswell, Limited, Hamilton, showed wringers and washing machines. They had the washing machines moving, and the wringers on the machine ready to be operated. Many paused to inspect this booth.

The Gurney Foundry Company, Toronto, showed their Economizer Range, which is a great fuel saver. The Oxford, too, was shown, and gas ranges, small and large, were placed near the front. In one of these paper bag cookery was done, which showed some of the virtues of the range. E. Holt Gurney and others were on hand to explain the stoves.

Pratt and Lambert, of Bridgeburg, showed in the rear of their booth a beautiful "Californian Red Oak Burl," which had been perfectly kept by P. and L. 38 Preservative. "61" Floor Varnish was also shown, not only in the can but on a floor. Two pillars beautified with "White Vitralite" were also on display. A. E. Miller was in charge.

The Imperial Varnish Company, Toronto, had spent some time preparing their booth. Maple Leaf Interior and Exterior Paints, Elastilite, varnish and floor glaze were tastefully arranged. Small specimens of the work were shown, the whole making a most attractive show.

Entertainment Features and Anecdotes

The stalwart figure of A. A. Bittues was missed on the police committee.

* * *

Oil stoves were in requisition again and the Queen City Oil Co. came to the rescue.

* * *

The convention badge was voted one of the best yet. They were very much in request and there was a continual demand for them from outsiders.

* * *

"On to Montreal," is now the cry.

* * *

When it comes down to singing, hardwaremen are like sheep; they need to be led. Wouldn't it be a good thing next year, to have a regular leader appointed for all sessions?

* * *

J. S. Weichel sang "The Great Question Box," at the smoking concert—a song of his own composition.

Part of it read as follows:

The life of the meet is the Great Question Box.
Now take my advice and make it a feature.
This Great Question Box is important, you know,
The problems are knotty that face the retail creature,
If they are not solved, profits melt just like snow.
Now come and relate and let us have your say,
Don't take a back seat but stand by your rocks,
Sometimes a few words that are spoken this way,
Help matters along in this Great Question Box.

* * *

The progressive euchre party was held at the city hall in the evening. The manufacturers had donated a number of handsome prizes and there was a warm contest as a result.

* * *

W. G. Scott, who served as president in the second of the association's history, was an interested spectator, Thursday.

THE CIVIC LUNCHEON.

A luncheon to the officers of the association and the exhibitors was given by the city on Wednesday. It was held in the Royal Canadian Cafe, starting at one o'clock and proved one of the most enjoyable events of the convention.

Mayor Thorp presided and led off the toast list by proposing the health of the King.

Ald. Mahoney proposed the Officers of the Association, responses being given by President R. C. Chown, vice-president Madole and Secretary Wrigley.

"Manufacturers and their representatives," was proposed by Ald. Carter and responded to by Adam Taylor, of Taylor-Forbes; E. Holt Gurney, of the Gurney Foundry Co.; T. Tobin, of the Tobin Arms Co.; and Harry C. Martin, president of the British Columbia Association.

"The Press" was proposed by Ald. Lawson. H. T. Hunter responded for Hardware and Metal and W. Wrigley for the Canadian Hardware, Stove and Paint Journal.

TRAVELERS WIN AT EUCHRE.

Guelph, Feb. 23.—With the euchre competition last night the Guelph convention came to a hilarious end. True a member did express doubt of one man's score. There were other rather ridiculous features, but despite these the evening provided a great deal of amusement. But it does seem that at subsequent events of the kind the travelers should be handicapped. Why, they bagged practically all the prizes. W. J.

Bell. "The Beeton Bell," being the only retailer to be well up.

Those securing the higher prizes were:—

Fred Wemp, Pinchin-Johnson. The loving cup given by the Taylor-Forbes Company for the player securing the highest number of lone hands.

The regular score prizes were awarded in this order: 1—A. E. Cowley, Sherwin-Williams; 2—P. J. Boothe, Queen City Oil Co., Toronto; 3—J. F. Duguid, Imperial Steel Co.; 4—W. J. Bell, Beeton; 5—Fred Wemp, Sherwin-Williams; 6—Edward E. Orr, Buck Stove Co. Brantford; 7—Harold L. Reid, Taylor-Forbes; 8—D. B. Blackwell, Glidden Varnish; 9—J. Roger, Ashwood; 10—Wm. W. Harris, Canadian Carbon Co., Toronto.

THE SMOKING CONCERT.

The feature of the evening, of course, was the German band from Elmira, headed by the versatile J. S. Weichel. Their first number of note was a grand opera selection sung—and acted—in German. Opinion differed in the audience as to whether it was "Carmen" or "Il Trovatore," but all agreed that the music was good and that Weichel as a comedian had Jimmy Powers lashed to the lamppost. After that, they gave a band selection in which each member had to imitate some instrument and they severally and in concert piped, thrummed, caroled or wheezed according to the instruments they were representing, with great fidelity and perseverance.

* * *

W. C. Hossack, of the Lufkin Rule Company, is gifted with an artistic temperament highly developed. Glaring things jar on his sensibilities, and so before proceedings started he felt compelled to leap to his feet. "Mr. Secretary," he said, "would you ask our President, R. C. Chown, to turn down his trouser legs. I can't stand the sight of those socks."

The roar of laughter which ensued did not perturb the President at all, but he complied with the request, hiding the green ones.

* * *

Upon the broad shoulders of W. A. Rankin responsibilities sit lightly. He was entrusted with the task of passing around the cigars, which he accomplished without pocketing too many or without letting any others corner the supplies. Mr. Rankin's strong right arm was needed to protect the smoke, however. He belabored the unruly with the cigar box in great style.

* * *

At some of the afternoon sessions the singing was lamentably poor, but no such criticism could be made of the vocal numbers at the smoker. Given real songs instead of pointless parodies and the hardwaremen can surely sing. How the chorus of "The Maple Leaf" rang through the hall; while "Old Black Joe" got every man present singing.

* * *

Ed. Wanless sang the verses of the fine old negro melody, and well he sang it, too; but if he hadn't asked all to join in the chorus he would have found there were some 300 Ed Wanlesses present.

* * *

J. W. Spaulding was another singer who pleased the crowd mightily. As he rendered Loch Lomond all got in the spirit of the Scotch ballad, and even such good Irishmen as Will Magladery extolled the "bonny, bonny banks."

* * *

Milton Bergey was very much in evidence, giving several recitations. His first was Kipling's "Gunga Din." Unfortunately a crowd just outside the door insisted on supplying the din part of it and Mr. Bergey's recital of the death of the "squidgy-nosed old idol" was hard to follow as a result. He also gave an imitation of a divine of the old school constructing a discourse with the flimsy material contained in the story of old Mother Hubbard.

* * *

Mr. Bergey's venture with Kipling brought Mr. Black, of Bond's Hardware, to the fore with a recital of Mr. Dooley's opinion of the aforementioned bard. Mr. Black added to the opinions of the loquacious Irish philosopher a few remarks of his own; such as "where th' divil's Belleville?"

* * *

James McGregor, of Oakville, demonstrated that Canada has a poet of her own by reciting a couple of the stirring ballads of Service. Mr. McGregor made them realistic and, without "tearing the passion to pieces," managed to infuse some typical Yukon ginger into his rendition. He deserved and got plenty of applause.

There was a call for a song from Geo. Ecclestone, the "Cock o' the North," but he was not feeling in vocal trim and remained discreetly in the background.

LOOKING TO HAMILTON AS NEXT CONVENTION CITY.

Guelph, Feb. 22.—From what is learned to-night, it appears that the joint meetings of the Ontario Retail Hardware and Stove Dealers' Association and the recently formed Canadian Hardware Manufacturers' Exhibitors, Limited, will next February meet in Hamilton. Following the meeting of the retailers this afternoon, at which the proposals of the manufacturers were approved, a meeting of a committee from each body was held. Though Belleville, through the Mayor, had invited the retailers, the manufacturers contended that the exhibition could not be held advantageously in a city of less than 40,000 people. So it was decided that Hamilton would be the place, if proper arrangements for a hall and for hotel accommodation can be made. The proposal to visit the ambitious city seems to meet general approval.

AN ENORMOUS FITTING.

A 56-inch ell made for the Winnipeg Electric Railway Co., Winnipeg, Man., running about 14,000 pounds, is of such great length from centre to face that it is in a class out of the ordinary in regular foundry practice. The accompanying illustration shows the enormous core of baked sand, which weighed about seven tons.

These large fittings serve to graphically mark the trend of steam engineering toward large units. A few years ago if a fitting of such a size was used at all, it would have been at the end of an exhaust main, carrying the steam from a number of engines; but with the increase in the unit sizes, a fitting such as shown may be necessary for an individual engine, as in this case.

Core used for large fitting.

The Traps That Caught the Mice

By Victor Lauriston.

When the 5-10-15-cent store loaded its windows full of mouse traps at three for five cents, it looked like a knockout for the ten-cent traps which Hardwareman Jones had stocked a couple of weeks before. The blow rather dazed Hardwareman Jones, for a few moments. Of course, there are plenty of other hardware lines besides mouse traps. The transaction in itself was of little moment, and the incidental loss hardly worth mentioning. But Hardwareman Jones had the true business man's objection to being loaded up with unsalables—and to be stocked with a big supply of quality goods which couldn't be sold because somebody else was selling an inferior article at a more appealing price was pretty hard lines, just the same.

Jones had figured on a slow but steady sale—a trap now and another trap again, the full price each time, and a fair margin of profit. With the advent of the three-for-five's half a dozen doors away, the slow but steady sale entirely ceased. Those people who, in the regular order of things, found that they wanted mouse traps, bought the cheap article.

"Shall I cut the price?" mused Jones, when, in a vagrant idle moment he found time from bigger cares to ponder the matter. "Say I sell a ten-cent trap for seven cents. That pretty nearly wipes out the profit, but—I don't believe in leaving stock on the shelves. But—"

Would such a cut, after all, sell the quality traps? Jones had his inner doubts.

Just then an inspiration came kiting from somewhere.

"By jingo, I'll do it!" he exclaimed. He turned to the stenographer. "Write to the National Novelty Company and tell them—" he began.

Again he mused. "No," he thought, "that won't do. If the scheme works I won't need them, and if it doesn't, I don't want to handle them. Here, Tom," he exclaimed to the lad who was dusting the cutlery case, "run down to the ten-cent store and buy me two dozen of those little three-for-five traps. Hustle."

When the traps arrived, the junior piled them in the little corner window. Then, under Jones' direction, he wrote some striking show cards to accompany them. "Special—three for 5c," read the cards. Then he stacked a few of the three-for-five's and a pile of the ten-cent traps on top of the show case nearest the door. Price cards were placed on each pile.

He was just finishing his task when a lady bustled in. After the manner of her sex, she insisted on being waited on by the proprietor.

"I would like five cents' worth of those little mouse traps," she remarked. "They're just the thing I've—"

Just then her eye lit upon the larger traps. Jones knew that she mentally compared the two.

"These little traps are constructed on identically the same principle as the regular ten-cent trap," explained Jones, very seriously. "You will notice," he picked up the larger trap and showed it, "that the spring works in precisely the same way. Of course, the material in the ten-cent trap is much more substantial—"

"Will those little traps catch anything?" demanded the woman, with sudden suspicion.

"Yes, they certainly will." Jones' tone was calm and dignified. "They're a good little trap for the money. Of course, they're by no means as substantial as the higher-priced article. You, of course, notice that." He placed a large trap and a small one side by side. "This little trap catches a mouse—it's not large enough for a good-sized rat. The larger, stronger trap will take both. Then, I know from what people have told me, that in some cases after the little trap's been spring once, the spring gets twisted and it's impossible to set the trap a second time. Of course, that mayn't happen once in a hundred times,"

"And it might happen to all three?" questioned the woman, eyeing the little trap with manifest disfavor.

"That's just why we don't like to recommend these little fellows," added Jones. "We stock them because quite a few people seem to like a very cheap trap. They're a good little trap for the money; but, when it comes to downright, lasting service, this,"—he picked up the ten-cent trap—"is the better value by far."

The woman regarded the two articles thoughtfully.

"I'll take a ten-cent trap," she remarked, suddenly. "After all, it's not what one pays now, but what one pays in the long run, that makes it expensive."

Jones glanced meaningly at Tommy after he had seen the customer out.

"There's more ways of killing a cat than choking it with cream," he mused, "and—well, a wise man can generally catch the mouse trap business without using cut-price bait. And we're the wise men, Thomas."

CURRENT NEWS.

New Lamp Factory.

St. Catharines, Ont. — The Presto Lamp Co., of Indianopolis, are establishing a Canadian branch factory here. Automobile, bicycle, boat and carriage lamps will be manufactured.

Burglars Routed Out.

Ladysmith, B.C.—Nightwatchman O'Connell detected a couple of burglars entering the store of the Ladysmith Hardware Co. They both managed to get away.

To Build Warehouse.

Vancouver, B.C.—A new wholesale section is being built up and one of the first large buildings in that locality will be that of Wood, Vallance & Leggatt. They will put up a six-storey warehouse at a cost of $85,000.

J. S. Murray Honored.

Blairmore, Alta.—J. S. Murray, who has gone to Bellevue to conduct a hardware store was presented with a handsome cut glass collection by the congregation of the Presbyterian church.

HANDY DIE STOCK.

The Handy die stock is a new pipe-threading tool, put upon the market by the Handy Manufacturing Co., of Bridgeport, Conn., and handled in Canada by Henderson & Richardson, Board of Trade Building, Montreal.

The tool is light in weight. May be easily carried, and by its simplicity and easiness of setting, should be of value to those who work with pipe.

LUTHER GRINDER STANDS.

Floor and counter stands have been put out by the Luther Grinder Manufacturing Co.

These two stands are made only for Luther Grinders. One of them is a floor stand a little over five feet in height; the other is about three feet high, intended for use on a counter. They are built entirely of metal with an ample base that will afford good support. A tubular steel shaft supports, in the case of the floor stand, three different brackets, and in the case of the counter stand, two brackets. Each bracket has room for three Luther Grinders. A globe representing the world tops the shaft and above this is a diamond-shaped name plate. The stands are neatly finished in black and red enamel, with the name plate of burnished bronze and the central shaft oxidized similarly to gun metal.

Hardware Clerks Hold Banquet

New Westminster, B.C., Feb. 19.—A remarkable interest is being taken by hardwaremen, both clerks and employers, in the trade in British Columbia. This has been shown from time to time by the successful meetings of the association and by the way that some of the more prominent are showing in the public eye. The inner activity of the hardwaremen is being noticed by the people on the outside.

In line with an active policy, the New Westminster Hardware Clerks' Association held their first annual banquet on the 7th instant, and to say that it was a success would be putting it mildly. Fifty seats were occupied at the table in St. Paul's lecture hall, and all those present were employed directly in the hardware business. Great enthusiasm was shown, which carried the evening through with a bang and with that zest that makes one long for more. The result was that it was decided to make the event an annual affair, and in future it will figure as one of the social functions in connection with the trade in this province.

The aim of the organizers of the banquet was to bring the members of the trade together, get them thoroughly acquainted, instead of having each feel that the other is a competitor and therefore to be shunned. The idea was to foster that spirit of mutual comradie, the existence of which is necessary to successful work in organization and to make the association a sure success. It also gave opportunity to discuss general trade matters to the mutual benefit of clerks and employers. The banquet demonstrated that the members of the hardware trade in New Westminster are well alive.

In the course of his remarks, one of the speakers portrayed the difference between the present day New Westminster and what the city was when he came to it years ago. Then there was but one hardware store in the town, whereas there are now seven first-class stores, employing upwards of sixty clerks. This speaks well for the growth of New Westminster and the outlook for trade.

A. Davis proved an excellent chairman. The room was appropriately decorated with articles of hardware and the clerks wore badges as distinguishing marks, made up for the occasion from stock.

Loyal Canadians all, the proceedings opened by the singing of "The Maple Leaf Forever," the accompaniment being by C. Oxenbury. Speeches, songs and musical selections followed and showed that the nail men were not behind in the art of entertaining.

Welcome visitors were present in the persons of Mr. White, of McLennan, McFeely & Company, and Mr. Morrison, of the New Westminster Nail Works. Both made rousing speeches. Mr. Morrison, taking as his watchword, "Let New Westminster Flourish," said he hoped to see the day when all the houses would be built with the best nails, namely, those manufactured in the Royal City on the Fraser. Mr. White told of the days when he worked behind the counter and urged the younger clerks to equip themselves so that they would be ready when the opportunity was presented to them. He hoped to see the time when New Westminster leaders would be chosen from the ranks of the hardware trade.

A lusty singing of "God Save the King" brought a very pleasant and satisfactory evening to a close.

By "Mack."

Sometimes when reviewing the many occasions upon which I had expected to realize a tangible benefit and did not, I own to being puzzled.

That which was pursued eventually ended in the region of illusion. This condition of the mental structure continues long after our childish illusions disappear, for if we may think so the delusions of many staid people are oftentimes shown to be about as chemerical as any of those which dominated the mind in early years. Just how our best laid plans merge into something resembling a pleasant dream does not concern us so much as being able to distinguish the real from the illusionary. Experience does not seem to act as the teacher that instructs us in the difficult art of being practical. The mistakes we made yesterday guide us perhaps no more than the stern lights of the ship at night and looking forward becomes no less difficult and uncertain.

Now anyone would deem the subject of taxation as devoid of delusion we shall assume. The taxes are said to fall due on certain dates with the certainty of fate, and payment is exacted.

This is a condition of life which all of us support and nearly everyone feels it a right to inveigh against the heavy tax that falls to one's lot to pay.

Here we have no illusions regarding the reality of life and its responsibilities, for the annual tribute is collected with the regularity of the rotation of the planet on its axis, unless we default payment. But we do not contemplate such a contingency arising and to make assurance of our ability to meet this obligation certain, nothing is allowed to interfere with a financial provision equal to the amount required. The usual illusion associated with this subject conjures up to the mind's eye the possibility of a lower rate next time.

Alas very often we know by experience that this hope is a mirage also and the opposite condition the stern reality.

Probably at some time in life we have thought of the indulgence in pleasures long held in suspension until favorably situated to embrace them. The time arrives and to our amazement the great times anticipated take wings and vanish. Oh well! we may say, that it was enjoyment enough picturing in imagination that which was so much desired. The many different views of that which each of us holds as essential to pleasurable emotion will likely, upon being analyzed be seen to be constituted of similar parts. And in one respect identical as having been actuated by common impulse.

The force of the impulse toward our pastimes or pleasures determines largely beforehand whether we are to reach our object or defeat it.

Should the impulse predominate the mind then the evolution of events shows another illusion shattered.

Splane—Hatheway.

St. John, N. B.—The marriage of John B. Splane, of the staff of T. McAvity & Sons, to Miss May Hatheway, was solemnized by Rev. R. P. McKim.

Another Attempt.

Fort William, Ont.—The hardware store of W. G. Colville was entered by burglars and some tools stolen. Nothing of particular value was secured.

Will Lead Delegation.

Dalls B. Smith, Jr., of Opelika, formerly of the Richardson Mica Works, Kingston, will lead the Alabama delegation to the Republican convention at Chicago in June.

PUBLISHED EVERY SATURDAY.

THE ONTARIO CONVENTION.

The seventh annual convention of the Ontario Retail Hardware and Stove Dealers' Association is over. It was in many respects a remarkable gathering and developments of an unusual nature featured the proceedings.

In some respects the convention was a success. The manufacturers' exhibits were more numerous and better than ever before. The discussions resulted in bringing out many useful points and those who attended will doubtless carry home new ideas.

The attendance of retailers was smaller than last year, however, and this fact detracted seriously from the success scored in other ways.

The Winter Fair Building was not found to be as suitable as had been expected. Part of the building was poorly heated and the scattering of the exhibits in various sections was a deterrent feature. The accommodation provided for the visitors was excellent, considering the size of the city. In this connection, credit is due to the civic officials for the system evolved of sending late arrivals to private homes. It did much to relieve the congestion.

The Question Box session was again a feature of the convention. Many live questions were discussed in a live way and there can be no doubt that every man who sat through it would leave the hall a better hardwareman.

The absence of a good window display feature was to be regretted. The displays shown in Guelph hardware windows were excellent examples, however, and did much to make up for that deficiency.

The fact that the personnel of the executive has been practically the same for several years came in for some comment. All the present executive members are good men, and it would indeed be a difficult matter to decide where a change could be made. Nevertheless, it is a good plan to pass the honors around as much as possible. The infusion of new blood always has a livening effect, and there are dozens of progressive and able men in the association who have never held office.

A WISE COURSE AT MONTREAL.

Those in charge of the Convention and Exhibition which opens in the 65th Armoury, Montreal, this coming Tuesday, have taken steps to ensure a good attendance. Not only are the retailers to be allowed in the exhibit—as at Guelph—but on certain days the hall is to be thrown open to business men who are greatly interested in hardware lines. An invitation has been extended to the Painters' Union. The carpenters have been asked to attend. A day has been set aside for the architects and members of the Builders' Exchange; while mechanics, through the Machinists' Union, have received an invitation.

From each of these organizations has come a reply, stating that the members in large numbers will visit the exhibits; thus a fine attendance is assured.

The wisdom of throwing the exhibits open in this way must be apparent. The convention after all, is for the retailers. It is to help them with their buying and selling problems; and surely these selling problems will be solved in no small degree by allowing the good retail buyers to view the exhibits. A demand will be stimulated, and retailer, jobber and manufacturer will benefit.

WHO PAYS THE TRAVELERS?

In speaking at the travelers' meeting—one of the best held at the Guelph convention—Harry Martin, of British Columbia, himself experienced on the road, urged upon the retailers the necessity of treating the traveling representatives of distant firms with courtesy and consideration. "When you notice a traveler in your store," he said, "don't keep him waiting. If impossible to see him at once, appoint an hour and let the man—who is as busy as you are—get off on other business."

There is more than mere courtesy suggested here. The whole question of conserving energy and expense is involved. A retailer keeps a traveler needlessly; the traveler misses a train; has extra hotel expenses, and is unable to cover his territory as quickly as he had hoped. Multiply that state of affairs by the number of thoughtless dealers who do fail to put themselves out for the travelers. The wasted days which this calculation would show—could it be made—would be startling.

But who pays for the wasted days. Is it the manufacturer, the jobber? At first perhaps yes, but sooner or later the extra selling cost thus necessitated works back to the consumer. The retailer will have to sell him the goods at a higher price. Possibly this may not mean a financial loss to him—but it will mean harder work, for every one knows that the higher the price goes the harder it is to sell the article for which that price is asked.

No, the retailer is vitally interested in keeping down the cost of marketing manufactured products. Higher cost of marketing means higher cost of selling, to the consumer, and the profit being the same, the lower an article can be sold the better.

Mr. Kennedy, of Dayton, Ohio, told a story which all travelers, and all those visited by travelers will appreciate.

"I was talking up our paint," he said. "I had stated that there was no better paint made, and explained that we had aimed to make it like the human skin—able to give off moisture and yet able to exclude it. But we haven't quite achieved our aim," added Mr. Kennedy, "we're free to confess the Lord has us beaten."

"I'm glad to hear," said the dealer, "that someone has you beaten."

During a discussion in which was being urged the importance of keeping the attention of customers who had "just dropped in," A. Welch told of a young boot salesman who had taken off a young lady's shoe, and carrying it under his arm he attended to three other customers before returning to her. "That," said Mr. Welch, "was a wise clerk. He made certain that his customer would stay."

AN OPPORTUNITY MISSED.

Some years ago Col. MacLean, publisher of Hardware and Metal, offered to take the members of the Ontario Association to Guelph at his expense in order that they might visit the Agricultural College. It was recognized that the visit would have brought to the members much practical and interesting information, but arrangements for the trip could not at that time be completed.

It was unfortunate that time was not set aside during the past week to permit the members to visit the College in a body. A majority of the dealers in attendance probably cater more to the trade of the farmer than to that of any other class. A visit to the College would have given the members an insight into the vast strides made by agriculture and would have suggested to them ways in which they could go about interesting the farmer. There are many articles which most farmers do not use and which hardwaremen do not carry, but which are necessary and essential in up-to-date farming. If the latter started to carry goods of this nature and knew how to push them, the farmers would soon become users. After a visit to that wonderful place, the Ontario Agricultural College, the hardware dealer would return to his place of business inspired by new ideas for improving his acquaintance and trade with the farmer.

A splendid opportunity was missed. A trip to the Model Farm would have been one of the features of the convention and the means of much lasting good.

THE SMALL ATTENDANCE.

The attendance of retailers at the convention was small. No one will gainsay that. It was a fact to be deplored, for the future success of the association depends upon the maintenance of interest among the retail dealers. The extremely unfavorable weather on Wednesday and Thursday had something to do, undoubtedly, with the shrinkage in the attendance, but the large majority of those who had intended to come had already put in an appearance before the storm king tied up the railroads.

What was the cause of the comparatively small number of retailers in attendance? Guelph is centrally located. A good programme was assured. It was known that the manufacturers' exhibit would be better than ever.

This matter is commended to the serious attention of the new officers, for it is one of vital importance. Should not the whole energies of the organization be devoted next year to getting the retailers interested and bringing them out in full force?

AMENDMENT TO ASSESSMENT ACT.

An act to amend the Ontario Assessment Act has been introduced into the Legislature. This is of a great deal of interest to retail dealers, and should be followed closely.

It refers to the rights of municipalities in determining how taxes shall be levied so far as land values, improvements and incomes are concerned. The chief section of the bill states that the council of a municipality, after the same has been submitted to and approved of by the ratepayers qualified to vote on money by-laws, may pass a by-law providing that land, real property and real estate shall be assessed at its actual value and that improvements and incomes shall be assessed at a percentage of their actual value. But the assessment of improvements and income shall not in the first year in which the by-law takes effect be reduced by more than forty per cent. of the assessment of the same for the next preceding year, and shall not in any year subsequent to the first year be reduced by more than fifteen per cent. of the assessment of the same for the next preceding year.

Whether this act, or one covering the principles involved, will go through is a question, as Premier Whitney, when he last expressed a view on the subject was pretty much against it. Retailers' views on such an act would be appreciated.

POINTED EDITORIALS.

Paint sales in February depend solely upon effort. A good salesman can sell at any and all times.

* * *

Don't be afraid to follow up sales by asking the customer next time he comes in, how he liked the goods.

* * *

"Don't use your stove for a table," advises Mr. Gurney. Right. The man who does will likely keep his table long.

* * *

Now the manner in which March will arrive is becoming a live question. Will it be like lamb or lion? Either may be hard to bear.

* * *

A lot has been heard of late about "the Seven Sleepers." There were many single rooms at Guelph which contained the snores of these.

* * *

From Guelph to Montreal is a far cry, but conventions and exhibitions in both places give all retailers east of Fort William a chance to attend at reasonable expense.

* * *

"To fight against parcel post," declared a retailer recently, "is to fight against the spirit of the age." If this is so there is a strong spirit of a better age about.

* * *

Window displays, continue the best "barkers" of the retail stores. A manager reports a trim as bringing three-quarters of the store's total trade the first night it was shown.

* * *

After hearing Mayor Thorp one was forced to the conclusion that Guelph is called the Royal City because at some period or other a King of England married a Mrs. Guelph. Or hold—was it not that his mother-in-law, or a second cousin owned to that name? His Worship did not seem quite sure about it.

* * *

A speaker at the Guelph convention spoke of hardwaremen to whom manufacturers will not send literature, because they throw this literature under the counters. Such dealers are called "Bailing Machines" in the United States. It would seem the term is wrong, for a bailing machine accomplishes something.

* * *

Cold weather is good for some people. The plumber is kept busy and the coal man's smile expands in direct ratio to the shrinkage of the mercury. But the average business man, particularly the retail dealer, suffers when the weather is cold enough to keep people indoors. The weather so far this winter has been far from favorable from the trade standpoint.

* * *

Department of Customs, Ottawa, in appraisers' bulletin No. 515, states that the importations of brooms coming from the Central Broom Company, Jefferson City, Mo., U. S. A., are to be placed under detention on the ground that they are prohibited under tariff item re prison labor goods.

Complete Course in Sheet Metal Work

Number 2.

On plates 1 and 2 we show all the practical geometry that is necessary for the sheet metal worker to know.

The student should carefully draw these forms until he is familiar with them.

For drawing the Pentagon, Hexagon and Octagon the simplest way is to draw a circle and step it off into the desired number of sides. For instance, if it is desired to draw a Pentagon or five-sided figure, first draw a circle the size of the figure wanted, and with the dividers step it off into five equal spaces, and draw straight lines connecting the different points.

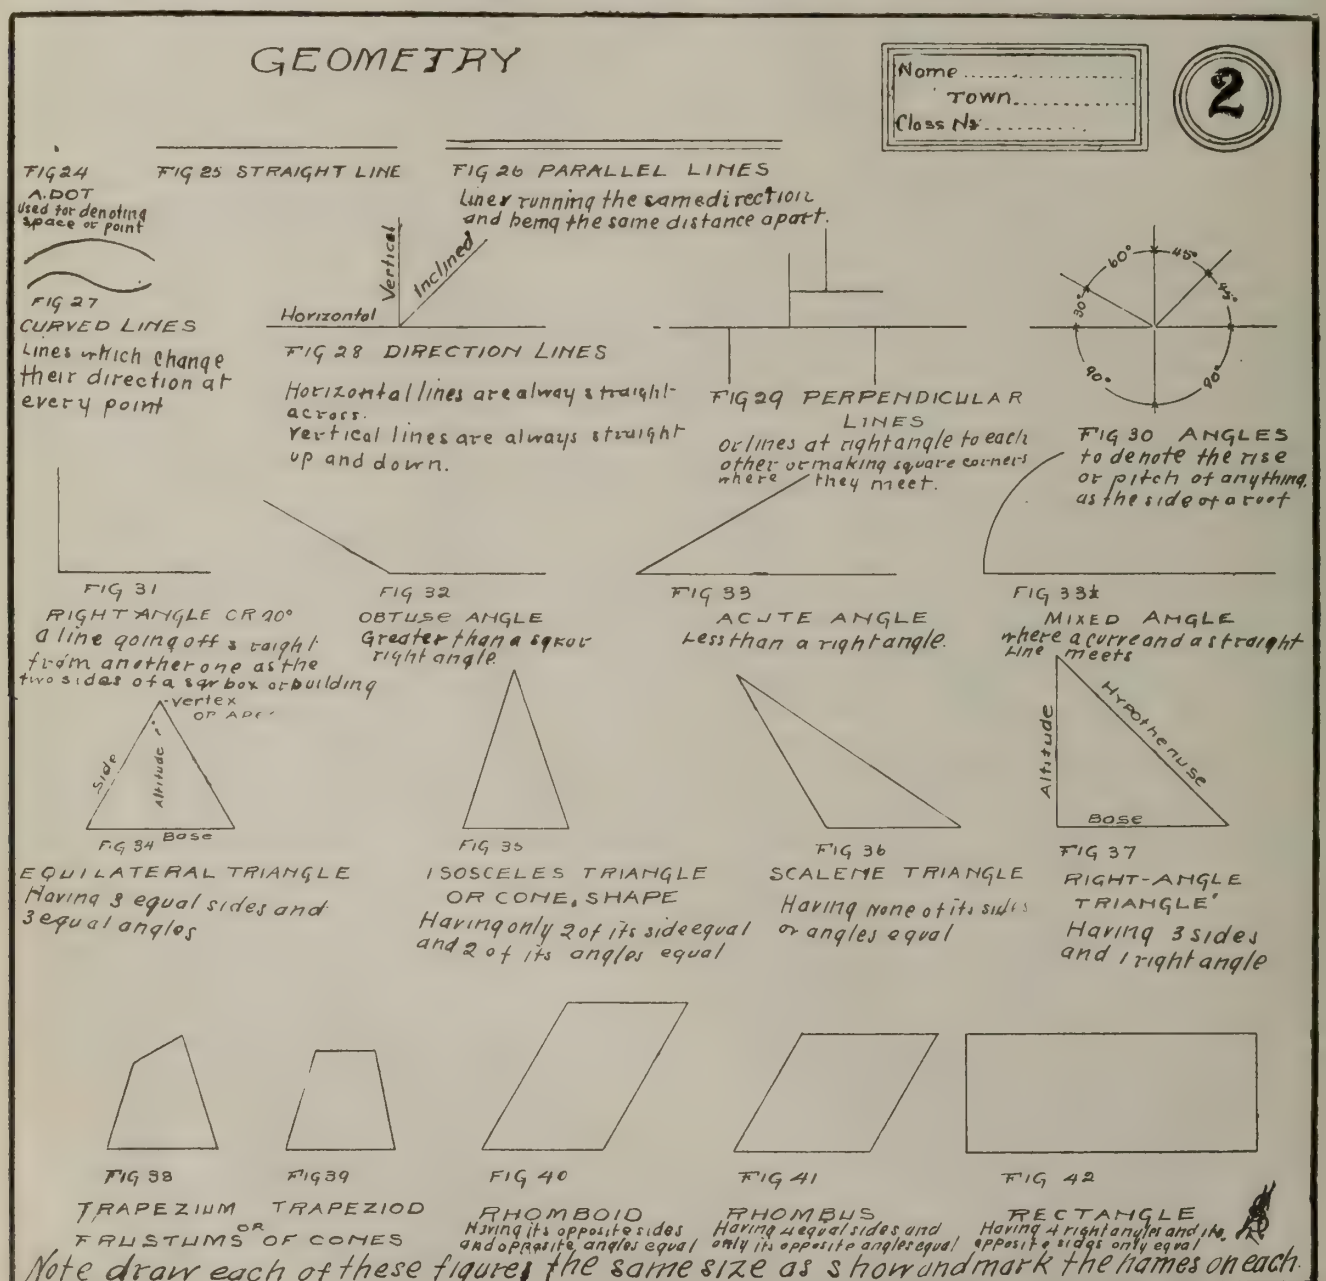
Some, however, may prefer the technical method for drawing these figures, and for their benefit we give the following propositions in Euclid:

To describe or draw a Pentagon.—Draw a circle the size of the desired figure; next draw a straight line through the circle as A B, and another straight line at right angles as C O; bisect the space A O. (The rule for bisecting is explained by Fig. 55). With the point of the compass set at R and the lead at C, describe the arc C G; then with the point at C and the lead at G, describe the arc at G F. Connect C F with a straight line, which will be one side of the Pentagon. Set the dividers to this space, and step off the other four sides.

To describe a Heptagon.—Draw a circle; set the point of the compass at any point on the circumference as A, and with a radius equal to the radius of the circle as A B, describe the arc C G; connect C G with a straight line, also A B, and where they intersect mark the point O; with the point of the compass at G, and with a radius equal to G O, describe the arc O R, connect R G, which will be one side of the Heptagon.

To describe an Octagon.—First draw a square the size of the Octagon wanted; set the point of the compass at any corner, as A, and with a radius equal to half the diagonal or centre of the square, describe the arc C G; repeat this operation at each of the four corners, connecting the ends of arcs will give the Octagon.

To describe an Ellipse. (This should be drawn fairly large).—First draw a straight line the length of the required Ellipse, as A E, and at right angles and through the centre of this line draw another line C D, which represents the



width, mark the intersection O, set the point of the compass at C, and with a radius equal to B O, describe the arc N M; set a pin firmly at N M and C; wrap a string around these points with a loop or knot at C; remove the pin C and insert the point of the lead pencil. Keep the string tight and begin moving the pencil around; the result will be an Ellipse, which will be sufficiently accurate for sheet metal work.

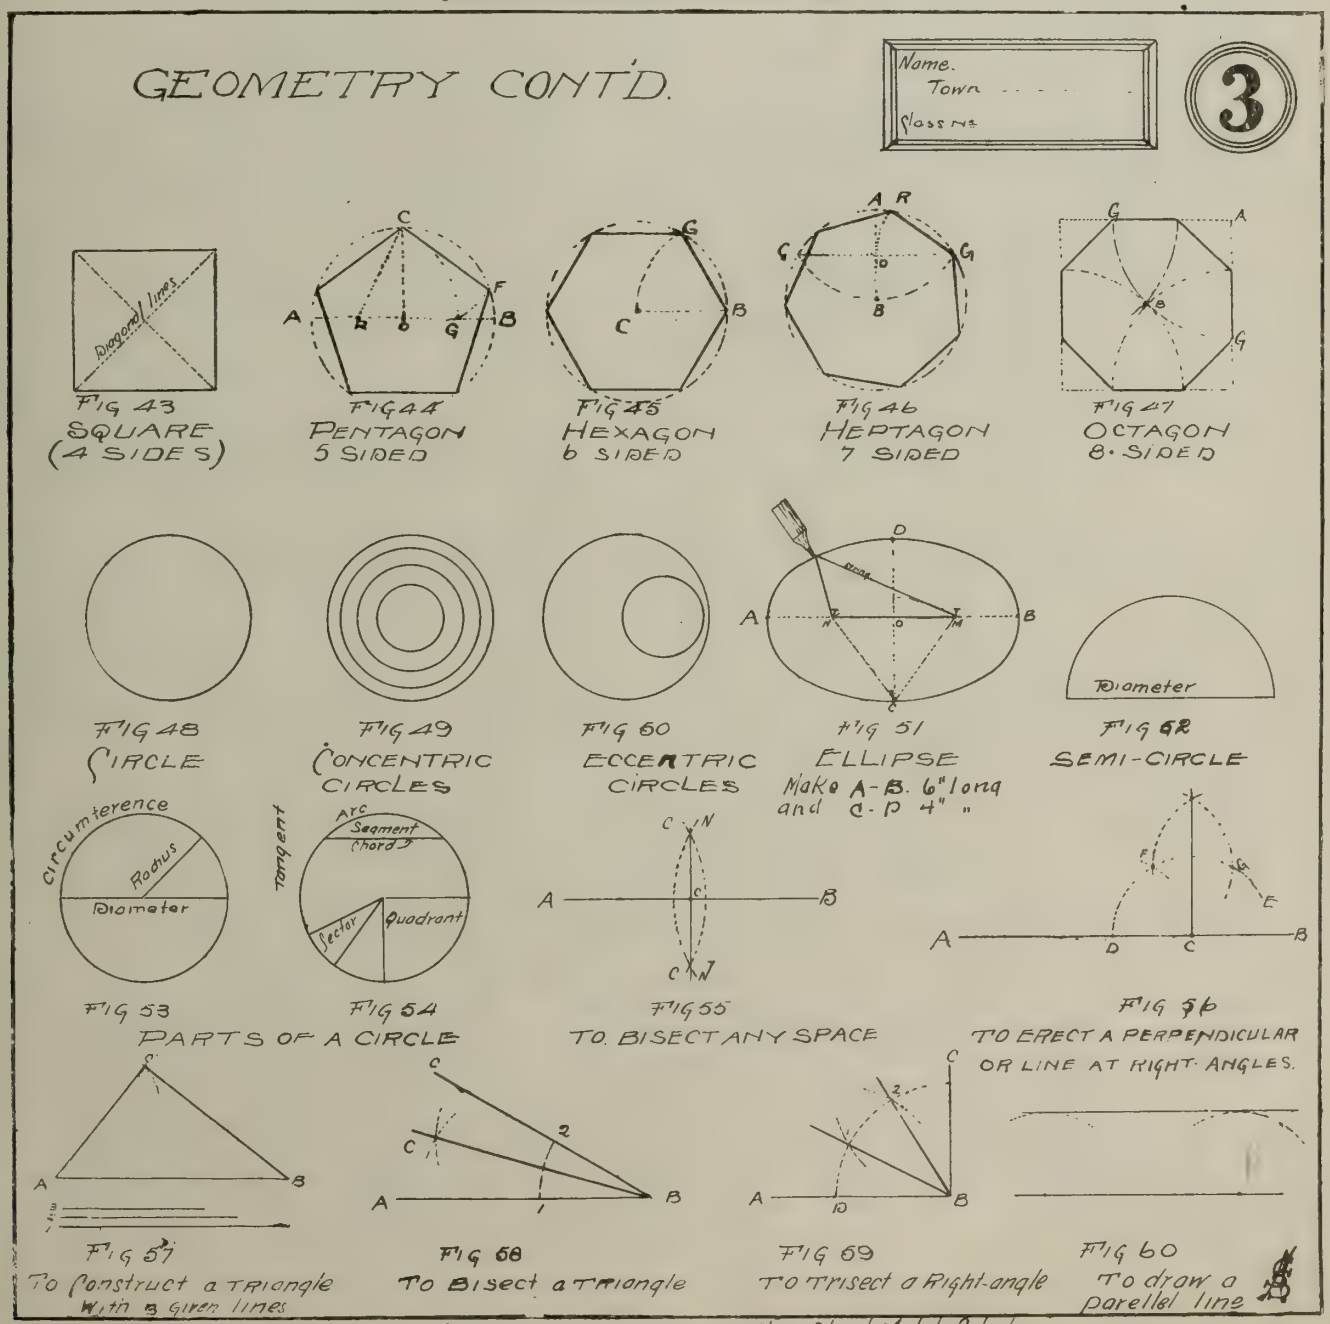
To bisect or divide any space in half, or to find the centre of any space.—Let A B be the space it is desired to bisect. Set the point of the compass at A, and with a radius greater than one-half of A B, describe the arc C C. With the same radius and the point at B, describe the arc N M. A line drawn through the points of intersection bisects the space A B.

To erect a perpendicular to a straight line.—Let A B be the given straight line, and C the point at which it is desired to erect a perpendicular or line at right angles. With any radius and the point of the compass at C, describe the arc D E, and with same raduis and the point at D, describe an arc cutting D E at F. With the same radius cut D E at G. Bisect F G as explained for fig. 55, then a line drawn from C to the point of intersection will be the perpendicular.

To construct a triangle from three given lines. (This example used in triangulation).—Draw the line A B equal to the line No. 1. Set the point of the compass at B, and with a radius equal to the line 2, describe an arc. Set the point at A, and with a radius equal to the line 3, describe an arc cutting the first arc at the point C, connect A B C.

To bisect a triangle. (That is, to divide into three equal parts).—Let A B C be the given triangle, set the point of the compass at B, and with any radius describe the arc 1 2. Bisect the space 1 2 and draw a line from B to the point of intercestion thus bisecting the triangle.

To trisect a right angle. (That is, to divide into three equal parts).—Let A B C be the given right angle. With the point of the compass at B and any radius describe the arc D C. With the same radius and the point at C, cut the arc at L and with the same radius and the point D, cut the arc at 2. Lines drawn from 1 to B and from 2 to B trisect the right angle.



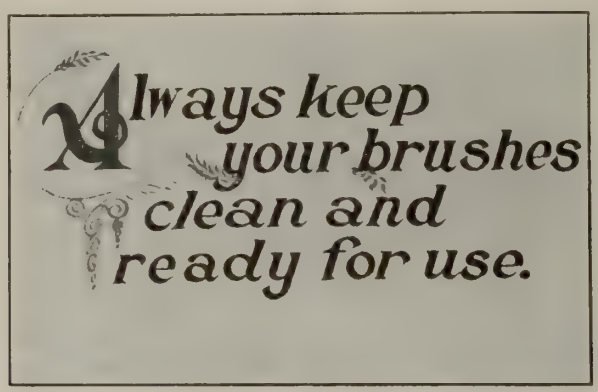
Lesson 9--Short Course in Card Writing

The Edwards Short-cut System—Showing Lower Case Letters of the Speedy Slant Roman Alphabet—Simple Method of Illuminating—Mixing Colors.

By J. C. Edwards. Copyright, Canada, 1911.

The use of capitals exclusively in a card is very undesirable as they are not so easily read as the lower case or small letters, with a capital either beginning the sentence or beginning each word. The capital and lower case letters are more quickly made; in fact, a card-writer can execute the small letters in less than half the time that it takes to make capitals.

Note each letter and its various strokes in detail and practice each many times, always being careful to get the correct slant to every letter. The more graceful and easy swing you get into this or any style of letter the more successful you are in reaching the goal every card-writer aims for.



Ornamented card, showing application of the speedy slant Roman.

The object in introducing this style of letter is to acquaint the student with the details which go to create speed rather than retard it. Compare this style with that taught in lessons No. 6 and 7—Brush Stroke Roman. Note the absence of spurs wherever it is possible to do away with them. This point alone is a recommendation for the slant Roman lower case letter. For instance, note the first stroke in letter "A." It is practically a cyma, lacking as it does the spur that is used in the plain brush stroke upright style. Note also the second stroke of the same letter; the second stroke in "f," the second in "j," the second and third in "s" and so on, and you will see that one single stroke of the brush replaces the rather difficult spur of the upright style as shown previously. The "c" also demonstrates this point as also does the first stroke of the "b," the third of "d," second of "h," third of "m," second of "n," etc.

Examine every letter and try them with your brush flattened out nicely—rubbed out on your palette or card board used for that purpose.

Draw the lines as referred to in lesson 8 as guide lines to get the right angle. You are sure to have difficulty at first, but perserverance will master it. Don't get discouraged if you fail first time; even the second or third time. Try again and you will succeed.

Always hold the brush at the same angle—square with the top of the card; don't change it or twist the fingers but make the letter with clean brush strokes. There are only two or three cases where the brush is held at commencement at a different angle and those are to form cymes, as stroke three in the second form of "g," stroke one in the "s" and two in the "z."

The strokes such as two in "j" and three in "g" may be made either with the brush held straight or at a slight angle (inclining to the left). This is left to the discretion of the writer.

Another letter which can be made in two different ways is the "p." It can be made as shown in the plate with the curved stroke all in one or it may be made as the "b" with two strokes. This also is left to the judgment of the student.

The card illustrating the use of this style of lettering is quite a plain and decorated specimen, but serves to demonstrate this lettering put in card form.

It also shows a very simple mode of illuminating—a few strokes of the brush wet with a grey paint or some mild shade or tint.

Do not allow your lettering to creep too far to the one side or the other. Be careful also to get your letters spaced evenly or rather to make them look even. Two o's coming together will bear less space between them; two capital "L's" coming together in the same word can be shortened so as to not make them look uneven, the same applies to capital T's.

The scroll which is shown at the bottom of the plate is very simply made with one stroke of the brush. Try it. Note the arrows.

Tints are made from a foundation of white letterine with a slight bit of any color added; a little at a time is added until the desired shade is acquired.

Get a little dry blue at the hardware store or aniline dye at the drug store, and pour out a small quantity of white on a piece of glass to which add a very small portion of blue. Mix thoroughly and work up until the right shade, which should be mild, is arrived at.

Shade the letter as shown in this lesson or use the left hand shade, as shown previously, which is the most simple and most easily made. Note the round cut showing outfit.

For particulars regarding brushes, outfits, etc., write to the author, J. C. Edwards, care MacLean Publishing Co., 143 University Ave., Toronto, or to this paper.

PACIFIC COAST NOTES.

Vancouver, B.C., Feb. 19.—R. P. McLennan, of the wholesale hardware firm of McLennan, McFeely & Company, is one of the lucky ones. He has been able to spare time to take the winter round trip to Honolulu, returning by way of San Francisco. Mr. McLennan is one of the most successful of the hardware men in the West. He is identified with many industrial enterprises, and is president of the Bank of Vancouver.

Wood, Vallance & Leggat, wholesale hardware dealers, are about to erect a six storey warehouse on Carrall street, to cost $85,000. This is the first large business house to be erected in what has been known the Chinese quarter, which was lately moved.

A week ago the store of the Ladysmith Hardware Company at Ladysmith was entered by robbers. This was one of a series of burglaries, and the police think they have the men who were arrested in a sloop in the Gulf of Georgia a day or two ago.

Plate No. 9 - Speedy Slant Roman

Lower Case

speed, though not
everything, counts

J. C. Edwards

Lower case of a letter particularly adapted to speed. By constant practice the beginner should master it.

Progressive Hardware Retailing

Annual Sale of Enamelware Held by Brantford Firm—Price Cutting Delayed Sale—Western Firm are Featuring and Selling Fishing Tackle.

PRICE CUTTING CAUSED SUSPICION.

Chatham, Ont.—That price cutting doesn't always facilitate sales is instanced by the experience of a hardwareman who about a year ago took a high-grade rifle worth probably $65 in part payment for another weapon. At the commencement of the hunting season he put the rifle—a weapon very nearly new and in excellent condition—in the window with a price of $25 marked on it. The rifle stayed there a good share of the season. Eventually the merchant, despairing of making a sale, put the weapon away and concluded that it couldn't be sold for even a tithe of its original value.

A few days ago, chancing on the rifle, he brought it out again, dusted it off, and, just for fun (as he put it) placed the weapon once more in his window tagged at $60. The second day a man came in, looked at the weapon critically, and took it, paying the purchase price in cash.

The hardwareman, after thinking it all over, reached the conclusion that the extremely low price he asked in the first instance rendered people who knew the quality of the weapon suspicious. As for those who didn't know the quality, he surmised that they were not interested in a good rifle at any price.

CHEAP ARTICLES DISPLAYED.

Portage La Prairie.—Alfred Babb, hardware dealer, has been showing window display of kitchen articles. One of his more recent efforts along this line was a display made up exclusively of articles costing 5 or 10 cents. This attracted considerable attention and cleaned out a large amount of stock. Another plan followed is to hold special sales of household goods on Friday and Saturday of each week.

STARTING SEASON EARLY.

Vancouver, B. C.—Tisdall's, Ltd., believe in starting to boom seasonable goods early. They are now advertising fishing tackle and are getting results.

NINTH ANNUAL SALE.

Brantford, Ont.—Turnbull & Cutcliffe, Ltd., held their ninth annual laundry and kitchenware sale on Friday and Saturday of last week with considerable success. This event has become one of the best known mercantile fixtures in the city, and it is looked forward to by an ever increasing number. All varieties of goods are offered at reduced rates.

A feature of the sale is the fact that it is conducted on a strictly cash basis.

HOUSE-CLEANING LINES.

St. John, N.B.—Although the spring house-cleaning time is already some weeks distant local merchants are interesting themselves in pushing some lines of essential value to the housewife on her tour of inspection of her premises in cleaning or retouching the furniture in all the rooms. For this reason it is noticed that some of the local firms are talking lines which tend to interest the house-cleaner in a small way, as a few lines from their "talks with customers" will show; rejuvenating an old chair, or in fact any piece of furniture which is badly marred. This liquid has a hundred uses and comes in a score of colors. Another matter which local dealers are talking to their customers at present is that of deciding upon their house interior changes in decorations or color schemes for the coming year, and in that connection various kinds of wall coatings are being featured, coatings which will not "fade, peel, or rub off, and which can be used on plaster, wood, brick, paper, paint or vanished surfaces."

Local hardware dealers are decidedly optimistic concerning the prospects for the approaching spring trade and are looking forward to a record business. There is a boom on in St. John and the people are impressed with the possibilities, and with the coming of new industries, government dry dock works, railway terminals, etc., all of which it is felt strongly, are certain to come, prospects for St. John hardware merchants look distinctly bright and promising. At present trade is very encouraging for this season of the year, but there is not a dealer who will be found to say that he is looking forward to next year's being in his career. Particularly promising are prospects in buliding operations for the coming spring.

Turnbull & Cutcliffe use half-page space in papers to advertise their annual sale.

Current News of Hardware Trade

New Companies.

Victoria, B.C.—A license has been granted to the Gramm Motor Truck Co. Registration has been granted to the Whiton Hardware Co., and certificates of incorporation have been granted to the Glover Rice Hardware Co., Scoullar Sheet Metal Co. and the Thompson Hardware Co.

May Run for Mayor.

Fredericton, N.B.—J. S. Neill, hardware merchant is mentioned in connection with the contest for the mayoralty here. It is understood that several delegations have waited upon him during the past week in connection with the matter, but he has not given them much satisfaction. Mr. Neill is one of the city's largest taxpayers and would make a good chief magistrate.

New Stores and Additions.

Eburne, B.C.—The new Gordon block on Fourth street, is under construction and will be completed about March 1. Gordon & Son, hardware dealers, will occupy one-half of the fifty-foot block.

Norwood, Ont.—J. E. Thomson, of Norwood, for some years prominent in the grocery business, has now added hardware. His store is large and enables him handling both lines.

May Locate in Calgary.

Calgary, Alta.—It is stated that the T. McArity Manufacturing Co., of St. John, N.B., may start a large warehouse here. R. A. McArity is in the city in that connection.

More Burglaries.

Nelson, B.C.—Still another robbery. The Wood-Vallance Hardware Co. was entered, along with eight other stores, and the burglars got away with six revolvers and some cash. An arrest was made and the goods recovered.

Burglars Rob Store.

Tofield, Alta.—R. O. Bird's hardware store was broken into by a burglar. The till was broken open, but only a small amount of change remaining there was taken, the cash having been placed in the safe. Entrance was effected by breaking the glass of the front door.

Nail Company Cartered.

Incorporation has been granted to the Maritime Nail Company with its chief place of business in St. John. The capital is $250,000, and the incorporators are Stanley Edward Elkin and Frederick Eugene Marvin, nail manufacturers; Edward Caldwell Elkin, ship broker; Harry Albert Marvin, superintendent, and Clarance Pettingill Nixon, accountant, all of St. John.

Death of J. D. Burk.

Amherstburg, Ont.—Joseph David Burk, for many years a stove dealer here, died at his home in Toronto on Tuesday last, February 20, and was buried in his old home town on Friday. He leaves besides his widow, two sons and two daughters, one of the sons being H. D. Burk, manager of the Gurney Foundry Co.'s London office. Mr. Burk retired from business about three years ago.

A Factory Extension.

Toronto, Ont.—The Gurney Foundry Co. are adding another story to their new stove warehouse on Adelaide street West, Toronto, at the back of their main office. As the new floor is 100x180 feet this will give them an additional 18,000 square feet of floor space on which to stock their output.

Hardware Clerks Dine.

New Westminster, Feb. 18.—Decorated with keys, padlocks, nails—everything except hammers—the hardware clerks of the city gathered last week at a banquet held in St. Paul's Reformed Episcopal Church. It was some little time ago that the idea of such a gathering was conceived. Since then all in the hardware trade have been working to make the occasion a success. And well they succeeded, for supper, speeches and songs alike brought forth enthusiasm. Those on the committee of management were:—W. Burr, J. H. Hyslop, R. Crawford, L. Curtis and H. Armstrong.

Fire Losses.

Winnipeg, Man.—Fire broke out in the premises of the Winnipeg Paint and Glass Co. It was checked promptly and the damage was quite light.

Middleton, N.S.—The large block occupied by the Crowe-Elliott hardware and plumbing business was burned to the ground. The fire started from the furnace in the cellar, a cask of oil standing near, catching the flames and exploding, so that in a moment the whole place was ablaze. The top floor of the block was used as a dwelling by Gordon Crowe and family. Every person in the building succeeded in getting out, but the contents of store and dwelling were completely destroyed. The firemen worked most energetically, turning their attention to the Jones block and the small buildings in the rear of the burning block. By tearing down one or two of the latter the flames were kept from spreading. The burnt block was valued at $4,500 and was fairly well insured. The stock is valued at $15,000 to $18,000, with fair insurance. Mr. Crowe had a small insurance on his furniture.

Business Changes.

Wetaskiwin, Alta.—The Wetaskiwin Hardware Co. moved this week into their new brick block on Railway Street West. The premises just vacated by them will be occupied by Smith & Co.

Brampton, Ontario.—The Brampton Hardware Co. who have bought out the business of Peaker & Son, have completed stock-taking and have thrown open their doors.

Frobisher, Sask.—Thos. Adair has taken over the hardware business of McKean Bros.

Bassano, Alta.—Pierce Bros. have opened a hardware store in this place.

Hartney, Man.—C. Woodhull has left for Stranraer, Sask., where he assumes control of his hardware business at that point. Before leaving Hartney he was presented with a handsome gold signet ring and locket from the hockey and baseball clubs and citizens.

Kamloops, B.C.—A deal is pending for the transfer of the hardware business carried on for a number of years by W. Hargraves, to Messrs. Wilcox & Hall, of this city, who have secured a short term option on it.

Staff Changes.

J. P. Whitly, head salesman with the Mangin & Egan Hardware, Warner, Alta., has accepted the position of manager of the Gleichen Trading Co., hardware department, Gleichen, Alta.

Personal Notes.

Mr. Cromwell Gurney, vice-president and general manager of the Gurney Foundry Co., Toronto, accompanied by his wife, has gone on the Mediterranean trip. They expect to visit Nice, Florence, Rome and Naples before returning home about the first of April.

J. T. Thomas, of Vickers, Ltd., is sailing with his family for Canada, where he will take charge of the electrical end of this English company's business for Canada. Mr. Thomas will have a permanent office in the building of Lewis Bros.

Ford Thomson, hardwareman of Winnipeg, who is recognized as one of the best trapshots in Canada, is in Prince Albert, Sask.

Weekly Market Report --- Metals

A BETTER FEELING.

There have been no developments in the metal situation, although there is a better feeling manifested with reference to the future. Prices have remained steady.

MONTREAL.

Montreal, Feb. 22.—With the exception of an advance of 25c per hundred pounds in the price of ingot copper, quotations in the Metal Market are undisturbed. There seems to be a scarcity of almost all metals, and users are showing great care and appear to be only buying in small quantities. This would indicate that they are looking for lower prices, but it does not seem that a change of this kind is about to take place, in fact if anything the reverse is the case.

Lead.—Lead is reported to be firm, and a fair amount of business has been done though the market has been a little quieter than usual.

Copper.—Ingot copper is now quoted at $15.25 per hundred pounds which is a rise of 25c. This rise is probably due to a scarcity of supplies which has been noted, and may be followed by further advance if this state of affairs does not change.

Tin.—Tin is again unchanged. No great amount of business is reported and the market has been fairly quiet during the past week.

Spelter.—Scarcity in spelter is again unchanged this week. The demand has been fairly good, and the supplies none too plentiful. Heavy consignments will mark the opening of navigation. Prices remain unchanged and we quote 7¼c.

Iron.—This market has no distinctive features and in fact may be said to have been on the quiet side. A certain amount of buying has been done, but the orders received have not been above the average, either in size or number.

TORONTO.

Toronto, Feb. 16.—Practically unchanged remains the whole metal situation. There is, it is true, a slightly better feeling regarding the future due to the nearer approach of spring, but sales continue at a normal and nominal rate with not one price change to note.

Prices tend to a firmer basis, but there is no immediate likelihood of an advance.

Tin.—This metal is firmly held, with no price change locally. Outside markets have fluctuating quotations from day to day, but the losses seem to be recovered after a day or two of low figures. Last week's cut of ½ cent holds good on all orders booked during the week. Demand has been very fair for tin.

Lead.—Good business is being done at present in lead, and the market is firm on this active demand. Stocks are rather light. Prices are unchanged.

Copper.—The red metal is active and firmly held both locally and throughout the province. The gathering strength of the copper situation has made for better business and for a more satisfactory feeling among holders of copper. Local prices are unchanged.

Spelter.—Spot spelter is still scarce; so much so that there may be a shortage in a few weeks. This is the opinion of one of the men closest to the metal situation in Ontario. Demand is splendid. Buyers are stocking up wherever they can obtain supplies. While prices are unchanged, they are decidedly firm.

Pig Iron.—No change at all has come over the iron situation within the week. Sales are steady and prices are at the old figures. Canadian foundry, No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $50.25 for Clarence No. 3, Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Plates and Sheets.—There is an excellent demand at unchanged prices. Manufacturing interests are using up large quantities. Stocks are none too great, and in some cases are decidedly light. The whole metal situation is encouraging.

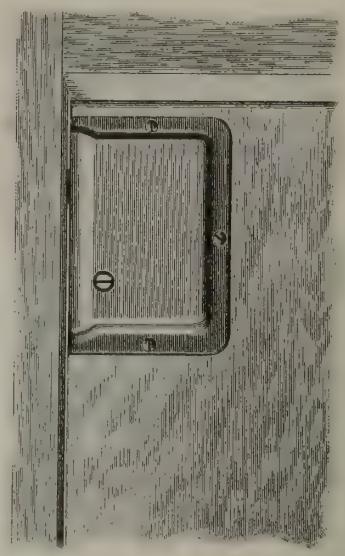
NEW PIVOT CHECK.

The Standard Mfg. Co., Shelby, Ohio, have added to their line of spring hinges the pivot check, for double-acting doors illustrated here.

The cut shows the combined pivot and check as applied at the top of the door to be used in connection with a regular double-acting spring floor hinge.

It is claimed that with the use of this pivot check at the top of the door and a regular double-acting spring floor hinge at the bottom of the door, the result of a double acting checking hinge is attained.

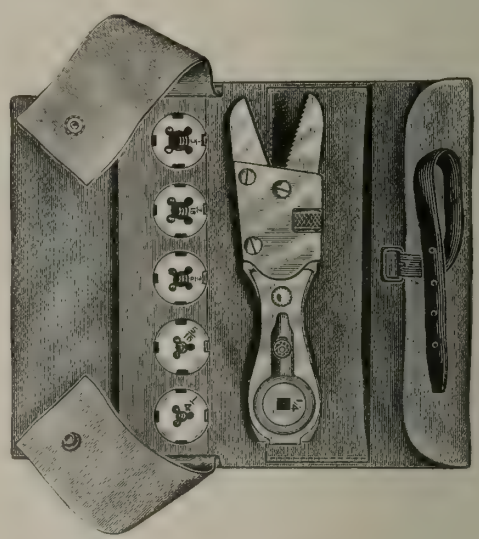
This pivot check is designed for use on doors where the regular double-acting floor hinges are already applied and it is desired to use a check to control the swing of the door. One distinctive feature claimed is that the "standard" pivot check can be used with any make



of double-acting floor hinges, since it can be set in position to bring the pivot in line with hinge post at bottom of the door.

LEATHER ROLLS.

The Star Manufacturiog Co., of Carpentersville, Ill., have introduced a no-



velty in the shape of a leather roll containing sets of Elgin wrenches. These sets are good for show case display.

Among the visitors to the Montreal wholesale houses this week were the following:—M. Lafond, St. Hermas, P.Q.; J. A. Paquin, Ste. Eustache, P. Q.; J. A. Parent, Ste. Claire, P. Q.; J. B. Damour, Ste. Philomene.

Weekly Market Report --- Hardware

NEW DISCOUNTS SET.

The new discounts on dairy and household metal goods now effective are as follows:—

Retinned Stamped Ware—75 and 5 per cent.

Cheese Factory Cans.—35 p.c.

Cheese Factory Trimmings.—20 p. c.

Coal Hods, galvanized and japanned.—35 p. c.

Galvanized Pails.—45 p. c.

Sprinklers, galvanized, plain, japanned.—40 p. c.

MONTREAL.

MONTREAL, Feb. 22.—The hardware market this week does not present any pronounced features except that the steady volume of business has been continued. Satisfactory orders are reported in the different lines for spring delievery both from the Northwest and from the Maritimes. In some quarters it is said that an early spring is looked for, which will probably cause a good many dealers to book their orders earlier than usual.

There is a great confidence as to the future among the trade and the representatives of the various houses state that conditions never looked brighter. The market is firm in tone and no changes in price have been noted.

Builders' Hardware.—No very great movement has been noticed in builders' hardware during the past week, but a few sorting orders have come in. It is still a little early for the big movement in these lines, but prospects for the spring look exceedingly favorable as the building trade generally throughout the country anticipate a busy season.

Spring Lines.—The Northwest is the district which is calling chiefly for spring goods. Large consignments of fencing wire, green wire cloth, screen doors, lawn mowers, hose and refrigerators, have been sent out. The East is not calling quite so strongly for these lines. A continued demand is being shown for sap-spouts, pails and other sugaring supplies. There is a good call for general lines and the shipping departments are busy.

Lumberman's Supplies. — Peaveys and pike poles are now in strong demand and a heavy business is continued in ball and heel calks for early spring use.

Sporting Goods.—Not very much has been done in these lines as it is still a little early. A certain demand has been shown for fishing tackle, but the base ball and lacrosse goods have not yet shown any activity.

Wire.—Wire lines are showing increasing strength. The Western Provinces are buying heavily, while well assorted lots are going out to the east.

TORONTO.

Toronto, Feb. 23.—The weather and the convention are uppermost in the conversation of jobbers, retailers and salesmen this week. The storms have almost completely tied up the mail service and the receipt of orders since Monday has been practically nil. Many of the travelers are up in Guelph, and a great many of those still out on their routes are finding difficulty in getting from place to place on account of the storm.

Orders are of the sorting-up variety. Booking is being fairly well maintained on spring goods, though there is little actual demand for spring stocks as yet. Prices are steady, the market is firm, and the situation generally is satisfactory, if we except the business of these past few days.

Seasonable Goods.—Buying is being confined pretty closely to shelf hardware. Orders received do not bulk very large and are scattered over a vast range of articles:—bolts, screws, latches, locks, etc., with some little cutlery.

Spring Goods.—Demand is steady, though by no means active. Booking continues on poultry netting, staples, wire, etc., but some of it is for future delivery. Shipments are only fair, but improvement is expected from now on, March being usually a heavy month in hardware movements.

Builders' Hardware.—Judging by inquiries this spring should be a bumper one for these lines. Some glass handled knobs are being featured, and fancy locks of elaborate as well as chaste designs are freely shown. There appear to be more of these high-grade articles on show than in any previous season.

Household Goods.—Spring cleaning demands are opening up, and fair calls are being made for tinware and enamelware. Dairy and laundry supplies, too, are beginning to feel an impetus. Booking on summer goods—cream freezers, ice chests, and garden goods has started.

Heavy Hardware.—All sizes of nails are being called for. Some big booking has been done for March delivery. Present sales, though, for immediate shipment call for various sizes for stock and shelf purposes.

Sporting Goods.—There is a lull in business in these goods. Inquiry is being made for basball and lacrosse supplies. The change in weather should be provocative of more retail sales of skates and hockey goods. Booking of hammocks, and croquet, and tennis sundries though somewhat light are beginning to feel more activity.

TORONTO STOVE MARKETS.

Toronto, Feb. 22.—Little stove business is being done locally, or in fact in the East, though the demand in the West has given a briskness to the manufacturers' outlook that cannot but be both cheerful and hopeful. It has, too, had the effect of delaying to some extent the filling of orders received from eastern jobbers and retailers.

The larger centres in Western Canada which usually form the distributing points for immigration are buying and stocking stoves pretty heavily at present against the demand that will surely be made at the break-up of the winter season.

Splendid stove trading is anticipated all through the summer months in the West, for stoves are one article which few homesteaders bring along with them.

Local stove booking is steady, though not much greater than ordinarily. There is, too, some pretty good demand for oil and gas stoves and lamps.

Household range sales have pretty much declined and until spring this line of business will remain inactive. Occasional sales made indicate, however, that it is well to have one or two on hand, and the opening of spring should provoke business among home owners doing their housecleaning, as well as among the newcomers to the country who prefer locating in the East rather than on the farm lands of Western Canada.

Booking for future delivery is the feature of the stove trade at present. Sales are not big, but salesmen say they are quite satisfactory. Sales of heaters are low, scarcely any demand existing.

Hotel and restaurant ranges and labor-saving food preparers are being exploited in greater volume than ever before by manufacturers, and work on these goods is decidedly active. Much of this class of goods is on order, so sales are assured; but there are as well standard sizes and styles which are being made up for handling by the trade in the larger centres.

To Get the Goods is the Problem

That is the Question Which the West Must Solve, Says Winnipeg Manager of an Eastern Stove House—Railway Extension, Immigration, Building Operations, Everything Points to Large Sales—Manufacturers Must Prepare to Meet Big Demand.

When all stove manufacturers are building for the spring—building in the confident expectation that the volume of business this year will be as great, if not greater than that of 1911—the word of a western manager for an eastern firm comes with particular meaning. This man knows the west—knows it from long experience. He knows the east, too, and with this knowledge he says that the great problem this year will not be to sell goods, but to get the goods to sell. To use a slang phase, he "puts it all up to the eastern and western producers.

It was while on a recent visit to the head office of the company which he represents, that this man expressed his opinions. He was speaking in the presence of the general manager. What he said he meant, and what he meant he explained in good concrete illustrations. He showed how the rapid growth of the western provinces creates a great demand for all hardware. He showed how many of the people settling there require complete outfits. He showed how the railways are bringing in a great army of men—men who must be fed and cared for, and who create a large natural demand for stoves, cooking utensls and general lines of hardware. He spoke also of the steady growth of many cities in the west. This man does not seem blinded by the western fever. The dust of the prairie has not dimmed his vision. He sees, or thinks he sees, that some western places are being over-boomed. But he feels that the growth in many instances is genuine, honest, expansion which will continue.

Immigration and its Benefits.

"When you consider the question of sales," remarked this western manager, "you must consider also the question of immigration. Last year about 400,000 new people settled in the far west. That in itself meant a great market, and a market which will be larger this year, for not only will these old settlers want new goods, but there will be new settlers in excess of those who came in last year. Everything seems to point to this.

"Four hundred thousand people in the east would not mean a tremendous volume of trade," continued the speaker. "Here all they would place would be sorting orders. But out there it is not a pot or a pan which is wanted to complete a set, but it is an entire new set. Many of these settlers, you know, come in with practically no personal effects. They intend to buy these upon their arrival, and buy them they do. Moreover, they buy well. There is a class in the towns and cities who buy cheap lines. but the settlers—those coming from the States, and the Galicians and Doukobours, too—buy the very best. It is not an unusual sight to see a Galician purchase a fifty or sixty-dollar steel range, and then a complete set of high grade granite ware. You can see what that means for the western hardware man. It means the sale of sets, where in the east individual pieces are sold. It means that we have to be prepared to fill large orders and to fill them promptly."

Railways Bring Business.

Another point touched upon was that of railways. "The G. T. P., the C. P. R. and the C. N. R. all are to operate extensively in the west this spring and summer," remarked the Winnipeg man. "They have already announced about what they are going to spend. Roughly speaking, the aggregate is some $60,000,000. It does not take a skilled railroad man to see what that means. It will bring many hundreds of men into the country. The principal difficulty the railways will experience, in fact, will be to get the men and to care for them. In the various camps stoves will be needed. Pots, pans and similar utensils will be used. All this will mean great business to the hardware men.

Not Curtailing Volume of Business.

What effect the coming of more railways will have is a question worthy of discussion. Some claim it will narrow the field of the hardware store, and so spoil the revenue. This western manager does not entirely agree with this. "There can be no doubt," he said, "that better railroad facilities is going to result in the growth of more towns. It will result in places which now get trade from a radius of fifty miles having this curtailed to ten or fifteen miles; but that does not necessarily mean that the volume of business done will be reduced proportionately. Take Edmonton, for instance. Since railroad facilities have improved the district served by Edmonton in a retail way has become smaller. Good sized places have grown up to supply the farm wants; yet the business in Edmonton has not declined. The population within the smaller radius now served has grown to more than the proportions of the larger district from which trade formerly came, and in addition a jobbing business is now done with the smaller places surrounding. No, railways will not spoil the business on the whole. They will develop it."

Though stoves and kitchen ware naturally are of primary interest to the western manager of this eastern stove concern, yet he takes notice of all that affects hardware men, for what benefits or injures them tends to benefit or injure his business. He has taken the trouble to estimate the probabilities of trade for Winnipeg, and declares there is practically no doubt that a greater volume of business will be done this coming summer than was done last year. "The building operations have already been estimated as over $20,000,000," he said. "That is about what they amounted to last year, and before the season is over they will likely be considerably increased. This means a big business in builders' hardware. In fact, there can be no doubt that the activity in this line will exceed that evidenced in 1911."

Collections Improving.

Asked about collections—a live question with all manufacturers—this westerner declared that a marked improvement is likely to be shown within the next few weeks. Farmers are now getting their grain away. The railway companies are getting the necessary cars, and though the delay has been unfortunate, the money for the grain is now in free circulation. Retailers are getting their bills paid more readily, and as a result the manufacturers are securing the money for the goods they have shipped the merchants.

It is an optimistic note this western manager strikes. He gives reason for his optimism moreover. As he says, everything seems to point to a good year in the west; and a good year in the west means much to the east.

Weekly Western Market Report

The Favorable Weather Has Had a Good Effect on Trade—General Spring Booking is Now the Order of the Day.

Winnipeg, Feb. 19.—The weather has been so favorable for the past little while that business has felt the impetus of spring demand. Some shipping has started but an active movement is not yet in evidence. A great deal of booking is being done.

General hardware lines are being booked in large bulk. It is quite apparent that a busy spring trade is ahead.

Winnipeg Hardware Quotations.

Axe Handles.—Oval and octagon, s.g. hickory, $3.50 ; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½ ; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts, 77½.

Bar Iron—Bar iron, $2.50 ; Swedish iron, $4.25 ; sleigh shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs., $8.50 ; Jessop, $15.

Blocks—Steel, 50 per cent ; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg ; $2.35 Fort William.

Copper.—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire 3 inch gage, 24c, to 20 inch gage 29c.

Crowbars—4½c. per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87 ; 26 gauge, $4.18 ; pressed standing seamed roofing, 28, painted, $2.84 ; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40 ; 8-inch, $4.65.

Clevices—7½c. per lb.

Enamelware—Canada, 50 ; Imperial, 60 ; Premier, 50 ; Colonial, 60 ; white, 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80 ; 18, $3.85; 20, $3.90; 22 and 24, $4 ; 6, $4.20 ; 28, $4.60 ; 30 gauge or 10¾ oz., $4.80 ; Queen's Head, 20, $4 ; 24, $4.20 ; 26, $4.60 ; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.25 ; ½ in., $4.05 ; ¾ in., $5.00 ; 1 in., $7.20 ; 1¼ in., $9.80 ; 1½ in., $11.80 ; 2 in., $15.30.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90 ; No. 2, and larger, $4.65 ; snowshoes, No. 0 to No. 1, $5.15 ; No. 2 and larger, $4.90 ; steel No. 0 to 1, $5.35 ; No. 2 and larger, $5.10 ; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30 ; 4, $3.80 ; 5, $2.75 ; 6 $3.30 ; 7, $3.05 ; 8, $2.85 ; 9, $2.75 ; 10 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $8.75 ; grass, $1.70.

Iron Washers—Full box, 40 per cent., smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15 ; ¼ in., $2.30 ; ⅜ in., $2.35 ; ½ in., $3.15 ; ¾ in., $3.80 ; 1 in.,$5.45 ;1¼ in., $7.45 ; 1½ in., $8.95 ; 2 in., $11.55 ; 2½ in., $18.40 ; 3 in., $24.15 ; 3½ in., $32.25, 4 in., $36.75; 4½ in., $42.50 ; 5 in., $47.50 ; 6 in., $61.50 ; 7 in., $95.50 ; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6 ; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7 coppered, $9 ; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope.—Sisal, 8½c; Pure Manilla 10¾c; British Manilla, 8½c; Lath yard, 9¼c.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½ ; brass, 77½ ; round head, iron, 82½ ; brass, 72½ ; coach, 67½ per cent.

Terne Plate—I.C., $9.75 ; I.X., $11.75

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25 ; ½ box, $5.50; I.X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $13.50 ; ½ box, $8 ; I.X., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½ ; pieced, 25 ; japanned ware, 35.

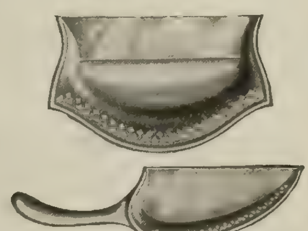
IMPLEMENT ADVERTISING.

Tofield, Sask.—Under the caption, "Hundreds of Dollars given away," R. O. Bird, hardware dealer, is advertising the line of machinery and farm implements that he is carrying. They are advertising the fact that instead of spending hundreds of dollars to call on all the people of that section, they are going to hand that amount of money over to the purchasers of implements.

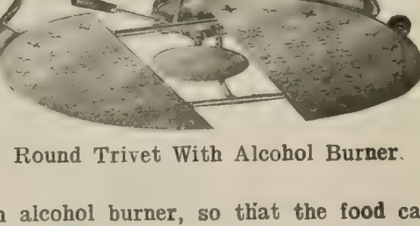
NEW STERNAU GOODS.

Among the recent articles put out by S. Sternau & Co., New York, is a round trivet for the protection of tables from heated plates. The one shown has a diameter of 10¼ inches and an extreme expansion to 14⅝ inches. It is fitted with

Percolating Coffee-Pot.



Long Crumb Scraper and Tray.



Round Trivet With Alcohol Burner.

an alcohol burner, so that the food can be kept hot after it is put on the table.

The second illustration shows one of the latest models of percolating coffee pots.

The third is a new crumb tray and scraper, a feature of which is the extreme length of the scraper.

Methods of Retailing Paints and Varnishes

Interesting Paint Features at Convention

The Paint Department of Bond Hardware Co. Was Well Worth a Visit—Lessons to be Obtained From the Paint Window Displays.

Visitors at the Ontario Convention this week who took occasion to visit the store of the Bond Hardware Co., had an opportunity to inspect a highly commendable paint department.

It is situated to the right hand side on entering the store, some little distance from the front. It is not so far back, however, as to be out of notice. On entering, one's eye is attracted by the large array of paint tins decorating the shelves in that section of the store. The department has an inviting appearance; one might almost say a beckoning look.

The position of the department is indicated on the accompanying plan of the store. It is intended in the near future to extend it to the rear. When this is completed, the capacity will be almost doubled and a much larger stock will be carried. The Bond Co. believe in paint and they are doing their best to make it one of the main departments of their business.

"We sell paint the whole year around," stated a member of the firm. "I cannot say just what methods we have adopted to push sales because we do not take any special steps. We advertise, keep the stock attractive and in evidence and put in window displays. That is the whole secret of success."

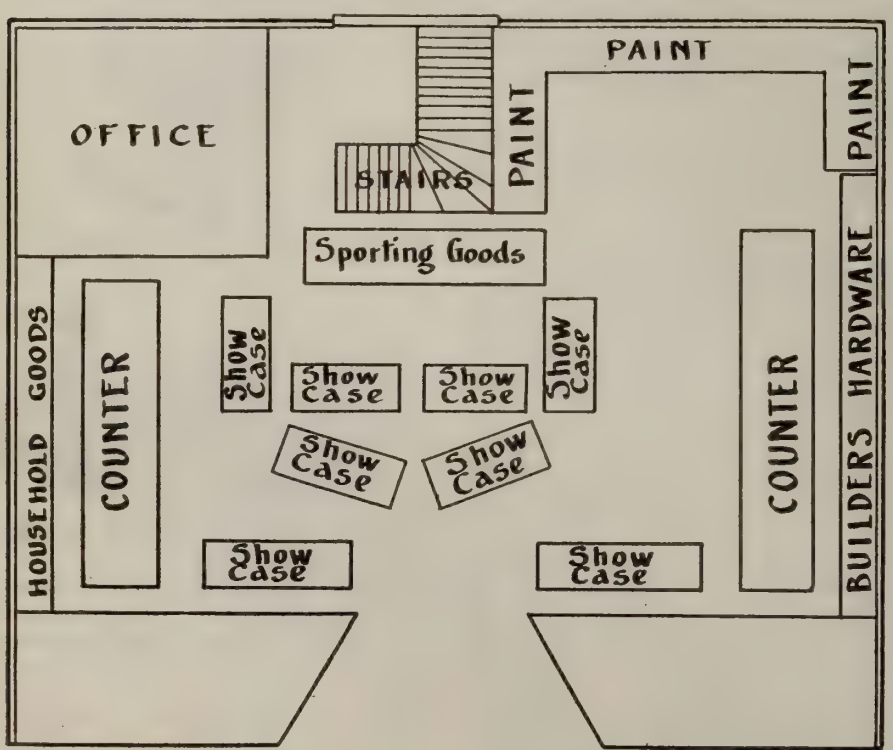
One plan followed by the firm is the placing of a very handsome stand containing color boards at the front on the other side of the store. People shopping on that side are not able to see the paint department very clearly, so the color boards serve the valuable purpose of reminding these customers of the subject of paint.

Some Good Lessons.

It is conceded that, while there are many hardware dealers who show exceptional aggression in their handling of paint, the average dealer is not an accomplished salesman when it comes down to a question of paint. For those who cared to acquire the latest ideas, there were other features in connection with the convention which had a distinct educative value. It was a significant fact that the majority of the windows dressed in Guelph hardware stores for the convention were devoted to paints and varnishes. All of the displays were of a high order and they contained suggestions which might be followed by dealers in planning their own paint displays.

Perhaps the most striking feature in connection with these window displays was the use made of lithographs and printed cards. The best effects can be obtained by decorating the background with handsome colored lithographs, as the success of the displays in question most amply attested. The bare use of a pile of paint tins does not make a good window display. It is probably true that the average dealer has not fully realized the good use that can be made of the lithos supplied by the manufacturers.

The discussion on Wednesday afternoon relating to paint salesmanship resulted in some good points being made. The discussion was not as general as had been hoped, however, few dealers joining in. If the suggestions thrown out were followed—they will be found on another page—we guarantee that good results will follow.



Plan of the Bond Hardware Co. store, showing paint department at rear.

THE B.C. CONVENTION.

Vancouver, B.C., Feb. 19.—British Columbia hardwaremen will hold their annual convention in North Vancouver on March 21. The date and place of meeting were decided at a meeting held this week. After the day's business, the annual banquet will be held at the Palace Hotel in the evening.

Harry C. Martin, of the firm of Martin, Finlayson & Mather, president of the B.C. Hardware Dealers' Association, was appointed delegate from British Columbia to the annual convention of the Ontario hardwaremen to be held in Guelph. He went east on the evening of the 14th instant. While away he will visit several of the large cities in the interest of his business.

MORE TALK OF HARDWARE MERGER.

Montreal, Feb. 23.—It is again rumored that certain parties are once more endeavoring to form a merger of the wholesale houses here. While indications show that there may be some ground for suspecting that negotiations are again being opened up, no confirmation can be obtained. If it is true that plans are being formed, it is not likely that anything will develop for some time.

SEE "M-L PAINT" AT THE CONVENTION

GUELPH, FEB. 19, 20, 21, 22, 23

THE dealer who wants to know the profit-line in paints and varnishes ought to see the M-L Exhibit at Guelph. Here are good paints and varnishes—made to help the dealer by giving his customer wear and service. Come to Guelph. Come, too, and see Maple Leaf Products.

M. L. FLAT WALL, an easy-to-clean wall paint for plaster, burlap or wood, in beautiful interior shades. Sanitary, smooth, and adapted to stenciling.

M. L. PAINT is best-lasting exterior paint, improved during 20 years of careful tests. The kind that helps your business when you sell it. Ready to use.

FLOORGLAZE, a flint-hard glass-like and beautiful floor finish that applies easily, stands wear, resists scratches. Best interior floor finish.

ELASTILITE, an indoor or outdoor varnish that is applied easily and perfectly. You can guarantee it. It gives every satisfaction. A beautiful finish.

In addition, the best thinners and auxiliary lines needed in a fully stocked and up-to-date paint department.

See all these at Guelph.

This is an aggressive concern selling paints, in a helpful way for the retailer. Quality is kept up. Selling aids are given. We believe in giving the retailer the best possible goods, because it builds his business, and therefore builds ours.

New Help for the Retailer

WE have added a decorative service department. It is free for our customers. By it a painter or dealer is told how to decorate any house. He is given shades, quantities, proper materials, stencil designs, stencil colors, to suit any room. This makes such a good job, from expert help, the dealer and painter get bigger local business. We help our customers to decorate right. Send us your problem to Toronto office.

Imperial Varnish & Color Co., Limited

6 to 34 Morse Street., Toronto

Winnipeg: 108 Princess Street

Vancouver: 365 Water Street

Honest! We're too busy at the Guelph Hardware Convention to write ads.

And say, if you could see the enthusiastic Hardware men around the "HIGH STANDARD" EXHIBIT you would surely be impressed of the idea that we must have something of unusual interest.

Better investigate.

Weekly Market Report --- Paints

TRADE STILL LIGHT.

Business has been light during the week. The hardware convention has doubtless had something to do with the tapering off in trade in Ontario and the unfavorable weather conditions have helped.

Prices have remained steady during the week.

MONTREAL.

Montreal, Feb. 22.—Spring shipments are keeping all the manufacturers busy at the present time. Practically every order that is being received just now, calls for immediate delivery, which would indicate that hardware dealers in general intend to be in a position to go right after the paint business, as soon as weather conditions will permit. The markets are unchanged this week. Buyers of linseed oil appear to be watching the market very closely, although it cannot be said that a further drop in the price is anticipated.

Generally all lines are moving well, and the tone of the market is satisfactory.

Turpentine.—Turpentine has been steady: supplies on hand are said to be fairly large. It is not anticipated, from present indications that there will be any marked changes for the time being. The market is firm.

Linseed Oil.—The market in linseed oil has strengthened during the past week, although this has not affected prices. Recent advices state that the price in the Old Country has been raised a little, but nothing of that kind has been recorded here. While it is practically impossible to forecast the direction prices will take, it is not thought that cheaper linseed oil will be obtainable before next May. At present time the demand is not abnormal, although a fair business is reported.

Paris Green.—A good deal of activity in paris green has been shown during the past week, in fact it is said that a surprisingly large number of orders have been received. Manufacturers state that despite statements to the contrary which have been given utterance to, it is not thought that the unrest which at present characterises the American market, will in any way affect conditions here, and that lower prices are unlikely.

White Lead.—Business in this line has been good during the past week, although the spring rush has not yet reached full swing. The market is firm, and prices are unchanged.

Colors.—A firm tone is noted in colors, both in the dry and ground in oil. The good volume of orders being shipped at this time of year, shows that painters and decorators are beginning to lay in stocks, so as to be ready for the spring call.

Mixed Paints.—This is the big line just now, and mixed paint may truly be said to be going out by the car load.

Putty.—Putty has been a good seller, deliveries having been heavy during the past week. There is no change in price.

TORONTO.

Toronto, Feb. 23.—The week started off well, but the stormy weather which developed on Wednesday put a damper on active trading, so that the latter part of the week orders are running light. The Hardware Association convention, too, has taken many salesmen off their routes, so that business generally is rather light.

Prospects for spring trade, however, are good. Building is active, and is pushing forward so rapidly that paints are expected to be in excellent demand from the very commencement of the spring season. Orders already booked show that if the present sales record, which is now in advance of previous years, keeps up this year should be a top-notcher for the paint business in Canada.

No price changes are announced, the market being very steady.

Firmer Turpentine Tendency.

The turpentine situation remains much as it was last week—perhaps a little easier, but slightly firmer than at the opening of February. Latest reports from the South indicate there is a likelihood of the market strengthening. There has been not a llttle snow and plenty of rain in the woods. This has retarded the running of the sap and has also prevented much work being done among the trees. Should there be an early spring new stocks would be delayed reaching the markets.

Prospects are bright for business later on as nearly all jobbers and retailers are carrying light stocks of both turpentine and oil.

Linseed Oil Unchanged.

Prices of oil remain at the old quotations, 94c for raw and 97c for boiled. Orders are light and sales are slow. Stocks are by no means heavy. The market is fairly firm, but none too strong.

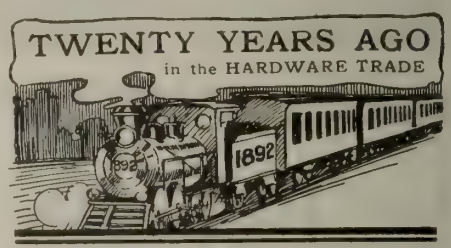
Other Lines Steady.

White Lead.—Quotations remain unchanged. Sales are not very heavy, but considering the season are perfectly satisfactory. The situation on the whole is good with the market firm.

Glass and Putty.—Glass business is confined pretty much to booking of futures, prseent delivery sales being very light. Putty for early spring shipment is good and even present deliveries are fair. Prices are as usual. Standard bulk in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same: Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

Prepared Paints.—Orders have sloped off this week, so many of the travelers being up in Guelph. Business has been good and steady since the commencement of the year. Good spring trading is anticipated.

Varnishes.—All kinds of varnishes and gums are moving fairly well. Coal oils are very active.



The following items are taken from the issue of February 20, 1892:—

"A. C. Leslie & Co., have been appointed agents here for the American Bit Brace Co., Buffalo."

Editor's Note.—A. C. Leslie & Co. gave up the handling of shelf hardware many years ago and now handle metals and heavy hardware exclusively.

* * *

"The fine supplementary catalogue of new goods which the Peterborough Lock Manufacturing Co. have just issued deserves more than a passing notice. As there has been a lot written of late about fine art hardware the retailer no doubt was beginning to look around for some advancement along this line by the Canadian manufacturers, so after a careful survey of the goods shown in this new catalogue the merchant cannot help feeling that they will fill a long felt want."

Editor's Note. — The Peterborough Lock Co. have maintained their position among the leading Canadian manufacturers.

B-H Paint Calendar, size 11½ in. by 8 in., printed in four colors

Mr. T. M. Nash, agent for B-H "ENGLISH" PAINT at Wellington, Ont., writes under date of January 19th, 1912, as follows:

"Am very much pleased with B-H Paint Calendar for 1912, and am sure it will be a big sales help to all B-H Paint Agents.

"I may say that I have been called on by a good many other paint firms trying to get me to take up their agencies, but I would not think of it, for I know that B-H 'ENGLISH' PAINT is the very best made. I can always bank on my customer's paint trade after he buys his first can of B-H 'ENGLISH' PAINT."

This attractive calendar is mailed to all property owners whose names are given us by B-H "ENGLISH" PAINT Agents. This calendar is part of a mail advertising campaign that we will conduct in your territory that will bring paint buyers to your store, and as Mr. Nash states in his letter printed above, "you can bank on your customer's paint trade after he buys his first can of B-H "ENGLISH" PAINT.

B-H "ENGLISH" PAINT is 70% Pure White Lead—30% Pure White Zinc---mixed ready for use with Pure Linseed Oil, Pure Turpentine and dryer and nothing else.

CURRENT MARKET QUOTATIONS

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

CO-OPERATION THAT COUNTS

MINERVA

Paints and Paint Specialties

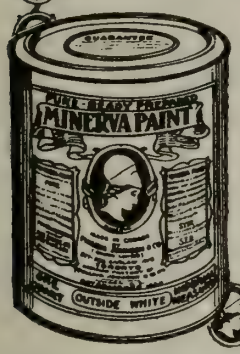
prove a paying line for any wide-awake dealer.

We not only put quality into every can, but the direct support we give in the dealer's interest makes "Minerva" Brand the most profitable line to handle.

We actually create the demand for "Minerva" Paints by our forceful consumer advertising, effective color cards, window trims, counter cabinets, show cards and street signs.

Fall into line with hundreds of aggressive dealers and feature the "Minerva" Line.

Every can guaranteed to contain full imperial measure.



Pinchin Johnson & Co.

(Canada) Limited

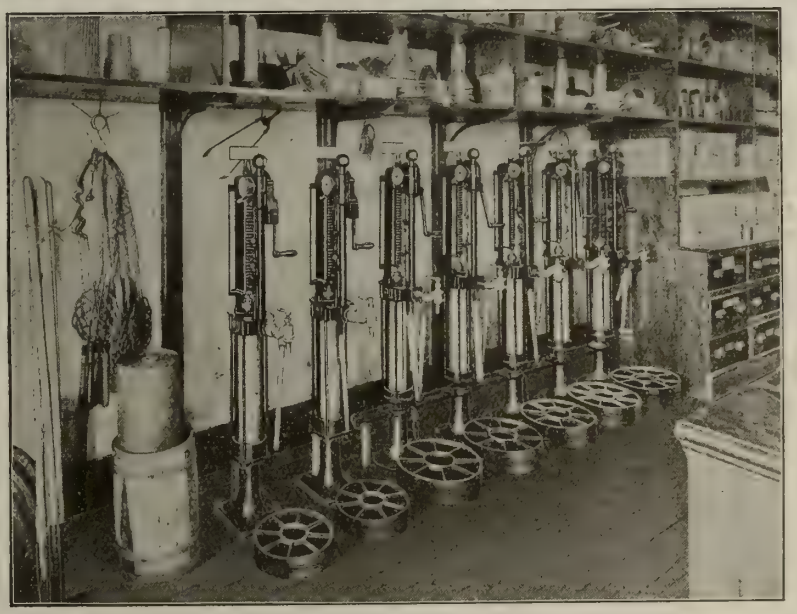
377-387 Carlaw Avenue, - - - TORONTO

Established in England in 1834.

J-50

This Illustration was made from a photograph of a Bowser installation for

Mr. Samuel Hobbs,
1434 Queen St. W.,
Toronto, Ont.



This system handles

Canadian Coal Oil
American Coal Oil
Raw Linseed
Boiled Linseed
Turpentine
Gasoline
Benzine

profitably.

It pays him and it will pay you.

You Can Make a Better Profit on Paint Oils if You Handle Them Right

Now is the time to get ready for your spring paint trade. Investigate the Bowser NOW. Your fellow merchants are using them profitably—so can you. Put in a Bowser and get a bigger profit next year. Ask for book No 15.

CONGO NEVER LEAK ROOFING

How Long Will It Last?

Every buyer of roofing asks that question---"How long will it last?"

That question is important.

We know positively how long Congo will last and are prepared to give every buyer a *real* Surety Bond with every roll of Congo Roofing.

The bond guarantees that Congo, 2-ply or 3-ply, *will last at least ten years*, and the buyer has *absolute certainty* on that point.

This guarantee is issued by the National Surety Company of New York and is enforcible without resort to law and without delay should Congo fail to last the ten years.

The fact that no other roofing manufacturer *can* give a Guarantee Bond like this ought to convince any reasonable buyer that Congo really is the *best* ready roofing made.

We will be glad to send you without obligation on your part a copy of the guarantee and further information.

CONGOLEUM FOR FLOORING AND WAINSCOTING

We should like to send every reader of this Paper a sample of Congoleum. It is fitted for use as a border around rugs, as wainscoting and as flooring. It is a perfect imitation of light and golden oak. Its surface has a high polish. It is unusually durable. The price is very low. Write for samples and further details

MISCELLANEOUS

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms —real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

FOR SALE BY DEALERS EVERYWHERE

Glidden

Challenges Comparison

Our terms are Sixty Days—some varnish houses give four months.

Why should you deal with Glidden?

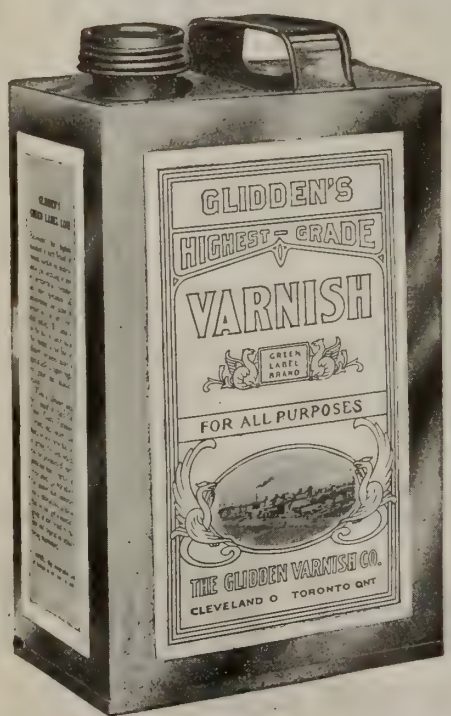
There's just one answer, Mr. Merchant: The quality of the goods and the profits to you.

The Glidden discount is so much more generous than the discounts made by other varnish houses that *the discount discounts the terms.*

The discount we offer the trade on Green Label Varnishes, Stains and Specialties makes it possible for you to *make more money* absolutely regardless of four months' - five months'—or six months' terms, and Glidden's Green Label Varnishes are in a class by themselves.

Have you been reading our advertising in the painters' publications?

We challenge any painter in the land to send us a sample of any exterior varnish equal in quality to Glidden's M.P. Durable Exterior, or any interior varnish equal to Glidden's M.P. Durable Interior, or any floor varnish equal to Glidden's M.P. Durable Floor.



We are giving this challenge bold advertisement in the Master Painter, The Painter and Decorator, The Modern Painter, Practical Decorator, Painters' Magazine, Cement World, American Carpenter and Builder, etc.

That is the sort of challenge that shows *faith* in the quality of our goods, and the painters know it.

Write for our New and Most Generous Proposition to the Trade on Green Label Varnishes, Endurance Wood Stains, Endurance Colorspar, and Specialties. Use the attached coupon.

TORONTO FACTORY

Let Your Business Grow With Ours

The Canada Paint Co. is one of the oldest manufacturers of paints, varnishes and colors in Canada. C. P. products have been sold for nearly half a century, and every year of that time has been better in sales than the previous ones. The growth in the demand has been continuous. So has the increase in number of dealers handling C.P. products. The C. P. selling plan is simple and is aimed at the largest market—to meet the demand for a complete line of reliable finishes that can be sold at popular prices, and pay you a good margin of profit. As a trade winner, this plan is a proved success in all localities. C. P. products satisfy the consumers, and the C. P. selling plan pleases the dealers. It takes three big factories in Montreal, Toronto and Winnipeg to keep up with the sales. This business is still growing, and the trade of C. P. dealers is growing with it.

THE CANADA PAINT COMPANY

LIMITED

MONTREAL TORONTO W NNIPEG

A COMPARISON

KALSOMINE

is a compound of whiting, glue and color that has to be mixed with boiling water—involving extra labor and trouble. When it has been on walls and ceiling a little time it decays and begins to rub and scale off, and has all to be washed or scraped off when the room is to be done over again.

ALABASTINE

is a cement, made from crystalline alabaster rock. It hardens on being applied to the wall and will not rub off. Add cold water, stir, and it's ready. No bother, no waste of time. And when the room is to be done over again you just put one coat over the other. No scraping or washing needed.

AND A MORAL

ALABASTINE is the only pure, permanent and sanitary wall coating. Your trade want it. No substitute will sell so readily. Remember the Spring rush and order NOW, direct or through your nearest jobber.

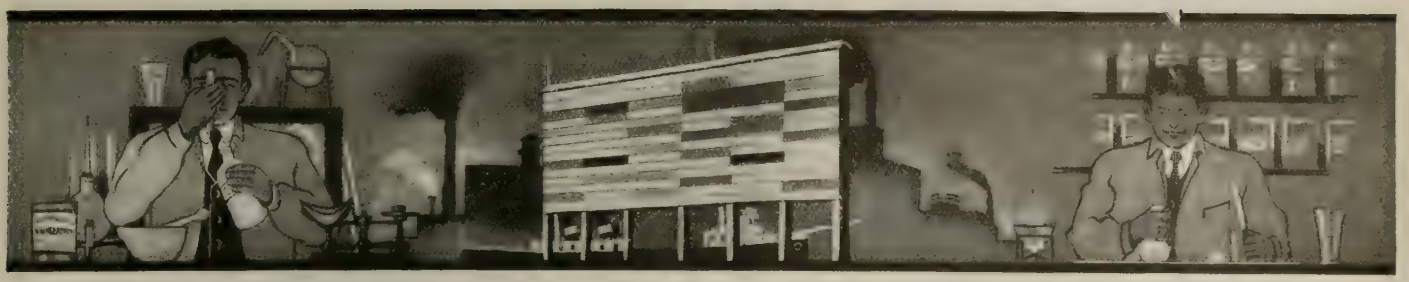
THE ALABASTINE CO., LIMITED, PARIS, ONT.

Sterling Prepared Paint

It is "Sterling" Quality at a Reasonable Price

CANADIAN OIL COMPANIES LIMITED, TORONTO

HALIFAX ST. JOHN MONTREAL QUEBEC WINNIPEG
CALGARY EDMONTON HAMILTON LONDON OTTAWA



Why do the Martin-Senour Paints bring customers back?

See what we are doing to keep up their quality, then answer that question for yourself.

Our chemists test all Linseed Oil and Dryers before they go into our storage tanks. If they do not test perfectly pure they are rejected. This protection for the dealer takes a slice from our net profits, but we have found it pays in the long run to co-operate with him by looking out for his interest.

The finished product is thoroughly tested to withstand the bite of inclement weather — to defy the destroying elements of sun, rain, and the gnawing tooth of time.

Martin-Senour Paints are not merely a mixed compository, but they are paints that are built upon a scientific basis — to render a given amount of service.

Permanent Color is just as important to the dealer as the durability. Even though the paint may protect the surface, if the color fades the property owner thinks the paint has lost its protecting qualities. Every shipment of dry colors is carefully tested — if it comes up to the standard it is passed on to the mills, otherwise it is rejected.

We believe you can now guess the answer very easily.
Don't you think this protection is a feature that deserves your worthy consideration, and is a very good asset to your paint business?
We also have an advertising campaign that sends you *new customers.*
Let's hitch together, we'll make a good team.

THE MARTIN-SENOUR CO., Limited

DO NOT DELAY

Now is the time to decide. How about that stock of DOUGALL VARNISH? How are you going to meet that demand for a really good varnish that is bound to arise?

A really good varnish—that's DOUGALL'S. DOUGALL VARNISH is the varnish that has built a reputation for itself as being the very best made.

The varnish that will not crack and peel off.
The varnish that is smooth and easy to use.
The varnish that covers the most surface per gallon.
The varnish that looks good and is good.

GET THE GENUINE

DOES THE REPUTATION of GARLOCK PACKING mean anything to you?

Does the fact mean anything to you that GARLOCK PACKINGS are giving eminent satisfaction the country over and everywhere Engineers who know insist on the installation of Genuine GARLOCK?

This big and insistent demand for GARLOCK PACKING is the demand for quality.

Imitators are making Packings that look like GARLOCK and are trying to sell them because they look like GARLOCK.

Sometimes these imitations are sold as being "just as good as GARLOCK." If they were as good, they would be sold on their own merits and not on the established reputation of GARLOCK.

Sometimes these imitations are substituted when "GARLOCK" is asked for. To prevent you getting an imitation and assist you in identifying the genuine, we have marked every piece of Spiral Packing with this mark of quality

SPRAYERS.

COLLINS SPRAYERS—SATISFIED CUSTOMERS

The Collins line of sprayers for this year is the best yet offered. We have found some small improvements could be made, esp cially in finish, and have also lowered the price, with the intention of making larger sales but smaller profits. We are aiming at doubling last year's output. Our three largest sellers are our Three-gallon Compressed Air Sprayer, our Crown and Gem Sprayers. Write for Catalogue and Prices. For Sale by Leading Jobbers or

"ACME"

are the strongest and sharpest low-priced Shears and Scissors on the market.

Why were 15,000 pairs of Acme Shears sold daily 5 years ago; and why are 30,000 pairs of Acme Shears sold daily to-day?

Because "Acme" on a shear or scissor spells **satisfaction** to the **customer** at a **low price** and a **handsome profit to the dealer** with greatly increased sales.

Special Representatives, Wiebusch & Hilger, Ltd., New York City.

MR. DEALER: Write your jobber to-day for prices on the "Acme" line, supplement your high priced shears with "Acme" shears and scissors and watch the gratifying results.

Jobbers should write for our W-2 Catalogue, illustrating the most complete line of shears and scissors manufactured.

The No. 701 Oval Steel Screw Straight Trimmer is one of our newest patterns.

Why Don't YOU Supply The Architects In Your Vicinity With

ROGERS' Portland Cement?

This is a standard Portland Cement that is specified by most architects as it is beyond comparison with other brands in strength, purity, evenness of set and durability.

You can sell this cement at such an attractive price that the architect will find it cheaper to buy from you, as it will eliminate a great deal of lost time through long distance hauling from larger dealers.

The many repeat orders that we are constantly receiving prove that this cement has real merit and is giving complete satisfaction.

Our prices are right. Try us for quick service.

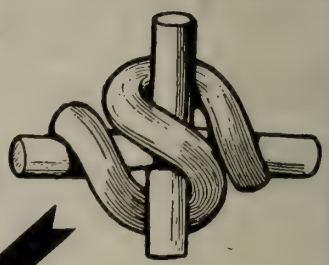
The PARKYTE Sanitary Chemical Closet is by far the best for you to handle. Write Winnipeg office for handsome catalogue and full particulars.

PARKER-WHYTE, Limited

WINNIPEG TORONTO VANCOUVER

The "IDEAL" FENCE

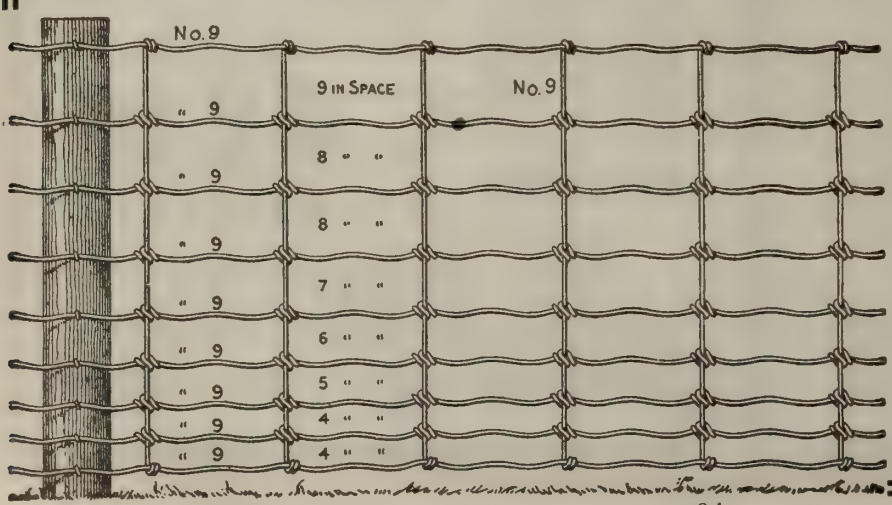
is an effective Trade-Winner



The reason that there are more miles of Ideal Fence sold in Canada annually than any other make is not due to salesmanship or to advertising, but is due to the merits of the fence itself—to the quality of material and workmanship—to the protection it affords—to the service it renders and to our many satisfied customers throughout the Dominion.

QUALITY FIRST—LAST—ALWAYS

is what has made "Ideal" so popular. Ideal Fence is made exactly as represented and the price is always right. Send for our catalogue and price—then go after the farm trade.



"IDEAL" PRODUCTS:
Staples, Diggers,
McCloskey Grips,
Farm and Stock Gates,
Fence Stretchers, Tools,

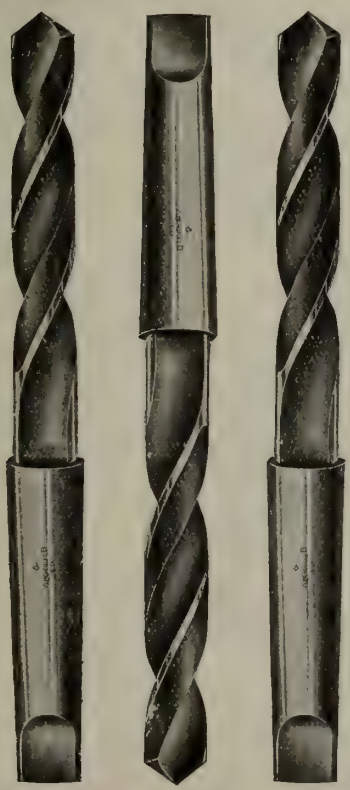
We manufacture all kinds of lumber tools.

Light and Durable
Send for catalogue and price list.

Long Distance
Phone No. 87

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.



The Process Counts As Much As The Steel

Drills are backed by the full strength of the steel when W & B twisted-while-hot process is used.

Other methods of manufacture remove the strength-giving qualities of the metal and produce drills with only a shadow of the real toughness of the steel.

Why buy drills made from steel that has lost its backbone?

"HERCULES" HIGH SPEED TWIST DRILLS

are manufactured under the only twisted-while-hot process that retains all strength of Vanadium Steel in the finished drill.

This is the drill for general factory work where metal of different degrees of hardness makes up the day's output.

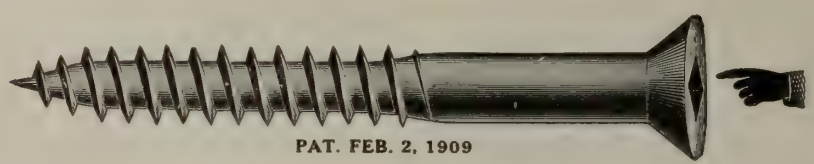
ROBERTSON WOOD SCREWS

SOCKET HEAD

The hardwareman who is wide awake can make excellent profits by boosting this new wood screw.

The square hole, into which a specially made screw driver fits, has become extremely popular with every user. With this the wood-worker can do the work in less time and without danger of destroying the wood, as the screw driver cannot slip.



PAT. FEB. 2, 1909

We are also manufacturers of Hand Drivers, Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails, Wire, etc.

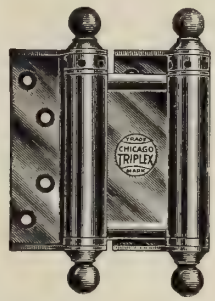
TRADE CHICAGO MARK

A SUGGESTION

Have you a stock of Spring Hinges that have distinctive selling features which your salesman can offer and which would make the prospective purchaser buy them and no other?



Chicago "Triplex" Spring Butts

offer this advantage to you. The appearance, durability and finish of this article are unsurpassed, and in consideration of prices that are conservative in respect to value, the up-to-date dealer cannot afford to neglect this profitable business.

Send for Catalogue M 26. It fully illustrates and describes the most complete line of Spring Hinges manufactured.

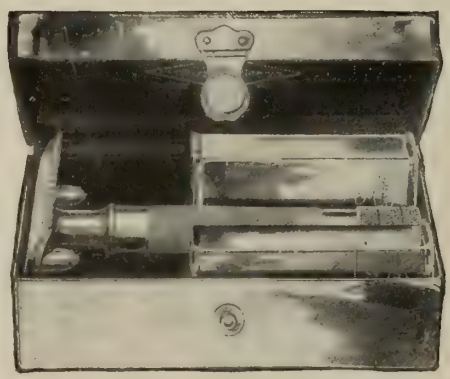
PROTECTED PRICES

Have Been for Years a Feature of the

Gillette Safety Razor Trade



Cut prices are fast losing their attractiveness to dealers, as well as to the buying public.

As men become better acquainted with their competitors, through their local Business Clubs, their Annual Conventions and the Wholesale and Retail Associations —as they absorb from these gatherings and from their Trade Papers the spirit of modern business—they realize more and more clearly that while competition in service builds up trade, competition in price-cutting tears it down.

There is consequently a growing tendency among progressive "merchants" to so price goods that each and every sale pays a fair and honest profit. Yet there are still many short-sighted "store-keepers" who do not hesitate to slash prices, and so injure their own and their competitors' trade.

It is significant that the GILLETTE Safety Razor was put on the market nine years ago at PROTECTED PRICES. We were among the pioneers in this movement. No dealers, not even the Mail Order Houses, have ever been permitted to cut GILLETTE prices.

Thus, those merchants who have been working for the betterment of the trade have been absolutely protected, so far as the GILLETTE is concerned, from unfair competition from any source. The dealer who purchases GILLETTES has learned that he can depend on quick, sure sales at a good profit.

That is one of the reasons why the GILLETTE is solid with the trade, and the "best seller" that has ever appeared among razors.

The Arguments That Sell LEWISITE ROOFING

You will convince your customer that "LEWISITE" is the Roofing needed, when you say to him:—

"LEWISITE" **Roofing** is One Solid Flexible Sheet, not several sheets stuck together; Consequently it lays flat on the roof.

"LEWISITE" **Roofing** is a sheet of Special Felt, Impregnated with a Preservative Saturant and **Coated on Both Sides** with a Gum Compound which makes it **Absolutely Waterproof.**

"LEWISITE" **Roofing** has a Saturant and Coating entirely different from the tarry substance used on cheap roofings, and which causes them to dry-out, crack, and disintegrate. It contains no tar. It remains Permanently Proof against all kinds of weather, Ice and snow, slush, hot sun—"LEWISITE" **Roofing** will resist them all.

It also resists fire and is unharmed by acid or alkali fumes that would destroy many roofings in a short time.

"LEWISITE" **Roofing** is cheaper than shingles and easier to lay, making a Better and More Permanent Roof.

"LEWISITE" **Roofing** will give better service than ordinary roofing because it is made of better materials. It will afford security and protection to your property.

LEWIS BROS. LIMITED stand back of "LEWISITE" Roofing.

These are Facts. These are Arguments that will **convince and sell** your customers.

What Roofing can you find that has such strong selling points as "LEWISITE?"

It Will Pay YOU to Investigate this Matter NOW. Let us quote YOU.

LEWIS BROS. LIMITED, MONTREAL

OTTAWA TORONTO VANCOUVER

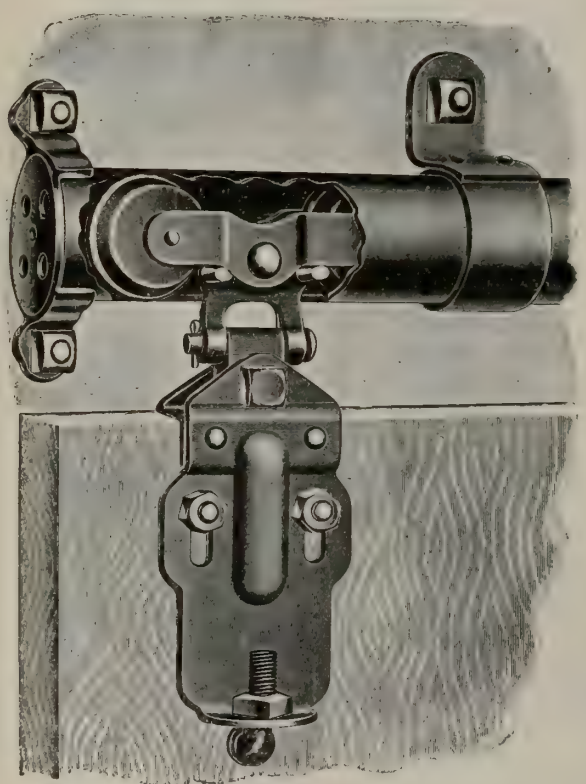
"No, I Can't Afford To Put In An Inferior Line Of Door Hangers—My Trade Demands The CANNON BALL."

"What's more, I can't see any good reason why I should take the chance.

"Cannon Ball Hangers have a mighty good reputation. They are ***trade-getters*** and ***trade-holders.*** I would be violating every principle of good business if I attempted to displace a line of such ***thoroughly proven merit*** with a new and ***untried*** one.

"Every once in a while some customer comes in and says: ***'Say, that Cannon Ball Hanger you sold me is a peach. Best thing of its kind I ever saw.'***

Fig. 440



"The Crated Track Is Mighty Handy."

"I don't have to bother with big, awkward stocks of track in various long lengths either.

"Cannon Ball Track comes in 3 ft. sections, ***crated.*** There are 32 pieces in each crate, making 96 feet of track that I can slip under the counter out of the way. I can give a customer just as much or little track as he wants in convenient form."

The Cannon Ball Battery:

CANNON BALL BARN DOOR HANGER

Is your profit keeping pace?

Cement has become one of the farmer's daily necessities. His demand for it, active twelve months in the year, is growing by leaps and bounds.

The demand is being stimulated by the most energetic educational campaign ever undertaken in Canada.

A $3,600 prize Contest for farmers was conducted in 1911, and the second contest will be held this year. Advertisements in newspapers and farm journals — The book, "What The Farmer Can Do With Concrete"—A quarterly magazine, "Farm Improvements."—Booklets on every phase of concrete work—Lectures to farmers at agricultural colleges. These are some of the means now being employed to increase the demand for concrete."

Are you getting your share of the profits from this publicity?

We are anxious to help you get it. We will send you wall files, handsome steel signs and copies of all publications. Our Publicity Department is always glad to answer any inquiries you desire to make. In addition to this service, we send you the names of those farmers in your community who have inquired about concrete, giving you valuable "tips" on prospective purchasers.

Last, but not least, dealers who handle "Canada" Cement are building up a permanent trade on this newly-awakened demand, because they sell the Cement that always gives satisfaction.

Have You Considered

that Open Hearth Steel is demanded by railways and bridge builders, and by those who know, for all purposes where durability is required?

The way fence wire has rusted for years back is notorious.

Are you aware that Farm Journals are taking up the question and condemning Bessemer Steel for fencing, or that the United States Department of Agriculture reports Open Hearth Steel as being far superior in lasting qualities?

The new process Open Hearth Steel High Carbon Wire lasts like the old time iron wire. "INVINCIBLE" Fencing is made exclusively from Open Hearth Steel and heavily galvanized.

As makers of steel and wire, we are in a position to quote attractive prices. Which do you prefer to handle? Don't wait till your customers refuse anything else but our Open Hearth Steel Fencing. Write for our very latest discounts.

WHY A TYPEWRITER

Modern business methods insist that all business correspondence shall be typewritten.

Invoices and statements when typewritten secure more attention—prompter payments.

The typewriter saves time and work. Pen work is laborious.

Typewritten personal letters increase business.

MONARCH VISIBLE

WHY THE MONARCH

The full visibility of the work all of the time is an aid to the operator.

The common sense, complete appliances for all classes of work make typewriting easy.

All the very latest improvements.

Splendid durability.

Terms to suit the purchaser.

The MONARCH TYPEWRITER COMPANY, Limited

Stanley Tools

In the well-known STANLEY "BED ROCK" PLANES as now constructed we offer the user of high-grade tools a Plane that is the strongest and most perfect in adjustment of any Plane ever manufactured.

The design of the sides, which is a new and distinctive feature, adds greatly to the strength and attractiveness of the Plane, as will readily be seen from the illustration.

The new method of fastening the frog to the seat permits of the frog being adjusted either forward or backward without moving the lever or the cutter.

The shape of the knob has been changed, the new shape permitting a much firmer and easier grip than before.

The high grade of material used and the great care taken in their manufacture enables us to guarantee these Planes in every respect, and repeat what we have already stated—that they surpass all other Planes ever offered to users of wood-working tools.

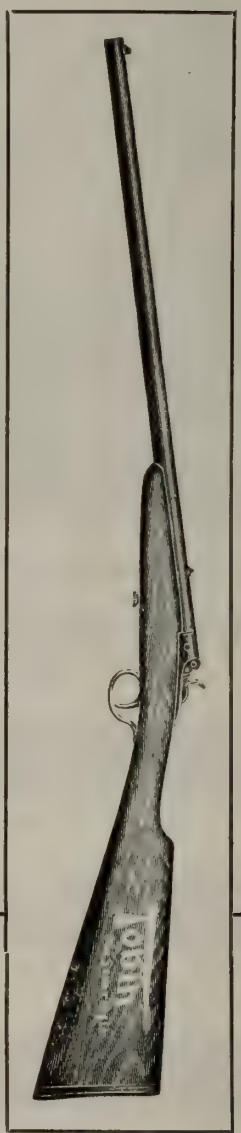
Stock Tobin Guns, They Don't Stay Long in Stock

If you do not somebody else, in your immediate vicinity, most likely will, and that means a dead loss to you. We offer terms which make it decidedly advantageous to carry our product.

Every TOBIN Gun possesses some distinctive feature, some easily seen advantage, which makes it a ready seller. It is generally a matter of handing the gun over the counter and ringing up the sale. You don't have to keep pushing, pushing, to sell TOBIN products. They sell themselves.



From every unrepresented district, orders pour in and that is proof positive that it pays to carry our products. TOBIN Guns add to the reputation of any store as a high class hardware emporium. They have been tried and tested and the public want them. A postal card will bring full information.

"Boy Scout" Rifle

This Rifle is one of the TOBIN ready sellers. Every store that handles it backs it up. The same strong guarantee applies to it as to our shot guns.

A New Bit that's a Good Buy

There is a great demand for an Auger Bit that will bore extremely fast, yet bore easily and cut a smooth hole. Heretofore, most bits have either bored too hard or not smooth enough. This new

Ford's Electrician's Special

fills the demand perfectly. It bores six turns to the inch, and saves one or two turns more in boring each timber than is possible with any other Bit. With slight pressure it will cut out without stopping or splintering.

Write for circular regarding this Bit Address 7B.

Some Truths About Horse Clipping Machines

Every Stewart Clipping Machine is sold with an unqualified understanding that it must please the buyer or no sale.

Stewart machines are made in the largest and most modernly equipped factory for the purpose in the world.

They are the simplest, sturdiest and most efficient made anywhere.

Stewart machines turn easier, cut faster and cleaner and the knives stay sharp longer than any others. When dull they can be resharpened to cut like new in a few minutes.

They compete in all the markets of the world and get the business on sheer merit.

More Stewart machines are sold in every country than of all other makes combined.

Dealers selling Stewart machines are backed by a better product, more extensively advertised than any other.

Every time you offer a Stewart machine to your customers you can do so with the understanding that it must prove more satisfactory than any other for the same money or we will refund every cent paid out for it.

From now to May these machines are in greatest demand.

METALLIC PACKING

Steam pressure, sliding friction and moisture make it difficult to properly lubricate piston and valve stem rods, hence a self-lubricating metal like Magnolia naturally proves superior to other metals for packing rings. We recently published some splendid letters from Engineers on that subject, and here is another fine letter.

UNITED STATES ENGINEER DEPARTMENT
U.S. DREDGE "WALLOWA"

RIPARIA, WAS., OCTOBER 24th, 1911

Gentlemen:—I use Magnolia Metal for high-pressure steam packing on the main rods of the propelling Engines. These Engines have a piston speed of 150 feet per minute; diameter of rods, 3 inches; steam pressure, 225 lbs. per square inch: Four rings, or eight pieces, bevelled Magnolia Metal rings constitute the packing for each rod. I had a great deal of trouble with packing on the main rods, before using Magnolia Metal, with different kinds of Babbitt metals; the packing would melt or burn and crumble. I have at different times, when renewing packing, taken out from 30 to 48 pieces from each set, out of one stuffing box. Since using Magnolia for the rings, I have had no trouble whatever with the packing and after the rings got conditioned to the rods no steam leaked by. To-day I examined the packing rings and found them in as perfect condition as when I put them in four months ago, with hardly any sign of wear to them, and they look good for years of hard service. I cannot speak too highly of Magnolia Metal. Yours truly,

JOHN OWRE, Steam Engineer on U.S. "Wallowa."

THE

"BAYARD"

SEMI-AUTOMATIC RIFLE

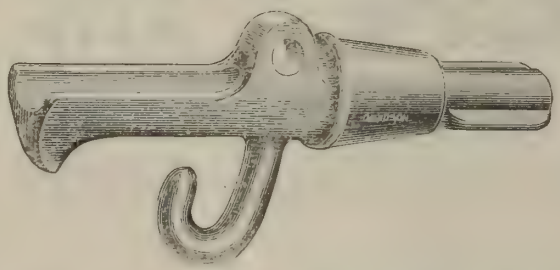
MADE FOR 22 CAL. LONG AND SHORT SMOKELESS RIM FIRE CARTRIDGES

THE STRONGEST SHOOTING RIFLE MADE

"You pull the trigger, the Bayard does the rest." When you shoot the cartridge the recoil automatically opens the breech block, cocks the rifle, throws out the empty shell and leaves it ready for a new cartridge. All you have to do is pull the trigger and drop in a new cartridge alternately. It is the only rifle having automatic features that handles two cartridges, 22 short and long. Strong Shooting, High-Class Workmanship, Handsome Alignment, Simplicity of Mechanism, Parts Interchangeable, are the main features of the Bayard. It has the quick twist rifling which makes it a powerfal shooter. Will penetrate three inches of pine, weighs about 4 lbs., can be taken entirely apart in three minutes for cleaning, the only tool needed is a screwdriver. The rear sight is adjustable for short or long range, and the barrel tapers beautifully from breech to muzzle. Ask your jobber for the Bayard.

FOR SALE BY LEADING WHOLESALE HARDWARE HOUSES.

THE "EMPIRE" SAP SPOUT



STRONGLY MADE OF MALLEABLE IRON, TINNED AND DURABLE ENOUGH TO LAST THROUGH A GENERATION.

EVERY SPOUT GUARANTEED AGAINST BREAKAGE

THEY WILL RUN SAP EARLY AND LATE with a capacity fully one-third more than any other make.

THE TAPERED END GIVES THIS SPOUT A FIRM HOLD of the tree and the play of the wind on a full bucket of Sap cannot possibly loosen the spout after it has once been driven in.

IT DOES NOT LEAK, and is very easy to insert and just as easy to remove.

USE 7/16-INCH BIT WHEN TAPPING and it will be found that with the "EMPIRE" SPOUT every severed grain of wood within the hole is left perfectly free to run Sap—and the increased amount thus obtained will pay for the Spouts in less than one Season.

NO ROSSING OF THE TREES NECESSARY and therefore no injury to the bark.

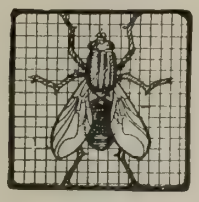
Not an Enterprise for the "Quitter"

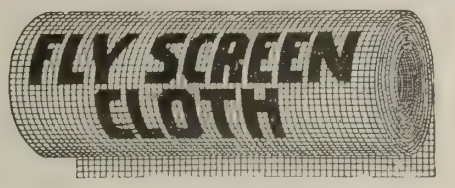
"If there is one enterprise on earth," says John Wanamaker, "that a 'quitter' should leave severely alone, it is advertising. To make a success of advertising one must be prepared to stick like a barnacle on a boat's bottom

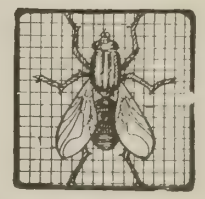
"He must know before he begins it tha he must spend money—lots of it.

"Somebody must tell him that he cannot hope to reap results commensurate with his expenditure early in the game.

"Advertising does not jerk; it pulls. It begins very gently at first, but the pull is steady. It increases day by day and year by year, until it exerts an irresistible power."







For Screen Doors and Windows

made of 33 gauge steel wire, 12x12 mesh, painted black, in 100 feet rolls.

Widths 18, 20, 22, 24, 26, 28, 30, 32, 34, 36 and 42 inch.

A Personal Chat With You About Ourselves

There has been a real dearth of good tinsmiths of late years. The tremendous amount of building construction probably accounts for the scarcity. The demand for tinners has been so great that almost anyone who could handle a soldering iron, has been accepted as a full-fledged journeyman.

It seems too bad that so few tinsmiths of the present day are competent to draft paterns for the tinshop. Yet such is the case. They look with awe, upon tracings and blue prints. And their efficiency would be increased from 50 to 100 per cent., if they could be counted upon to read plans and draft patterns.

Any sheet metal draftsman will tell you that the drawing of tinshop patterns is not such a formidable proposition after all. It does not require a deep knowledge of geometry or mathematics. It can be mastered by any tinsmith who will apply himself to a study of the subject.

The "Complete Course in Sheet Metal Work," which is now running in Hardware and Metal, affords a great opportunity for acquiring a knowledge of pattern drafting.

This course was originally intended as a correspondence course, and it treats the subject very thoroughly from A to Z. The author, L. W. Koser, is one of the most experienced sheet metal draftsmen in Canada, having been connected with such large firms as the Berger Manufacturing Co., Canton, Ohio, Metal Shingle and Siding Co., Preston, Ont., and Galt Art Metal Co., Galt, Ont.

The time spent in studying these articles and practising the drawings given with each lesson, will bring big returns. No tinsmith or draftsman should neglect the opportunity. The third instalment of the series appears in this issue, and the course will run throughout the year.

WE GIVE THE SERVICE.

In the twenty-three years that Hardware and Metal has been making its weekly visits to the trade, the paper has been continually strengthening its hold on its readers, and becoming more and more indispensable to them. It would be difficult to find a newspaper or magazine anywhere which is so highly regarded by its subscribers, as is Hardware and Metal.

If we had not been giving the best possible service to our readers, for almost a quarter of a century, Hardware and Metal would long ago have lost its grip.

But we are to-day giving better value than ever before. Our market reports are newsier and are just as accurate as a big organization of careful and clever men can make them. Our special articles are intensely practical, giving ideas for business getting and business management which are worth many times the subscription price.

Our eyes are always open for ideas which will make Hardware and Metal newsier, more interesting and more helpful. Subscribers can look forward with a fair degree of certainty to each number being better than the one which preceded it.

As time goes by, we receive, more and more regularly letters from our readers, expressing their apprciation of Hardware and Metal. Here are a few samples of letters which have recently come to hand from widely different parts of Canada:

An Inspiration and a Pointer.

"Enclosed you will find cash for our subscription to Hardware and Metal for the current year.

We cannot see how anyone in these kindred lines can do without it. Its pages, all through, are an inspiration and a pointer to every reader.

"G. E. CALKIN & CO.,
Kentville, N. S."

Could Not Miss a Copy.

"Would you please send me the Dec. 30 issue of Hardware and Metal, as it must have gone astray. I notice there are some articles in the Jan. 6 issue referring to previous paper, and as I did not receive my Dec. 30 number, would appreciate very much having you forward same.

"H. STEVENS,
Valley River, Man."

Show Card Articles are Helpful.

"The writer has just noticed in your last issue, article No. 7 on Show Card Writing. One of our clerks here is anxious to get this complete set of articles, and how we ever came to overlook it in the previous issues, we do not know. Would it be possible for you to send us this complete set?

"A. M. BELL & CO.,
Halifax, N.S."

"When first I started to write signs, I drew the letters on pasteboard, cut them out and pencilled around them to get the forms of the letters on the boards. The introduction of the Edwards' Short Cut System in "Hardware and Metal," was a new era for me. Since then, I have discarded pasteboard letters, and can work with five times the speed and ease.

"I am indeed thankful to you for the benefit and knowledge I am getting through Hardware and Metal, and hope that many other clerks will take advantage of the opportunity this valuable course opens to them.

"F. WARE,
with T. M. Nash,
Wellington, Ont."

HARDWARE STORE WINDOWS GETTING BETTER.

On another page of this issue announcement is made of the awards in Hardware and Metal's Christmas Window Competition.

In order to secure an impartial verdict these windows were judged by three different hardwaremen, in Montreal, Toronto and Winnipeg, the result being arrived at by adding the marks assigned each window by all the judges.

One thing which the judges did not fail to remark, was the excellence of the window displays submitted from small towns and villages. They were, on the whole, just about as good as those from the towns over ten thousand population.

How is it that clerks and dealers in small and out-of-the-way places have such good ideas on window dressing?

It is because Hardware and Metal ("the Bible of the Canadian hardware trade") has been for years illustrating and describing the best window displays that have come to our attention. These have been studied by our readers in city, town and village alike with the result that every progressive hardware store in Canada is making window displays that are really fine.

The value of the work that Hardware and Metal has done in raising the standard of window dressing in Canadian hardware stores, can scarcely be estimated.

Hardware Convention and Exhibition

A Notable Event at Montreal—Retailers from Province of Quebec Gather There —Addresses by Officers and Prominent Manufacturers at Opening of Exhibition.

Montreal, Feb. 27.—Hardware merchants of Montreal and the Province of Quebec have met in Montreal before, but now for the first time they are having the opportunity of inspecting the product of the various manufacturers. Never before has an exhibit been held in connection with the Quebec Retailers' Convention. The novelty undoubtedly is doing something to make the present gathering a success; and yet not to novelty alone can the success be attributed. Everything possible has been done for the comfort of exhibitor and retailer alike, and exhibitor and retailer alike, are appreciative.

When the hardware section of the Quebec Retail Merchants' Association decided to have an exhibit in connection with their convention, they decided also that as the exhibitors were practically to pay the piper, they should have something to say in calling the tune. So a committee of the manufacturers were asked to act with the retailers, and these two sections, working together, laid the plans for the gathering now in progress. This committee secured the 65th Armory on Pine avenue. This committee made suggestions to J. A. Beaudry, the indefatigable secretary. This committee—keeping the various needs in view—laid the foundations which are rendering possible the present successful gathering.

President Fred C. Lariviere.

The 65th Armory is well nigh an ideal spot for such a convention and exhibition. It is large, well lighted and well heated. The booths are all easily reached. There is little or no chance of a visitor missing any exhibit. From the gallery, which runs around the armory, a fine view may be secured of the whole floor; and the beautifully decorated booths, there under the flag-bedecked ceiling, make a gay scene.

All this afternoon, retailers, visitors and exhibitors moved in and out among the displays. Not a complaint was heard, and when, at 4 o'clock, F. C. Lariviere, the president, formally opened the exhibition and convention there was genuine applause.

Here the opening ceremonies were cut pleasantly short. There was no long address of welcome. No time was taken in prolonged replies. The speeches made were to the point. All were expressive of satisfaction that the exhibition had opened so successfully; all expressive also of the hope that this is but the first of annual exhibitions in which the manufacturers and the retailers may get together for mutual benefit.

When F. C. Lariviere mounted on a box in one of the booths and called all to order many gathered about to listen. But Mr. Lariviere did not waste words. He thanked the exhibitors, not only for showing their goods, but for helping to make the gathering a success by the gift of their ideas. He paid a tribute to Mr. Beaudry the secretary of the association; then expressed the hope that such gatherings might be annual affairs. At this general applause broke out.

J. O. Gareau, President for Montreal, next spoke. He too expressed satisfaction that so many had taken the opportunity to exhibit; and also pointed out the number who were present from out-

The 65th Armory Building, Montreal, where the Convention and Exhibit are being held.

side places. Like Mr. Lariviere Mr. Gareau spoke in both French and English.

J. U. Boivin, President of the Quebec section, had something to say about the sessions of the retailers. These, he said, were not only for Montrealers, but for all dealers who cared to attend. All would be welcome to attend and to take part.

Though still forced to get about on crutches, because of his recent accident, A. A. Bittues, of the Gillette Safety Razor Co., was here, there and everywhere at the exhibition, and was called upon to speak for the newly formed Canadian Hardware Manufacturers' Exhibitors,' Limited, of which he was elected president at the inaugural eeting in Guelph.

"If, in another year," said Mr. Bittues, "the Canadian exhibitors can be the means of bringing a bigger exhibition here the Canadian Exhibitors will be glad to do it. We are not at war with the retailers, you must know. We are merely trying to lift the load a little. We can do much to help these exhibitions. We hope you will want to meet with us again next year; for we surely will want to meet with you."

F. M. Tobin, of the Tobin Arms Manufacturing Co., Woodstock, the vice-president of the Exhibitors, Limited, was also called upon.

"In French, please," shouted C. Smallpiece as Mr. Tobin mounted the box.

Every one joined in the cry, for be it known Mr. Bittues had spoken in French as well as English.

"No, no," replied Mr. Tobin. "Mr. Bittues escaped but I might not." Then he spoke of the exhibit. "We have a gem of an exhibition here," he said. "I think it is as nearly perfect as is possible. We owe a great deal to Mr. Baudry, and the reason he has been able to accomplish so much is because he has French blood in his veins."

"You woulon't say that in Ontario," interrupted Mr. Lariviere.

Everyone laughed, but Mr. Tobin was ready with an answer. "I would not say that in Ontario," he said, "because there are a great many Scotchmen there and it would take two years to explain the joke to them."

"You have called upon me to speak for the Manufacturers' Exhibitors," concluded Mr. Tobin. "We are a baby organization,but I can tell you that we are growing fast and that we stand ready to do all we can to help this association at this and any other time."

J. A. Beaudry, the secretary, also spoke with the others, expressing the hope that the present exhibition would be but the first of many similar gatherings. Then Mr. Lariviere invited all to attend the sessions to-morrow, and the short meeting broke up, all going back to the booths, which were indeed well worth careful inspection.

Need of Retailers' Associations Urged

Several Speakers at Montreal Convention Show What has Already Been Accomplished and Refer to Things Yet to be Done—Manufacturers Exhibitors, Limited, Explained—The "Made in Canada" Cry.

Montreal, Feb. 28.—Important in many ways was this afternoon's meeting of the Retail Merchants' Association. A number of members and visitors spoke. Some merely extended good wishes, but others sounded the call to battle. Retailers, they contended, must work side by side if retailers and those who directly or indirectly depend upon them, are to get a square deal.

Words of Welcome.

The opening moments of the meeting were formal. Mayor Lavallee was unable to attend, but Lieut.-Col. Labelle of the 65th Regiment; Armand Chaput, President of the Chambre de Commerce,, and W. M. Reford, of the Board of Trade, welcomed the members. Then, W. U. Boivin, the Provincial President, who presided, called upon F. C. Lariviere. He responded briefly but exceedingly appropriately.

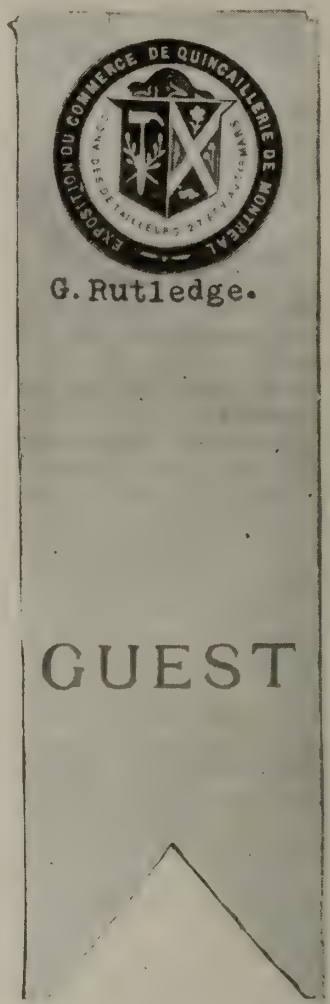
ONTARIO DELEGATION.

The Ontario Retail Hardware and Stove Dealers' Association has been well represented at the Quebec convention. President M. S. Madole, first Vice-president H. Occomore, second Vice-president W. F. Macpherson, past President R. C. Chown, and Treasurer Caslor represented the Ontario body.

After this F. M. Tobin, of the Tobin Arms Co., was called to speak for the manufacturers, A. A. Bittues, of the Gillette Company, President of the Manufacturers Exhibitors, Limited, being absent.

"I don't think you needed to express a welcome," said Mr. Tobin. "We have felt it on every side."

E. M. Trowern, Secretary of the Federal Retail Merchants' Association, made a stirring speech. "The retailers must unite," he said. He told of a great gathering of retailers in the



Convention badge supplied by the Gillette Safety Razor Co.

United States. "There," he said, "the dealers are face to face with the trading stamps and other evils, all of which have been stamped out of Canada through the efforts of the Retailers' Association."

Merchants Deserve Aid.

Later Mr. Trowern had something to say about the government. "I know a man in Winnipeg," he said, "who decided he would make a little garden. He wrote the Dominion Agricultural Department and was supplied with much more seed than he could use. The seed has been coming annually, though the garden has been untilled for seven years."

"It is all right to help the farmers," commented Mr. Trowern, "though in this case much of the assistance was wasted; but in any event the merchant should be remembered. Why," he proceeded ,"do you realize that this is the first year the merchants have been

enumerated? We have counted sheep and hogs but never merchants until this year."

M. S. Madole, President of the Ontario Retail Hardware Association, brought greetings from the sister organization, telling something of the new arrangement entered into at Guelph, whereby the manufacturers take over the direction and control of the exhibition.

Mr. Madole also spoke of the laws, declaring some have been passed which are against the best interests of the retail manufacturer and jobber. "We need associations," he declared, "so that we can guard our own interests."

Mr. Madole closed with a wish for the Montreal Convention's success and sat down amid enthusiastic applause.

J. G. Watson, a former president, pointed out the growth of the association. The hall last year was too small; the larger building this year is still too small. "We'll have to have a larger place next year," he remarked; "of that I'm certain."

"Hear! Hear!" came from all parts of the hall.

"The work of our association," remarked Mr. Watson, "is not done at the Dominion or Provincial Conventions, but in the sections. I'm glad to say these are meeting regularly and are taking an interest in all lines."

A permanent exhibit, Mr. Watson thought, might be a fine idea. He was not sure the time for this had come, but believed in many of the larger places permanent exhibitions might well be held.

Mr. Tobin, who had spoken briefly before, was called upon to explain the Canadian Manufacturers Exhibitors, Limited. He pointed out how this body aims to make the exhibitions more attractive and more satisfactory. "The first place at which the Exhibitors Limited will take an active part," he said, "will likely be Hamilton in 1913, but later the hope is to use the whole power of the organization to make a convention in Montreal or Quebec a huge success."

H. F. Meldrum, Secretary of the Canadian Manufacturers Association, struck a note in favor of the "Made in Canada" cry. Some goods, he conceded, have to be imported, but some are now being brought in which might just as well be produced here. If this unnecessary importation were stopped it would mean the addition all over the Dominion of some 65,000 hands, earnings $33,000,000 wages. "And the goods made would be good goods," concluded Mr. Meldrum. "It is to you merchants' advantage to press home made products, for that will help make the country prosperous, and general prosperity benefits all—the retailer especially."

Variety of Manufactured Goods Shown

Retailers Were Given Object Lessons of the Progress Along Productive Lines Made in Canada During the Past Few Years. Outsiders, Carpenters, Mechanics, Architects and Painters Among Others, were Given Opportunity to Inspect the Various Booths.

Everything tended to make the exhibition held in connection with the Montreal Convention a great success. The 65th Armory was bright and warm—delightful both for those in the booths and those inspecting them. The crowd was entirely satisfactory. It was a buying crowd and one which seemed to promise future buying. The manufacturers could see this the moment they reached the armories. So they made every effort to attractively display their goods, and well indeed they succeeded.

C. Smallpiece, a Prominent Figure at the Convention.

Ermaline Paper Bags.—The booth in which these were displayed was one of the few places from which goods were actually retailed. Miss Antil, of the Montreal Technical School, there demonstrated the good results which might be obtained by a use of the bags. Chops and other meats were cooked and many who watched the work paused to buy. A. L. Dawe was in charge of the booth.

The Ontario Lantern and Lamp Co., Hamilton, had a fine display, not only of lamps and lanterns, but also of electrical fixtures, a new product for this concern. J. W. Moncure and B. W. Moncure were in the booth.

Cummer-Dowswell, of Hamilton, had a booth in which was prominently shown the Playtime washing machine and a combination hand and power washer, devised especially to meet the needs of farmers who use gasoline engines. Geo. B. Dowswell and F. T. Baine explained the machines to the many interested.

The Canadian Keyless Lock Co., Charette Mills, P.Q. Here Geo. E. Bissonnette and G. T. Lemyre demonstrated this new combination house lock—a lock the combination of which can be changed 999 times. Stock was also subscribed at the booth.

The Stinson-Reeb Builders' Supply Co., Montreal, showed a variety of building materials, concrete blocks, flawless hardwall plaster, flawless white finish, bricks of various styles, enameled brick in different colors, Medusa waterproofing and Medusa White Portland Cement. All this was attractively arranged, the various bricks being laid as in a building, cotton batting being used to represent the plaster. J. C. Simpson was in charge.

The Pike Manufacturing Co., New Hampshire, had an attractive display of abrasives—abrasives of every description. In the booth were R. A. Shaw and L. B. Ward.

The Stanley Rule and Level Company, New Britain, gave the hardwaremen and visitors a fine idea of the tools made in their Canadian works; bits, planes, screw drivers and new line vises were shown. F. Greving, D. A. F. Gooszen and M. Coe were in charge.

J. H. Connor & Son, Ottawa, displayed washing machines and wringers, "The Connor Ball-bearing," "The Gem," and the I. X. L. attracting particular attention. In the booth were J. T. Jeffrey and J. D. Morin.

G. L. Griffith & Son, Melbourne, showed some of their Hercules halters, whips and handy hame straps—a line which attracted a good deal of attention. H. L. Griffith was in charge of the display.

The Canadian Buffalo Sled Co., Preston, Ontario, had on view sleighs, snow shovels, coasters and lawn swings. M. E. Seaman was in charge.

The Tobin Arms Manufacturing Co., Woodstock, had a display of rifles, shot guns and high speed bits. Several retailers expressed surprise that such high class goods in this line are manufactured in Canada. F. M. Tobin and L. Jacques showed the strong points of the various lines to the many who were interested.

The Starr Manufacturing Co., Dartmouth, N.S., had a booth which demanded attention. Out of Starr skates a large star was formed; while bolts, nuts, rivets, carriage axles, washers and spikes were also shown, as were hockey sticks. In charge was H. L. Gaetz.

Boeckh Bros., Toronto, showed steel grip lines—paint brushes, whisks, brooms. A. Boeckh and H. E. Smith were on hand to give the retailers facts and figures.

The Gillette Safety Razor Co. had a somewhat different display from that shown at Guelph, but one which attracted fully as much attention. The process of manufacturing this well known razor was shown. There were blades, handles, guards—all the parts which assembled make the finished product. And there were finished razors too, in many styles. A. A. Bittues, J. S. Chadburn and D. P. Cotter were in the booth.

The Carborundum Co., Niagara Falls, showed all kinds of sharpening stones. In charge of the booth were K. D. Rose and W. C. Schwab.

The Onward Manufacturing Co., Berlin, featured sliding shoes, some of which were shown on a miniature brass bed. Electric and hand vacuum cleaners were aiso displayed. In charge of the exhibit were Geo. A. Cox and H. Beaudry.

The International Distributing Company, Montreal, had rubberset brushes of many kinds to show. There were paint brushes, shaving brushes and brushes cut in two, showing how the bristles are set. The Ever-ready and the Yankee safety razors were also shown. In charge were A. A. Fritsch and H. R. Hale.

The Brantford Roofing Co., Brantford, showed a miniature house finished with Christal roofing. Mohawk and Rubber roofings were also displayed. R. C. Sheppard was there to demonstrate the goods.

Pratt & Lambert, Bridgeburg, Ontario, by means of a carefully arranged display, showed to all passing the gums used in making their varnish. Also they showed "61" Floor Varnish undergoing the water test. The work done by the varnish and vitrolite white enamel was also illustrated. J. W. Limoges was in charge of this booth.

J. Wiss & Sons Co., Newark, displayed shears, scissors, manicure sets and similar products. In the same booth were pliers, chisels, wrenches and similar goods manufactured by Kraeuter & Co., Newark.

Starke-Seybold, Montreal, displayed goods carried exclusively by them. "So-Bos-So Kilfly," manufactured by H. Childs & Co., Utica; fencing made by the Republic Fence Co., of Chicago; and baseball goods made by A. J. Reach Co. E. W. Myers and W. M. Leith were in charge.

The Paterson Mfg. Co., Montreal, showed especially "Amatite," "Amazon," and "Everlasting" roofing, as well as tile felt and carpet felt. In charge were F. A. MacLagan, R. H. Povrier, C. W. Cowdry and L. Bourboneriere.

The Corbin Cabinet Lock Co., New Britain, displayed high grade locks, window fasteners and similar lines. **The Savage Arms Co.**, of Utica, N.Y., which occupied the same booth, displayed rifles and automatic revolvers. G. Monette and A. Lariviere were on hand to display these lines.

The Canadian Shovel and Tool Co., Hamilton, displayed shovels, scoops, spades, etc. An especial display was made of the "D" handle which—by eliminating cross grain—gives great strength. W. E. Skelton and J. H. Roper were in the booth.

The Gendron Mfg. Co., Toronto, displayed bathroom fittings especially as well as collapsible go-carts and wagons. J. J. Gagnier was in charge.

The Smith Hardware Co., Montreal, showed in their booths Utica pliers and nippers. The Mephisto bit, screw drivers and locks made by Peter Ludwig Schmidt of Germany, and the Ampere fused lockset, manufactured by the Hamilton Lock and Hardware Co. W. O. Davis was present to explain these lines.

R. S. Muir & Co., Montreal, had fire places, mantels, mosaic pavements and wall tiles in their booth, which was in charge of B. Muir.

Martin-Senour Co., Montreal, displayed especially their "New Tone" flat finish for inside work. Specimens of the work were shown, attracting a good deal of attention. There were present to explain the New Tone and other lines J. A. Naud, G. Tasse and J. Brault.

The Canadian Sporting Goods Manufacturing Co., Berthier, P.Q., displayed toboggans of all shapes and sizes. W. J. Henault was in charge.

The Dunlop Tire and Rubber Co., Toronto, had a display which aimed to bring home to the retailers that this concern does not confine its attentions to the manufacture of automobile tires. Belting, lawn hose, piston packing and horseshoe pads were shown prominently. A. L. Bogart was present to explain the goods.

The National Acme Mfg. Co., Montreal, displayed machine products, especially cap and set screws. H. L. Schneider and M. E. Barden were in charge.

Alex. Bremnier, Montreal, had in a tastefully decorated booth "Everhard" face bricks, Rocalite wall plaster, cement tools and cement boards. J. O. Benoit was in charge.

Brandram-Henderson, Montreal, aimed to show both the variety and quality of the goods which they manufacture. Lead in various stages of the corroding process was shown. English floor paint, Brandram Genuine and Anchor Brand white lead was displayed in the finished state. Floor luster and varnish, carriage gloss and Marbleine was also displayed; while a gallon of B. H. paint placed on a scales in the front of the booth illustrated that the paint weighs from 21 to 22 pounds a gallon. In charge of the booth were Wm. Edwards, John Irwin, A. B. Bremner, F. A. Markham, Nap. Paradis, E. W. Charleton and Alf. Beauchemen.

David Maxwell & Son, St. Mary's displayed "Imperial Electric and "Puritan Electric" washing machines, churns, lawn mowers and barrows. In charge was Jas. S. Parkes.

The Stratford Mfg. Co., Stratford, had a booth filled with step ladders, extension ladders and lawn seats. Jas. S. Parks explained the goods to all inquirers.

Taylor-Forbes Co., Guelph, displayed a wide variety of builders' hardware, shelf brackets, lamp brackets, letter boxes, door knobs; also tailors' irons, lawn mowers and jacks. C. I. Smallpiece was in charge, assisted by A. Vallee and others.

The Standard Sanitary Co., Toronto, featured a sanitary water fountain such as is now being specified for many schools and public buildings. Wash basins, baths and w.c.'s of porcelain enameled iron were also shown. F. Conaugton was in charge.

Robert & Robert, 73 St. Denis Street, Montreal, had their "Jackson" delivery wagon on the floor. P. A. D. Robert was present to demonstrate the machine.

The Window Strip Co., Montreal, exhibited Robbins rustless fly screens and their patent metal window strip. W. A. Stanley, manager of the concern, and R. J. Drake were in the booth.

Shurley-Dietrich Co., Galt, had to rely on the jobbers for an exhibit, since the goods being sent down for the booth were stuck somewhere in a snowdrift. But the Razor Steel saws of various kinds which were secured were arranged in an exceedingly attractive form. **J. A.** Donnelly was present to explain the good points of these saws to all inquiring.

MANY RETAILERS ATTEND.

Montreal, Feb. 29.—Among the retailers attending the Montreal convention this week were the following from Montreal:—A. Wallerand, David Deschampe, J. Delisle, Oscar Fournier, J. Pesant, J. E. Deslauriers, Jos. Lafalle, Denis Demers, Jacques Brault, J. P. Beauvdes, J. E. Beriard, Lucien Beault, Geo. Lebel, R. L. Shepard, M. Grange, J. O. Picard, L. A. Picard, C. Rounin, J. E. Bissonnette, O. Decarie, O. Lemire, A. Rouleau, A. Raymond, Geo. N. Des Roches, O. De Serre, Hercule Masson, W. Boiven, J. A. Labonte, J. O. Benoit, Jas. Haule, J. Bareau, J. Robert, A. E. Blandiard, A. Zaniel, J. W. Jaque, J. S. Bourbonnier, J. H. Roper, Alex. W. Bremner, Thos.

Continued on page 41.

Some Exhibitors at Ontario Convention

Mention of Some of the Booths Was Inadvertently Omitted in Last Week's Report—Some Photographs Secured at the Convention.

A large number of letters have been received complimenting Hardware and Metal on the complete report of the convention at Guelph which appeared in last week's issue. Owing to the haste with which the editorial copy necessarily had to be prepared some omissions occurred.

A number of the exhibitors were inadvertently omitted in the otherwise complete report of the convention. It so happened that among those omitted were some of the most interesting booths in the whole exhibition. A supplementary list is appended.

The Gillette Safety Razor Co., Montreal, had a splendid exhibit of their goods. Every variety of Gillette razor was shown, together with a liberal supply of the selling helps and literature supplied by that company. J. S. Chadburn and D. P. Cotter were in charge. There were countless inquiries at the booth for A. A. Bittues whose absence, as a result of his accident, was much regretted.

The Lufkin Rule Co., Windsor, showed a complete line of their measuring tapes and rules, including steel tapes, woven tapes, steel rules and wood rules. The stock had been capitally arranged and drew the attention of everyone. J. A. Hossack was in charge and E. Russell was also in attendance.

D. Maxwell & Sons, St. Mary's, had a display of their food choppers and washing machines. Two electric motor washers were shown and, being a distinctly new line, they attracted as much attention as any article perhaps in the exhibition. The operation of the electric motor washer proved a matter of keen interest. John L. Maxwell and J. W. Gallagher were in attendance.

S. F. Bowser & Co., Toronto, showed their storage tanks and pumps. These were demonstrated for the benefit of visitors and attracted a great deal of notice. Those in charge were L. Swartz, E. J. Murphy, F. C. Potter, H. T. Sterne and H. C. Christie.

Parker-Whyte Ltd., Winnipeg, showed their line of sanitary closets. As this line is now much in demand, particularly in the country districts, the booth drew its share of attention from the visiting hardwaremen.

F. W. Bird & Son, Hamilton, showed an interesting display of Neponset roofing. Those in attendance were W. J. Shaw, H. F. Collins and Walter MacKay.

Boeckh Bros., Toronto., had an attractive display of brushes and the paint specialties which they manufacture. The representatives of the company present were John Billinghurst and L. J. Levy. This booth attracted much attention.

The Dover Mfg. Co., Canal Dover, Ohio, had a unique booth containing a full line of asbestos sad irons and goods of a like nature. The motion device used created considerable interest. A. S. Howe was in charge.

The booth of the **Success Manufacturing Co.**, Gloucester, Mass., and **Lewis Bros.**, Montreal, was devoted to a display of sheet metal refrigerators. The display proved one of general interest for the hardware visitors. A. R. Payne, T. Houghton and F. Bolger were in charge.

ED. WANLESS.

A new member of the executive committee, who conducted the Question Box.

The W. C. Crawford Co., Tilbury, had an interesting stock of handles to show. Handles were on display for practically every hardware utensil which required handles.

The Pike Mfg. Co., Pike, N.H., showed an interesting display of oil stones, grinders, etc.

The Allan Hills Edge Tools Co., Galt, showed their line of edge tools on a black background. The display was undoubtedly a strong feature. E. E. Rendle was in charge.

The Galt Art Metal Co., Galt, had some of their sheet metal patterns on display. Those in attendance were L. W. Koser, G. A. Gordon and D. G. Speers.

The National Mfg. Co., Sterling, Ill., showed their lines of builders' hardware. E. S. Meikle, who was in charge, demonstrated these goods to all who called.

In the description of the booth of the Queen City Oil Co. the name of Mr. Lapp was inadvertently omitted. Mr. Lapp was in charge of the booth.

The address of the Oneida Community, Limited, was incorrectly stated. The Oneida Community factories are located at Oneida, N.Y., and Buffalo, N.Y.

Question Box Leader.

The chairman of the Question Box session, Ald. Ed. Wanless, of Chatham, conducted the meeting with considerable skill. Although a young man, he showed a wide knowledge of hardware, contributing valuable opinions on most of the questions discussed. Mr. Wanless is now a member of the executive of the association.

A snapshot at the Guelph Convention— Past Presidents D. Cinnamon, R. C. Chown and J. R. Hambly.

THE QUESTION OF LOCATION.

The Convention and Exhibition just concluded in Montreal has been a success—a greater success, perhaps, than was expected. Retailers and manufacturers alike have expressed the hope that the gathering will prove to have been but the first of many. There seems little doubt, indeed, that next year will see another session, so it behooves those who had so much to do with making this year's meeting a success, to consider if there is not yet room for improvement.

The gathering, it must be remembered, is best held in February or March—two of the wildest, roughest, most tempestuous months of the year. This being so, the question of location is of tremendous importance. The 65th Armory in which this year's convention was held, was well nigh perfect—a little small perhaps, but bright, well heated, pleasant for all, yet its situation left something to be desired. The building was too far north. What is wanted is a hall near St. Catherine Street—nearer the centre of the city and the hotels. All attending the Convention must stay at the hotels or their homes. They must go to these for lunch. When the exhibition is in the north as it was this year, this means a long car trip and a good deal of wasted time. A hall nearer the centre of things, therefore, even were it not as good a hall, would yet be better.

WINDOW DRESSING ON NEW PLANE.

The improvement in hardware window dressing has been marked of late years. The cramped window space filled with a miscellaneous collection of incongruous objects has given place to the large and well-lighted windows seen in all up-to-date hardware stores nowadays. Displays can be seen in hardware windows which in point of attractiveness, selling quality and artistic finish are quite the equal of the most elaborate efforts of window dressing experts in the large departmental stores. Hardware window dressing has been set on a new plane.

This truth was evidenced more clearly than ever before in the Christmas window contest conducted by Hardware and Metal. Over twenty contestants entered and the quality of the displays that they submitted was unprecedently high. The originality of design, the artistic qualities and the elaboration of detail shown in the better windows was indeed praiseworthy. The judges, who had a difficult task in selecting the winners, agree that they had never before seen better work.

It is interesting to note that the winners of first place in both contests achieved the same distinction the year before. The members of the editorial staff of Hardware and Metal who acted as judges on that occasion feel that the decision reached by the three judges this year has vindicated them in their awards in the 1910 contest.

The contest was a record breaker in every respect. More interest was shown than in any previous year and the number of contestants was appreciably larger. May the interest continue to grow. Window dressing has become a salient feature of modern merchandising.

A feature of the contest was the interest shown by dealers and clerks in small places. Some highly creditable displays were received from dealers in small villages, where the facilities are not as good and the inducements not as large. It can be accepted as a telling evidence of the all around improvement in merchandising methods which is manifesting itself in the hardware trade.

GIVE THE TRAVELER A CHANCE.

The editorial which appeared in last week's issue, entitled, "Who Pays the Traveler?" has seemingly struck a responsive chord. Words of commendation have been heard on all sides and many have voiced their approval of the sentiments expressed.

A well-known wholesaler writes in to express his endorsation and to add another reason why the retailer should always give the traveler a fair and courteous hearing. He states that merchants located in small centres, frequently lose the opportunity of securing new lines or some useful information through their indifferent reception of traveling salesmen. The dealer in a village or small town does not have the opportunity of watching trade developments as closely as he may desire. The traveler comes in contact with all sorts of people and all conditions and thus acquires a fund of information the benefit of which he is willing to give to the dealer. The dealer, therefore, should regard the traveler as a friend and useful ally.

The point is well taken. It is quite as much in the interests of the merchant as of the traveler that the latter should be accorded a fair chance. Most dealers appreciate this fact, but there are exceptions.

SOME METAL STATISTICS.

The annual book of Metal Statistics published by the "American Metal Market" contains a complete summary of the world's operations in metals during the past year. While it is true that figures are always dry, there is plenty of material in the tables which the volume contains for serious thought. They indicate the trend of the world

industrially and contain a wealth of information for those who follow the metal situation closely.

Among the interesting features is a table which shows the steady and steep increase in the production of copper in the last twenty years. Despite the talk of limitation so frequently heard last year, the estimated figures put the year's production at 885,000 tons—the largest in the world's history.

The ever increasing demand for metal is evidenced by the lead and tin statistics. The world's consumption of lead last year was 1,115,700 fons. In 1902 the total was 889,600. The consumption of tin in the United States last year was 44,300 tons and in 1902 the amount used was 33,900. Even a greater increase is shown in other metals, particularly in spelter. In 1885 the world's production of spelter was 295,480, whereas in 1910 the total production was 797,392. It is impossible as yet to give accurate figures with reference to the total production for 1911, but it is confidently expected that an advance will be found.

It is interesting to note that aluminum has risen from a comparatively unknown metal to one of commonest use in a comparatively short time. The consumption of aluminum in the United States in 1883 was 83 pounds. In 1910 it had grown to 47,734,000 pounds.

The year was marked by price fluctuations. Tin was the most unsettled of all metals. Copper and lead showed unexpected strength near the end of the year.

BUYERS SHOULD USE CAUTION.

The statement is made that there has been a considerable amount of rejected flaxseed offered at a reduced price in the North-West. It is impossible to say whether it has found a market or not, but, in any case, buyers of linseed oil should use caution. Past experience has amply demonstrated that trouble invariably ensues where poor seed is used.

MAIL ORDER HOUSES GAINING.

The menace of the mail order house is growing. The catalogue establishments are continually reaching out, widening their scope and, sad to relate, getting a larger share of the business. It is probably true that most retail dealers realize the seriousness of the situation but they are not fully alive to the necessary methods of meeting this insidious form of opposition.

In a recent issue, a western newspaper gives considerable editorial space to the fact that the operations of the mail order houses are growing more extensive in that district. Twenty mail bags, bulging with spring catalogues, were dumped into the town recently and the contents were distributed throughout the town and district. This is only a repetition of what occurs twice and sometimes thrice a year. The newspaper goes on to do some figuring and estimates that each one of the mail bags contained 100 catalogues. That would mean the distribution of 2,000 catalogues in that neighborhood. Taking the average amount of business brought in as $10 for every catalogue, it figures out that the sum of $20,000 goes semi-annually or tri-annually to the mail order houses—a cash contribution.

The newspaper may be out in the figures thus presented, but the fact remains that the mail order houses are gaining ground, in some sections at least. Every dollar gained in this way is lost by the local merchants.

When everything is considered, the local dealer has many advantages over the catalogue house; only he does not realize the fact and does not use those advantages. The best defence he can put up is to keep his store attractive, his stock up-to-date and his methods businesslike. The catalogue house cannot gain a foothold in sections where the local dealers are right up to the mark.

POINTED EDITORIALS.

Uniformity in advertising is a valuable asset.

* * *

For an initial effort, the exhibition at the Quebec convention was a great success.

* * *

A paint window display now will pave the way for a bigger trade in the spring.

* * *

Fight the mail order house with its own weapons. Advertise.

* * *

The active paint season is not far off. Get ready for it.

* * *

One thing about a really cold winter is that it is pretty sure to be followed by a scorching hot summer.

* * *

The dealer and the painter should work together for the general good of the cause.

* * *

The weather man has not been allied with the merchant this winter. Stormy weather means decreased business.

* * *

Technical phrases are thrown away on the average purchaser of a stove. Make your arguments simple and to the point. One sentence of unvarnished instruction is worth a whole technical treatise.

* * *

Quality and Profit may not be exactly synonyms, but in the retail business they are very close to it. Cut-Price and Bankruptcy are also words which frequently go together.

* * *

The retail dealer is a busy man. So is the traveler. They should mutually respect this fact; the dealer, by giving the traveler a prompt hearing, the traveler by making the interview as brief as he consistently can.

* * *

Great interest is being manifested in the "Complete Course of Sheet Metal Work" now appearing in Hardware and Metal. It is undoubtedly the best series of the kind ever published and will be of incalculable value to tinsmiths and roofers.

Awards in Christmas Window Contest

The Three Judges Have Completed Their Work—The Winning Displays Will be Reproduced in the Annual Spring Number—The Contest Broke all Records.

The Christmas window contest announced by Hardware and Metal last fall created more interest than a similar event has ever aroused in Canada. The response served as a striking evidence of the interest which hardwaremen take in window dressing. Photographs were received from all parts of the Dominion, over twenty contestants in all entering.

The quality of the displays sent in was exceptionally high. Tribute to the good work of the contestants is paid by the three judges selected by Hardware and Metal, who state that without doubt the work was on a distinctly new plane. No more striking testimony to the wonderful improvement effected in hardware window dressing of late years could be paid. More will be said with reference to this matter when the winning displays are reproduced. This will be done in the annual spring special number of Hardware and Metal which will be issued on March 23. It had been intended to defer the publication of the awards until that issue but, in deference to the wishes of those who had entered the contest and were consequently anxious to learn the result, the present announcement is made.

In view of the great interest shown in the contest and the high quality of the displays entered, it was decided to secure as judges three prominent hardwaremen—one in Montreal, one in Toronto and one in Winnipeg. The photographs were first sent to Hector A. Bernier, manager of the hardware store of L. J. A. Surveyer, of Montreal. The next judge to pass upon them was W. J. A. Lytle, manager of the retail department of Aikenhead's Ltd., Toronto. The photos were then sent to Winnipeg, where E. B. Lennox, of the Lennox Hardware Co., passed upon them.

THE WINNERS.

Places Over 5,000.

1—R. H. Thornhill, with P. Hymmen Co., Berlin.

2—A. T. Black, with the Bond Hardware Co., Guelph.

3—Harold Cook, with the Northern Hardware Co., Edmonton.

Places Under 5,000.

1—Peter McNaughton, with Geo. W. Ecclestone, Bracebridge.

2—Blake Phillips, with Sutherland & Stelck, Dauphin, Man.

3—Chas. Byford, with G. A. Binns, Newmarket.

The marks of the three judges were added together and the awards made according to the totals thus reached. It was felt that by leaving the decision to men known to the trade as competent judges the merits of the displays entered would be accurately and fairly judged. The selection of one judge from each of the three centres named was deemed advisable in view of the fact that photographs were received from all parts of the country.

How Judging Was Done.

The judging was carried out on the basis set at the time the contest was announced as follows:

Selling qualities—60.

Attractiveness—30.

Description—10.

The marking was very close in many instances and, when the totals were made up, it was found that the race had been a close one in both contests. The window of P. Hymmen Co., Berlin, which took first prize for places over 5,000, was marked 235 out of a maximum of 300, and that of the Bond Hardware Co. 233. These figures indicate the excellence of the displays, for all three judges were inclined to be severe and they accorded these high marks because they were convinced that they had been fairly merited. Five other contestants in in places over 5,000 were marked over 200. The window of Geo. W. Ecclestone, of Bracebridge, which took first prize for places under 5,000 was marked as high as 241 and that of Sutherland & Stelck, which was placed second, was marked 232.

The prizes in each contest are: First, $5; second, $3; third, $2.

Some Close Contenders.

Many of the other contestants were marked so high that they came close to securing prizes. In accordance with the terms of the contest, the sum of $1.50 will be sent to all who entered without securing prizes, but whose displays are deemed worthy of reproduction in Hardware and Metal. This list is as follows:

T. S. Tait & Sons, Campbellford; D. W. Douglas, Campbellford; McGowan Bros., Uxbridge; The McMurtry Co., St. Thomas; C. Richardson & Son, Harrow; Peterboro Hardware Co.; Kingan Hardware Co., Peterboro; The Fawcett Hardware Co., Tweed; E. A. Whitton, Bracebridge, W. F. Mickus, Preston; McKinley & Northwood, Ottawa.

The Judges.

The three judges selected all have well deserved reputations as window dressers.

Hector A. Bernier, Montreal. W. J. A. Lytle, Toronto. E. B. Lennox, Winnipeg.

Mr. Bernier has won many prizes himself..

After capturing a number of minor prizes Mr. Bernier was awarded first place in a competition held by "Iron Age Hardware" for an article upon the subject, "How to Dress a Hardware Show Window."

A number of years ago Mr. Bernier took the window dressing prize given by Hardware and Metal. He also captured a prize given by the Bissell Carpet Sweeper Company, his window being adjudged the best of all those sent in. Mr. Bernier's advertisement of the Bissell sweeper was also given first place, a $60 prize going to him.

The Dover Asbestos Sad Iron window and advertisement competition was another triumph for this Montrealer. He won first place in both contests, but was only given the one prize.

W. J. A. Lytle was with Whytes Ltd., Collingwood, before taking his present position with Aikenheads Ltd. He has always shown a keen interest in the qestion of advertising and window dressing. During the World's Fair at St. Louis Mr. Lytle paid a visit there for the purpose of studying the window displays and he has also visited Europe, where he studied the methods in vogue carefully.

E. B. Lennox is one of the most progressive young hardwaremen in the West. He has made a success of his business career there and has won a deserved reputation as a clever window dresser.

MANY RETAILERS ATTEND.

(Continued from page 36.)

Dussault, O. Taellefer, J. A. Rochette, O. P. de Montiginy, J. Josselin, J. A. Phaneuf, Z. Bourdeau, Wilfrid Brouillet, A. F. Resol, J. E. Hudon, F. X. Perrault, M. Martaneau, Thos. Dussault, J. P. Gervois, E. Belanger, J. Pesant, O. Fourner, J. H. Hanson, Jas. A. Arcand, A. Rouleau, L. A. Picard, W. A. Boivin, T. O. Ranger, J. C. Benard, J. G. Watson, P. Gooselen, David Deschamps, J. A. Labonte, O. Lemire, J. O. Bouleuce, J. E. Bissonnette, Alex. Gougeon, J. O. Garneau, F. C. Lariviere, J. E. Deslauriers.

A number of retailers also came in from outside places, among these being: W. Boeuful, Sherbrooke; J. L. Demers, Thetford Mines; W. A. Skelton, Hamilton; D. Duford, St. Theodore d' Acton; E. M. Trowern, Toronto; O. Beaudoin, Thetford Mines; Nap. Mercure Neuville, P. Gosselin, Magog; F. Boinet, Quebec; J. A. Champagne, Verdun; Gosselin Paradis, Magog; R. C. Chown, Belleville; John Caslor, Toronto; H. Occomore, Guelph; W. F. Macpherson, Prescott; M. S. Madole, Napanee; P. J. Cote, Quebec; A. Grenier, Quebec; J. D. O. Picard, Jules Verret, Indian Lorette; Jos. Viel, Riviere du Loup; A. E. Michand, Isle Verte; Art. L. Desaulniers, La Perade; Arthur L. Pelletier, Riviere du Loup; Nap Mercure, Neuville; E. J. Turcotte, East Broughton; Alphonse Blais, Thetford Mines; J. Barnet, Quebec; P. E. Beaudoin, Thetford Mines; J. S. Demers, Thetford Mines; Alfred Nand, Deschambault.

Hardware Letter Box

Empire Queen Ranges.

Gleichen Trading Co., Gleichen, Alta. —"Can you tell us who the manufacturers of the Empire Queen ranges are?"

Canadian Heating & Ventilating Co., Owen Sound.

Spring Beds.

Aiken Bros., Allenford, Ont.—"Who are the makers of bed springs and mattresses?"

Ideal Bedding Co., Toronto, and Ham & Holt, Brantford.

Canoe and Tent.

K. Johnson, Kipling, Ont.—"Where can I secure a canoe and a tent?"

Peterborough Canoe Co., Peterboro; Canadian Canoe Co., Peterboro; Raymond Bros., London, are makers of tents.

Keen Kutter Goods.

A Subscriber, Whitby.—"Who are the manufacturers of Keen Kutter hardware?"

Simmons Hardware Co., St. Louis.

Side Cars for Cycles.

Constant Reader, Whitby.— "Are there any manufacturers of side cars for motorcycles in Canada?"

No. Side cars can be obtained, however, from any bicycle jobbing house. Most of the cars used for motorcycles are of English manufacture.

Small Hardware.

J. Moxon & Son, Picton.—"Where can we secure a line of five and ten-cent articles for a five and ten-cent table in a hardware store? Who are makers of the Ohio steam cooker?"

1. Goods of this description can be obtained through your jobber. 2. Toledo Cooker Co., Toledo.

Copper Piping.

Bouthron & Drysdale, Hensall, Ont.—"Where can we obtain copper and brass piping?"

The hardware jobbing houses carry these lines.

Tailors' Stoves.

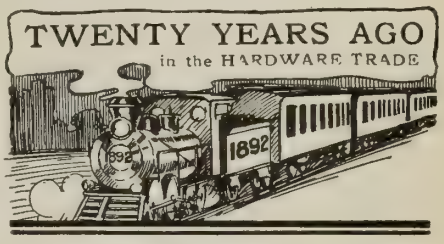
Carnegie Bros., Port Perry.—"Is there a maker of tailors' stoves at Truro, N. S., named J. Albert Lundstrom?"

Can any reader supply this information?

Sliding Ladders.

J. R.Myers, Stratford.—"Who are the manufacturers of sliding store ladders?"

Hamilton Brass Mfg. Co., Hamilton; Richards-Wilcox Mfg. Co., Aurora, Ill.; F. E. Myer & Bro., Ashland, Ohio.



The following items have been taken from the issue of February 27, 1892:

"Home Wall Colors is the name of a line of paints for which Walter H. Cottingham & Co. are the sole Canadian agents."

Editor's Note.—Walter H. Cottingham has since become one of the most prominent figures in America among paint manufacturers. He is now president and general manager of the Sherwin-Williams Co.

* * *

"The Globe File Mfg. Co., situated at Port Hope, Ont., is an industry that is rapidly getting to the front. The company employ about 60 hands in the different departments."

Editor's Note.—The Globe File Mfg. Co. were merged into the Nicholson File Co., who still make the Globe file among other brands.

* * *

"T. J. Trapp & Co., New Westminster, are running an interesting advertisement."

Editor's Note.—The firm of T. J. Trapp & Co. are still among the best known hardwaremen on the Pacific coast.

* * *

Editor's Note.—Our attention is called to an error in the "Twenty Years Ago" column which stated that W. H. Thorne & Co., were successors to Burpee, Thorne & Co. We are informed that, on the dissolution of Clark, Kerr & Thorne, Mr. Kerr formed a partnership with John M. Robertson under the name of Kerr & Robertson, of which Robertson, Foster & Smith are the successors. Burpee, Thorne & Co., went out of business in 1893.

Hardware Store Publicity

Chapter 3.--- Uniformity in Advertising

The most important feature of any advertising campaign is the use of newspaper space. While other schemes can be worked advantageously the newspaper is the most reliable and profitable of all advertising media. It should be regarded as the first consideration and other publicity plans as side issues of varying importance.

Newspaper advertising should not be considered an incidental feature of business. It requires thought, thoroughness and enthusiasm. It should be planned carefully ahead of time. Careless and indifferent handling of advertising work not only means the loss of the money invested but also the loss of the increased business which good advertising would have brought. Read that sentence over again and let the thought sink in.

Drawing the distinction broadly, there are two classes of advertisers. The first is made up of aggressive publicists who have studied their proposition thoroughly and who know as a result what goods to feature at each season of the year, how to feature them and how generally to use the space they have bought so that they will get returns in the shape of bigger business and wider public recognition. In the second class we find the men who write their advertising matter at any odd moment, who do not know what they are going to advertise until they get out their pencils and who treat the subject generally in an off-hand way.

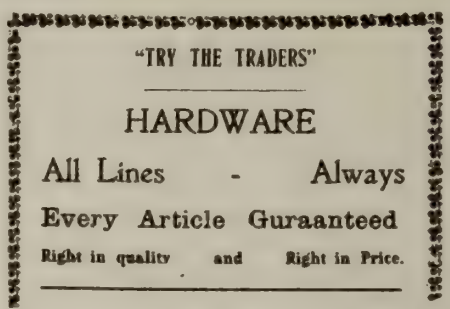
One of the real secrets of successful advertising is to have your campaign planned out ahead of time.

As far as possible, retail hardwaremen should plan out just what they are going to do throughout the whole year. Each advertisement should be a unit in the general plan of campaign.

One of the chief advantages of this system is that a certain uniformity can be maintained in all advertising matter used. There should be certain distinctive features which the public will become familiar with and recognize at a glance. The name plate, the trade mark, the slogan, and even the general form of lay-out can be kept distinctive from all other advertising in the paper. People will come to associate a catch phrase or a distinctive form of heading with Smith's hardware. if Hardwareman Smith uses that phrase or employs that form of heading long enough. This mental association of a certain advertising feature with a certain firm is an asset which every dealer should strive to attain for himself.

In planning out a campaign, therefore, it is well to devise something original which can be maintained right through. Get a catch phrase. A neatly turned sentence, a terse and pointed statement will catch the eye as it skims the pages. Present that same laconic argument day in and day out and people get to know it. They get to believe it. "Try the Traders" is the catch phrase of a western firm. It is a simple form of appeal and, if only used once, might not have particular weight. But used continuously and persistently it begins to acquire weight with remembrance. A person needs some articles of hardware and "tries the Traders." The same firm employ a number of other phrases at the heading of their advertisements. "All lines—always," is one.

"Right in quality; right in price," is another.



A simple appeal used continuously acquires weight.

Other firms use something distinctive at the foot of their advertising matter. Day in and day out Smith & Gaetz, of Red Deer, Alta., make use of the words, "The hardware people." It is not a striking phrase, but to the purchasing public, Smith & Gaetz are "the hardware people." A phrase of that kind sticks.

SMITH & GAETZ

The Hardware People.

A phrase of this kind sticks in the memory.

It is also well to maintain typographical uniformity steadily. See to it that the printer uses the same kind of type in to-morrow's ad. that he used to-day, unless, of course, something peculiarly distinctive is required for the occasion. The form of name plate used by Illsey Bros., of Castor, Alta., is different from that of other firms and for that reason it stands out prominently.

ILLSEY BROS
THE HARDWARE OF QUALITY

This name plate stands out prominently because it is different.

People residing in the districts covered by the Robert Simpson Co. advertising are familiar with the form in which the firm name is invariably presented. It has acquired a distinction all its own. Every dealer can do the same for himself. Arrange for a style which suits and then stick to it.

Uniformity can also be observed in the lay-out of advertising matter. The best newspapers and magazines strive to make their style and make-up so distinctive that people seeing only part of a loose page can tell at once what paper it was torn from. Some of the best known publications have succeeded in this respect to such an extent that the reading public of the continent recognize them at a glance.

The good advertiser should strive for the same effect. A hardware dealer in a Canadian city ran a series of three advertisements on three successive days. The first was cut up into a large number of panels with black borders. The second was made up largely of cuts. The third was devoted to a straight talk set in three-column italics, set off with a single line heading in large light faced type. Each advertisement took up the same subject—a special sale of kitchenware—and each had merit of its own. But taken together, they had only a fraction of the value they might have possessed. Each one of the three was absolutely unlike the other two. Different sized space was used and the firm name was put in different type. Different location in the paper even had been taken.

The Robert **SIMPSON** Company Limited

Everyone in a certain district will recognize this heading at a glance.

Each one of those advertisements had to stand on its own legs, gaining little strength from the others in the series. Something similar, something to connect number three instantly with numbers one and two would have been a great asset.

Continued on page 43.

Veteran Figures in the Hardware Field

No. 9—James Purvis, Sudbury.

Of a judical turn of mind is James Purvis of Sudbury. At the Guelph convention, just closed, he several times mounted the rostrum to set some member right upon a point of law. For instance, when Pres. Madole suggested that the association urge upon the Ontario Provincial secretary the need of some special tax as against the Catalogue houses, Mr. Purvis declared the question to be one for the minister of trade and commerce. Now Mr. Madole contested this point, but no matter who was right the incident shows the judical channels in which Mr. Purvis' mind runs. He has an opinion on every subject, and can enunciate that opinion clearly. No wonder, for Mr. Purvis has taken a keen interest in municipal, provincial, and Federal politics during all the 39 years he has been engaged in the hardware field.

Fads Have Kept Him Young.

Yes it is thirty-nine years since Mr. Purvis started in the hardware business, though to look at him one would not think so. He does not seem as much over fifty, as his years in the trade would imply. But then his hobbies—politics, gardening and fishing—have undoubtedly done much to keep him young.

It was in Barrie, in 1870, that Mr. Purvis started as a store owner. Then he was in partnership with his brother David. For seventeen years they carried along their business; making money and friends, and perhaps a healthy enemy or two, for Mr. Purvis is somewhat of a fighter and quite likely has stirred the ire of a few with whom he has come in contact.

It was while in Barrie that Mr. Purvis entered the field of public service. He doesn't remember himself all the posts he has held, but his friends recall that he was president of the Mechanics' Institute, and served for a number of years as public school trustee.

Sudbury a Garden of Eden.

Moving to Sudbury, 22 years ago Mr. Purvis started business entirely on his own account. Twenty-two years ago Sudbury was not much of a place. Some people will say it is not much of a place now. Let them say so; but not within hearing of Mr. Purvis—not if they are wise. Sudbury, it appears from his statements, is the twentieth century equivalent of the Garden of Eden. To strangers it may seem that the climate there would be a little chilly at seasons for the light clothing affected by those early progenitors, but this may be only an alien opinion.

It is thirty-nine years since Mr. Purvis started in the hardware business, but then his hobbies—politics, gardening and fishing—have undoubtedly done much to keep him young.

Any way Mr. Purvis has lived in Sudbury for twenty-two years, and says he has enjoyed every one of them. His looks add strength to his statement. He is hale and hearty with the robustness that a vigorous climate makes possible.

A Mistake About Sudbury.

By the way the opinion has gone abroad that Sudbury is one of those blasted towns—no bad language that, just a figure of speech to designate that it is necessary to blast to get a foundation for a house. Mr. Purvis denies this impeachment. As has been briefly mentioned above, one of his fads is gardening. Now how could a man garden in a barren, rocky section? The obvious answer is that he counld not; and the obvious conclusion, therefore, is that Sudbury is not altogether barren.

Mr. Purvis takes keen delight out of his garden. He is a practical man and likes profitable ventures, yet he does not take a mercenary view of everything. He does not think with the old Irishman that "the prettiest flower he ever seen is a cauliflower." In his garden—there in the north—are a wide variety of beautiful flowers.

But gardening and politics are not Mr. Purvis' only fads. He is a fisherman. By the way that is another link which connects him with the judiciary. Cleveland in the United States was a fisherman of an inveterate type. Lincoln had the fisherman's story-telling ability. Fishing and the judical point of view undoubtedly go hand in hand.

An Independent Man.

During the 22 years Mr. Purvis has been in the hardware business in Sudbury he has held office on the school board, the municipal council, and the Board of Trade. He was president of the latter body for three years, and took no small part in bringing Sudbury to the front. In these offices Mr. Purvis has been nonpartisan. Indeed in all his politics he takes this attitude. He is a Conservative with a strong list towards independentism; not an independent with a strong list toward conservatism.

But Mr. Purvis has done more than mix in local politics. He has been a joiner of no mean ability. He seems to have seen the good in all the societies, and so to have joined them all. Of late the gardening and the fishing—to say northing of the hardware store— have taken more time, so the societies have been somewhat neglected. But they still find a warm friend in this warm-hearted man.

Veteran With Young Ideas.

By the way, while Mr. Purvis is unquestionably a veteran of the hardware trade he must yet be numbered among the very youngest, if up-to-date views are considered. In his store he is constantly introducing new lines and methods of work. He looks at changing customs without bitterness or fear. Parcels post, he declares, to be something which is bound to come. "Fighting against it," he says, "is fighting against the spirit of the age." There are many who differ with Mr. Purvis on this point, but the statement shows the advanced views of the man.

HARDWARE STORE PROPERTY.

Continued from page 42.

Uniformity need not verge into sameness. People recognize a newspaper by its headlines but that does not make them feel that they know what it contains. A familiar touch brings them to recognize an advertisement but it does not lessen their curiosity as to its contents.

To sum up: Make your advertising so people will know it at first glance. This can be done only by careful preparation in advance.

Complete Course in Sheet Metal Work

By L. W. KOSER—Number 3

Plate No. 4 illustrates different styles of conductor pipe, eave and roof trough, hip and ridges that can be made in any tinsmith shop. The student should carefully draw these details.

We will first develop a square mitre for a molding similar in shape to Fig. 1, plate 5.

Draw the profile Fig. 1, and number each place where there is a bend or brake, as 1, 2, 3, etc.

Below the profile and an inch or so back of it draw the vertical line N-M. This is for the stretchout or girth of Fig. 1, and is called the stretchout line.

Now transfer the different parts of the profile to this line in the following manner: Set one point of the dividers at 1 and the other point at 2 on the profile, and with the dividers thus set transfer the space 1 to 2 to the stretchout line N-M and mark 1-2 as shown. Transfer the space 2 to 3 to the stretchout line, also the spaces 3 to 4 and 4 to 5, and number each space on the stretchout line to correspond to the numbers on the profile.

The line N-M then represents the stretchout or girth of the profile, or in other words, it is the width of the metal necessary to form a molding like Fig. 1.

Now draw lines at right angles to the line N-M from each number on it. These are called measurement lines, and are always at right angles to the stretchout line.

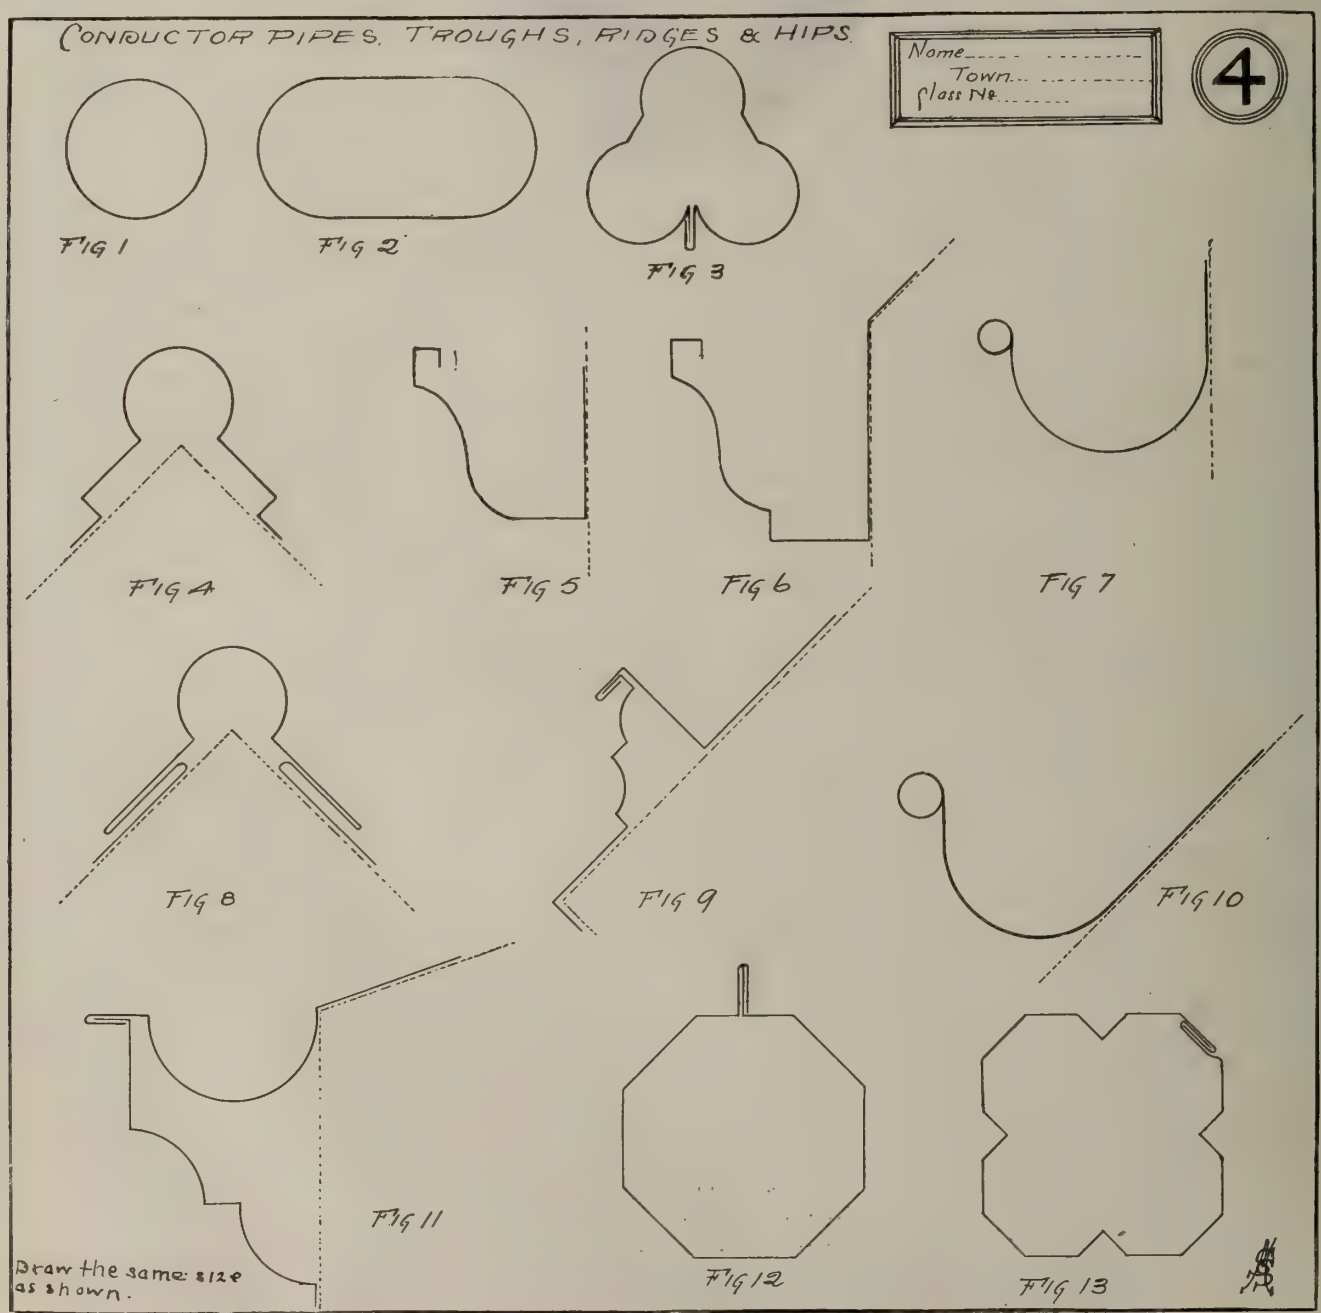
To save confusion we will make another drawing to finish this pattern, but the student can finish it in the one drawing.

It will be noticed that Fig. 3 is the same as Fig. 1 with the addition of more lines.

The line O-P is drawn back of the profile and in line with N-M.

A dotted or light line is carried horizontally from each number on the profile to this line, and marked in some way; for instance, a line is carried from 1 on the profile to the line C-P and is marked A; next a line is carried from 2 and 3 to the line O-P and is marked E. Then a line from 4 and 5 and is marked C.

Now set one point of the dividers at A on the line O-P and the other at 1



on the profile, and transfer this distance to the first measurement line, as 1-A. As the distance from 2 to B is the same as 1 to A, the distance on the No. 2 measurement line will be the same. Now set one point of the dividers at B and the other at 3 and transfer this to the measurement line No. 3. The space 4 to C is the same as 3 to B, so make it the same on the No. 4 measurement line. Now set one point of the dividers at C and the other at 5, and transfer this distance to No. 5 measurement line. Connect the points A, B, E, and C, C, by a line drawn through them and the pattern is developed.

The pattern on the right hand side is for an inside mitre, and the pattern on the left hand side is for an outside mitre.

Cut two outside mitres from paper or metal and form one right and the other left and see that they match together. Also do the same with the inside mitres.

Figs. 5 and 6, problem two shows a patterns developed the same as explained for problem 1, the only difference being in the shape.

Draw Fig. 5. Begin at the top and number the points 1, 2, 3 and 4. Divide the curved part into equal spaces, and number each space. Continue the numbers to the end of the profile.

Lay out the stretchout line N-M and transfer the profile to this line and number to correspond.

Draw the measurement lines from each number.

Draw the back line O-P, and draw a light or dotted line from each number on the profile to this line.

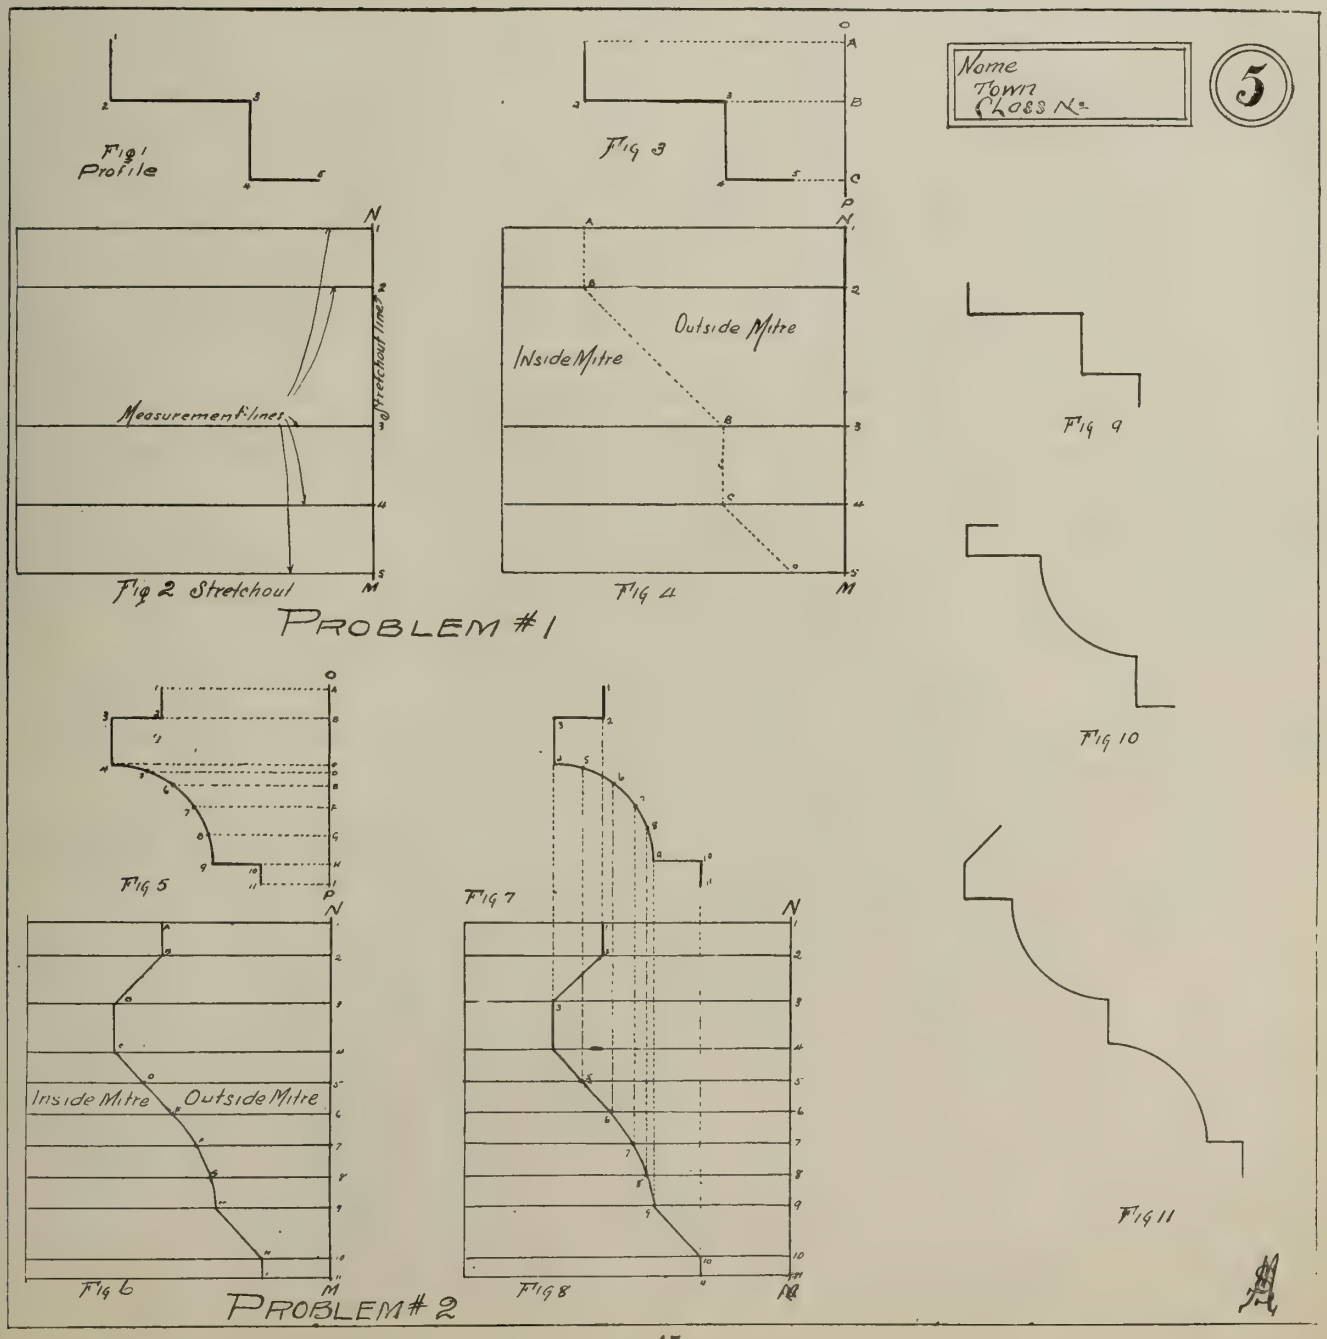
With the dividers transfer the different spaces to the measurement lines having the same numbers.

Connect the different points and the pattern is developed.

Figs. 7 and 8 show the same pattern developed in a different and easier manner. The profile is drawn the same as Fig. 5, and the stretchout the same as Fig. 6, but instead of using the line O-P and the dividers to transfer the spaces to the stretchout line, the T-sqr. is used instead.

This is done in the following manner: Place the T-sqr. parallel to the line N-M and bring it against each number on the profile, and drop a line to the measurement line on the stretchout line having the same number. For instance, with the edge of the T-sqr. placed against 1 and 2 on the profile, connect

(Continued on page 46.)



Progressive Hardware Retailing

Western Firm Deal with the Mail Order Problem, Advancing Some Splendid Arguments—Illsey Bros. are Featuring the Sale of Good Cutlery—Builders' Hardware Featured.

FEATURING CUTLERY.

Castor, Alta.—Illsey Bros. are making a special effort to sell cutlery. They are urging on the public the advisability of having good cutlery. In a recent advertisement they say:

"If your cutlery is poor throw it away and buy new. Buy it where the quality is guaranteed."

Under this caption, they give a strong talk on the merits of the line they are carying, guaranteeing it absolutely.

AFTER FARM TRADE.

Dundurn, Sask.—Under the caption, "Headquarters of the difference between the Real and the Imitation," M. McKenzie & Son, hardware dealers, make an effective advertising appeal for the trade of the farmers of that vicinity. They invite the farmers "whether they buy or not to come in and look over their complete lines." They are advertising a number of cold weather lines.

THE MAIL ORDER PROBLEM.

Red Deer, Alta.—The Day Hardware Co. are advertising stoves and incidentally advancing some very good reasons why people should not buy stoves from the mail order houses. Some of the arguments that they advance are as follows:

"They have your money, you can't be without a stove a month while you are sending it back to get another one, and if it wears out it is never the fault of 'defective material or workmanship,' which their guarantee (?) covers. So when you get right down to the bottom, what are their claims of guarantees but a clever ruse to get your order?

"We are right here where we have to make good what we claim; compare the sizes of our stoves, the weights, and you will find we give you fully as much for your money, to say nothing of seeing what you get, of delivering your stove the day you order it, and saving you freight charges.

"There is a good deal of difference between a guarantee covering "defective material and workmanship' and our guarantee of perfect satisfaction. We are willing to leave the decision to your judgment, but we want you to see our stoves and make the comparison before you buy. It will pay both of us."

The advertising was neatly arranged and illustrated attractively. In another recent advertisement the firm present an exceptionally good talk in favor of "quality" pocket knives. They say:

"The man with a good knife knows that every time he uses it—and there are many every day—it is a source of satisfaction.

"How many times does somebody ask you to borrow your knife? Again, there is a feeling of satisfaction in having a good one.

"A good knife is as convenient and as necessary as a good watch, and there is fully as much satisfaction in carrying one. You woudn't carry a cheap, unreliable watch if you could get a good one for the same money or even for a few cents more.

"Buy your knife on the same basis and you will buy it from us."

SELLING BUILDERS' HARDWARE.

Red Deer, Alta.—The present is a good time to push the sale of builders' hardware. People are planning for the houses and buildings they intend to put up in the spring. They are, therefore, open to propositions on the score of hardware.

Recognizing this fact, Smith & Gaetz, the hardware people, are advertising a line of builders' hardware, which they are carrying. Some goods they are selling from sample or catalogue as their advertising shows. They say:

"It is quite and unobstrusive and is a token of culture and refinement. Now that you may be planning your New House, we want you to come in and see the Catalogue we have to show you.

"Ask to see Mr. Gaetz or Mr. Woodsworth, who will be glad to show you cuts of the various lines and quote you prices on them."

The time is undoubtedly a good one to push the sale of this line for the building season will be opening very shortly now.

ST. JOHN HARDWAREMEN DINE.

St. John, N.B., Feb. 27.—The members of the St. John Hardware Merchants and Manufacturers' Association numbering with their guests about eighty enjoyed a most successful banquet at the Union Club last week, with M. E. Agar making a most capable chairman, and A. M. Rowan in the vice-chair. After an excellent and tempting menu had been fully done justice a round of toasts, speechmaking, musical and literary numbers were carried out. After the toast to the King had been honored in music, the president proposed the toast "Our Association," responded to by John A. McAvity, J. G. Harrison, and S. L. Emerson. "Our City," was proposed by Vice-president Rowan and replied to by Mayor Drink and Ald. McGoldrick. John Keefe proposed the toast to the board of trade, and H. C. Schofield, president of that body, and Herbert B. Schofield made reply. The "Iron and Hardware Manufacturers" was responded to by James Pender, Stanley E. Elkin, T. Malcolm McAvity, John Keefe and C. A. McDonald. The responses to the toasts of "Our Guests" were made by T. H. Bullock, C. B. Allan, A. P. Hazen, F. C. MacNeil, John Neill, of Fredericton, and D. B. Haggie, representing an English hardware house.

Music was furnished by Jones' orchestra, and those contributing to the musical and literary programme besides, were Steve Mathews, Fred C. MacNeil, C. B. Allan, and Gilbert Davidson. The committee in charge of the arrangements for the banquet were John A. McAvity and S. L. Emerson. The affair was pronounced a distinct and enjoyable success by all present.

COURSE IN SHEET METAL WORK.

(Continued from page 45.)

the measurement lines 1 and 2 directly below. Then with the edge of the T-sqr. placed against 3 and 4 on the profile, connect the measurement lines 3 and 4, also draw a line from 2 and 3.

Bring the edge of the T.sqr. against the points 5, 6, 7, 8, 9, 10 and 11 on the profile and cut the measurement lines having the same numbers.

Connect the different points on the measurement lines.

Let the student now draw a square mitre for Figs. 9, 10 and 11 using both of the foregoing methods.

Current News of Hardware Trade

Building New Store.

Hamilton, Ont.—A. J. Wright, James Street, is building a handsome new store. He expects to occupy it by July 1.

Met in Hardware Store.

Mirror, Alta.—A meeting of the local Board of Trade was held in the hardware store of Dentman & Johnson. The question of good roads was taken up.

Secure Agency.

Montreal.—Henderson & Richardson, of this city, have just received the Canadian agency for Francis Greaves & Sons, Sheffield, manufacturers of cheap and medium grades table cutlery, carvers and butcher knives.

Clerks Organize.

Cranbrook, B.C.—The retail clerks have elected officers as follows:—President—F. L. Brown; Vice-president—Wm. Dunstan; Recording Secretary—N. Armstrong; Financial Secretary—S. G. Bassett; Treasurer—F. Pye.

Death of Wm. Darling.

Montreal, Que.—William Darling, 65 years of age, one of the best known hardware men in Montreal, died suddenly at his home, Kelvin Grove, Boyerbourg, Que. He was the son of the late William Darling, founder of the Darling Hardware Company, in St. Sulpice street, many years ago.

Has Assigned.

Montreal.—Upon the demand of Eugene Guay, H. A. Depocas, hardware and iron merchant, of 1984 St. James Street, has assigned. The liabilities, which comprise twenty-four claims, are in the neighborhood of $17,000. Assets comprise stock in trade, fixtures and some Ville Emard realty.

Banquet to Harold Stone.

St. John, N.B.—Harold H. Stone, who has been a valued employee of the firm of W. H. Thorne & Co., Ltd., has resigned and left for Saskatoon where he has accepted a position with the International Harvester Co. Before severing connection with the Thorne employ, he was tendered a banquet by his associates, on whose behalf Charles O. Morris presented to him a handsome gold chain and locket. The banquet was given at Bond's restaurant and an enjoyable time was spent. R. H. Sancton responded to the toast of the firm, and among the clerks who took part in the programme were: Mr. Morris, who presided, J. P. Doherty, Allan Leavitt, R. A. Willett, and R. F. Romley.

Death of A. Munro.

Wroxeter.—The death occurred here after a prolonged illness of eleven months' duration of Alexander Munuro. He was born in Rosshire, Scotland, coming to Canada with his parents and settling in Mornington township, County of Perth. He came to Wroxeter about the year 1892 and entered the hardware buisness with W. A. Rutherford. About eight years ago the partnership was dissolved and Mr. Munro began business on his own account. The deceased took a prominent part in public life. He was reeve several years and occupied a position on the library board for many years. He was also president of the Wroxeter Rural Telephone. The deceased had a well deserved reputation as a debater and was a close student of books.

Fire Losses.

Harrow, Ont.—A fire broke out here which did considerable damage, burning out three stores, one of which was that of Arthur Best, tinsmith. The loss will be heavy.

Toronto, Ont.—A blaze was caused at midnight by defective wires in the basement of 19 Jarvis Street, and the machinery and hardware plant owned by F. J. Schuch, and though an alarm was turned in immediately by the policeman on the beat about $500 damage was done before the fire was brought under control.

Business Changes.

Winnipeg, Man.—D. Coulter is starting a hardware business in this city.

Hartney, Man.—A hardware store is being opened here by George Agnew.

Minnedosa, Man.—J. J. Kirk, tinsmith, of this place, has discontinued business.

Rosenfeld, Man.—J. W. Wiebe, hardware dealer, has sold out his stock to A. Johnston.

Dunrea, Man.—The firm of J. H. Dunlop & Co. has been dissolved and Robert Dunlop will carry on the business.

Hartney, Man.—C. Woodhull, hardware dealer, is removing to Fairford, where he will conduct a hardware business.

Borden, Sask.—A hardware and harness business is being started here by A. H. Wansley.

Lajord, Sask.—H. A. Hanson has taken over the hardware and implement business of E. M. Berg.

Lemberg, Sask.—The firm of Fletcher & Lutz, hardware and implement dealers, has been dissolved and Mr. Lutz will continue the business.

Saskatoon, Sask.—It is stated that Bartholomew & Co., are contemplating the establishment of a branch business at North Battleford in paints, oils and glass.

Vancouver, B.C.—J. A. Simpson has bought the stock of the Grandview Hardware Co.

Toronto, Ont.—J. C. Schmidt has succeeded G. H. Garrett in the hardware business here.

Beaverton, Ont.—Walter King, formerly with Cameron & Cameron has bought out the business of G. Murray, stoves and tinware. Mr. Murray is moving to St. Catharines.

Champion, Alta.—The Baker Hardware Co. have sold out to Moffatt Bros., of Pilot Mound.

Staff Changes.

Oxbow, Sask.—Chas. Hames, who recently returned from a visit with his parents at Proton Station, Ontario, has accepted a position with the Oxbow Hardware Co.

A. E. Dickson has taken a position on the road with W. H. Thorne & Co. He will represent that firm in Nova Scotia.

Beaverton, Ont.—E. Dure, who has been with Cameron & Cameron, has gone to Midland. A. Dobson, formerly with W. Glassford, has taken his place.

Galt, Ont.—C. P. Brown, manager of the McMurtry Hardware Company's store here, left last night for the company's St. Thomas store. Mr. Brown will be away a month.

PERSONAL NOTES.

Works, of Philadelphia, was in Toronto. Works, of Philadelphia, is in Toronto. He went on to Montreal Thursday night.

ENCOURAGING NEWS.

Cleveland, O., Feb. 29.—The Iron Trade Review to-day says: Pittsburg continues to be the most optimistic centre in the iron trade and sends rather encouraging news this week. Many of the Pittsburg mills are well supplied with orders. This is particularly true of plates, and prices on plates and shapes are firmer. The strength of the coke market is also a noteworthy feature. In other sections, however, the tone is not so satisfactory. In the east, particularly, the market drags and prices show a great deal of irregularity. The demand for basic pig iron shows decided improvement. Foundry irons are extremely quiet.

Weekly Market Report --- Metals

PRICE ADVANCES.

The metal market has been featured by advances in the price of copper and antimony. There is a generally active tone to business.

The tie-up on the railroads has resulted in a shortage in some metals, but the situation is not serious.

MONTREAL.

Montreal, Feb. 29.—The inactivity which has characterized the metal market has not shown any material change during the past week. This is the one slack season and anything in the shape of a spurt in business would come as a surprise to the jobbers, for nobody expects very much at this time of the year. There is still somewhat of a scarcity of metals noticed, and all the markets are firm.

A rise is reported in antimony and also in copper.

The recent heavy snowfalls may have the effect of stimulating business to some extent, as transportation will be easier owing to better roads.

A steady volume of business has been done, and is said to be up to the average for the time of year.

Lead.—This market has been very firm during the past week, and the high prices which have been in vogue for some time have been well maintained, and no change is looked for at the present time.

Advance in Copper.

Copper.—As was foretold last week, copper has again gone up in price, and ingot copper is new quoted at $15.50, a further rise of 25 cents per 100 pounds. It is said that there is very little to be had, which is undoubtedly the cause of the rise in price.

Tin is Steady.

Tin.—Tin has been steady during the past week and no change in price has been noted. A fair amount of business has been done, although not out of the ordinary.

Antimony.—A scarcity in antimony has been the cause of a small increase in the price of this metal, which is now quoted at $8.50. A very fair amount of business is reported.

Spelter.—This market has been quite dull during the past week, and shows no outstanding features. Not much business is reported in this line.

Iron.—A steady flow of orders is reported in this metal, but the volume of business reported as having been done is not great. It will be the end of March before any noticeable movement takes place, and then the busy time will commence. Meanwhile jobbers appear to be satisfied with the amount of business done for the time of year.

TORONTO.

Toronto, March 1.—Business is good in metals. The month of February is not usually a brisk month but certainly there has been no room for complaint on the score of February business this year. In addition, there is a great deal of booking for spring being done. The near approach of spring has created more active industrial conditions and metal orders are growing larger.

The tendency in prices is toward firmness. No change is noted except in copper, where a small advance has been made.

Tin.—The usual fluctuations have occurred on the primary markets but locally tin has remained firm. There have been no striking developments in the tin situation, although present indications seem to point to continued firmness. The metal has been very active here. Demand has been heavy and enquiries lead to the belief that this condition will continue right through the winter season. The price has not been changed here.

Lead is Firm.

Lead.—There is a decidedly active movement in lead. Demand is heavy and the price as a result has remained firm. Stocks are light. This same condition is noted in all lines, owing to a large extent to the blockade on the railroads. The shortage in lead has not yet reached serious proportions, however. Now that the weather conditions have improved, there does not seem to be any danger of a serious shortage developing.

An Advance in Copper.

Copper.—A local man sums up the situation in copper by stating that "the demand is immense." There has undoubtedly been a heavy call for this metal and, as stocks are light, an advance of one-quarter of a cent has been declared.

The copper situation the world over seems to be healthy. Consumption has grown sufficiently to warrant the heavy production which weighed on the market during the greater part of last year. Nothing but optimistic references are now heard as to the future of copper.

Spelter.—Stocks in spelter are still light, the railroad blockade having aided materially in bringing about this condition. The price necessarily is firm. Demand has been good during the past week.

Antimony.—There is very little doing in this metal at the present time.

Stocks Very Light.

Plates and Sheets.—The results of the snow blockade have been felt very seriously in respect to plates and sheets. Stocks are quite light and some difficulty is being found in getting fresh supplies. On top of this comes the fact that demand is quite heavy. It is believed, however, that the improvement in weather conditions will relieve the stringency.

Pig Iron Unchanged.

The situation in pig iron is unchanged. Sales continue steady for the time of year. Prices are as follows: Canadian foundry, No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $50.25 for Clarence No. 3, Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

IMPROVEMENT NEEDED.

The Iron Age says: The finished steel trade is still hopeful that the advance of the active season will bring a material increase in business, but has found no evidence of such improvement in the past week. Until pig iron shows more signs of life expectations of wide-spread betterment in the industry are not likely to be realized.

The encouraging feature of the situation is that the mills have kept up so high a rate of operation, with all the handicaps of severe cold and of freight blockades in February. In the Central West and in the Chicago district a 90 per cent. operation is now carried on, but Eastern works still fall considably short of this. Chicago mills are now less able to make quick shipment than those at Pittsburg—a reversal of conditions a few weeks back.

It is understood that considerable rail business has been closed in the past week with Southern and Western lines, but the details of tonnages have not yet been announced. Awards by the Wabash on 2950 cars and by the Western Maryland on 2750 cars are expected soon. The Bessemer & Lake Erie is dividing 1,500 steel hoppers and gondolas and 500 box cars between two Pittsburg interests. The placing of the St. Paul order for 1,000 steel ballast cars is deferred. The New York Central has bought 20 locomotives and the Rock Island 40.

Weekly Market Report --- Hardware

BLOCKADE EFFECTS FELT.

The blockade on the railroad lines has made business in wholesale hardware lines pretty dull during the past week. The shipment of spring goods has been delayed as a result. It is expected, however, that active business will start again with a rush with the more favorable weather now prevailing.

MONTREAL.

Montreal, Feb. 29.—Retailers who have found things a little slow during January and February are now beginning to prepare for the active spring trade. Some have not got to the ordering stage yet—they are merely planning what they will need—but many are already sending in lists of their requirements. The past week has seen a marked improvement in the orders coming to the wholesalers.

As has been suggested it is for spring goods that the largest demand is being felt. For the staples the call is steady, but now the articles which are needed particularly in the spring are being ordered by the early birds.

A great many of these early birds, be it noted, are situated in the west. Local jobbing houses which do a big business out there are receiving orders daily. From the east, too, the call is coming.

Making Ready for Sporting Goods.

Sporting Goods. — Immediate sales have practically ceased to be. A few hockey sticks are still being sold by the retailers. A puck or two is wanted. But skates, sleighs, snowshoes, these and similar lines are through for this season. Now the dealers handling these lines extensively are waiting for another season to come, with its other sporting goods. Wholesalers are getting their catalogues in shape, so that the retailers will have no trouble in selecting the guns, the fishing tackle, the baseball and tennis goods, and the paddles which they want.

There is quietness in this line now, but a month or little more will see a change.

Builders' Hardware.—The volume of business in this line is becoming greater. For locks a good demand is being felt. Hinges and barn door equipment are in demand. The time has about arrived for buying by the small contractors, and the dealers are preparing to meet this demand. At the exhibition just closing they have placed a good number of orders.

Lumbering Supplies Moving.

Lumbering Supplies.—While there has been a good demand for axes, chain, cant hooks and similar lines for the past two or three months, the camps do not seem fully supplied yet. The men must have good tools, and consequently new axes, saws, etc., have to be purchased to replace those which have been blunted by hard work.

All is now in readiness for the spring drive, too. The skids are near the river, and peeveys, cant hooks and boot caulks which will be needed when the ice melts and the logs are rolled into the water are being largely bought.

Spring Goods.—The heavy snowfalls of the past few days do not seem to point toward spring; yet in less than a month by the calendar the warmer season will be here, and there seems to be a general belief that the season will actually open earlier. It has been an unusually hard winter. To make the balance even the warm days should come somewhat sooner than usual.

Spring Specialties Moving.

In British Columbia and the Maritime Provinces dealers are now ordering their spring supplies largely. Wire cloth, spring hinges for screen doors—these and similar lines are being sought daily. In Quebec and Eastern Ontario there is not so good a demand for these lines. Some of the widest awake dealers are placing their orders for lawn mowers, lawn hose, sprinklers and similar lines, but many are leaving this until a later date. All, however, who do business with farmers blessed with a bit of sugar bush, are laying in stocks of sap bits and sap pails. Egg crates, too, are being bought. Easter is coming and the farmers need these contrivances which enable them to carry eggs to market without danger of breakages.

TORONTO.

Toronto, March 1.—The weather has been so extremely unfavorable during the past two weeks that the wholesale hardware houses have suffered. Trade was slack last week, owing to the presence at the Guelph convention of such a large number of travelers and retailers. This week, according to some jobbers, it is duller still.

The railroad blockade has made it practically imposible to ship goods out to some sections and difficult to ship to any section. There has been a pretty general delay as a result. The same state of affairs, though in a lesser degree, is found in the matter of imports. The jobbers are finding it difficult to bring new stocks in and, although the situation is not serious in this respect, there will be general relief when the blockade is lifted.

Orders have fallen off owing largely to the slowness with which the travelers have been covering the ground.

Winter Lines.—The demand for winter goods, such as mitts, blankets, snow-shovels, etc., is now at a standstill. A few orders of the sorting variety have been received, but they have all been of insignificant proportions.

Spring Goods.—March will be a heavy one in all spring lines. Booking for wire netting, screen doors, spades, rakes and like articles has been going on for some weeks now, and under ordinary circumstances, shipments would have been started by this time. It is expected that an active movement will begin at once, and that stocks will be shipped out steadily.

Builders' Hardware.—The demand for builders is growing apace. Orders are coming in freely, and spring requirements are being filled. Local jobbers state that the demand for high-class lines of builders' supplies is more pronounced this year than ever before.

House Cleaning Goods.

Household Goods.—The demand is setting toward what might be termed "house cleaning goods." Orders are being placed for carpet stretchers, step-ladders, vacuum cleaners, etc. There has been a certain amount of booking done for summer lines such as refrigerators, ice chests and ice cream freezers.

Heavy Hardware.—There has been a big demand for some lines of heavy hardware, particularly nails. Booking for March and April delivery has been heavy. Price quotations are:—Discounts on carriage bolts, 3/8 and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Sporting Goods.—There is some call now for spring sporting goods, but the volume is not very large. Skates and hockey supplies are at a complete standstill.

A STOVE SALE.

Mitchell, Ont.—C. J. Werner has been holding a special sale of stoves for the past two weeks. Finding that he had quite a number of heaters and ranges on hand, Mr. Werner decided to clear them out. Accordingly he has been advertising the stoves he has on hand, the list including seven ranges and ten heaters, at reduced rates. It is understood that the sale has been quite successful.

The Story Of a

How Pratt & Lambert T

You! what did you say last Fall when we promised to triple s
You knew we did it with "61" Floor Varnish. But did you s
bad—why other manufacturers are withdrawing their support—
Now, you'll be interested to know just how that decision affected you

50%—100%—150%—200%

That's how Dealers' Sales on Vitralite began climbing.

Profits For Dealers

And more, this advertising, specializing on Vitralite and "61" Floor Varnish, carried the whole Pratt & Lambert Line. A general Pratt & Lambert Varnish Demand was created—not merely a "specialty" demand. Pratt & Lambert "38" Preservative Varnish, Spar Finishing Varnish, Alcolac Liquid Wood Filler, Pratt's Patent Liquid Dryer—and all the rest for every conceivable purpose—they were all selling.

Demand Increases — Dealers Reorder—Factory Works Nights—New Four-Story Building Erected.

Meanwhile Vitralite sales increased like a flood tide—orders poured in—dealers had to reorder—the factory was working nights to keep up with the tremendous demand—a new four-story building was erected for the manufacture of Vitralite.

The Verdict—Quality

A few months ago, Vitralite was not the well-known enamel it is now. True, it was the standard high-grade white enamel of Europe for over a quarter of a century, and was used on such work as the coaches and private trains of Royalty; made and sold by our European associate house, Robt. Ingham Clark & Co. We were satisfied on Vitralite by our own tests. But the final verdict must come from the highest court and jury in the world on the quality of painting materials—the great army of painters. Would Vitralite measure up to that same quality as its brothers in the P. & L. Line, with them? Letters from painters came in—from presidents of painters' associations. "There's never been its equal before," they said, "nothing with such free and easy labor-saving working qualities—that covers so many square feet per gallon—that has such "hiding" properties. Why! one coat of Vitralite over a mahogany board is almost equivalent to two coats of ordinary enamel applied over the same board. And color and durability! Nothing can compare with it for whiteness—will not turn yellow. Clings like a leach—does not crack, craze nor chip off." But what's the use of repeating what all these painters said. *Vitralite had arrived.* It was but another demonstration of P. & L. Quality.

A Promise Made Good

The Three Year Mark Reached in Six Months

And the sales barometer rose—it kept on rising—each day higher and higher. And it came. Surely—steadily. The mark was reached. Vitralite sales were tripled in six months. And all this in the face of adverse conditions.

The Reason Why!

This tremendous success surpassed our every expectation. There was only one reason: Pratt & Lambert advertising has been steady and consistent—not the "flash in the pan" kind to load up the dealers' shelves. Its aim has been to create a logical consistent demand on the dealer for Pratt & Lambert Varnishes. This steady pounding has created an indelible impression on the minds of the people so that now Pratt & Lambert stands for in varnish what *Ivory* stands for in soap, *Victor* in phonographs, *Shredded Wheat* and *Kelloggs* in cereals.

Now This Spring

What are you going to do about it? That Pratt & Lambert advertising can sell varnish for you has been proven by actual accomplishment. This Spring these same methods of campaign will be continued—but on a larger scale—and with conditions with us—with everything favorable for a large paint and varnish trade. Get aboard.

The Campaign in Action

After The Painter For You

Figure out—the big bulk of your varnish trade the painter forms. And every one of these men, the very backbone of your varnish trade, are

Great Campaign

ipled White Enamel Sales

es on Vitralite, The Long-Life White Enamel in three years? "Well, floor varnish is different. Besides, trade conditions are s going to be a bad paint and varnish season. I'll hold off." *profits.*

being reached for you four times this Spring through *Varnish Talks*, the Pratt & Lambert Painters' Magazine, also through a big campaign of advertising in the painters' papers.

Getting the Great Public to Your Store

You know that great Pratt & Lambert general magazine advertising campaign to the general public, a campaign such as no other varnish house in the trade offers—a campaign that reaches every one of those people in your community who can afford to buy varnish—the people who can afford to buy these magazines. *You know that you've only got to let these people know you carry Pratt & Lambert Varnishes to get that trade.*

All Hitched to Your Store

And all this advertising is hitched right to your store through store signs, window trims, etc., booklets and printed matter, framed panels and free newspaper electrotypes—everything to tell that man, Mr. Painter, and that Mrs. Varnish User, where they can buy Pratt & Lambert Varnishes, after they know all about them through all this other advertising.

Right on Your Own Firing Line

And we're going further. Our advertising Department will help you right on your own firing line. Plan local advertising campaigns to help you increase your field of business—write advertisements for you on varnish or on any other line. Letters to painters and property owners—catalogs, booklets, slips and folders, newspaper advertisements—all these are included in this special service—service you'd pay your local advertising men fives and tens of dollars for.

Getting You Those New Building Orders

And what would you say if you knew you had a special department in action for you, to get the architects in your town to specify Pratt & Lambert Varnishes on all the new building work? Yet that's just what the Pratt & Lambert Architectural Department is doing.

Are You Going to Fill the Demand?

You must decide this question now for yourself. If you don't, your competitor surely will. What were your varnish profits last year? How much increase? How much increase do you look forward to this year? Your varnish department is but part of your business. But the success of your business depends on the success of each individual department. That varnish department of yours must be made to pay you more profits. *If you held off last Fall,* when we promised tripled sales in three years, *you lost.*

There is no longer any question of the tremendous sales of Pratt & Lambert Varnishes. That has been conclusively proven by our last great campaign. And right now—on the eve of another great campaign—when the whole varnish selling mechanism for the Pratt & Lambert Dealer is in action—*investigate—find out.* It will put you under no obligations to us. Just use the coupon.

Stoves, Furnaces and Accessories

Avoid Technical Talk to Customers

Store Salesmen Should Not Make Their Explanations Hard to Understand—A Customer appreciates a Simple Demonstration of the Operation of a Store—Something ab out Salesmanship and the Folly of Over Glibness.

One of the best features undoubtedly of the convention of the Ontario Retail Hardware and Stove Dealers Association at Guelph last week was the discussion on "Retail Salesmanship." The discussion on stoves brought out an abundance of practical ideas and aggressive suggestion. Owing to the shortness of the time allotted, it was impossible to take up any one point at any length and a fuller discussion of some of the ideas brought out will be in order.

Referring to the report which appeared in Hardware and Metal, one finds that a very good point was made by E. Holt Gurney on the necessity of avoiding technical language in talking stoves to customers.

> "A salesman must remember to make his demonstration simple," said Mr. Gurney. "It is so easy to talk duplex drafts, etc. Why you might as well talk about the chemistry of steel."

The point is one well worth attention. The knowledge that the average person possesses on the subject of stoves is elementary. People know a draft from a grate but their knowledge does not go much further. At the same time, when the question of a stove purchase comes up, the purchaser wants to understand all about the article he is getting. He knows that he has got to live with that stove for some years and that his comfort will depend largely on his ability to get best results out of it. It is highly unsatisfactory, therefore, when the salesman explains the various points with a mixture of technical words which are unintelligible to the customer. In many cases the customer will go to some other dealer where he can get an ordinary, common sense explanation of how to operate the stove. A command of technical terms is a valuable asset for any salesman but it should be kept under control. Over knowledge linked with verbosity can become quite as injurious as complete ignorance.

Why it is Done.

Indulgence in technical terms is, after all, a natural instinct. When a man obtains a certain knowledge, he likes to parade it. A lecturer on a scientific subject will go off into high flights of technically tinctured rhetoric which dazzle and, perhaps, numb the minds of his hearers. One recalls a certain rogue in the "Vicar of Wakefield" who built up a reputation for deep learning by the systematic use of a memorized jargon, relating to the beginning of the world.

Sometimes it pays. The scientific lecturer impresses and edifies his hearers, because they do not expect to ever have to make use of the information he has retailed. Had the audience gone to hear him for the express purpose of turning the knowledge obtained to practical use, there would have been a clamoring for simpler, more intelligible language. When it comes down to business, people do not appreciate anything that they cannot understand.

The salesman should, therefore, restrain his natural desire to impress the customer with the extent of his knowledge on the subject of stoves and endeavor instead to make the customer himself understand the stove under inspection. That is the short cut to sales making.

Don't Talk too Much.

The question opens up some other important considerations. Many salesmen apparently entertain the belief that glibness is the only quality required in salesmanship. They try to talk their customers into buying, assailing the barricade of their indecision with a fusilade of words. It is possible that, in some cases, such tactics pay, but the cases are rare indeed. A salesman who monopolizes the talk, who hurries the customer along from point to point and impetuously talks down all objections is more likely to antagonize than to convince.

One of the best salesmen the writer has ever known was a merchant who believed in letting the customer do considerable of the talking. "To sell a stove," he explained, "you have to offer something which suits the customer perfectly and you can only find out what suits by letting the customer talk."

His policy was to give his customers every opportunity to explain their views and preferences, reserving his own efforts for closing up the sale. He would describe the stove fully, simply and briefly. At the end he would bring his heavy guns into action, introducing his best arguments, shaping them to meet the views and arguments advanced earlier by the customer. This method of attack he found much better than scattering his arguments and leaving the customer to bring up his objections at the end when the deal should be in shape to close.

No dogmatic rule can be laid down, of course. There are people who have to be railroaded into making a purchase by sheer force of words, just as there are loquacious persons who insist on monopolizing every phase of the negotiations, relegating the salesman to a background of monosyllabic acquiescence. But the salesman should always give the customer a chance to talk, to explain and to ask questions. As was stated by the same speaker at the convention, the purchase of a $50 stove is an event in the lives of most people. They feel that they are about to place an important order with the dealer and that they are deserving of every consideration. If the salesman brushes their objections aside and glibly refuses to give them a chance to express their views, they are inclined to take offence. They feel that he is underrating the importance of their position in the deal.

Avoid Future Trouble.

To hark back to the original subject, it should be pointed out that very frequently the use of technical terms in explaining a stove leads to considerable trouble after the deal is made. Some people will imagine they understand or will not feel like exposing their ignorance by asking for further instructions. As a result, they do not know how to operate the stove properly and they fail to get satisfactory results. This means a trip to the house by a representative of the firm or, worse still, the harboring of a grudge on the part of the customer who thinks that he has been loaded up with an inferior stove.

STOVE MAKERS START.

Montreal, Feb. 28.—The A.B.C. Stove Manufacturing Co. of Battle Creek, Michigan have commenced operations in Maissoneuve. It is understood that the concern are not making stoves for general sale, but merely to supply the Montreal Light, Heat & Power Co., which sells upward of 6,000 gas ranges a year. The work in Maissoneuve is more assembling than manufacturing.

Veteran Figures in the Hardware Field

No. 9—James Purvis, Sudbury.

Of a judical turn of mind is James Purvis of Sudbury. At the Guelph convention, just closed, he several times mounted the rostrum to set some member right upon a point of law. For instance, when Pres. Madole suggested that the association urge upon the Ontario Provincial secretary the need of some special tax as against the Catalogue houses, Mr. Purvis declared the question to be one for the minister of trade and commerce. Now Mr. Madole contested this point, but no matter who was right the incident shows the judical channels in which Mr. Purvis' mind runs. He has an opinion on every subject, and can enunciate that opinion clearly. No wonder, for Mr. Purvis has taken a keen interest in municipal, provincial, and Federal politics during all the 39 years he has been engaged in the hardware field.

Fads Have Kept Him Young.

Yes it is thirty-nine years since Mr. Purvis started in the hardware business, though to look at him one would not think so. He does not seem as much over fifty as his years in the trade would imply. But then his hobbies—politics, gardening and fishing—have undoubtedly done much to keep him young.

It was in Barrie, in 1870, that Mr. Purvis started as a store owner. Then he was in partnership with his brother David. For seventeen years they carried along their business; making money and friends, and perhaps a healthy enemy or two, for Mr. Purvis is somewhat of a fighter and quite likely has stirred the ire of a few with whom he has come in contact.

It was while in Barrie that Mr. Purvis entered the field of public service. He doesn't remember himself all the posts he has held, but his friends recall that he was president of the Mechanics' Institute, and served for a number of years as public school trustee.

Sudbury a Garden of Eden.

Moving to Sudbury, 22 years ago Mr. Purvis started business entirely on his own account. Twenty-two years ago Sudbury was not much of a place. Some people will say it is not much of a place now. Let them say so; but not within hearing of Mr. Purvis—not if they are wise. Sudbury, it appears from his statements, is the twentieth century equivalent of the Garden of Eden. To strangers it may seem that the climate there would be a little chilly at seasons for the light clothing affected by those early progenitors, but this may be only an alien opinion.

It is thirty-nine years since Mr. Purvis started in the hardware business, but then his hobbies—politics, gardening and fishing—have undoubtedly done much to keep him young.

Any way Mr. Purvis has lived in Sudbury for twenty-two years, and says he has enjoyed every one of them. His looks add strength to his statement. He is hale and hearty with the robustness that a vigorous climate makes possible.

A Mistake About Sudbury.

By the way the opinion has gone abroad that Sudbury is one of those blasted towns—no bad language that, just a figure of speech to designate that it is necessary to blast to get a foundation for a house. Mr. Purvis denies this impeachment. As has been briefly mentioned above, one of his fads is gardening. Now how could a man garden in a barren, rocky section? The obvious answer is that he counld not; and the obvious conclusion, therefore, is that Sudbury is not altogether barren.

Mr. Purvis takes keen delight out of his garden. He is a practical man and likes profitable ventures, yet he does not take a mercenary view of everything. He does not think with the old Irishman that "the prettiest flower he ever seen is a cauliflower." In his garden—there in the north—are a wide variety of beautiful flowers.

But gardening and politics are not Mr. Purvis' only fads. He is a fisherman. By the way that is another link which connects him with the judiciary. Cleveland in the United States was a fisherman of an inveterate type. Lincoln had the fisherman's story-telling ability. Fishing and the judical point of view undoubtedly go hand in hand.

An Independent Man.

During the 22 years Mr. Purvis has been in the hardware business in Sudbury he has held office on the school board, the municipal council, and the Board of Trade. He was president of the latter body for three years, and took no small part in bringing Sudbury to the front. In these offices Mr. Purvis has been nonpartisan. Indeed in all his politics he takes this attitude. He is a Conservative with a strong list towards independentism; not an independent with a strong list toward conservatism.

But Mr. Purvis has done more than mix in local politics. He has been a joiner of no mean ability. He seems to have seen the good in all the societies, and so to have joined them all. Of late the gardening and the fishing—to say northing of the hardware store— have taken more time, so the societies have been somewhat neglected. But they still find a warm friend in this warm-hearted man.

Veteran With Young Ideas.

By the way, while Mr. Purvis is unquestionably a veteran of the hardware trade he must yet be numbered among the very youngest, if up-to-date views are considered. In his store he is constantly introducing new lines and methods of work. He looks at changing customs without bitterness or fear. Parcels post, he declares, to be something which is bound to come. "Fighting against it," he says, "is fighting against the spirit of the age." There are many who differ with Mr. Purvis on this point, but the statement shows the advanced views of the man.

HARDWARE STORE PROPERTY.

Continued from page 42.

Uniformity need not verge into sameness. People recognize a newspaper by its headlines but that does not make them feel that they know what it contains. A familiar touch brings them to recognize an advertisement but it does not lessen their curiosity as to its contents.

To sum up: Make your advertising so people will know it at first glance. This can be done only by careful preparation in advance.

Complete Course in Sheet Metal Work

By L. W. KOSER---Number 3

Plate No. 4 illustrates different styles of conductor pipe, eave and roof trough, hip and ridges that can be made in any tinsmith shop. The student should carefully draw these details.

We will first develop a square mitre for a molding similar in shape to Fig. 1, plate 5.

Draw the profile Fig. 1, and number each place where there is a bend or brake, as 1, 2, 3, etc.

Below the profile and an inch or so back of it draw the vertical line N-M. This is for the stretchout or girth of Fig. 1, and is called the stretchout line.

Now transfer the different parts of the profile to this line in the following manner: Set one point of the dividers at 1 and the other point at 2 on the profile, and with the dividers thus set transfer the space 1 to 2 to the stretchout line N-M and mark 1-2 as shown. Transfer the space 2 to 3 to the stretchout line, also the spaces 3 to 4 and 4 to 5, and number each space on the stretchout line to correspond to the numbers on the profile.

The line N-M then represents the stretchout or girth of the profile, or in other words, it is the width of the metal necessary to form a molding like Fig. 1.

Now draw lines at right angles to the line N-M from each number on it. These are called measurement lines, and are always at right angles to the stretchout line.

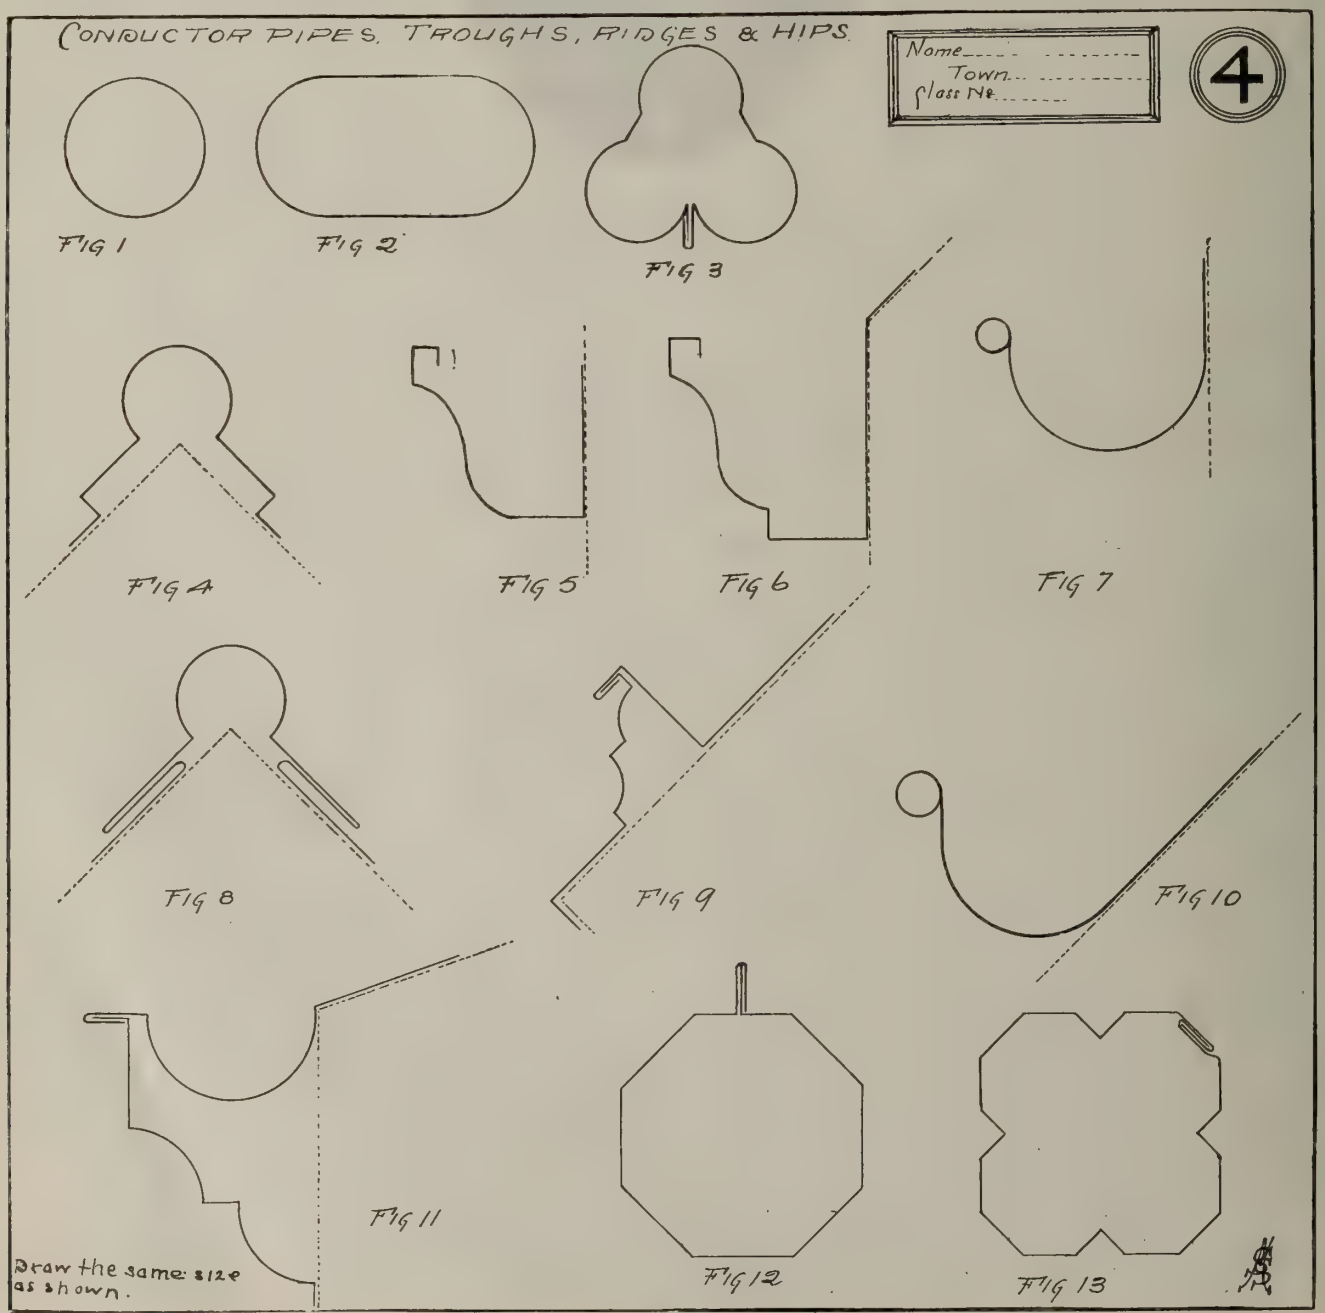
To save confusion we will make another drawing to finish this pattern, but the student can finish it in the one drawing.

It will be noticed that Fig. 3 is the same as Fig. 1 with the addition of more lines.

The line O-P is drawn back of the profile and in line with N-M.

A dotted or light line is carried horizontally from each number on the profile to this line, and marked in some way; for instance, a line is carried from 1 on the profile to the line C-P and is marked A; next a line is carried from 2 and 3 to the line O-P and is marked E. Then a line from 4 and 5 and is marked C.

Now set one point of the dividers at A on the line O-P and the other at 1



on the profile, and transfer this distance to the first measurement line, as 1-A. As the distance from 2 to B is the same as 1 to A, the distance on the No. 2 measurement line will be the same. Now set one point of the dividers at B and the other at 3 and transfer this to the measurement line No. 3. The space 4 to C is the same as 3 to B, so make it the same on the No. 4 measurement line. Now set one point of the dividers at C and the other at 5, and transfer this distance to No. 5 measurement line. Connect the points A, B, E, and C, C, by a line drawn through them and the pattern is developed.

The pattern on the right hand side is for an inside mitre, and the pattern on the left hand side is for an outside mitre.

Cut two outside mitres from paper or metal and form one right and the other left and see that they match together. Also do the same with the inside mitres.

Figs. 5 and 6, problem two shows a patterns developed the same as explained for problem 1, the only difference being in the shape.

Draw Fig. 5. Begin at the top and number the points 1, 2, 3 and 4. Divide the curved part into equal spaces, and number each space. Continue the numbers to the end of the profile.

Lay out the stretchout line N-M and transfer the profile to this line and number to correspond.

Draw the measurement lines from each number.

Draw the back line O-P, and draw a light or dotted line from each number on the profile to this line.

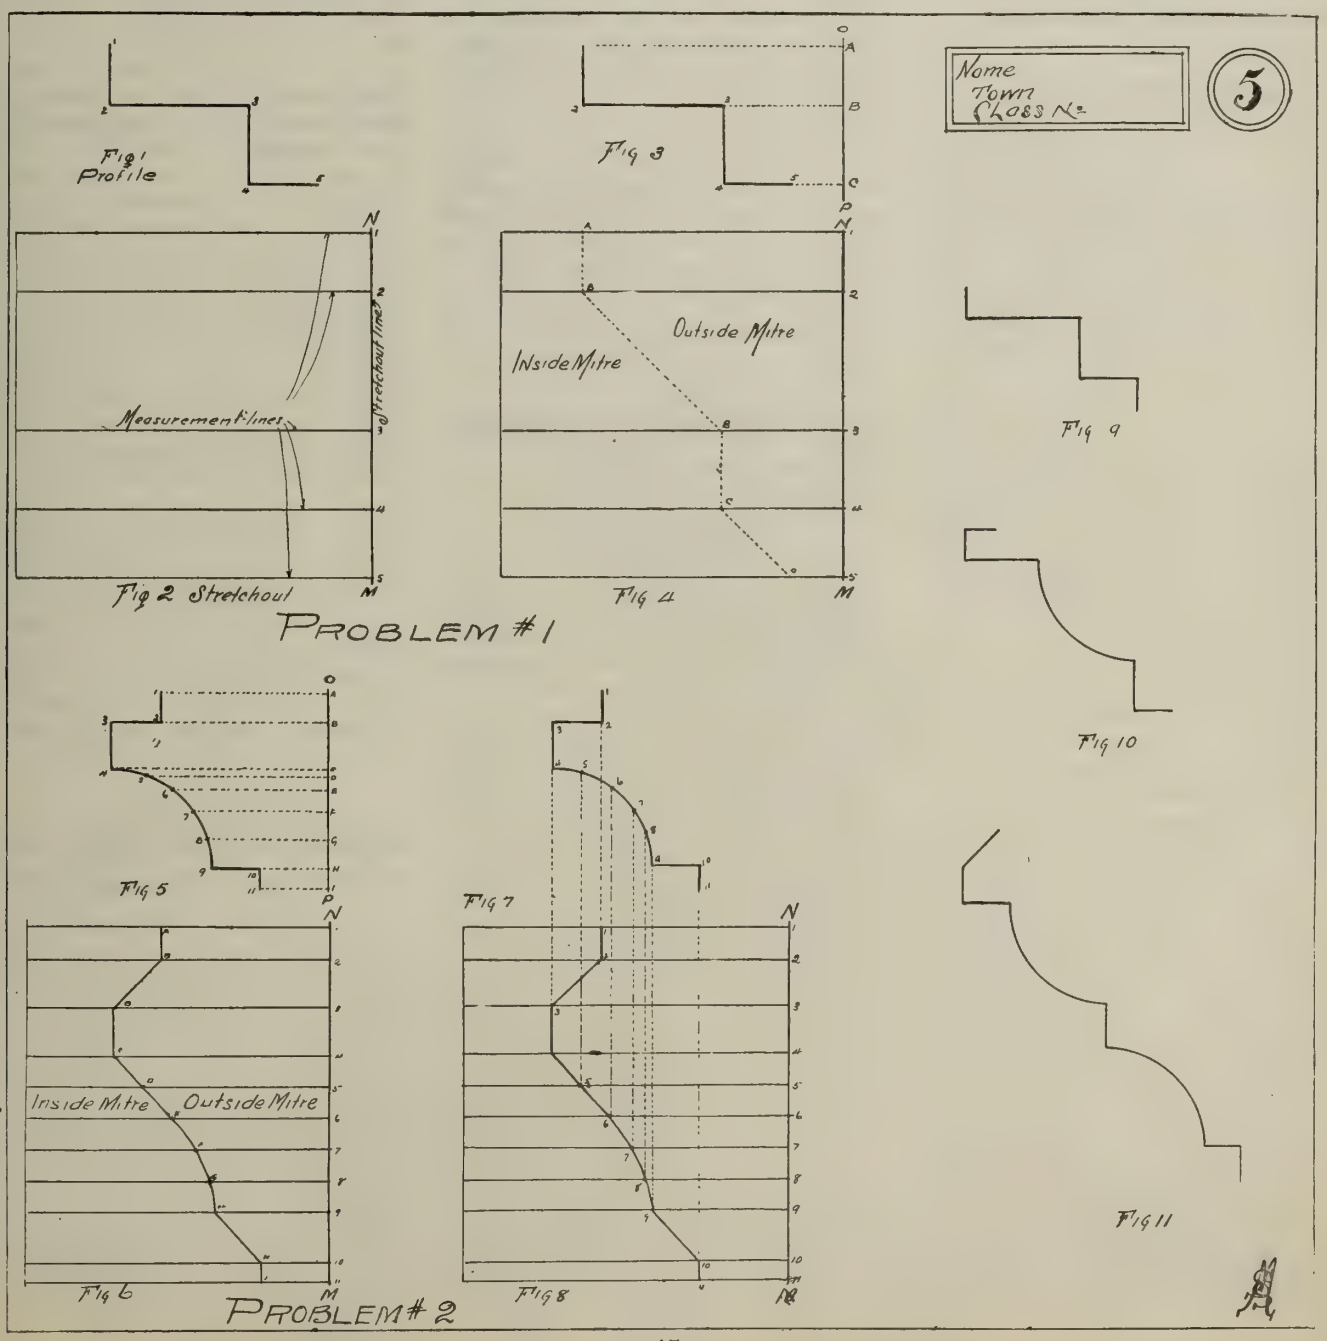
With the dividers transfer the different spaces to the measurement lines having the same numbers.

Connect the different points and the pattern is developed.

Figs. 7 and 8 show the same pattern developed in a different and easier manner. The profile is drawn the same as Fig. 5, and the stretchout the same as Fig. 6, but instead of using the line O-P and the dividers to transfer the spaces to the stretchout line, the T-sqr. is used instead.

This is done in the following manner: Place the T-sqr. parallel to the line N-M and bring it against each number on the profile, and drop a line to the measurement line on the stretchout line having the same number. For instance, with the edge of the T-sqr. placed against 1 and 2 on the profile, connect

(Continued on page 46.)



Progressive Hardware Retailing

Western Firm Deal with the Mail Order Problem, Advancing Some Splendid Arguments—Illsey Bros. are Featuring the Sale of Good Cutlery—Builders' Hardware Featured.

FEATURING CUTLERY.

Castor, Alta.—Illsey Bros. are making a special effort to sell cutlery. They are urging on the public the advisability of having good cutlery. In a recent advertisement they say:

"If your cutlery is poor throw it away and buy new. Buy it where the quality is guaranteed."

Under this caption, they give a strong talk on the merits of the line they are carying, guaranteeing it absolutely.

AFTER FARM TRADE.

Dundurn, Sask.—Under the caption, "Headquarters of the difference between the Real and the Imitation," M. McKenzie & Son, hardware dealers, make an effective advertising appeal for the trade of the farmers of that vicinity. They invite the farmers "whether they buy or not to come in and look over their complete lines." They are advertising a number of cold weather lines.

THE MAIL ORDER PROBLEM.

Red Deer, Alta.—The Day Hardware Co. are advertising stoves and incidentally advancing some very good reasons why people should not buy stoves from the mail order houses. Some of the arguments that they advance are as follows:

"They have your money, you can't be without a stove a month while you are sending it back to get another one, and if it wears out it is never the fault of 'defective material or workmanship,' which their guarantee (?) covers. So when you get right down to the bottom, what are their claims of guarantees but a clever ruse to get your order?

"We are right here where we have to make good what we claim; compare the sizes of our stoves, the weights, and you will find we give you fully as much for your money, to say nothing of seeing what you get, of delivering your stove the day you order it. and saving you freight charges.

"There is a good deal of difference between a guarantee covering "defective material and workmanship' and our guarantee of perfect satisfaction. We are willing to leave the decision to your judgment, but we want you to see our stoves and make the comparison before you buy. It will pay both of us."

The advertising was neatly arranged and illustrated attractively. In another recent advertisement the firm present an exceptionally good talk in favor of "quality" pocket knives. They say:

"The man with a good knife knows that every time he uses it—and there are many every day—it is a source of satisfaction.

"How many times does somebody ask you to borrow your knife? Again, there is a feeling of satisfaction in having a good one.

"A good knife is as convenient and as necessary as a good watch, and there is fully as much satisfaction in carrying one. You woudn't carry a cheap, unreliable watch if you could get a good one for the same money or even for a few cents more.

"Buy your knife on the same basis and you will buy it from us."

SELLING BUILDERS' HARDWARE.

Red Deer, Alta.—The present is a good time to push the sale of builders' hardware. People are planning for the houses and buildings they intend to put up in the spring. They are, therefore, open to propositions on the score of hardware.

Recognizing this fact, Smith & Gaetz, the hardware people, are advertising a line of builders' hardware, which they are carrying. Some goods they are selling from sample or catalogue as their advertising shows. They say:

"It is quite and unobstrusive and is a token of culture and refinement. Now that you may be planning your New House, we want you to come in and see the Catalogue we have to show you.

"Ask to see Mr. Gaetz or Mr. Woodsworth, who will be glad to show you cuts of the various lines and quote you prices on them."

The time is undoubtedly a good one to push the sale of this line for the building season will be opening very shortly now.

ST. JOHN HARDWAREMEN DINE.

St. John, N.B., Feb. 27.—The members of the St. John Hardware Merchants and Manufacturers' Association numbering with their guests about eighty enjoyed a most successful banquet at the Union Club last week, with M. E. Agar making a most capable chairman, and A. M. Rowan in the vice-chair. After an excellent and tempting menu had been fully done justice a round of toasts, speechmaking, musical and literary numbers were carried out. After the toast to the King had been honored in music, the president proposed the toast "Our Association," responded to by John A. McAvity, J. G. Harrison, and S. L. Emerson. "Our City," was proposed by Vice-president Rowan and replied to by Mayor Drink and Ald. McGoldrick. John Keefe proposed the toast to the board of trade, and H. C. Schofield, president of that body, and Herbert B. Schofield made reply. The "Iron and Hardware Manufacturers" was responded to by James Pender, Stanley E. Elkin, T. Malcolm McAvity, John Keefe and C. A. McDonald. The responses to the toasts of "Our Guests" were made by T. H. Bullock, C. B. Allan, A. P. Hazen, F. C. MacNeil, John Neill, of Fredericton, and D. B. Haggie, representing an English hardware house.

Music was furnished by Jones' orchestra, and those contributing to the musical and literary programme besides, were Steve Mathews, Fred C. MacNeil, C. B. Allan, and Gilbert Davidson. The committee in charge of the arrangements for the banquet were John A. McAvity and S. L. Emerson. The affair was pronounced a distinct and enjoyable success by all present.

COURSE IN SHEET METAL WORK.

(Continued from page 45.)

the measurement lines 1 and 2 directly below. Then with the edge of the T-sqr. placed against 3 and 4 on the profile, connect the measurement lines 3 and 4, also draw a line from 2 and 3.

Bring the edge of the T.sqr. against the points 5, 6, 7, 8, 9, 10 and 11 on the profile and cut the measurement lines having the same numbers.

Connect the different points on the measurement lines.

Let the student now draw a square mitre for Figs. 9, 10 and 11 using both of the foregoing methods.

Current News of Hardware Trade

Building New Store.

Hamilton, Ont.—A. J. Wright, James Street, is building a handsome new store. He expects to occupy it by July 1.

Met in Hardware Store.

Mirror, Alta.—A meeting of the local Board of Trade was held in the hardware store of Dentman & Johnson. The question of good roads was taken up.

Secure Agency.

Montreal.—Henderson & Richardson, of this city, have just received the Canadian agency for Francis Greaves & Sons, Sheffield, manufacturers of cheap and medium grades table cutlery, carvers and butcher knives.

Clerks Organize.

Cranbrook, B.C.—The retail clerks have elected officers as follows:—President—F. L. Brown; Vice-president—Wm. Dunstan; Recording Secretary—N. Armstrong; Financial Secretary—S. G. Bassett; Treasurer—F. Pye.

Death of Wm. Darling.

Montreal, Que.—William Darling, 65 years of age, one of the best known hardware men in Montreal, died suddenly at his home, Kelvin Grove, Boyerbourg, Que. He was the son of the late William Darling, founder of the Darling Hardware Company, in St. Sulpice street, many years ago.

Has Assigned.

Montreal.—Upon the demand of Eugene Guay, H. A. Depocas, hardware and iron merchant, of 1984 St. James Street, has assigned. The liabilities, which comprise twenty-four claims, are in the neighborhood of $17,000. Assets comprise stock in trade, fixtures and some Ville Emard realty.

Banquet to Harold Stone.

St. John, N.B.—Harold H. Stone, who has been a valued employee of the firm of W. H. Thorne & Co., Ltd., has resigned and left for Saskatoon where he has accepted a position with the International Harvester Co. Before severing connection with the Thorne employ, he was tendered a banquet by his associates, on whose behalf Charles O. Morris presented to him a handsome gold chain and locket. The banquet was given at Bond's restaurant and an enjoyable time was spent. R. H. Sancton responded to the toast of the firm, and among the clerks who took part in the programme were: Mr. Morris, who presided, J. P. Doherty, Allan Leavitt, R. A. Willett, and R. F. Romley.

Death of A. Munro.

Wroxeter.—The death occurred here after a prolonged illness of eleven months' duration of Alexander Munuro. He was born in Rosshire, Scotland, coming to Canada with his parents and settling in Mornington township, County of Perth. He came to Wroxeter about the year 1892 and entered the hardware buisness with W. A. Rutherford. About eight years ago the partnership was dissolved and Mr. Munro began business on his own account. The deceased took a prominent part in public life. He was reeve several years and occupied a position on the library board for many years. He was also president of the Wroxeter Rural Telephone. The deceased had a well deserved reputation as a debater and was a close student of books.

Fire Losses.

Harrow, Ont.—A fire broke out here which did considerable damage, burning out three stores, one of which was that of Arthur Best, tinsmith. The loss will be heavy.

Toronto, Ont.—A blaze was caused at midnight by defective wires in the basement of 19 Jarvis Street, and the machinery and hardware plant owned by F. J. Schuch, and though an alarm was turned in immediately by the policeman on the beat about $500 damage was done before the fire was brought under control.

Business Changes.

Winnipeg, Man.—D. Coulter is starting a hardware business in this city.

Hartney, Man.—A hardware store is being opened here by George Agnew.

Minnedosa, Man.—J. J. Kirk, tinsmith, of this place, has discontinued business.

Rosenfeld, Man.—J. W. Wiebe, hardware dealer, has sold out his stock to A. Johnston.

Dunrea, Man.—The firm of J. H. Dunlop & Co. has been dissolved and Robert Dunlop will carry on the business.

Hartney, Man.—C. Woodhull, hardware dealer, is removing to Fairford, where he will conduct a hardware business.

Borden, Sask.—A hardware and harness business is being started here by A. H. Wansley.

Lajord, Sask.—H. A. Hanson has taken over the hardware and implement business of E. M. Berg.

Lemberg, Sask.—The firm of Fletcher & Lutz, hardware and implement dealers, has been dissolved and Mr. Lutz will continue the business.

Saskatoon, Sask.—It is stated that Bartholomew & Co., are contemplating the establishment of a branch business at North Battleford in paints, oils and glass.

Vancouver, B.C.—J. A. Simpson has bought the stock of the Grandview Hardware Co.

Toronto, Ont.—J. C. Schmidt has succeeded G. H. Garrett in the hardware business here.

Beaverton, Ont.—Walter King, formerly with Cameron & Cameron has bought out the business of G. Murray, stoves and tinware. Mr. Murray is moving to St. Catharines.

Champion, Alta.—The Baker Hardware Co. have sold out to Moffatt Bros., of Pilot Mound.

Staff Changes.

Oxbow, Sask.—Chas. Hames, who recently returned from a visit with his parents at Proton Station, Ontario, has accepted a position with the Oxbow Hardware Co.

A. E. Dickson has taken a position on the road with W. H. Thorne & Co. He will represent that firm in Nova Scotia.

Beaverton, Ont.—E. Dure, who has been with Cameron & Cameron, has gone to Midland. A. Dobson, formerly with W. Glassford, has taken his place.

Galt, Ont.—C. P. Brown, manager of the McMurtry Hardware Company's store here, left last night for the company's St. Thomas store. Mr. Brown will be away a month.

PERSONAL NOTES.

Works, of Philadelphia, was in Toronto. Works, of Philadelphia, is in Toronto. He went on to Montreal Thursday night.

ENCOURAGING NEWS.

Cleveland, O., Feb. 29.—The Iron Trade Review to-day says: Pittsburg continues to be the most optimistic centre in the iron trade and sends rather encouraging news this week. Many of the Pittsburg mills are well supplied with orders. This is particularly true of plates, and prices on plates and shapes are firmer. The strength of the coke market is also a noteworthy feature. In other sections, however, the tone is not so satisfactory. In the east, particularly, the market drags and prices show a great deal of irregularity. The demand for basic pig iron shows decided improvement. Foundry irons are extremely quiet.

Weekly Market Report --- Metals

PRICE ADVANCES.

The metal market has been featured by advances in the price of copper and antimony. There is a generally active tone to business.

The tie-up on the railroads has resulted in a shortage in some metals, but the situation is not serious.

MONTREAL.

Montreal, Feb. 29.—The inactivity which has characterized the metal market has not shown any material change during the past week. This is the one slack season and anything in the shape of a spurt in business would come as a surprise to the jobbers, for nobody expects very much at this time of the year. There is still somewhat of a scarcity of metals noticed, and all the markets are firm.

A rise is reported in antimony and also in copper.

The recent heavy snowfalls may have the effect of stimulating business to some extent, as transportation will be easier owing to better roads.

A steady volume of business has been done, and is said to be up to the average for the time of year.

Lead.—This market has been very firm during the past week, and the high prices which have been in vogue for some time have been well maintained, and no change is looked for at the present time.

Advance in Copper.

Copper.—As was foretold last week, copper has again gone up in price, and ingot copper is new quoted at $15.50, a further rise of 25 cents per 100 pounds. It is said that there is very little to be had, which is undoubtedly the cause of the rise in price.

Tin is Steady.

Tin.—Tin has been steady during the past week and no change in price has been noted. A fair amount of business has been done, although not out of the ordinary.

Antimony.—A scarcity in antimony has been the cause of a small increase in the price of this metal, which is now quoted at $8.50. A very fair amount of business is reported.

Spelter.—This market has been quite dull during the past week, and shows no outstanding features. Not much business is reported in this line.

Iron.—A steady flow of orders is reported in this metal, but the volume of business reported as having been done is not great. It will be the end of March before any noticeable movement takes place, and then the busy time will commence. Meanwhile jobbers appear to be satisfied with the amount of business done for the time of year.

TORONTO.

Toronto, March 1.—Business is good in metals. The month of February is not usually a brisk month but certainly there has been no room for complaint on the score of February business this year. In addition, there is a great deal of booking for spring being done. The near approach of spring has created more active industrial conditions and metal orders are growing larger.

The tendency in prices is toward firmness. No change is noted except in copper, where a small advance has been made.

Tin.—The usual fluctuations have occurred on the primary markets but locally tin has remained firm. There have been no striking developments in the tin situation, although present indications seem to point to continued firmness. The metal has been very active here. Demand has been heavy and enquiries lead to the belief that this condition will continue right through the winter season. The price has not been changed here.

Lead is Firm.

Lead.—There is a decidedly active movement in lead. Demand is heavy and the price as a result has remained firm. Stocks are light. This same condition is noted in all lines, owing to a large extent to the blockade on the railroads. The shortage in lead has not yet reached serious proportions, however. Now that the weather conditions have improved, there does not seem to be any danger of a serious shortage developing.

An Advance in Copper.

Copper.—A local man sums up the situation in copper by stating that "the demand is immense." There has undoubtedly been a heavy call for this metal and, as stocks are light, an advance of one-quarter of a cent has been declared.

The copper situation the world over seems to be healthy. Consumption has grown sufficiently to warrant the heavy production which weighed on the market during the greater part of last year. Nothing but optimistic references are now heard as to the future of copper.

Spelter.—Stocks in spelter are still light, the railroad blockade having aided materially in bringing about this condition. The price necessarily is firm. Demand has been good during the past week.

Antimony.—There is very little doing in this metal at the present time.

Stocks Very Light.

Plates and Sheets.—The results of the snow blockade have been felt very seriously in respect to plates and sheets. Stocks are quite light and some difficulty is being found in getting fresh supplies. On top of this comes the fact that demand is quite heavy. It is believed, however, that the improvement in weather conditions will relieve the stringency.

Pig Iron Unchanged.

The situation in pig iron is unchanged. Sales continue steady for the time of year. Prices are as follows: Canadian foundry, No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $50.25 for Clarence No. 3, Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

IMPROVEMENT NEEDED.

The Iron Age says: The finished steel trade is still hopeful that the advance of the active season will bring a material increase in business, but has found no evidence of such improvement in the past week. Until pig iron shows more signs of life expectations of wide-spread betterment in the industry are not likely to be realized.

The encouraging feature of the situation is that the mills have kept up so high a rate of operation, with all the handicaps of severe cold and of freight blockades in February. In the Central West and in the Chicago district a 90 per cent. operation is now carried on, but Eastern works still fall considably short of this. Chicago mills are now less able to make quick shipment than those at Pittsburg—a reversal of conditions a few weeks back.

It is understood that considerable rail business has been closed in the past week with Southern and Western lines, but the details of tonnages have not yet been announced. Awards by the Wabash on 2950 cars and by the Western Maryland on 2750 cars are expected soon. The Bessemer & Lake Erie is dividing 1,500 steel hoppers and gondolas and 500 box cars between two Pittsburg interests. The placing of the St. Paul order for 1,000 steel ballast cars is deferred. The New York Central has bought 20 locomotives and the Rock Island 40.

Weekly Market Report --- Hardware

BLOCKADE EFFECTS FELT.

The blockade on the railroad lines has made business in wholesale hardware lines pretty dull during the past week. The shipment of spring goods has been delayed as a result. It is expected, however, that active business will start again with a rush with the more favorable weather now prevailing.

MONTREAL.

Montreal, Feb. 29.—Retailers who have found things a little slow during January and February are now beginning to prepare for the active spring trade. Some have not got to the ordering stage yet—they are merely planning what they will need—but many are already sending in lists of their requirements. The past week has seen a marked improvement in the orders coming to the wholesalers.

As has been suggested it is for spring goods that the largest demand is being felt. For the staples the call is steady, but now the articles which are needed particularly in the spring are being ordered by the early birds.

A great many of these early birds, be it noted, are situated in the west. Local jobbing houses which do a big business out there are receiving orders daily. From the east, too, the call is coming.

Making Ready for Sporting Goods.

Sporting Goods. — Immediate sales have practically ceased to be. A few hockey sticks are still being sold by the retailers. A puck or two is wanted. But skates, sleighs, snowshoes, these and similar lines are through for this season. Now the dealers handling these lines extensively are waiting for another season to come, with its other sporting goods. Wholesalers are getting their catalogues in shape, so that the retailers will have no trouble in selecting the guns, the fishing tackle, the baseball and tennis goods, and the paddles which they want.

There is quietness in this line now, but a month or little more will see a change.

Builders' Hardware.—The volume of business in this line is becoming greater. For locks a good demand is being felt. Hinges and barn door equipment are in demand. The time has about arrived for buying by the small contractors, and the dealers are preparing to meet this demand. At the exhibition just closing they have placed a good number of orders.

Lumbering Supplies Moving.

Lumbering Supplies.—While there has been a good demand for axes, chain, cant hooks and similar lines for the past two or three months, the camps do not seem fully supplied yet. The men must have good tools, and consequently new axes, saws, etc., have to be purchased to replace those which have been blunted by hard work.

All is now in readiness for the spring drive, too. The skids are near the river, and peeveys, cant hooks and boot caulks which will be needed when the ice melts and the logs are rolled into the water are being largely bought.

Spring Goods.—The heavy snowfalls of the past few days do not seem to point toward spring; yet in less than a month by the calendar the warmer season will be here, and there seems to be a general belief that the season will actually open earlier. It has been an unusually hard winter. To make the balance even the warm days should come somewhat sooner than usual.

Spring Specialties Moving.

In British Columbia and the Maritime Provinces dealers are now ordering their spring supplies largely. Wire cloth, spring hinges for screen doors—these and similar lines are being sought daily. In Quebec and Eastern Ontario there is not so good a demand for these lines. Some of the widest awake dealers are placing their orders for lawn mowers, lawn hose, sprinklers and similar lines, but many are leaving this until a later date. All, however, who do business with farmers blessed with a bit of sugar bush, are laying in stocks of sap bits and sap pails. Egg crates, too, are being bought. Easter is coming and the farmers need these contrivances which enable them to carry eggs to market without danger of breakages.

TORONTO.

Toronto, March 1.—The weather has been so extremely unfavorable during the past two weeks that the wholesale hardware houses have suffered. Trade was slack last week, owing to the presence at the Guelph convention of such a large number of travelers and retailers. This week, according to some jobbers, it is duller still.

The railroad blockade has made it practically imposible to ship goods out to some sections and difficult to ship to any section. There has been a pretty general delay as a result. The same state of affairs, though in a lesser degree, is found in the matter of imports. The jobbers are finding it difficult to bring new stocks in and, although the situation is not serious in this respect, there will be general relief when the blockade is lifted.

Orders have fallen off owing largely to the slowness with which the travelers have been covering the ground.

Winter Lines.—The demand for winter goods, such as mitts, blankets, snow-shovels, etc., is now at a standstill. A few orders of the sorting variety have been received, but they have all been of insignificant proportions.

Spring Goods.—March will be a heavy one in all spring lines. Booking for wire netting, screen doors, spades, rakes and like articles has been going on for some weeks now, and under ordinary circumstances, shipments would have been started by this time. It is expected that an active movement will begin at once, and that stocks will be shipped out steadily.

Builders' Hardware.—The demand for builders is growing apace. Orders are coming in freely, and spring requirements are being filled. Local jobbers state that the demand for high-class lines of builders' supplies is more pronounced this year than ever before.

House Cleaning Goods.

Household Goods.—The demand is setting toward what might be termed "house cleaning goods." Orders are being placed for carpet stretchers, step-ladders, vacuum cleaners, etc. There has been a certain amount of booking done for summer lines such as refrigerators, ice chests and ice cream freezers.

Heavy Hardware.—There has been a big demand for some lines of heavy hardware, particularly nails. Booking for March and April delivery has been heavy. Price quotations are:—Discounts on carriage bolts, 3/8 and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Sporting Goods.—There is some call now for spring sporting goods, but the volume is not very large. Skates and hockey supplies are at a complete standstill.

A STOVE SALE.

Mitchell, Ont.—C. J. Werner has been holding a special sale of stoves for the past two weeks. Finding that he had quite a number of heaters and ranges on hand, Mr. Werner decided to clear them out. Accordingly he has been advertising the stoves he has on hand, the list including seven ranges and ten heaters, at reduced rates. It is understood that the sale has been quite successful.

The Story Of a

How Pratt & Lambert Tr

You! what did you say last Fall when we promised to triple s You knew we did it with "61" Floor Varnish. But did you sa bad—why other manufacturers are withdrawing their support— *Now, you'll be interested to know just how that decision affected your*

50%—100%—150%—200%

That's how Dealers' Sales on Vitralite began climbing.

Profits For Dealers

And more, this advertising, specializing on Vitralite and "61" Floor Varnish, carried the whole Pratt & Lambert Line. A general Pratt & Lambert Varnish Demand was created—not merely a "specialty" demand. Pratt & Lambert "38" Preservative Varnish, Spar Finishing Varnish, Alcolac Liquid Wood Filler, Pratt's Patent Liquid Dryer—and all the rest for every conceivable purpose—they were all selling.

Demand Increases — Dealers Reorder—Factory Works Nights—New Four-Story Building Erected.

Meanwhile Vitralite sales increased like a flood tide—orders poured in—dealers had to reorder—the factory was working nights to keep up with the tremendous demand—a new four-story building was erected for the manufacture of Vitralite.

The Verdict—Quality

A few months ago, Vitralite was not the well-known enamel it is now. True, it was the standard high-grade white enamel of Europe for over a quarter of a century, and was used on such work as the coaches and private trains of Royalty; made and sold by our European associate house, Robt. Ingham Clark & Co. We were satisfied on Vitralite by our own tests. But the final verdict must come from the highest court and jury in the world on the quality of painting materials—the great army of painters. Would Vitralite measure up to that same quality as its brothers in the P. & L. Line, with them? Letters from painters came in—from presidents of painters' associations. "There's never been its equal before," they said, "nothing with such free and easy labor-saving working qualities—that covers so many square feet per gallon—that has such "hiding" properties. Why! one coat of Vitralite over a mahogany board is almost equivalent to two coats of ordinary enamel applied over the same board. And color and durability! Nothing can compare with it for whiteness—will not turn yellow. Clings like a leach—does not crack, craze nor chip off." But what's the use of repeating what all these painters said. *Vitralite had arrived.* It was but another demonstration of P. & L. Quality.

A Promise Made Good

The Three Year Mark Reached in Six Months

And the sales barometer rose—it kept on rising—each day higher and higher. And it came. Surely—steadily. The mark was reached. Vitralite sales were tripled in six months. And all this in the face of adverse conditions.

The Reason Why!

This tremendous success surpassed our every expectation. There was only one reason: Pratt & Lambert advertising has been steady and consistent—not the "flash in the pan" kind to load up the dealers' shelves. Its aim has been to create a logical consistent demand on the dealer for Pratt & Lambert Varnishes. This steady pounding has created an indelible impression on the minds of the people so that now Pratt & Lambert stands for in varnish what *Ivory* stands for in soap, *Victor* in phonographs, *Shredded Wheat* and *Kelloggs* in cereals.

Now This Spring

What are you going to do about it? That Pratt & Lambert advertising can sell varnish for you has been proven by actual accomplishment. This Spring these same methods of campaign will be continued—but on a larger scale—and with conditions with us—with everything favorable for a large paint and varnish trade. Get aboard.

The Campaign in Action

After The Painter For You

Figure out—the big bulk of your varnish trade the painter forms. And every one of these men, the very backbone of your varnish trade, are

Great Campaign

ipled White Enamel Sales

es on Vitralite, The Long-Life White Enamel in three years? "Well, floor varnish is different. Besides, trade conditions are s going to be a bad paint and varnish season. I'll hold off." *rofits.*

being reached for you four times this Spring through *Varnish Talks*, the Pratt & Lambert Painters' Magazine, also through a big campaign of advertising in the painters' papers.

Getting the Great Public to Your Store

You know that great Pratt & Lambert general magazine advertising campaign to the general public, a campaign such as no other varnish house in the trade offers—a campaign that reaches every one of those people in your community who can afford to buy varnish—the people who can afford to buy these magazines. *You know that you've only got to let these people know you carry Pratt & Lambert Varnishes to get that trade.*

All Hitched to Your Store

And all this advertising is hitched right to your store through store signs, window trims, etc., booklets and printed matter, framed panels and free newspaper electrotypes—everything to tell that man, Mr. Painter, and that Mrs. Varnish User, where they can buy Pratt & Lambert Varnishes, after they know all about them through all this other advertising.

Right on Your Own Firing Line

And we're going further. Our advertising Department will help you right on your own firing line. Plan local advertising campaigns to help you increase your field of business—write advertisements for you on varnish or on any other line. Letters to painters and property owners—catalogs, booklets, slips and folders, newspaper advertisements—all these are included in this special service—service you'd pay your local advertising men fives and tens of dollars for.

Getting You Those New Building Orders

And what would you say if you knew you had a special department in action for you, to get the architects in your town to specify Pratt & Lambert Varnishes on all the new building work? Yet that's just what the Pratt & Lambert Architectural Department is doing.

Are You Going to Fill the Demand?

You must decide this question now for yourself. If you don't, your competitor surely will. What were your varnish profits last year? How much increase? How much increase do you look forward to this year? Your varnish department is but part of your business. But the success of your business depends on the success of each individual department. That varnish department of yours must be made to pay you more profits. *If you held off last Fall,* when we promised tripled sales in three years, *you lost.*

There is no longer any question of the tremendous sales of Pratt & Lambert Varnishes. That has been conclusively proven by our last great campaign. And right now—on the eve of another great campaign—when the whole varnish selling mechanism for the Pratt & Lambert Dealer is in action—*investigate—find out.* It will put you under no obligations to us. Just use the coupon.

Avoid Technical Talk to Customers

Store Salesmen Should Not Make Their Explanations Hard to Understand—A Customer appreciates a Simple Demonstration of the Operation of a Store—Something ab out Salesmanship and the Folly of Over Glibness.

One of the best features undoubtedly of the convention of the Ontario Retail Hardware and Stove Dealers Association at Guelph last week was the discussion on "Retail Salesmanship." The discussion on stoves brought out an abundance of practical ideas and aggressive suggestion. Owing to the shortness of the time allotted, it was impossible to take up any one point at any length and a fuller discussion of some of the ideas brought out will be in order.

Referring to the report which appeared in Hardware and Metal, one finds that a very good point was made by E. Holt Gurney on the necessity of avoiding technical language in talking stoves to customers.

> "A salesman must remember to make his demonstration simple," said Mr. Gurney. "It is so easy to talk duplex drafts, etc. Why you might as well talk about the chemistry of steel."

The point is one well worth attention. The knowledge that the average person possesses on the subject of stoves is elementary. People know a draft from a grate but their knowledge does not go much further. At the same time, when the question of a stove purchase comes up, the purchaser wants to understand all about the article he is getting. He knows that he has got to live with that stove for some years and that his comfort will depend largely on his ability to get best results out of it. It is highly unsatisfactory, therefore, when the salesman explains the various points with a mixture of technical words which are unintelligible to the customer. In many cases the customer will go to some other dealer where he can get an ordinary, common sense explanation of how to operate the stove. A command of technical terms is a valuable asset for any salesman but it should be kept under control. Over knowledge linked with verbosity can become quite as injurious as complete ignorance.

Why it is Done.

Indulgence in technical terms is, after all, a natural instinct. When a man obtains a certain knowledge, he likes to parade it. A lecturer on a scientific subject will go off into high flights of technically tinctured rhetoric which dazzle and, perhaps, numb the minds of his hearers. One recalls a certain rogue in the "Vicar of Wakefield" who built up a reputation for deep learning by the systematic use of a memorized jargon, relating to the beginning of the world.

Sometimes it pays. The scientific lecturer impresses and edifies his hearers, because they do not expect to ever have to make use of the information he has retailed. Had the audience gone to hear him for the express purpose of turning the knowledge obtained to practical use, there would have been a clamoring for simpler, more intelligible language. When it comes down to business, people do not appreciate anything that they cannot understand.

The salesman should, therefore, restrain his natural desire to impress the customer with the extent of his knowledge on the subject of stoves and endeavor instead to make the customer himself understand the stove under inspection. That is the short cut to sales making.

Don't Talk too Much.

The question opens up some other important considerations. Many salesmen apparently entertain the belief that glibness is the only quality required in salesmanship. They try to talk their customers into buying, assailing the barricade of their indecision with a fusilade of words. It is possible that, in some cases, such tactics pay, but the cases are rare indeed. A salesman who monopolizes the talk, who hurries the customer along from point to point and impetuously talks down all objections is more likely to antagonize than to convince.

One of the best salesmen the writer has ever known was a merchant who believed in letting the customer do considerable of the talking. "To sell a stove," he explained, "you have to offer something which suits the customer perfectly and you can only find out what suits by letting the customer talk."

His policy was to give his customers every opportunity to explain their views and preferences, reserving his own efforts for closing up the sale. He would describe the stove fully, simply and briefly. At the end he would bring his heavy guns into action, introducing his best arguments, shaping them to meet the views and arguments advanced earlier by the customer. This method of attack he found much better than scattering his arguments and leaving the customer to bring up his objections at the end when the deal should be in shape to close.

No dogmatic rule can be laid down, of course. There are people who have to be railroaded into making a purchase by sheer force of words, just as there are loquacious persons who insist on monopolizing every phase of the negotiations, relegating the salesman to a background of monosyllabic acquiescence. But the salesman should always give the customer a chance to talk, to explain and to ask questions. As was stated by the same speaker at the convention, the purchase of a $50 stove is an event in the lives of most people. They feel that they are about to place an important order with the dealer and that they are deserving of every consideration. If the salesman brushes their objections aside and glibly refuses to give them a chance to express their views, they are inclined to take offence. They feel that he is underrating the importance of their position in the deal.

Avoid Future Trouble.

To hark back to the original subject, it should be pointed out that very frequently the use of technical terms in explaining a stove leads to considerable trouble after the deal is made. Some people will imagine they understand or will not feel like exposing their ignorance by asking for further instructions. As a result, they do not know how to operate the stove properly and they fail to get satisfactory results. This means a trip to the house by a representative of the firm or, worse still, the harboring of a grudge on the part of the customer who thinks that he has been loaded up with an inferior stove.

STOVE MAKERS START.

Montreal, Feb. 28.—The A.B.C. Stove Manufacturing Co. of Battle Creek, Michigan have commenced operations in Maissoneuve. It is understood that the concern are not making stoves for general sale, but merely to supply the Montreal Light, Heat & Power Co., which sells upward of 6,000 gas ranges a year. The work in Maissoneuve is more assembling than manufacturing.

Weekly Market Reports---Stoves

LARGE WESTERN ORDERS.

There is an awakened activity in stoves. Large orders are being received from Western points and the manufacturers as a result have been kept busy.

Gas stoves are being booked for delivery in March so that shipments will start very shortly now.

MONTREAL.

Montreal, Feb. 29.—Though ranges are exceedingly quiet for the time being; and though there is not a great deal of activity in furnaces; manufacturers of stoves and accessories report a satisfactory condition of affairs. Ordering of spring lines has been going along well. There are some dealers who seem unable to make up their minds what they will want until the customers begin making their wants known, but many have put in their requisitions in good time. The result of this is that the manufacturers are finding themselves in a good position now. They have got their early shipments off, and are ready to pay prompt attention to orders coming in immediately.

Keen Fight Expected.

Everything seems to point toward a keen fight for the gas range business here this year. The Montreal Light, Heat & Power Co., has contracted with a United States firm to supply them with the 6,000 odd stoves they need. This takes business away from those firms which supplied the M.L.H. & P. Co. last year. Naturally this has not brought universal pleasure, and it is already stated that the concerns which have lost a part of the Power Co.'s business will make a determined effort to make up by securing more business in other fields.

Credit is reported good. Many in placing their spring order are taking advantage of the cash discount. Other accounts are being settled satisfactorily. There are some slow dealers—soms men who keep putting off and putting off, but the majority appear able and ready to pay promptly.

Ranges and Heaters Quiet.

Ranges, Heaters and Furnaces.—As yet the dealers have not started to order largely for spring. Many have a few models left over from the fall. These they expect to use for the very early trade, so that they will not be placing their large spring orders for a month or more. Heaters have been moving fairly until the last few days. From now all will be quiet until spring, when a fair sale of the cheaper lines may be expected, as then those who are starting early for their summer homes will be buying.

Gas Stoves.—As has been hinted, indications are that there will be keen competition in this line during the coming spring and summer. Some of the local manufacturers feel that their field has been invaded. They, therefore, are preparing to fight hard for business. That they are meeting some success in their efforts is evident, for during the past week several hundred gas ranges have been sold.

Gas Stoves Needed.

The retail demand for these gas stoves has not grown very large as yet, but it is only a question of a week or two now until the heavy call commences. Many new houses have to be equipped with these ranges as yet.

Kitchen Furnishings.—Though copper has advanced still higher, and though there has not been any drop in the price of tin, no higher rate has been struck for kitchenware. A few lines have been advanced, but generally the prices remain at the figures which have obtained for some months.

For milk cans and sap buckets the call has been heavy. Yet from a study of the sales made last year the manufacturers see that the real demand has only commenced. They expect a great rush for this class of goods within the next few weeks.

"I do not think," said one manufacturer," that we will be able to fill all the orders promptly. But we will do the best we can. It will be a case of first come first served."

TORONTO.

Toronto, March 1.—The situation has shown a very considerable stimulation of interest during the past few weeks. Stoves are starting to move out for the spring trade. While business in Ontario is not yet particularly heavy, large shipments are being sent from Ontario points to the West.

There is a very healthy demand from Western points, in fact. One firm have made a shipment of seven carloads for Edmonton alone. Stove manufacturers state that they are sending out practically all that they can make and the Western demand is largely responsible. Some orders are being placed in Ontario but, even in these cases the dealers require the goods to supply customers who are leaving for the west.

Gas Stoves.—The feature of the stove market here is the heavy booking being done for gas stoves. Shipments will start in real earnest early in March; it is possible that some shipping would have been done by this time had not the unfavorable conditions precluded this. Manufacturers state that the large booking done points to a heavy spring trade in gas stoves.

Ranges.—The range trade has picked up considerably. Most of the orders coming from the West are for ranges and this has kept the manufacturers busy.

Heaters.—There is not a great deal doing in heaters. Some orders for delivery in late summer have been placed but orders for immediate shipment are few and far between. Oil stoves are still selling but the demand here is also slumping off. A few sorting demands only are being met.

Dairy Supplies.—The demand is not quite as heavy for trimmings but the finished articles are now moving well.

Kitchen Sundries.—There is a first-class call for all lines. Enamelware is selling in large bulk. Tinware is reported brisk.

Shipments Delayed.

The effect of the storm has been felt in all lines. The railroads have not been able to handle the goods and shipments have been tied up as a result. Freight is now starting to move, however.

THE MERGER ONCE MORE.

Montreal, Feb. 29.—Talk of a merger of the local wholesale hardware houses is still in the air. Apparently, a wealthy American has made an offer for the various establishments. Little is being said about this, but apparently the offer is being considered. The head of one of the concerns, however, expressed his opinion that this attempt to merge the houses will fall through, as did the effort made in the fall. The task is a big one, and the men vitally interested will not move until they have proof positive that the negotiations have reached a sound basis.

EXPLOSIVE CO. PLANT BURNED.

Wallaceburg, Ont.—The Dominion Carlite Explosive Company's plant here was almost completely destroyed by fire. The loss and cause are unknown.

Weekly Western Market Report

Goods are Now Being Shipped Out in Large Bulk—Stoves are Selling for the Spring Trade—The Spring Rush in Paints is on.

Winnipeg, Feb. 29.—With the arrival of milder weather spring shipments have been going out in regular order and the rush may be said to have started. Travelers are all out and very satisfactory orders are being received with the result that the trade accomplished so far this year shows a great advance over this period last year. Freight conditions are decidedly better and satisfaction is being given at the present time by the railroads. Of course a certain amount of delay is still being encountered but this is due in the majority of cases to the conditions prevailing in winter.

The market this week shows little change as far as prices are concerned but the tone is decidedly stronger and healthy. All spring lines are moving and many late orders are being rushed forward as quickly as possible, especially lines which are needed by the farmers for spring work. All indications at the present time point to an early spring and as a result the majority of the hardware merchants are preparing for it.

Stoves Selling Well.

In this line cooking stoves are going out with a rush as well as all general lines. The prospects for spring and summer trading is decidedly good and a large number of orders have already been booked ahead by travelers for cooking ranges. Several car-loads from Eastern factories have been passing through Winnipeg for Western distributing points during the week and as far as could be learnt they were devoted almost exclusively to the carrying of stoves. The demand in the city for gas ranges is just starting and it is expected that this will increase as the spring and summer approaches. All other lines such as enamel and tinware and all description of shelf goods are also moving out to city as well as country points. Several new hardware and tinsmiths' shops are opening up in the city as well as country points and as a result many of the large wholesale firms have been busy stocking these The tone of the entire market may be said to be decidedly healthy and inclinations point towards advances rather than declines. Orders in general lines show a great advance over the corresponding period last year. Quotation in general lines remain as follows:

Winnipeg Hardware Quotations.

Axe Handles.—Oval and octagon, s.g. hickory, $3.50 ; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½ ; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts, 77½.

Bar Iron—Bar iron, $2.50 ; Swedish iron, $4.25 ; sleigh shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs., $8.50 ; Jessop, $15.

Blocks—Steel, 50 per cent ; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg ; $2.35 Fort William.

Copper.—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire 3 inch gage, 24c, to 20 inch gage 29c.

Crowbars—4½c. per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87 ; 26 gauge, $4 18 ; pressed standing seamed roofing, 28, painted, $2.84 ; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3 65 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40 ; 8-inch, $4.65.

Clevices—7½c. per lb.

Enamelware—Canada, 50 ; Imperial, 60 ; Premier, 50 ; Colonial, 60 ; white, 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80 ; 18, $3.85; 20, $3.90; 22 and 24, $4 ; 6, $4.20 ; 28, $4.60 ; 30 gauge or 10¾ oz., $4.80 ; Queen's Head, 20, $4 ; 24, $4.20 ; 26, $4.60 ; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.25 ; ½ in., $4.05 ; ¾ in., $5.00 ; 1 in., $7.20 ; 1¼ in., $9.80 ; 1½ in., $11.80 ; 2 in., $15.30.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90 ; No. 2, and larger, $4.65 ; snowshoes, No. 0 to No. 1, $5.15 ; No. 2 and larger, $4.90 ; steel No. 0 to 1, $5.35 ; No. 2 :and larger, $5.10 ; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30 ; 4, $3.80 ; 5, $2.75 ; 6 $3.30 ; 7, $3 05 ; 8, $2.85 ; 9, $2.75 ; 10 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $8.75 ; grass, $1.70.

Iron Washers—Full box, 40 per cent., smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15 ; ¼ in., $2.30 ; ⅜ in., $2.35 ; ½ in., $3.15 ; ¾ in., $3.80 ; 1 in.,$5.45 ;1¼ in., $7.45 ; 1½ in., $8.95 ; 2 in., $11.55 ; 2½ in., $18.40 ; 3 in., $24.15 ; 3½ in., $32.25, 4 in., $36.75; 4½ in., $42.50 ; 5 in., $47.50 ; 6 in., $61.50 ; 7 in., $95.50 ; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6 ; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7 coppered, $9 ; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope.—Sisal, 8½c; Pure Manilla 10¾c; British Manilla, 8½c; Lath yard, 9¼c.

Spring Rush in Paints.

The spring rush in these lnes may be said to be at its height and shipments are being forwarded daily to Western points. The demand has been constant for all lines of mixed paints, varnishes, stains, dry color, brushes, etc., and a healthy tone is prevailing. Turpentine and linseed oil are also in great demand but remain unchanged from previous quotations. The former is now selling at 80c in bbls., and 85c in quantities less than bbl. lots, with an extra advance for packages. Raw linseed oil is still quoted at $1.05; while boiled is sold at $1.08 with the usual advance of 5c for smaller quantities. It is expected that orders in these lines will show a large increase over last year as present prospects point to an enormous increase in the amount of building ' that will be carried on throughout the West this year. From large as well as small towns increased building permits are being reported and a healthy trade can be expected.

With the rush in paints, etc., a decline in window glass and putty is noticed as very little of these are being used at the present time. Lead is also quet but it is expected to increase in demand shortly.

Methods of Retailing Paints and Varnishes

Preliminary Work For Spring Trade

Measures Should be Taken at the Present Time to Stimulate the Spring Demand—Good Results Obtained by a Window Display.

Paint requires skillful handling if the best of results are desired. The dealer who lets his paint stock sell itself may, if he carries a good make and is located in a thriving place, sell quite a little at the busy seasons. It is certain, however, that his trade during the duller periods and particularly during the winter will be light.

"I haven't sold ten dollars' worth of stuff in my paint department since the first of the year," was the complaint voiced by an Eastern Ontario dealer the other day. After glancing over his store, the reason for this lack of business was obvious. The paint department was hidden out of sight at the back of the store. To catch a glimpse of it, one had to skirt a miscellaneous collection of lawn mowers, washing machines and kegs of nails which barred the back end of the establishment and peer around a rack hung with mitts. The paint on the shelves consisted of the odd lines of stock left over from the fall trade. Dust had taken possession of every nook and cranny. The only wonder was that he had sold as much as he had.

In contrast to this deplorable method, there are many hardwaremen who get just as much business during the winter months as it is possible to get. They push paints for all they are worth, keeping the stock to the front in the store, using paint window displays and not neglecting to talk paints when the opportunity presents itself. They find it profitable labor, for trade generally during the mid-winter months is dull. Anything calculated to help along the daily sales is well worth trying.

The accompanying illustration is of a paint window display in the store of the Vokes Hardware Co., Queen street east, Toronto. It was put in during the week of February 19 by Gordon McKinley, who has charge of the window dressing work. The display has many exceptionally good features.

Despite the fact that the weather during the week was rough and stormy, this display brought direct results. The sales in the paint department picked up and, although the improvement could not be termed large, it was noticeable nevertheless.

The best results of a paint window display at this time of year are more likely to be felt later on. "People may not buy paint now," explained Mr. Funston, the manager of the retail department, "but they notice the display and it has its effect later on in the season when they finally make their purchase. It quite frequently happens that a man will decide where he is going to buy his paint some weeks, even months, before he intends to buy."

This point is well worth bearing in mind. It may seem futile to deck out a window with an assortment of paint when the snow lies deep on the ground

February paint window display in the stors of the Vokes Hardware Co., Queen Street, Toronto.

and winter winds preclude all possibility of outside painting being done. It is true, however, that quite a few of the men who drop in to buy paint when the spring comes will have noticed the displays in the store window some months before and been influenced thereby. There is no reason why a display in February or March should not create a certain amount of immediate business; but the chief result obtained will be in the impetus given to the spring trade which opens later.

Every dealer who desires to do a large spring trade in paint should begin to prepare for it not later than the first of March. Several window displays should be arranged before the opening of the spring season. This method will not only attract attention to the store as the headquarters for paint, but will also have the effect of inducing early buying.

TWO PROMOTIONS AT A. RAMSAY & SONS.

Montreal, Feb. 28.—Arthur D. Brown, for eighteen years with the firm of A. Ramsay & Son, which is now celebrating the seventieth anniversary of its formation, has recently been appointed sales manager; while W. A. Ramsay, lately representing the firm in British Columbia, has been brought back to Montreal to assume the duties of warehouse and factory manager.

Arthur D. Brown for eighteen years with A. Ramsay & Son, now appointed sales manager.

Practically all the time Mr. Brown has been with this old house he has worked on the road. He has sold paint from Halifax to Vancouver, from the start having made a financial success of traveling. Mr. Brown's reliability and his genial manner have made him popular with all with whom he has had dealings; and they will be glad to hear not only of his appointment to this important post, but also to learn that he will still visit them from time to time. Mr. Brown, on account of his executive ability and intimate knowledge of the field, should prove an exceedingly valuable man to his firm. He will reside in Montreal.

W. A. Ramsay, who is taking over the management of the warehouse and factory has been with the firm nine years, having passed through all branches of the work from the very bottom. He returns to Montreal from Vancouver.

The Dealer and Painter Should Co-operate

It is not wise to attempt to ignore the painter, although some dealers endeavor to do this. The painter has it in his power to "knock" any brand of paint, just as effectually as he can "boost" it if he so desires. He can either do the local dealer a great deal of good or an equal amount of harm.

If the paint dealer does not do anything to keep the painters in town in line, he will lose a great deal of business. Householders who contemplate painting, very frequently go to the painter first. It is then morally certain that the advice of the painter as to the kind of paint to be used will be accepted. The owner of the house concludes that the painter knows his business and that his advice is likely to be good. He, therefore, lets the painter pick what brand of paint he prefers and lets it go at that. What chance has the dealer who has never gone to the trouble of getting into touch with the master painters?

This occurs very frequently. For that reason, the dealer must work with the painter as closely as he can. A certain amount of reciprocity will redound to the advantage of both.

Applying the Paint.

The writer has heard some dealers declare that they endeavor to sell paint direct to the house owner, the latter undertaking to do the work himself. This is not altogether a wise position to assume. The average man's knowledge of paint is purely superficial. He cannot do the work as well as a regular painter would. He may make some very serious error. It very frequently happens, when an amateur handles the brush, that the results are not all that had been expected. Who does he blame? Himself? Not at all. He blames the paint, of course. Unwilling to concede that he himself did not know enough about the work to insure good results, he concludes that it was poor paint. If the work had been done by a painter the results would have been better and there would not have been the trouble which is bound to ensue in the other case.

Touching on this point, the Paint, Oil and Drug Review says:

"The dealer who encourages 'I painted my own house' kind, is doing a great harm to the line he represents. Don't forget your interests and the maker's are identical—you are one. If you encourage the wrong side of the trade you are responsible to the manufacturer for the complaint. Remember his paint that is in no way at fault is being blamed for something you did, and could have been obviated had you encouraged a painter doing the work.

"There are plenty of good, honest and intelligent painters. Get one to make a working agreement with you. It will benefit you as well as the goods you handle, and the customer will not only be saved money, but their property will be benefited."

PAINT BOOKLETS.

The January number of "The Little Blue Flag," published by Lowe Bros., is called a "School of Salesmanship" number. It contains a report of the convention of the Lowe Brothers' staff at Dayton, Ohio, and gives a number of addresses delivered before that gathering, all dealing with the important subject of paint salesmanship. Prof. W. D. Scott gave a lengthy address on "Influencing Men in Business," showing the potent force of habit in securing that influence. Advertising Director Shuey gave an outline of the selling help campaign to be inaugurated this year.

"A Message from Minerva," is the title of an unique booklet issued by the Pinchin-Johnson Co., Toronto. The cover represents the firm trade as a star from which a stream of light radiates. The booklet contains mention of the full line of Minerva paints manufactured by the company.

CORBIN CLUB BANQUET.

Hartford, Conn.—The sixth annual banquet of the P. F. Corbin Club was held here on Feb. 15. There was a large attendance. M. H. Norton, president of the club, was in the chair and, after full justice had been done to the splendid menu provided, a number of speeches were made by prominent members of the firm and the club.

Free Help for Every Decorator

Our new service department will help you plan the interior and exterior painting and decoration of any house or of a part. In place of a small job, you can get a big one, well planned and done. Remember the

S for every decorator or dealer to get him good business.

M-L MAPLE LEAF

Every decorative problem properly answered for best results.

DECORATIVE AID DEPARTMENT

M. L. PAINT is best-lasting exterior paint, improved during 20 years of careful tests. The kind that helps your business when you sell it. Ready to use. FLOORGLAZE, a flint-hard glass-like and beautiful floor finish that applies easily, stands wear, resists scratches. Best interior floor finish.

is at your free service. Just send us your problem. We give you exactly the right shades and line of goods to use. We give you suggestions. Give areas and we tell exactly how much paint you need, or varnish, or flat wall color. Stencil suggestions, too. Get booklet.

ELASTILITE, an indoor or outdoor varnish that is applied easily and perfectly. You can guarantee it. It gives every satisfaction. A beautiful finish. M. L. FLAT WALL, an easy-to-clean wall paint for plaster, burlap or wood, in beautiful interior shades. Sanitary, clean and adapted to stenciling.

Samples of the above finishes on request. The Decorative Aid Dept. supplies suggestions, estimates and stencil designs (stencils also at low cost) to any decorator, painter or dealer who wants to give his customers the best and most modern service. Freely at the service of the entire retail trade. Send your problems.

IMPERIAL VARNISH & COLOR COMPANY, LIMITED

108 Princess St., WINNIPEG 6-24 Morse St., TORONTO 365 Water St., VANCOUVER

INVESTMENT vs. EXPENSE

There's as much difference in paint results as there is in advertising results.

For a consumer to use good paint—"High Standard" Paint is an investment and not an expense. It protects, beautifies, and gives such lasting satisfaction that it is really cheaper to paint than not to paint.

To promote paint sales for the dealer in the Lowe Brothers' way of advertising, is an investment and not an expense. It is no experiment with us—we know beforehand what the results will be just as we know beforehand what the results will be in the use of "High Standard" Paints.

We know—that's the powerful reason behind our success—the difference we want to show progressive dealers in territory not already taken up.

Are you willing to be shown?

Lowe Brothers LIMITED

TORONTO, DAYTON, NEW YORK, BOSTON, CHICAGO, KANSAS CITY.

Weekly Market Report --- Paints

AN ACTIVE TONE.

Reports are to the effect that activity dominates the paint situation. Conditions have not been exactly favorable but business is proceeding apace nevertheless.

Most lines are firm in price but in Toronto linseed oil has dropped 2 cents and turpentine 1 cent. Spring booking is brisk.

MONTREAL.

Montreal, Feb. 29.—With snow piled high on the streets preparations for the spring sale of paint are yet going rapidly ahead. Retailers in all parts of the country are ready. Stock taking is over. The merchants know what they have on hand. They know what they sold last year; and with these two facts to go upon they have little difficulty in determining upon their early order.

There was a time when the early demand for paint was small, when merchants bought only enough to assure them of a supply to meet the very early trade. But this time has passed. Now the first order is a large one. The merchants are not afraid of having stock left on their hands. More and more paint is coming to be a commodity which sells the year round—at some seasons much better than others it is true, still never dead.

A Banner Year in Prospect.

This year the early ordering has been exceptionally large. "I think," said one sales manager, "that this is going to be a banner year. We are getting bigger orders than ever before." It certainly seems that the retailers are expecting a big demand.

White Lead.—Orders for this line have remained large. Quantities are always sold about housecleaning seasons. There seems no reason to doubt the continuance of this demand. Indeed retailers are now laying in a supply which will enable them to meet a heavy call.

Some Fluctuations.

Linseed Oil.—Still the market is somewhat unsettled. A report comes in that cars are scarce and that flax seed can not be brought forward. As a result prices tend to rise. A day later the word is that crops are being moved. and there is a tendency downward. So it goes. But the fluctuation is of minor importance and prices remain at about 92 for raw and 95 for boiled oil.

Putty.—Always in demand at the spring of the year, this material is now being large bought. Building operations are undoubtedly going to be large. This will mean large orders from the contractors. Boats are to be caulked at this season, too. There is another cause for large ordering. The manufacturers have none too heavy stocks on hand. All winter the demand has kept up. They have not been able to get as far ahead as usual. Probably they will be able to fill all orders, but it will be the early bird who is sure of his supply.

Some Records Broken.

Mixed Paints.—It is in this line that the greatest activity is shown. "We took the biggest order we have ever had from a retail store, this week," remarked one manufacturer, "an order for $9,000 worth of paint. We established another record, too—seven car loads shipped in five days. Oh, I can't see anything for it but a banner year."

Other manufacturers report similarly auspicious openings of the season. They are working hard for business, but they are getting it.

Glass.—Indications are that this material will be scarce for a little time. Stocks are none too large. Until navigation opens there will be a tendency to conserve the supply. After that prices may rise.

TORONTO.

Toronto, March 1.—There is noticeable activity in the paint and oil market. Booking is proceeding briskly and shipments have also started, though not a great deal is being sent out yet. There is every evidence of a busy spring ahead.

Paint, glass and white lead prices remain firm but linseed oil and turpentine have shown a weaker tendency.

Linseed Oil Lower.

In regard to linseed oil, there has been some slight decline both in Great Britain and by the crushers in Canada. As a result local prices have been cut down to 2 cents, making the quotations 92 cents for raw and 95 cents for boiled. As the first of March is usually the time for spring deliveries, it is expected that there will be an immediate stimulation in trade, which will be helped along by the present decline. This will result, it is thought, in higher price levels. Stocks are known to be pretty light and it is certain, therefore, that the demand will be very considerably augmented. Paint and oil men are of the opinion that oil is now at the lowest level that it is likely to reach.

Turpentine Lower.

The turpentine market continues weak, which is a great surprise to the trade at the receiving points in the Southern States. The naval stores people complain that the weather is still very adverse to operations in the woods and that, whereas last year new turpentine was arriving in the early part of February, there has been very little new gum gathered this year owing to the continued inclement weather. It is believed that all consumers, including manufacturers of varnish have bought very sparingly in the past months and that, when the spring opens, the demand will be greater than usual for turpentine.

The local price has been cut to 67 cents, a reduction of one cent.

White Lead Firm.

White Lead.—Extreme firmness is noted in white lead. The strength shown in pig lead has reacted very rapidly on white lead and it is now assured that the price of that commodity will remain firm. There has been a good demand for this season of year.

Glass.—The demand is not heavy, although some shipments are being made. Spring booking is proceeding very satisfactorily.

Putty.—The same applies to putty. There has been a fairly good demand in putty for this early date. Prices are as usual. Standard bulk in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.00.

Prepared Paints.—There is a brisk demand for spring stocks but orders for immediate delivery are not by any means heavy yet. Some spring shipments are being made but there will not be a great deal doing in that way until the weather becomes more favorable.

Varnishes and japans are in satisfactory demand.

OPEN WESTERN OFFICE.

With the purpose of facilitating their operations in the west, R. C. Jameson & Co., Montreal, have opened a branch warehouse and office at Vancouver, B.C. Thos. Pearson, for a number of years one of the firm's representatives in eastern Ontario and Quebec, has been appointed manager of the new branch.

Weekly Market Reports---Stoves

LARGE WESTERN ORDERS.

There is an awakened activity in stoves. Large orders are being received from Western points and the manufacturers as a result have been kept busy.

Gas stoves are being booked for delivery in March so that shipments will start very shortly now.

MONTREAL.

Montreal, Feb. 29.—Though ranges are exceedingly quiet for the time being; and though there is not a great deal of activity in furnaces; manufacturers of stoves and accessories report a satisfactory condition of affairs. Ordering of spring lines has been going along well. There are some dealers who seem unable to make up their minds what they will want until the customers begin making their wants known, but many have put in their requisitions in good time. The result of this is that the manufacturers are finding themselves in a good position now. They have got their early shipments off, and are ready to pay prompt attention to orders coming in immediately.

Keen Fight Expected.

Everything seems to point toward a keen fight for the gas range business here this year. The Montreal Light, Heat & Power Co., has contracted with a United States firm to supply them with the 6,000 odd stoves they need. This takes business away from those firms which supplied the M.L.H. & P. Co. last year. Naturally this has not brought universal pleasure, and it is already stated that the concerns which have lost a part of the Power Co.'s business will make a determined effort to make up by securing more business in other fields.

Credit is reported good. Many in placing their spring order are taking advantage of the cash discount. Other accounts are being settled satisfactorily. There are some slow dealers—soms men who keep putting off and putting off, but the majority appear able and ready to pay promptly.

Ranges and Heaters Quiet.

Ranges, Heaters and Furnaces.—As yet the dealers have not started to order largely for spring. Many have a few models left over from the fall. These they expect to use for the very early trade, so that they will not be placing their large spring orders for a month or more. Heaters have been moving fairly until the last few days. From now all will be quiet until spring, when a fair sale of the cheaper lines may be expected, as then those who are starting early for their summer homes will be buying.

Gas Stoves.—As has been hinted, indications are that there will be keen competition in this line during the coming spring and summer. Some of the local manufacturers feel that their field has been invaded. They, therefore, are preparing to fight hard for business. That they are meeting some success in their efforts is evident, for during the past week several hundred gas ranges have been sold.

Gas Stoves Needed.

The retail demand for these gas stoves has not grown very large as yet, but it is only a question of a week or two now until the heavy call commences. Many new houses have to be equipped with these ranges as yet.

Kitchen Furnishings.—Though copper has advanced still higher, and though there has not been any drop in the price of tin, no higher rate has been struck for kitchenware. A few lines have been advanced, but generally the prices remain at the figures which have obtained for some months.

For milk cans and sap buckets the call has been heavy. Yet from a study of the sales made last year the manufacturers see that the real demand has only commenced. They expect a great rush for this class of goods within the next few weeks.

"I do not think," said one manufacturer," that we will be able to fill all the orders promptly. But we will do the best we can. It will be a case of first come first served."

TORONTO.

Toronto, March 1.—The situation has shown a very considerable stimulation of interest during the past few weeks. Stoves are starting to move out for the spring trade. While business in Ontario is not yet particularly heavy, large shipments are being sent from Ontario points to the West.

There is a very healthy demand from Western points, in fact. One firm have made a shipment of seven carloads for Edmonton alone. Stove manufacturers state that they are sending out practically all that they can make and the Western demand is largely responsible. Some orders are being placed in Ontario but, even in these cases the dealers require the goods to supply customers who are leaving for the west.

Gas Stoves.—The feature of the stove market here is the heavy booking being done for gas stoves. Shipments will start in real earnest early in March; it is possible that some shipping would have been done by this time had not the unfavorable conditions precluded this. Manufacturers state that the large booking done points to a heavy spring trade in gas stoves.

Ranges.—The range trade has picked up considerably. Most of the orders coming from the West are for ranges and this has kept the manufacturers busy.

Heaters.—There is not a great deal doing in heaters. Some orders for delivery in late summer have been placed but orders for immediate shipment are few and far between. Oil stoves are still selling but the demand here is also slumping off. A few sorting demands only are being met.

Dairy Supplies.—The demand is not quite as heavy for trimmings but the finished articles are now moving well.

Kitchen Sundries.—There is a first-class call for all lines. Enamelware is selling in large bulk. Tinware is reported brisk.

Shipments Delayed.

The effect of the storm has been felt in all lines. The railroads have not been able to handle the goods and shipments have been tied up as a result. Freight is now starting to move, however.

THE MERGER ONCE MORE.

Montreal, Feb. 29.—Talk of a merger of the local wholesale hardware houses is still in the air. Apparently, a wealthy American has made an offer for the various establishments. Little is being said about this, but apparently the offer is being considered. The head of one of the concerns, however, expressed his opinion that this attempt to merge the houses will fall through, as did the effort made in the fall. The task is a big one, and the men vitally interested will not move until they have proof positive that the negotiations have reached a sound basis.

EXPLOSIVE CO. PLANT BURNED.

Wallaceburg, Ont.—The Dominion Carlite Explosive Company's plant here was almost completely destroyed by fire. The loss and cause are unknown.

Weekly Western Market Report

Goods are Now Being Shipped Out in Large Bulk—Stoves are Selling for the Spring Trade—The Spring Rush in Paints is on.

Winnipeg, Feb. 29.—With the arrival of milder weather spring shipments have been going out in regular order and the rush may be saio to have started. Travelers are all out and very satisfactory orders are being received with the result that the trade accomplished so far this year shows a great advance over this period last year. Freight conditions are decidedly better and satisfaction is being given at the present time by the railroads. Of course a certain amount of delay is still being encountered but this is due in the majority of cases to the conditions prevailing in winter.

The market this week shows little change as far as prices are concerned but the tone is decidedly stronger and healthy. All spring lines are moving and many late orders are being rushed forward as quickly as possible, especially lines which are needed by the farmers for spring work. All indications at the present time point to an early spring and as a result the majority of the hardware merchants are preparing for it.

Stoves Selling Well.

In this line cooking stoves are going out with a rush as well as all general lines. The prospects for spring and summer trading is decidedly good and a large number of orders have already been booked ahead by travelers for cooking ranges. Several car-loads from Eastern factories have been passing through Winnipeg for Western distributing points during the week and as far as could be learnt they were devoted almost exclusively to the carrying of stoves. The demand in the city for gas ranges is just starting and it is expected that this will increase as the spring and summer approaches. All other lines such as enamel and tinware and all description of shelf goods are also moving out to city as well as country points. Several new hardware and tinsmiths' shops are opening up in the city as well as country points and as a result many of the large wholesale firms have been busy stocking these The tone of the entire market may be said to be decidedly healthy and inclinations point towards advances rather than declines. Orders in general lines show a great advance over the corresponding period last year. Quotation in general lines remain as follows:

Winnipeg Hardware Quotations.

Axe Handles.—Oval and octagon, s.g. hickory, $3.50 ; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½ ; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts, 77½.

Bar Iron—Bar iron, $2.50 ; Swedish iron, $4.25 ; sleigh shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs., $8.50 ; Jessop, $15.

Blocks—Steel, 50 per cent ; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg ; $2.35 Fort William.

Copper.—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire 3 inch gage, 24c, to 20 inch gage 29c.

Crowbars—4½c. per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87 ; 26 gauge, $4.18 ; pressed standing seamed roofing, 28, painted, $2.84 ; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40 ; 8-inch, $4.65.

Clevices—7½c. per lb.

Enamelware—Canada, 50 ; Imperial, 60 ; Premier, 50 ; Colonial, 60 ; white, 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's 65 per cent.

Spring Rush in Paints.

The spring rush in these lnes may be said to be at its height and shipments are being forwarded daily to Western points. The demand has been constant for all lines of mixed paints, varnishes, stains, dry color, brushes, etc., and a healthy tone is prevailing. Turpentine and linseed oil are also in great demand but remain unchanged from previous quotations. The former is now selling at 80c in bbls., and 85c in quantities less than bbl. lots, with an extra advance for packages. Raw linseed oil is still quoted at $1.05; while boiled is sold at $1.08 with the usual advance of 5c for smaller quantities. It is expected that orders in these lines will show a large increase over last year as present prospects point to an enormous increase in the amount of building that will be carried on throughout the West this year. From large as well as small towns increased building permits are being reported and a healthy trade can be expected.

With the rush in paints, etc., a decline in window glass and putty is noticed as very little of these are being used at the present time. Lead is also quet but it is expected to increase in demand shortly.

Methods of Retailing Paints and Varnishes

Preliminary Work For Spring Trade

Measures Should be Taken at the Present Time to Stimulate the Spring Demand—Good Results Obtained by a Window Display.

Paint requires skillful handling if the best of results are desired. The dealer who lets his paint stock sell itself may, if he carries a good make and is located in a thriving place, sell quite a little at the busy seasons. It is certain, however, that his trade during the duller periods and particularly during the winter will be light.

"I haven't sold ten dollars' worth of stuff in my paint department since the first of the year," was the complaint voiced by an Eastern Ontario dealer the other day. After glancing over his store, the reason for this lack of business was obvious. The paint department was hidden out of sight at the back of the store. To catch a glimpse of it, one had to skirt a miscellaneous collection of lawn mowers, washing machines and kegs of nails which barred the back end of the establishment and peer around a rack hung with mitts. The paint on the shelves consisted of the odd lines of stock left over from the fall trade. Dust had taken possession of every nook and cranny. The only wonder was that he had sold as much as he had.

In contrast to this deplorable method, there are many hardwaremen who get just as much business during the winter months as it is possible to get. They push paints for all they are worth, keeping the stock to the front in the store, using paint window displays and not neglecting to talk paints when the opportunity presents itself. They find it profitable labor, for trade generally during the mid-winter months is dull. Anything calculated to help along the daily sales is well worth trying.

The accompanying illustration is of a paint window display in the store of the Vokes Hardware Co., Queen street east, Toronto. It was put in during the week of February 19 by Gordon McKinley, who has charge of the window dressing work. The display has many exceptionally good features.

Despite the fact that the weather during the week was rough and stormy, this display brought direct results. The sales in the paint department picked up and, although the improvement could not be termed large, it was noticeable nevertheless.

The best results of a paint window display at this time of year are more likely to be felt later on. "People may not buy paint now," explained Mr. Funston, the manager of the retail department, "but they notice the display and it has its effect later on in the season when they finally make their purchase. It quite frequently happens that a man will decide where he is going to buy his paint some weeks, even months, before he intends to buy."

This point is well worth bearing in mind. It may seem futile to deck out a window with an assortment of paint when the snow lies deep on the ground

February paint window display in the stors of the Vokes Hardware Co., Queen Street, Toronto.

and winter winds preclude all possibility of outside painting being done. It is true, however, that quite a few of the men who drop in to buy paint when the spring comes will have noticed the displays in the store window some months before and been influenced thereby. There is no reason why a display in February or March should not create a certain amount of immediate business; but the chief result obtained will be in the impetus given to the spring trade which opens later.

Every dealer who desires to do a large spring trade in paint should begin to prepare for it not later than the first of March. Several window displays should be arranged before the opening of the spring season. This method will not only attract attention to the store as the headquarters for paint, but will also have the effect of inducing early buying.

TWO PROMOTIONS AT A. RAMSAY & SONS.

Montreal, Feb. 28.—Arthur D. Brown, for eighteen years with the firm of A. Ramsay & Son, which is now celebrating the seventieth anniversary of its formation, has recently been appointed sales manager; while W. A. Ramsay, lately representing the firm in British

Arthur D. Brown for eighteen years with A. Ramsay & Son, now appointed sales manager.

Columbia, has been brought back to Montreal to assume the duties of warehouse and factory manager.

Practically all the time Mr. Brown has been with this old house he has worked on the road. He has sold paint from Halifax to Vancouver, from the start having made a financial success of traveling. Mr. Brown's reliability and his genial manner have made him popular with all with whom he has had dealings; and they will be glad to hear not only of his appointment to this important post, but also to learn that he will still visit them from time to time. Mr. Brown, on account of his executive ability and intimate knowledge of the field, should prove an exceedingly valuable man to his firm. He will reside in Montreal.

W. A. Ramsay, who is taking over the management of the warehouse and factory has been with the firm nine years, having passed through all branches of the work from the very bottom. He returns to Montreal from Vancouver.

The Dealer and Painter Should Co-operate

It is not wise to attempt to ignore the painter, although some dealers endeavor to do this. The painter has it in his power to "knock" any brand of paint, just as effectually as he can "boost" it if he so desires. He can either do the local dealer a great deal of good or an equal amount of harm.

If the paint dealer does not do anything to keep the painters in town in line, he will lose a great deal of business. Householders who contemplate painting, very frequently go to the painter first. It is then morally certain that the advice of the painter as to the kind of paint to be used will be accepted. The owner of the house concludes that the painter knows his business and that his advice is likely to be good. He, therefore, lets the painter pick what brand of paint he prefers and lets it go at that. What chance has the dealer who has never gone to the trouble of getting into touch with the master painters?

This occurs very frequently. For that reason, the dealer must work with the painter as closely as he can. A certain amount of reciprocity will redound to the advantage of both.

Applying the Paint.

The writer has heard some dealers declare that they endeavor to sell paint direct to the house owner, the latter undertaking to do the work himself. This is not altogether a wise position to assume. The average man's knowledge of paint is purely superficial. He cannot do the work as well as a regular painter would. He may make some very serious error. It very frequently happens, when an amateur handles the brush, that the results are not all that had been expected. Who does he blame? Himself? Not at all. He blames the paint, of course. Unwilling to concede that he himself did not know enough about the work to insure good results, he concludes that it was poor paint. If the work had been done by a painter the results would have been better and there would not have been the trouble which is bound to ensue in the other case.

Touching on this point, the Paint, Oil and Drug Review says:

"The dealer who encourages 'I painted my own house' kind, is doing a great harm to the line he represents. Don't forget your interests and the maker's are identical—you are one. If you encourage the wrong side of the trade you are responsible to the manufacturer for the complaint. Remember his paint that is in no way at fault is being blamed for something you did, and could have been obviated had you encouraged a painter doing the work.

"There are plenty of good, honest and intelligent painters. Get one to make a working agreement with you. It will benefit you as well as the goods you handle, and the customer will not only be saved money, but their property will be benefited."

PAINT BOOKLETS.

The January number of "The Little Blue Flag," published by Lowe Bros., is called a "School of Salesmanship" number. It contains a report of the convention of the Lowe Brothers' staff at Dayton, Ohio, and gives a number of addresses delivered before that gathering, all dealing with the important subject of paint salesmanship. Prof. W. D. Scott gave a lengthy address on "Influencing Men in Business," showing the potent force of habit in securing that influence. Advertising Director Shuey gave an outline of the selling help campaign to be inaugurated this year.

"A Message from Minerva," is the title of an unique booklet issued by the Pinchin-Johnson Co., Toronto. The cover represents the firm trade as a star from which a stream of light radiates. The booklet contains mention of the full line of Minerva paints manufactured by the company.

CORBIN CLUB BANQUET.

Hartford, Conn.—The sixth annual banquet of the P. F. Corbin Club was held here on Feb. 15. There was a large attendance. M. H. Norton, president of the club, was in the chair and, after full justice had been done to the splendid menu provided, a number of speeches were made by prominent members of the firm and the club.

Free Help for Every Decorator

Our new service department will help you plan the interior and exterior painting and decoration of any house or of a part. In place of a small job, you can get a big one, well planned and done. Remember the

S for every decorator or dealer to get him good business.

M·L MAPLE LEAF

Every decorative problem properly answered for best results.

DECORATIVE AID DEPARTMENT

M. L. PAINT is best-lasting exterior paint, improved during 20 years of careful tests. The kind that helps your business when you sell it. Ready to use.

FLOORGLAZE, a flint-hard glass-like and beautiful floor finish that applies easily, stands wear, resists scratches. Best interior floor finish.

is at your free service. Just send us your problem. We give you exactly the right shades and line of goods to use. We give you suggestions. Give areas and we tell exactly how much paint you need, or varnish, or flat wall color. Stencil suggestions, too. Get booklet.

ELASTILITE, an indoor or outdoor varnish that is applied easily and perfectly. You can guarantee it. It gives every satisfaction. A beautiful finish.

M. L. FLAT WALL, an easy-to-clean wall paint for plaster, burlap or wood, in beautiful interior shades. Sanitary, clean and adapted to stenciling.

Samples of the above finishes on request. The Decorative Aid Dept. supplies suggestions, estimates and stencil designs (stencils also at low cost) to any decorator, painter or dealer who wants to give his customers the best and most modern service. Freely at the service of the entire retail trade. Send your problems.

INVESTMENT vs. EXPENSE

There's as much difference in paint results as there is in advertising results.

For a consumer to use good paint—"High Standard" Paint is an investment and not an expense. It protects, beautifies, and gives such lasting satisfaction that it is really cheaper to paint than not to paint.

To promote paint sales for the dealer in the Lowe Brothers' way of advertising, is an investment and not an expense. It is no experiment with us—we know beforehand what the results will be just as we know beforehand what the results will be in the use of "High Standard" Paints.

We know—that's the powerful reason behind our success—the difference we want to show progressive dealers in territory not already taken up.

Are you willing to be shown?

Lowe Brothers LIMITED

TORONTO, DAYTON, NEW YORK, BOSTON, CHICAGO, KANSAS CITY.

Weekly Market Report --- Paints

AN ACTIVE TONE.

Reports are to the effect that activity dominates the paint situation. Conditions have not been exactly favorable but business is proceeding apace nevertheless.

Most lines are firm in price but in Toronto linseed oil has dropped 2 cents and turpentine 1 cent. Spring booking is brisk.

MONTREAL.

Montreal, Feb. 29.—With snow piled high on the streets preparations for the spring sale of paint are yet going rapidly ahead. Retailers in all parts of the country are ready. Stock taking is over. The merchants know what they have on hand. They know what they sold last year; and with these two facts to go upon they have little difficulty in determining upon their early order.

There was a time when the early demand for paint was small, when merchants bought only enough to assure them of a supply to meet the very early trade. But this time has passed. Now the first order is a large one. The merchants are not afraid of having stock left on their hands. More and more paint is coming to be a commodity which sells the year round—at some seasons much better than others it is true, still never dead.

A Banner Year in Prospect.

This year the early ordering has been exceptionally large. "I think," said one sales manager, "that this is going to be a banner year. We are getting bigger orders than ever before." It certainly seems that the retailers are expecting a big demand.

White Lead.—Orders for this line have remained large. Quantities are always sold about housecleaning seasons. There seems no reason to doubt the continuance of this demand. Indeed retailers are now laying in a supply which will enable them to meet a heavy call.

Some Fluctuations.

Linseed Oil.—Still the market is somewhat unsettled. A report comes in that cars are scarce and that flax seed can not be brought forward. As a result prices tend to rise. A day later the word is that crops are being moved. and there is a tendency downward. So it goes. But the fluctuation is of minor importance and prices remain at about 92 for raw and 95 for boiled oil.

Putty.—Always in demand at the spring of the year, this material is now being large bought. Building operations are undoubtedly going to be large. This will mean large orders from the contractors. Boats are to be caulked at this season, too. There is another cause for large ordering. The manufacturers have none too heavy stocks on hand. All winter the demand has kept up. They have not been able to get as far ahead as usual. Probably they will be able to fill all orders, but it will be the early bird who is sure of his supply.

Some Records Broken.

Mixed Paints.—It is in this line that the greatest activity is shown. "We took the biggest order we have ever had from a retail store, this week," remarked one manufacturer, "an order for $9,000 worth of paint. We established another record, too—seven car loads shipped in five days. Oh, I can't see anything for it but a banner year."

Other manufacturers report similarly auspicious openings of the season. They are working hard for business, but they are getting it.

Glass.—Indications are that this material will be scarce for a little time. Stocks are none too large. Until navigation opens there will be a tendency to conserve the supply. After that prices may rise.

TORONTO.

Toronto, March 1.—There is noticeable activity in the paint and oil market. Booking is proceeding briskly and shipments have also started, though not a great deal is being sent out yet. There is every evidence of a busy spring ahead.

Paint, glass and white lead prices remain firm but linseed oil and turpentine have shown a weaker tendency.

Linseed Oil Lower.

In regard to linseed oil, there has been some slight decline both in Great Britain and by the crushers in Canada. As a result local prices have been cut down to 2 cents, making the quotations 92 cents for raw and 95 cents for boiled. As the first of March is usually the time for spring deliveries, it is expected that there will be an immediate stimulation in trade, which will be helped along by the present decline. This will result, it is thought, in higher price levels. Stocks are known to be pretty light and it is certain, therefore, that the demand will be very considerably augmented. Paint and oil men are of the opinion that oil is now at the lowest level that it is likely to reach.

Turpentine Lower.

The turpentine market continues weak, which is a great surprise to the trade at the receiving points in the Southern States. The naval stores people complain that the weather is still very adverse to operations in the woods and that, whereas last year new turpentine was arriving in the early part of February, there has been very little new gum gathered this year owing to the continued inclement weather. It is believed that all consumers, including manufacturers of varnish have bought very sparingly in the past months and that, when the spring opens, the demand will be greater than usual for turpentine.

The local price has been cut to 67 cents, a reduction of one cent.

White Lead Firm.

White Lead.—Extreme firmness is noted in white lead. The strength shown in pig lead has reacted very rapidly on white lead and it is now assured that the price of that commodity will remain firm. There has been a good demand for this season of year.

Glass.—The demand is not heavy, although some shipments are being made. Spring booking is proceeding very satisfactorily.

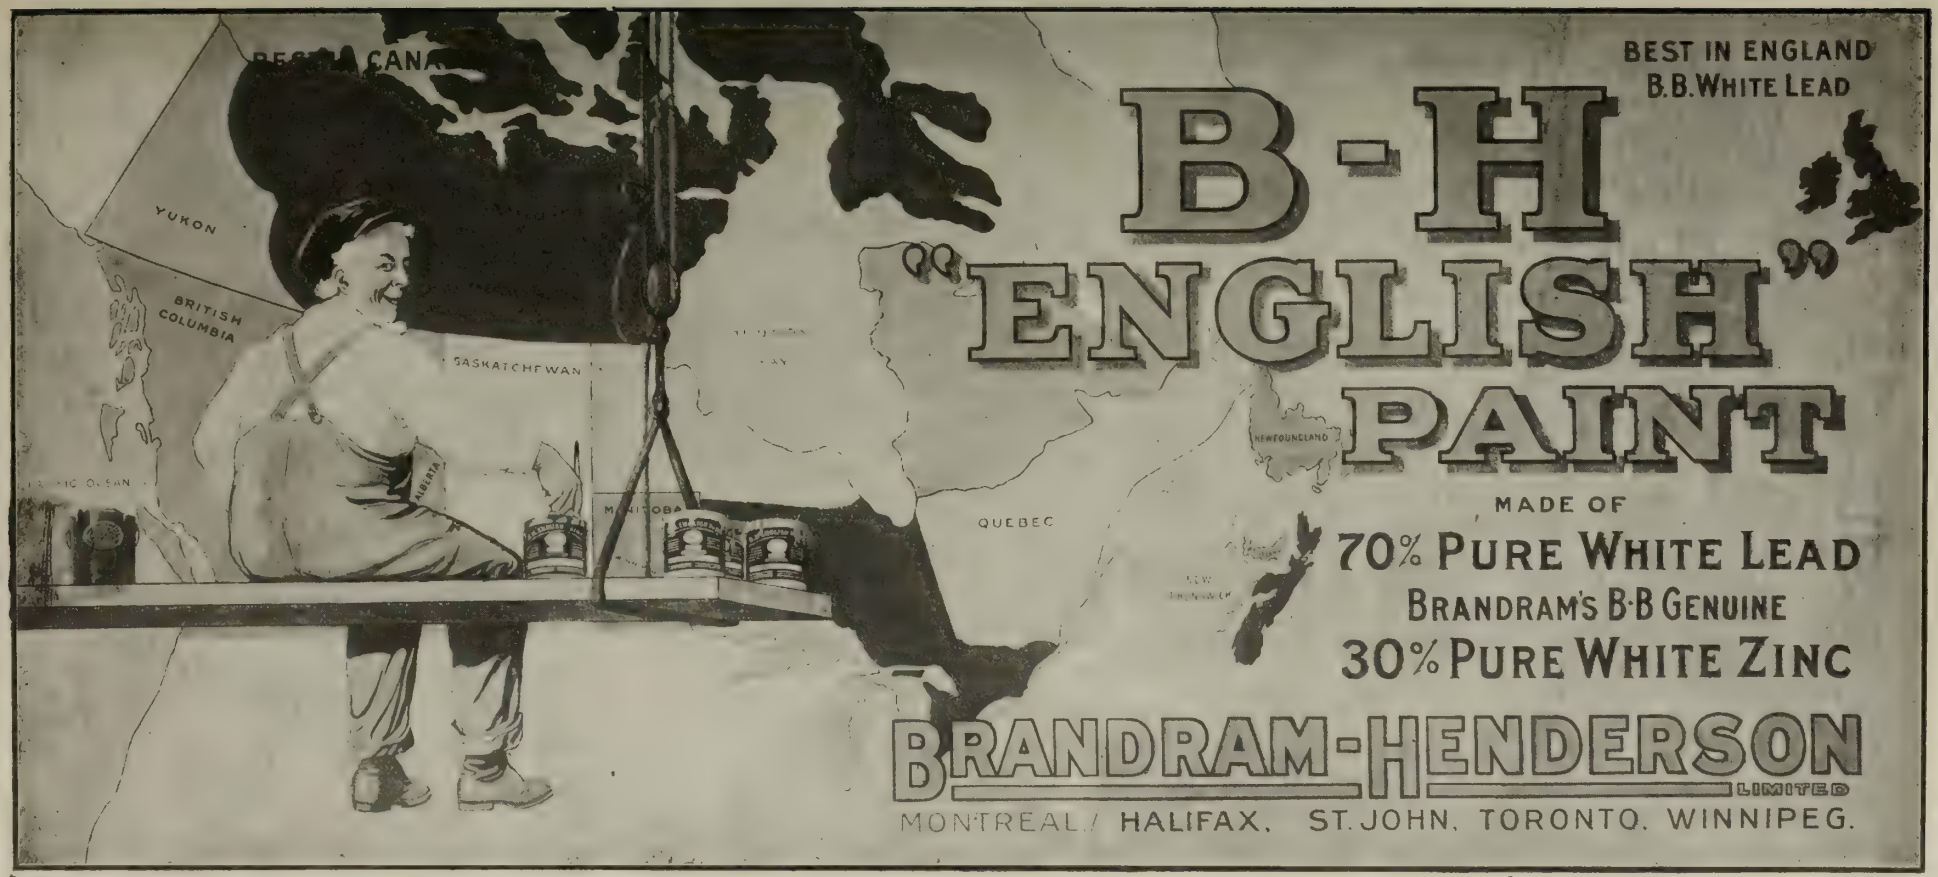
Putty.—The same applies to putty. There has been a fairly good demand in putty for this early date. Prices are as usual. Standard bulk in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.05; bladder, in barrels, $2.75. Pure putty prices remain the same; Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.00.

Prepared Paints.—There is a brisk demand for spring stocks but orders for immediate delivery are not by any means heavy yet. Some spring shipments are being made but there will not be a great deal doing in that way until the weather becomes more favorable.

Varnishes and japans are in satisfactory demand.

OPEN WESTERN OFFICE.

With the purpose of facilitating their operations in the west, R. C. Jameson & Co., Montreal, have opened a branch warehouse and office at Vancouver, B.C. Thos. Pearson, for a number of years one of the firm's representatives in eastern Ontario and Quebec, has been appointed manager of the new branch.



Strong, attractive, business-getting posters (18 sheet) on B-H Paint tell the story of quality in paint, and bring customers to the B-H Paint Agency.

B-H "ENGLISH" PAINT is 70% Pure White Lead—30% Pure White Zinc—mixed ready for use with Pure Linseed Oil, Pure Turpentine and dryer and nothing else.

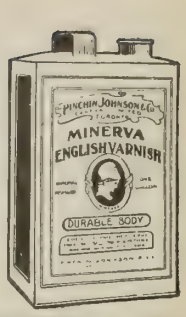
A Full Imperial Measure of Satisfaction!



Aggressive dealers will find one of their strongest selling points in the fact that

MINERVA

PAINTS and PAINT SPECIALTIES

are always put up in cans containing Full Imperial measure—not wine or short measure.

And the quality goes into every can before the "Minerva" Label is attached—there is 78 years' reputation for superior quality back of our products.

Our conscientious co-operation with the dealer has made the "Minerva" Brand a truly worthwhile line to handle.

GET DETAILS OF OUR PROPOSITION. IT WILL PAY YOU.

PINCHIN, JOHNSON & CO.

(CANADA) LIMITED

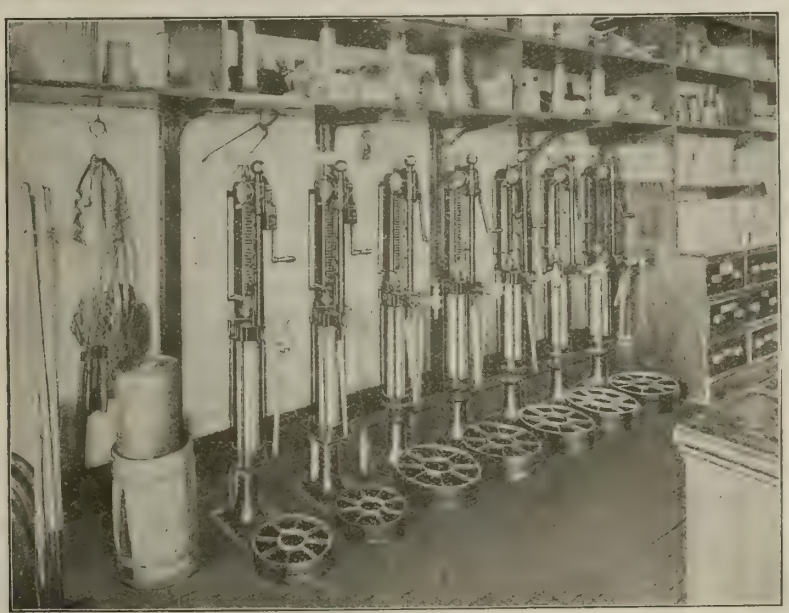
377-387 Carlaw Avenue, Toronto

Established in England in 1834

J 55

This Illustration was made from a photograph of a Bowser installation for

Mr. Samuel Hobbs,
1434 Queen St. W.,
Toronto, Ont.



This system handles

Canadian Coal Oil
American Coal Oil
Raw Linseed
Boiled Linseed
Turpentine
Gasoline
Benzine
profitably.

It pays him and it will pay you.

You Can Make a Better Profit on Paint Oils if You Handle Them Right

Now is the time to get ready for your spring paint trade. Investigate the Bowser NOW. Your fellow merchants are using them profitably—so can you. Put in a Bowser and get a bigger profit next year. Ask for book No. 15.

Amatite ROOFING

CONSUMERS DEMAND IT

Are you still selling ready roofings that need painting? These are the old-fashioned kinds.

Consumers all over the country are demanding a ready roofing that *will not require painting.*

We have spent several hundred thousand dollars in advertising to explain to the customer that painting roofs is a needless nuisance and expense.

Amatite has a real mineral surface that needs no painting.

Amatite is laid like any other roof requiring no skilled labor or special tools. You give your customers a bargain when you sell them Amatite which needs no painting whatever.

You can capture the roofing trade in your territory if you are there first with Amatite and let the people know that you have a roofing which they won't have to paint. Amatite costs less than other first-class roofings and gives double the weight for the money. For samples, booklets, etc., address nearest office.

MISCELLANEOUS

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms —real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS — ESPECIALLY made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for binders and monthly account systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

YOU CAN BUY A REBUILT TYPEWRITER from us. We have about seventy-five typewriters of various makes, which we have rebuilt and which we will sell at $10.00, $15.00 and $20.00 each. We have also a large stock of better rebuilts at slightly higher figures. Write for details. The Monarch Typewriter Co., Ltd., 46 Adelaide St. West, Toronto, Canada. (tf)

OFFICE MANAGER WANTED

AN OLD-ESTABLISHED AND SUCCESSFUL joint stock manufacturing company in Toronto wants an office manager who besides being an expert accountant is capable of following costs closely, stopping leaks in the manufacturing department and capable of introducing economic methods. For such a man there is a good future. He can in time acquire an interest in the business. State experience and salary wanted. Box 637 Hardware and Metal, Toronto. tf

MISCELLANEOUS

COUNTER CHECK BOOKS—WRITE US to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS ARE DEVISED to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE — INSURE IN THE Hartford. Agencies everywhere in Canada.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN pens. If you have fountain pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction, and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. Gage & Co., Limited, Toronto, sole agents for Canada.

PENS—THE VERY BEST PENS MADE ARE those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find pen to suit you.

THE MONEY YOU ARE NOW LOSING through not having a National Cash Register would pay its cost in a short time. Write us for proof. The National Cash Register Co., 285 Yonge St., Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

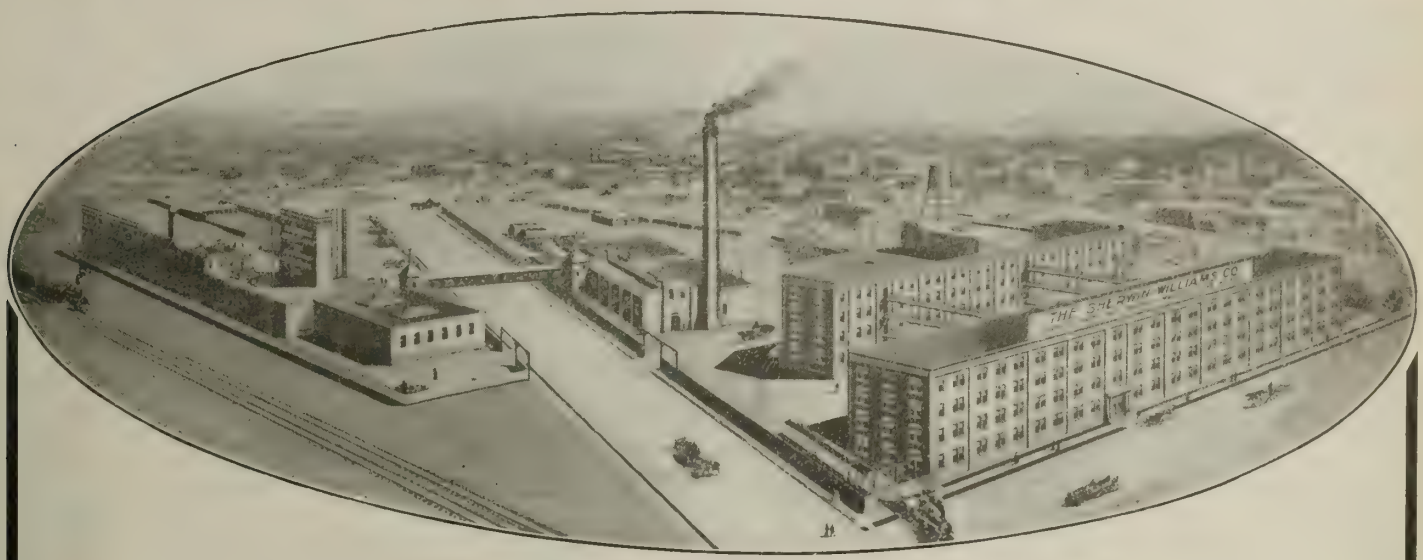
Nothing succeeds like success



Factory of the Sherwin-Williams Co., Montreal.

This saying is only true when success is based on merit. Success based on anything else can only be temporary. The success of The Sherwin-Williams Paints throughout the world has been the wonder of the paint trade. There has been nothing to equal it. There is no mystery about it, however. It is based solely on merit—merit in the product and merit in the system of marketing the product. In other words, good goods and good methods—that is the combination that has won. That is the combination that has made the success continuous and enduring.

Every year the sale of The Sherwin-Williams Paints in Canada has increased. It has increased in poor years and good years. Last year was the biggest year, and this year is forging ahead of last. The same kind of increase in sales applies to the great majority of agents and dealers who sell The Sherwin-Williams Products. They have grown with us and will continue to grow with us. A customer once secured we very rarely lose. Nothing succeeds like success based on merit.

CALGARY EDMONTON HAMILTON LONDON OTTAWA

Paint and Varnish Removers

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

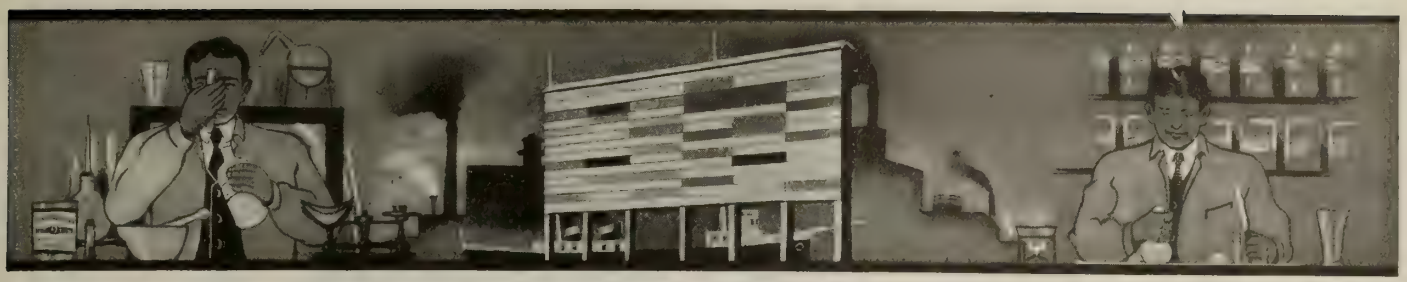
	NAME OF BRAND
The Sherwin-Williams Co., Montreal, Canada	"Taxite"
International Varnish Co., Ltd., Toronto Canada	"Klensa"
Pratt & Lambert, Inc., Bridgeburg, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapoo"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

Chadeloid Chemical Company

100 William Street
NEW YORK, N.Y.



Why do the Martin-Senour Paints bring customers back?

See what we are doing to keep up their quality, then answer that question for yourself.

Our chemists test all Linseed Oil and Dryers before they go into our storage tanks. If they do not test perfectly pure they are rejected. This protection for the dealer takes a slice from our net profits, but we have found it pays in the long run to co-operate with him by looking out for his interest.

The finished product is thoroughly tested to withstand the bite of inclement weather — to defy the destroying elements of sun, rain, and the gnawing tooth of time.

Martin-Senour Paints are not merely a mixed compository, but they are paints that are built upon a scientific basis — to render a given amount of service.

Permanent Color is just as important to the dealer as the durability. Even though the paint may protect the surface, if the color fades the property owner thinks the paint has lost its protecting qualities. Every shipment of dry colors is carefully tested — if it comes up to the standard it is passed on to the mills, otherwise it is rejected.

We believe you can now guess the answer very easily.
Don't you think this protection is a feature that deserves your worthy consideration, and is a very good asset to your paint business?
We also have an advertising campaign that sends you *new customers.*
Let's hitch together, we'll make a good team.

THE MARTIN-SENOUR CO., Limited
Pioneers of Pure Paint
MONTREAL CHICAGO WINNIPEG

WHAT IS THE DIFFERENCE

between DOUGALL VARNISH and other varnish? Just this:—With most varnishes it is largely a matter of faith, you never know what is going to happen; but with Dougall Varnish you start the job with the assurance that everything will be o.k., and it never fails.

WHAT IS THE REASON?

The reason is that years of study, experiments and experience, together with the use of only first-class materials, and best skilled labor, have enabled us to produce a varnish which cannot be excelled in appearance or durability.

WHAT IS THE RESULT?

The result is that the merits of our product are becoming more widely known daily, and our business is increasing from year to year. You can partake of this if you wish to. We will send you our proposition by return mail on receipt of a post card.

GET THE GENUINE

DOES THE REPUTATION of GARLOCK PACKING mean anything to you?

Does the fact mean anything to you that GARLOCK PACKINGS are giving eminent satisfaction the country over and everywhere Engineers who know insist on the installation of Genuine GARLOCK?

This big and insistent demand for GARLOCK PACKING is the demand for quality.

Imitators are making Packings that look like GARLOCK and are trying to sell them because they look like GARLOCK.

Sometimes these imitations are sold as being "just as good as GARLOCK." If they were as good, they would be sold on their own merits and not on the established reputation of GARLOCK.

Sometimes these imitations are substituted when "GARLOCK" is asked for. To prevent you getting an imitation and assist you in identifying the genuine, we have marked every piece of Spiral Packing with this mark of quality

PIONEERS IN THE PACKING BUSINESS

A Step Forward

The illustration in this advertisement shows the new Plaster Mill recently erected at Caledonia, Ontario, for the Alabastine Company, Limited.

The erection of this building marks a step forward—a turning point—in the Wall Plaster Business of the Dominion for

now hardware dealers can sell Hardwall and Wood-Fibre Plasters at little or no more than lime.

Hitherto, high-grade plasters could only be used in the most expensive buildings, as the prices charged for them placed them beyond the reach of the average builder.

But the building of our new plaster mill enables us to supply a full line of the highest-class Plaster Products at prices that will cause something akin to a sensation. We are able to do this, because the most modern equipment was installed in the new mill regardless of expense. Consequently, we are in a position to make Plaster Products at the lowest cost for which they can be produced. We are also able to make a higher grade of plasters.

This mill, by the way, was constructed under the direction of one of the foremost and most practical wall plaster authorities on this continent. No more modern Plaster Mill is to be found anywhere. Indeed, so satisfied were we with it, that we decided to secure the services of the man under whose charge it was built. He is now our superintendent. You can thus be sure of getting from the Alabastine Company, Plaster Products of the highest class at prices that will certainly surprise dealers. Get the proofs from

Big Pictures of this Label are Reaching Over a Million Canadians Monthly

Through big-space advertising in "Canadian Magazine," "Industrial Canada," "MacLean's Magazine," "The Saturday Evening Post," "Collier's Weekly" and a long list of other popular magazines, the Berry Brothers' Label is fast becoming one of the nation's best known trade-marks.

The pictures of the label are big and prominent.

Canadians are learning to know it at sight—and to know that it stands for quality.

When you put it on your shelves you are not only getting the best varnish stock, but also the best varnish advertising you can display in your store.

Berry Brothers' Line includes every varnish, shellac and kindred product that any dealer needs to fill all his demands

A Common Sense Talk

AIR IS CHEAP You do not pay rates for air like you do for water, yet a big fuss is made over the impurity of water and very often no thought is taken of the impurity of the air breathed from day to day and night to night.

Crowded rooms, whether in public places, schools, opera houses or factories, require ventilation as well as the private dwellings.

HOUSE BUILDING IS A SCIENCE NOWADAYS AND NO BUILDING IS COMPLETE WITHOUT ONE OF OUR J. W. HARRIS VENTILATORS.

THE VENTILATOR ITSELF IS AN ORNAMENT and can be made to suit the character of the building, either as to size or as to quality of material.

MONTREAL, Dec. 4th, 1905

MESSRS. J. W. HARRIS MFG. CO., Ltd.
City

DEAR SIRS,—
In answer to your letter of the 25th ult., I must say that I am very much satisfied with the results of the "ZEPHYR" Ventilators.

Yours truly,
W. CHAMPAGNE,
191 St. Paul St.

Dealers everywhere will find a double profit in handling this ventilator. Write direct for catalogue and booklet to-day.

Learn about our system of ventilating. A pleasure to send books.

TINSMITHS' TOOLS, SHEET METAL WORKERS' TOOLS, PRESSES, CANNING MACHINERY

You Sell Not Only Spray Pumps, But--

PEOPLE who spray, not only need spray pumps, but they also require spraying mixtures, vessels to mix them in, etc. The fact that a man does spray, is an indication that he is interested in his orchard and that he prunes and cultivates as well as sprays. Consequently he will need new pruning tools, new fruit picking appartus, etc. The opening of this new field of trade brings with it a demand for other implements and material—all of which you can handle to good advantage.

"Century" barrel sprayer. The very best all around barrel pump on the market. Has submerged cylinder and all brass working parts.

Deming Sprayers

are built right. They are carefully tested before we ship them so you will not be bothered with complaints. They have been on the market for years. Your customers know the name "Deming" and you know what a help that is when closing the sale.

We would like to get in touch with you. It won't take much of your time to look over our proposition. Just say, "I saw your ad. in "Hardware and Metal" Send your spray pump proposition."

Nicholson-made Files are the Standard of File Quality

The entire output of the Nicholson File Company in 1864 was 100 dozen per day. At the present time 16,000 dozen Nicholson-made Files are sold every day and shipped to all parts of the civilized world. Unvarying good quality, coupled with progressive methods and strict specialization, is the cause.

In Canada these are the well-known factory brands made by the Nicholson File Company:—

"AMERICAN" **"ARCADE"** **"GREAT WESTERN"** **"GLOBE"**
"EAGLE" **"McCLELLAN"** **"KEARNEY & FOOT"** **"J. B. SMITH"**

Nearly every file user in Canada has a preference for one or more of these lines above all others. You can stake your reputation upon their absolutely uniform and satisfactory quality.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

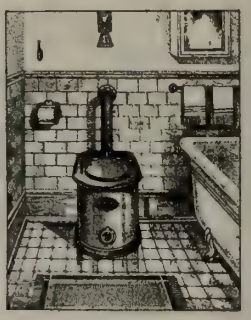
Easily Sold --- Profitable



That about sums up our article from the dealer's point of view. The PARKYTE Sanitary Chemical Closet is the best on the market. GUARANTEED to satisfy buyers. Furthermore, our strong advertising campaign will bring orders right to your store. The margin is liberal. Write our Winnipeg office for handsome catalogue and full particulars. The time is NOW!

PARKER-WHYTE, Limited

WINNIPEG TORONTO VANCOUVER

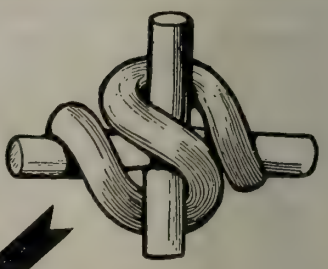
The "IDEAL" FENCE

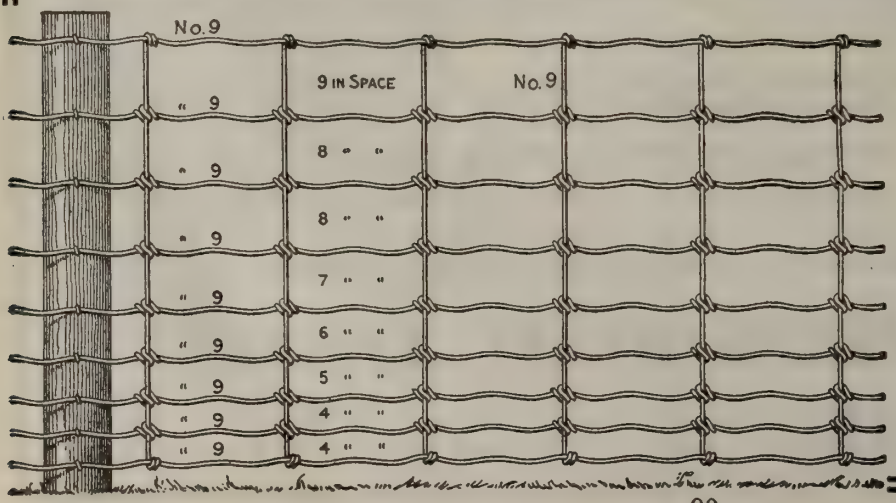
is an effective Trade-Winner

The reason that there are more miles of Ideal Fence sold in Canada annually than any other make is not due to salesmanship or to advertising, but is due to the merits of the fence itself—to the quality of material and workmanship—to the protection it affords—to the service it renders and to our many satisfied customers throughout the Dominion.

QUALITY FIRST—LAST—ALWAYS

is what has made "Ideal" so popular. Ideal Fence is made exactly as represented and the price is always right. Send for our catalogue and price—then go after the farm trade.





"IDEAL" PRODUCTS:
Staples, Diggers,
McCloskey Grips,
Farm and Stock Gates,
Fence Stretchers, Tools,
Barb Wire, Coiled Wire,
Ornamental Fences and Gates,
Field, Hog and Poultry Fence,
Window and Stall Guards, Etc.

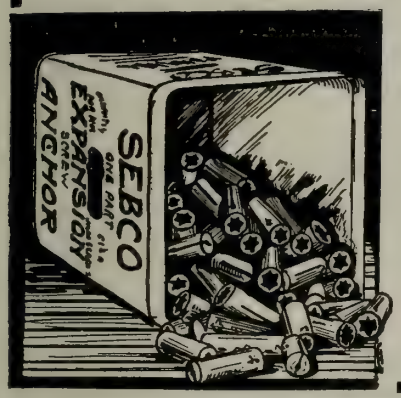
STAR EXPANSION BOLTS

Somebody's Going To Get It —It Might As Well Be You

We are receiving inquiries every day from people who have occasion to buy Expansion Bolts---these inquiries might just as well go to you---if you could see some of the letters from Dealers thanking us for sending them business, you would not hesitate to send for our 90 day Special Dealers' Proposition. We can refer inquiries only to those who have our goods.



It's easier to sell to a man when he's in your store than it is to get him to come. We are paying to get men to come to you. Can you supply them?

Made in Canada

The Standard Tools in every province of the Dominion, New Zealand, Australia, Etc.

We manufacture all kinds of lumber tools.

Light and Durable
Send for catalogue and price list.

Long Distance
Phone No. 87

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

The Process Counts As Much As The Steel

Drills are backed by the full strength of the steel when W & B twisted-while-hot process is used.

Other methods of manufacture remove the strength-giving qualities of the metal and produce drills with only a shadow of the real toughness of the steel.

Why buy drills made from steel that has lost its backbone?

"HERCULES" HIGH SPEED TWIST DRILLS

are manufactured under the only twisted-while-hot process that retains all strength of Vanadium Steel in the finished drill.

This is the drill for general factory work where metal of different degrees of hardness makes up the day's output.

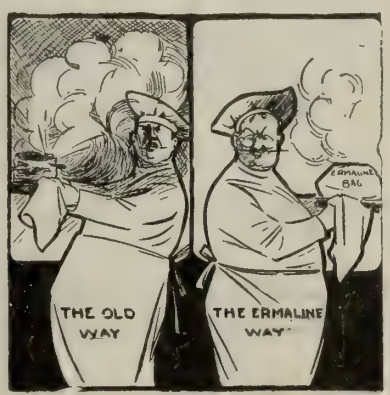
Reliable QUALITY

Ermaline

what does this word convey to you?

To those who have tried the new method of cooking it conveys memories of a well cooked tasty meal without the usual pungent odors which so often pervade the house.



To those merchants who sell them it conveys a message of increased trade and more satisfied customers.

It also carries a message of profit.

Ermaline Paper Bags will make friends for you.

Get the Local agency for "Safelock" Wire Fence

You will find "Safelock" the best selling line of fence you ever handled, because you can prove by actual demonstration that it really is the strongest fence made.

Look at this little cut—note how the stay wires interlock where they wrap the strand wire. You simply cannot make a "Safelock" stay slip in any direction. And, as the strand wires are not kinked, at the lock, every wire retains its full strength.

Better write us to-day about getting an exclusive "Safelock" agency for your locality

The Owen Sound Wire Fence Co., Ltd., Owen Sound, Ont.

Western Agents: The Brandon Safelock Fence Co., Brandon, Man.

Make Money From Good Pumps--Profit

Unless a metal pump is made just right it will leak at joints or valves.

"Aremacdee" pumps do not give dealers who sell them trouble and loss from defective service in "Aremacdee" pumps sold customers.

Pumps for every use—hand or motor—force or lift—every type a dealer can sell.

All in the big catalogue. Ask for it—for dealer prices—for dealer terms.

American Cans

IN SELECTING your PAINT and VARVISH Cans use the same careful judgment and criticism that you exercise in all other purchases. "American Cans" court such a test. Cans are not all alike, even if they do seem similar and look alike as "two peas in a pod." Satisfy every one of your needs in weight, strength, manufacturing detail and appearance; then consider price, promptness of delivery and possibility of a continuous supply without interruption. On the above basis we will take a chance on securing and holding your business.

American Can Company

Montreal, Que. Hamilton, Ont.

A TIP FOR 1912

Buy the Queen Square Fruit Jar

The biggest selling Lightning Style Jar in the United States and Canada. This jar is tried and true and should not be confused with the ordinary type of jar.

Made in clear white flint glass, with wide mouth, seamless rubber base and smooth polished top. Has the adjustable fastener.

Insist on the Genuine. Beware of Imitations. There is only one "Queen"

Manufactured by

The ROSS

"High Velocity" Sporting Rifle

justifies itself on every occasion where absolute dependability is required.

Where danger is met face to face its superiority is shown—

RETAIL PRICE, $70.00

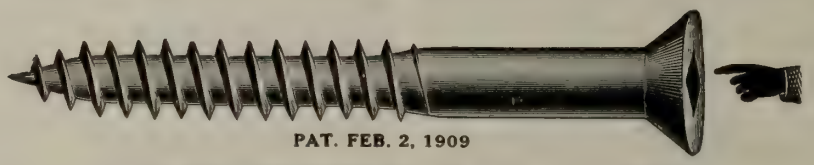
Other Ross Rifles from $25.00 up

The prestige of the Ross Rifle increases from month to month, and there are demands in every town in Canada for them.

Dealers will find them the most satisfactory to carry —no trouble with duties, no delay in securing parts. Liberal discounts and satisfied customers.

Send for Catalogue and Trade Discounts.

THE ROSS RIFLE CO., QUEBEC, QUE.



PAT. FEB. 2, 1909

ROBERTSON SOCKET HEAD WOOD SCREWS

Have a decided advantage over other styles of wood screws. By having a square hole, into the centre of which a specially designed screwdriver fits snugly, it does away with all possibility of slipping, which often proves disastrous to the screw, and wastes a considerable amount of the workman's time.

They will sell on sight—get our prices at once.

We also manufacture high-grade Hand Drivers, Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails and Wire.

Big Ben Store Helps

In order to enable Canadian dealers to get the maximum benefit from the Big Ben campaign now running in Canadian magazines, we are packing Big Ben specially for Canadian trade, six in a carton with a full set of store selling helps (two posters, two show cards, two metal signs.)

On an order for 12 we add a solid mahogany display stand. On an order for 24 or more, we print your name on dials, give the posters, display stand, and a beautiful metal sign lithographed in five colors.

Big Ben and his selling helps are being carried in stock by 54 wholesale Canadian distributors. We will be glad to let you have their names upon request. Any one of them will tell you Big Ben is the best selling alarm that's ever been put out.

In broken and dozen lots, $2.20 less 5%. In lots of 24, $2.10 less 5%.

The Western Clock Co., La Salle, Ill.

A CASE OF PROFIT

The Carborundum Triangular Display Case and a Stock of CARBORUNDUM Sharpening Stones

YOU can put a lot of ginger into your sharpening stone sales by using Carborundum displays---the Triangular Display Case for instance---put it on your counters or in your window---it will talk to your customers---let them know you are a Carborundum dealer---case is made of quartered oak, glass panelled---stones shown on attractive background of black cloth---it's a great sale stimulator. Given free to dealers with stock of Carborundum Sharpening Stones. Glad to send you all the details.

The Carborundum Company

Niagara Falls, New York

THE LIGHTNING AND BLIZZARD

FREEZERS

stand ready to serve you in the same satisfactory manner in which they have served both trade and consumer for over a quarter of a century. The construction is of the same high class. They run easy, freeze quickly and take the smallest amount of ice and salt of any freezer made. The extensive advertising from season to season has created a permanent demand. They bring trade and help you keep it.

Better let your Jobber quote at once.

NORTH BROS. MFG. CO.

The Mark That Stands For
The Best in Rope

The Facts About Rope

Why not consider some of the common-sense reasons why PLYMOUTH Manila rope is a good investment for you — a profit-maker in every sense of the word? These facts have started hardwaremen thinking:

PLYMOUTH ROPE

"The Rope You Can Trust"

1st. *Gives more pounds of satisfaction to an ounce of weight than any other rope made.* Isn't it reasonable to expect that when a rope gives good value for the money, the buyer will come back for more?

2nd. *Outlasts all other ropes.* When the marked durability of rope will convince buyers that they want no other, isn't their steady trade fairly well assured?

3rd. *Is the best possible advertisement.* When you get the reputation of handling a *very fine rope*, isn't it natural that vou get customers that would otherwise go elsewhere?

Is it good business to offer your customers cheap rope when you know that PLYMOUTH Manila gives them more for their money and at the same time helps to "boost" your trade? Why not ask your jobber to send you PLYMOUTH next time?

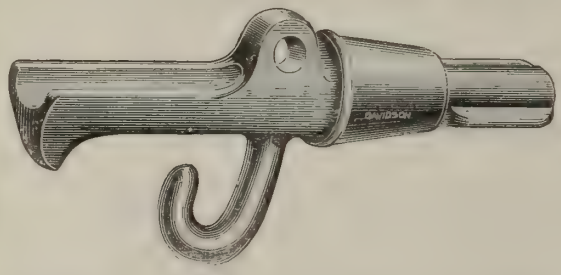
CANADA STEEL GOODS CO., Ltd., - Hamilton, Can.

THE "EMPIRE" SAP SPOUT



STRONGLY MADE OF MALLEABLE IRON, TINNED AND DURABLE ENOUGH TO LAST THROUGH A GENERATION.

EVERY SPOUT GUARANTEED AGAINST BREAKAGE

THEY WILL RUN SAP EARLY AND LATE with a capacity fully one-third more than any other make.

THE TAPERED END GIVES THIS SPOUT A FIRM HOLD of the tree and the play of the wind on a full bucket of Sap cannot possibly loosen the spout after it has once been driven in.

IT DOES NOT LEAK, and is very easy to insert and just as easy to remove.

USE 7/16-INCH BIT WHEN TAPPING and it will be found that with the "EMPIRE" SPOUT every severed grain of wood within the hole is left perfectly free to run Sap—and the increased amount thus obtained will pay for the Spouts in less than one Season.

NO ROSSING OF THE TREES NECESSARY and therefore no injury to the bark.

WRITE FOR PRICES AND TRY A SAMPLE LOT.

A New Bit that's a Good Buy

There is a great demand for an Auger Bit that will bore extremely fast, yet bore easily and cut a smooth hole. Heretofore, most bits have either bored too hard or not smooth enough. This new

Ford's Electrician's Special

fills the demand perfectly. It bores six turns to the inch, and saves one or two turns more in boring each timber than is possible with any other Bit. With slight pressure it will cut out without stopping or splintering.

Write for circular regarding this Bit Address 7B.

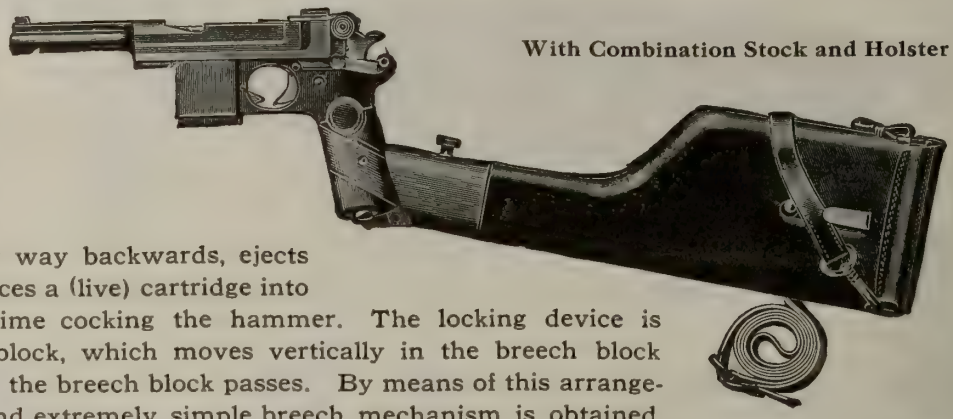
A WONDERFUL LONG RANGE PISTOL

"Bayard" Automatic Repeating Pistol

(Military Model) 9 $^{m}/_{m}$ Bore (Cal. 38)



With Combination Stock and Holster

The 9 $^{m}/_{m}$ Bayard Pistol belongs to the class of Automatic Firearms which have an automatic locking breech, the barrel, together with the locked breech, acting under the action of the recoil, automatically slides a short way backwards, ejects the shell and immediately places a (live) cartridge into the chamber, at the same time cocking the hammer. The locking device is characterized by a locking block, which moves vertically in the breech block chamber and through which the breech block passes. By means of this arrangement a particularly strong and extremely simple breech mechanism is obtained. The firing mechanism of the Bayard Pistol is provided with a visible hammer, which is a prime necessity for a reliable hand weapon, as the hammer constitutes a safety in itself. The magazine of the Bayard Pistol is fixed in the frame of the Pistol, immediately in front of the trigger guard and forward of the breech, thus ensuring a perfect balance and improved accuracy in shooting. A further invaluable feature of the 9 $^{m}/_{m}$ Bayard Pistol is its extremely simple, comprehensible and very solid mechanism, which can be taken apart and re-assembled in a few seconds without the aid of any tools.

Retailers Convention Brought to Conclusion

Members and exhibitors Are Banqueted, Then Some Speak While Others Listen —A. A. Bittues Talks Briefly on Maintenance of Prices—J. A. Naud Speaks of Salesmanship, Venturing to Give a Receipt for Success.

Montreal, March 4.—With a banquet at the Place Viger Hotel, the convention of the Retail Merchants' Association—in connection with which was held the Hardware Exhibition—came to a happy conclusion Thursday night. There is no use talking, it takes a dinner to get a body of men in the best mood for speaking. There were a number of addresses given at that banquet, and in all of them something was said well worth considering.

J. A. Beaudry, president of Le Prix Courant, the host of the evening, had something to say upon the relation of the manufacturers, the wholesalers and the retail merchants. He thought it a duty of the manufacturers to give the retailers an opportunity to see what they produce. Dealers of the province, he declared, were only too willing to buy goods made in Canada and in Quebec. All they wanted was to have the goods brought to their attention.

The Guelph badges were always in evidence.

Propose Larger Quarters.

The toast to the Hardware Exhibitors and retailers being proposed, A. A. Bittues, of the Gillette Safety Razor Co., was called upon to reply. He expressed the opinion that the exhibition just closing had been a success in every way —thanks to the retailers who had come to see what was placed there for their inspection. Next year, he believed, the 65th Armory would be entirely too small to contain the exhibits. The Arena, he believed, would be the proper place—the arena which has a large floor area and boxes which might well be used for booths.

Mr. Bittues spoke briefly upon the need of maintaining prices. Cutting benefits no one permanently. It destroys the public's confidence in goods. The great thing is for the retailers and manufacturers to pull together, and to fix a fair profit from which there can be no deviation.

F. M. Tobin, of the Tobin Arms Co., in speaking to the same toast, urged the need of educating the future buyer. He must be shown that the inventive powers of Canadians are equal to those of Americans. He should be made to see that there is practically no commodity which cannot be made in Canada as well

Flashlight taken the last night of the M ontreal Exhibition.

F. M. Tobin, 1st Vice-President.

A. A. Bittues, President.

Chas. E. Stewart, 3rd Vice-President.

as abroad. Mr. Tobin strongly urged the retailers to push Canadian made goods. These are the lines from which, directly and indirectly, they get the greatest benefit.

Word From the Travelers.

Bevan Giles gave a message from the travelers. "I'm proud," he said, "to represent 8,000 of the Ambassadors of Commerce, nine-tenths of whom are selling goods made in Canada."

J. A. Naud spoke on "The Art of Selling," and favored with an address in which he brought out clearly that selling is something which is worth study, and which demands study. Selling Mr. Naud declared to be an art, and yet, he said, how many are there among the merchants who have devoted time to a careful study of their success or failure in business. Some few have done so, and have found as their reward—prosperity. Others have not taken the trouble to find the origin of their success or failure, and so they have, in reality, achieved failure, for partial success is truly failure.

"I have met merchants in business for many years," said Mr. Naud, "who have evidently never asked themselves if they are profiting by the adoption of certain new methods."

Keep up With the Times.

Continuing, Mr. Naud contended that business men are not as truly successful as is often believed. Statistics show that 95 per cent. do not prosper as they should, and the cause of this, he believed to be the defective methods of the retailers. They followed a routing instead of trying to keep up with the times or a little ahead of them.

Much, Mr. Naud proceeded, could be learned in college, but business ideas are acquired only from men of experience—men who have built up businesses.

Receipt for Success.

Then Mr. Naud did a very brave thing. He attempted to give a receipt for success. To succeed, he said, the merchant must study the business which he intends to pursue. He must understand perfectly the lines which he has for sale; and he must have a certain facility of speech in order that he may appear to advantage. Another thing he must remember. He must not make disparaging remarks or insinuations about similar lines carried by a neighbor. This destroys the customers' confidence, not only in the one criticized, but in the one criticizing.

A salesman, Mr. Naud concluded, should never take No for an answer. He should rather try to understand his customer's position. Then, through diplomacy and courtesy, he may persuade that customer that it would be to his advantage to make the purchase.

M. S. Madole, president of The Ontario Retail Hardware and Stove Dealers' Association, responded to the toast to The Visitors.

R. B. Johnson, Chairman Exhibition Committee.

CROWDS AT EXHIBITION.

Every afternoon and evening during the Montreal Convention, the 65th armory in which the booths were arranged was crowded. Not only did retailers from Montreal and surrounding places come to inspect the goods displayed, but many mechanics, painters, carpenters, architects and engineers also visited the

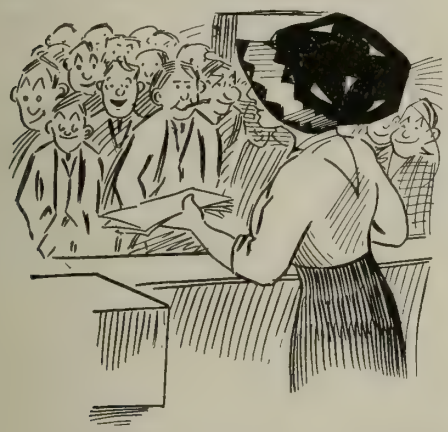
Adam Taylor, Chairman Entertainment Committee.

hall. The last evening the crowd was possibly a little greater than at any previous session. The flash light reproduced here, gives some idea how large was the attendance.

Special arrangements had been made for the last night. The 65th Regimental band had been secured to play during the evening. The officers of the Association were bound to make the concluding events of the Convention memorable.

It will be noticed in the picture that a number of women attended. They were present every afternoon and evening. The booths in which Paper Bag Cookery was being demonstrated, and those in which washing machines and wringers were shown, regularly gathered an interested crowd of ladies.

And the exhibitors were glad to have the ladies present. As one said: "They may not buy much right now, but they are seeing the goods and getting the desire for them. The sales will come."



The crowds certainly did congregate around the Ermaline Cookery Bag Booth.

The picture does not give as good an idea of the exhibit as could be desired. Many of the booths could not be got within the range of the camera at all. But the general effect is shown—enough indeed, to indicate that it was a well-arranged and well-attended Exhibition.

OFFICERS OF NEW ASSOCIATION.

The organization of the Canadian Hardware Manufacturers Exhibitors, Limited, at Guelph, was the most interesting development of the 1912 convention. It is firmly believed that it will be possible to conduct the exhibitions in future with more general satisfaction. The new association will take charge of the arrangements in future years.

The officers of this body are all well-known men in the hardware trade, so that it will not be necessary to make any extended mention. A. A. Bittues, the president, has been managing-director of the Gillette Safety Razor Co. of Canada, for a number of years, and has come as closely in touch with the retailers probably as any manufacturer. The vice-presidents are F. M. Tobin, of the Tobin Arms Manufacturing Co., Woodstock; W. J. Nahrwood, of Canadian Yale & Towne, St. Catharines; Chas. E. Stewart, of the James Stewart Manufacturing Co., Woodstock, and M. R. Griffiths, of the Canadian H. W. Johns-Manville Co., Toronto. All are representative men in different branches of the trade. R. B. Johnson, of Pinchen, Johnson & Co., is chairman of the Exhibition Committee, and Adam Taylor, of the Taylor-Forbes Co., is chairman of the Entertainment Committee, both being eminently well suited for those postions. Mr. Tobin is acting as temporary secretary-treasurer.

A number of the officers are shown herewith. Pictures of the rest will appear in a subsequent issue.

ASKED TO REPEAT SPEECH.

Montreal.—J. A. Naud made a reputation for himself by the address on retail salesmanship which he delivered before the Retail Merchants' Association last week. Mr. Naud has been asked to deliver the same address before the retailers of Quebec, and before the hardware dealers in Thetford Mines and Riviere de Loup.

The Management of a Retail Business

By H. C. Carson, F.S.S.

Nowadays, when every nation, great and small, is engaged in the struggle of commerce, the lack of knowledge in the matter of languages and customs is being recognized as one of the chief drawbacks to development and progress. The time may come when a universal commercial language will be adopted, and business customs will harmonize, one nation with another, but until such time, the ability to translate readily and correctly will be found to be a money-making asset in any commercial or financial house. Many mistakes, sometimes merely humorous, but quite frequently very costly, have been committed in the past by firms content to leave the translation of a business letter in a foreign language to the capacity of the ledger clerk or someone else in the office professing a knowledge of the language in question.

Unfortunately for the amateur translator, there is a considerable difference between, say, the French of the evening classes and the French spoken and written by the commercial men of that country. This is why the casual translator, who is quite capable of an intelligent reading of a French novel, sometimes makes errors in the translation of a business epistle which cause more than annoyance.

The wide development of business has brought into the commercial arena countries whose tongues are absolutely unfamiliar to the ordinary man. For instance, a good deal of business, in Canadian goods most likely, is being transacted between England and nations and races speaking such languages as the Frisian, the Slavonian, the Lithuanian, the Sesotho, the Maya, the Pangasinan, the Tagalog, and many others, and it must be realized that there is real need for competent translators. This brief list of tongues excludes those spoken and written by the peoples of the Far East, the Chinese, the Japanese, the Persian, the Armenian, etc., all of whom do a tremendous business with Great Britain, and a growing business with Canada and other countries.

The translation bureau, when adequately equipped, saves the business house all trouble in the translation of foreign correspondence. There are in London several bureaus which make it a boast that their translators can correctly render into English and language of any country which is, so to speak, within the pale of civilization. The translators are highly accomplished men, each specializing in a particular branch of the languages spoken by the races of the commercial world. Some deal with the Latin tongues, other the Slavonic, others the Eastern, and so on. The translators in the first-class bureaus are, moreover, men who have mastered the principles underlying the commercial practices and regulations of the countries with whose language they have such intimate acquaintance. They are, therefore, competent to not merely translate, but to make perfectly clear any points which might baffle a university professor who possessed their linguistic ability, but who lacked their knowledge of international business procedure.

The time is coming when Canada will be in the vortex of international trade, and if the business is to be done direct, without the intervention of other countries better equipped, Canadians must give heed to this very important question. The establishment of bureaus now probably would not pay in dollars and cents, but their inauguration and maintenance might well be undertaken, even with Government assistance, preparatory to Canada's assumption of her place among the commercial nations of the world.

OUR ANNUAL SPRING NUMBER

"Efficiency" will be the theme of the annual spring special number of Hardware and Metal, which will be issued on March 23. This number has in the past established for itself so high a standard that all hardwaremen look forward to its arrival as an important yearly event. It contains, in addition to an unusually large amount of bright and practical editorial matter, advertisements covering every phase of the hardware business. So completely does this number cover the field, that it is used as a book of reference. To the hardware dealer, it serves as an advertising guide and is kept on hand by most dealers for the whole year which follows, until the next special number appears.

It has always been the aim of Hardware and Metal to deal editorially in each special number with some theme of vital importance and current interest. Last spring the idea of "Outside Salesmanship" was developed. In a previous year the bulk of the editorial matter was devoted to a discussion of the relative merits of Cash and Credit; a discussion which awakened widespread interest and led to many dealers changing their methods of doing business.

In deciding upon an "Efficiency number" this year, we believe that we have adopted a theme that is timely and highly practical. There is a big demand for efficiency in all branches of business to-day. There is a marked determination noted to avoid overlapping and waste, to find the short cuts to best results, to reduce all business to a system where incompetency and ineffective methods will have no place. It will be our object to develop the idea of efficiency in all branches of the hardware business; to present the most efficient ideas for the business management of the store, for the pushing of sales, for the conduct of the stove, paint and tinshop departments. In short, it will be our object to present practical ideas which make for efficiency in every phase of hardware retailing.

CANADA WILL SUFFER, TOO

It is hands around the world in trade, now, and what affects little old England, affects the commerce of the world. Never, perhaps, was this better evidenced than at present, when the miners' strike is threatening the well-being of all.

Already in Canada manufacturers are wondering how extensive will be the harm done here by the strike. That harm will result none doubt. It is just a question how much. This of course depends upon the length of time which the strike lasts, but it will not have to continue very long to make itself seriously felt in this country.

Few of the factories in England, it must be remembered, have very large coal supplies on hand. Perhaps they have enough to keep the plants running for a fortnight, but then of necessity the works must close down. This means that there will be no production of tin sheets, zinc sheets, and other metal products regularly exported to Canada in large quantities. Iron and heavier metals too will become scarce here. In the old land there are good reserves of these, so that the supply may not be cut off at once, even if the mills close down; but already the railways are cutting down their service; already the steamship lines are cancelling some sailings; transportation facilities are being seriously interfered with.

This state of affairs, if it continues, will mean trouble in Canada. For some weeks iron has been scarce here. Stocks have been low all winter, and of late the handlers have sold reluctantly. They have been counting upon supplies which will come on the first boats, and if anything interferes with the steamship service the resulting situation in Canada will be serious.

QUALITY OF BARGAIN.

Is the average person influenced more by the opportunity to secure a bargan than by the promise of quality?

A good many hardware dealers are inclined, we believe, to over-estimate the value of the bargain sale. It is quite true that there is a large percentage of people who will buy goods if they think they are getting a bargain, even if they are not sure that the goods they are buying have the desirable quality of durability. On the other hand, however, there is an ever-growing tendency on the part of common-sense people to look for the best goods and to judge from the standpoint of future, rather than present gain. There are also the people who want the very best and are prepared to pay for it, to whom the word "bargain" does not possess any charm. A store which is continually offering goods at low prices is not likely to attract these people. And it must be confessed that the trade of the last two classes is more desirable and more remunerative than that of the bargain-hunters.

Of course, there are seasons of the year when clearing sales are strictly in order. The early months of the year are dull and are generally featured by stock-taking sales. Special efforts of this kind are generally advisable for they serve the valuable purpose of clearing out old stock, thus enabling the dealer to enter on the spring trade with a better assortment of goods. Another phase of "bargain business" which can generally be made profitable is the use of five, ten and fifteen cent tables for the sale of small articles.

As a matter of store policy, however, the merchant who depends upon the quality of his goods rather than the holding out of price inducements to bring trade, has the better chance of lasting success. The interests of the customer are best served by the sale of a quality article; and the store policy which goes hand in hand with the interests of the consumer will bring permanent recognition.

THE SCARCITY OF BRICK

Brick, it is said, is to be scarce this spring. Brick was scarce last fall. The rush of building made it impossible for any reserve supply to be secured, so the early spring building of this year must be done with early

spring bricks. Of old the brickmakers complained because of a corner in straw; but now, with all the necessities, the makers seem unable to meet the demand.

The brick market never catches up with itself. Fall bricks are gone before fall is over. Spring bricks can not well be made until June, when bricks are again in demand.

This is important to the hardwaremen, for without bricks houses can not be finished in time, and builders' hardware, paint, tin work and similar lines are not wanted until late in the season. It is this which causes much of the great fall rush.

Canada at the present time is crying out for brick. It would seem that this is a line of activity which is not overcrowded.

FEATURE HOUSECLEANING GOODS

The time is not far off now now when the thrifty housewife will start to tear things to pieces in the old approved housecleaning fashion. This means much to the hardwareman, for there are a large number of articles indispensable for housecleaning which can be obtained only at the hardware store. The necessity arises in every household now for brooms, mops, pails, carpet beaters, carpet stretchers, gloves, polishes and a great variety of other goods. All these lines should be pushed to the front without delay.

Many hardwaremen have not yet added vacuum cleaners to their stock in trade. There is no time to start like the present. The vacuum cleaner is invaluable at housecleaning time. It saves labor and does the work much more thoroughly than can be done in any other way. The time is not far off when the vacuum cleaner will be recognized as quite as necessary in a house as a heating system.

The hardwareman should also make it a point to feature paint and varnish for housecleaning purposes. The house may be thoroughly cleaned and scrubbed but no amount of work can add polish or gloss to old furniture or cover up the seamed surfaces of worn woodwork. Housecleaning shows up the necessity for paints and stains in most striking manner and the dealer who features these lines at such time will undoubtedly find a heavy demand.

KEEP BACK COPIES.

The "Complete Course in Sheet Metal Work," now running in Hardware and Metal has created deep interest among tinsmiths and metal workers. The series is being closely followed and already many requests have been received for back copies.

It would be well for all who are following the series to keep each issue of the paper on hand. If space does not allow they should at least file the pages devoted to the course. It will be found that in many installments references are made to plates and problems which have previously appeared. In order to follow the course closely then, it will be necessary to have all back issues on hand for reference.

POINTED EDITORIALS.

Keep a record of your stove sales. It will help you with every customer who enters your stove department.

* * *

An American has invented a new stove which, he says, is going to revolutionize heating methods. But most of us will go on using the old style stove just the same.

The annual spring special number of Hardware & Metal will be a record-breaker in every respect this year. Watch for it.

* * *

Now that the conventions are over it remains to be seen how many will profit by the suggestions made at the various meetings.

* * *

Waiters in the Windsor Hotel, Montreal, have gone on strike. They must have heard the agitation that the travelers are waging to abolish the tip.

* * *

Trade in the West is opening up. Industrial life is awakening in all parts from its winter sluggishness, with the impetus given by the near approach of spring.

* * *

Order early is good advice. After so severe a winter, an early spring is highly probable and dealers who neglect getting their requirements placed, may be caught unprepared.

* * *

March came in without showing any near kinship to either lamb or lion. But it doesn't really seem much to matter how March comes in, it's exit is usually stormy and welcome.

* * *

It is necessary to fix an advertising appropriation. Haphazard management in that department may lead to serious results. The dealer should not spend too much; but neither should he spend too little.

* * *

In spring the housewife's fancy lightly turns to vacuum cleaners, mops, brooms, carpet beaters and such like things. The dealer should put a stock of such articles to the front as soon as the weather shows signs of relenting.

* * *

The time is not far off now when the head of the house will eat his meals down town and beat carpets all evening. In other words, housecleaning is near at hand. The hardwareman should prepare for the trade that crops up at this nerve-racking time.

* * *

During the first twenty-four days of February one Montreal paint house did $4,000 more business than during the whole month last year. And there was an extra day in February this year, too.

* * *

The turpentine market has been dull and uninteresting this year when one considers the highly spectacular course of that commodity last winter. No complaints have been heard from the hardware dealers, however.

* * *

The baseball teams have gone south and from now on the sporting pages of the paper will be more interesting. But the training season means more than pleasure to the fans. It means the start of baseball sales to the retail dealers.

* * *

Efficiency is a word which means much. It expresses highest development in any particular work or line. A man who has not worked hard, studied hard, and given of his best thought and a full measure of enthusiasm to his vocation, cannot become efficient. And efficiency is what is demanded in this hustling and efficient age.

Hardware Store Publicity

Chapter 4.--- Appropriation and Space

Some time around the first of the year, the progressive advertiser sits down and figures out how much he is going to spend on advertising and how he is going to spend it. The first is, of course, the primary consideration. The question of an appropriation must be settled before anything else can be done.

It is probably true that not more than one merchant in three fixes a yearly appropriation for advertising. The writer is firmly convinced, however, that it pays to fix the amount to be spent in advance. By taking this course, the dealer avoids the danger of spending more than he can afford and the almost equal danger of not spending as much as he should.

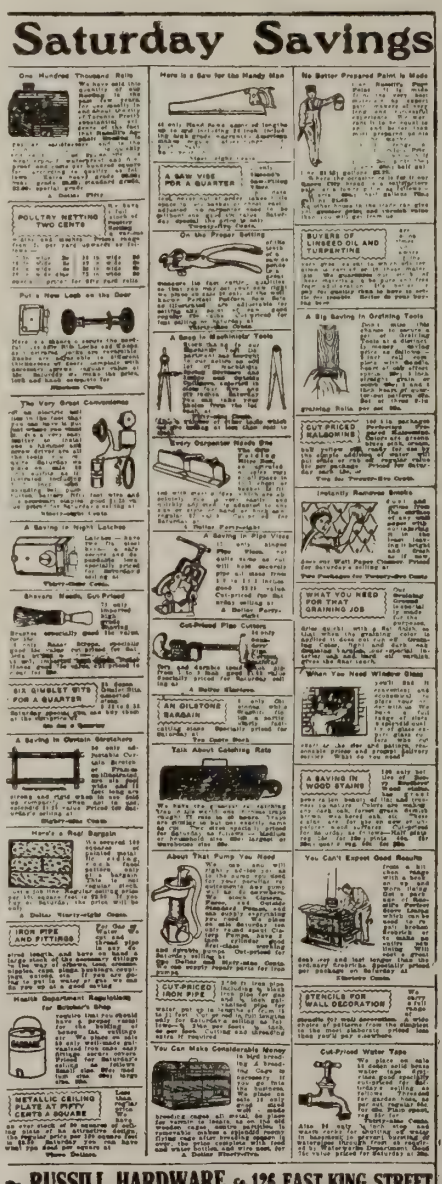
How much should be devoted to advertising? is a question very frequently asked and never answered with complete satisfaction. The truth of the matter is that no rule can be laid down which would fit every case. A chewing gum concern can spend many thousands of dollars a year and find that it pays them. It depends largely on the scope of the business, the extent of the field and the possibilities of expansion. In the retail hardware business, it will depend largely on the size of the yearly turn-over and on general local conditions. It may be possible to fix an amount under which no progressive hardwareman can afford to go and a maximum sum which he cannot, in safety, exceed, but, other than that, no one can lay down a rule which all must follow. Between the minimum and maximum of advertising expense, there is a wide range and every merchant must decide for himself just where he fits in.

One of the most aggressive retail advertisers in the Canadian field is a young hardwareman who has a business with an annual turnover of $40,000. He spends $600 a year on advertising. In other words, he lays out 1½ per cent. of his turnover for advertising purposes. Of that amount, he spends $500 with the local papers and the rest is devoted to calendars at Christmas and a few circulars during certain seasons.

Many dealers doing about the same business do not spend nearly as much as that for advertising. One man with a business in a live city of 20,000 population made the statement to the writer that last year he had spent only about $100 for publicity. "The year before I spent over $400," he explained. "This year I cut it down almost to nothing and my sales have not fallen off one jot."

But the sales had not increased. The city had grown, new factories had located there, other merchants had increased their annual turnover very materially. This merchant had just held his own. He had saved over $300 on advertising, but had lost many thousands, no doubt, in increased business. He had cut his publicity expense below the minimum figure.

Other dealers go to the other extreme. The writer has heard it stated that a merchant should devote 3 per cent. to advertising. The statement was made by a hardwareman whose annual turnover would aggregate $100,000 a year, at least. If this man devoted $3,000 a year to advertising, he was spending too much.



The Russill Hardware Co., Toronto, believe in concentrated advertisement, one-half page ad. on Friday constituting their programme.

In arriving at an average, one must bear in mind that the dealer in a large city must spend more proportionately than the dealer in the small town or village. The country hardwareman uses the weekly paper and the rates he is called upon to pay are low. The city dealer has two or three daily papers to consider and he will probably find it necessary to use them all.

In the opinion of the writer, 1 per cent of the annual turnover is about the average amount that should be set aside for advertising. The country dealer will not use that much in a majority of cases. We have in mind a hardwareman in a place of a few hundred people who, nevertheless, does a yearly business of $35,000. There is a small weekly in that section and the hardwareman in question does not need to spend $350 to secure enough space for adequate publicity—not by a wide margin. On the other hand, some hardware dealers in large cities have to spend more than one per cent.

The Matter of Space.

Having decided how much to spend, it next devolves on the hardwareman to plan how it is to be laid out.

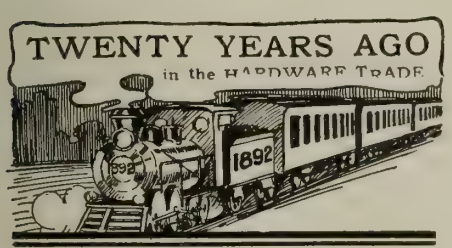
Differences of opinion exist as to the best way of using newspaper space. Some believe that it pays best to contract for certain space in every issue. When the appropriation is small, space contracted for on this basis must necessarily be small. Others do not use space in every issue but "double up" every other day, or perhaps advertise only once or twice a week, using large space then.

The advocates of the regular space system claim that by having their advertisement in the same place day in and day out, they are more certain of reaching every reader. It may be overlooked by a reader one night but it will not be overlooked often. It is always there and it familiarizes the firm name with every reader of that paper.

Dealers who advertise less frequently but take bigger space argue that to tell a story once in a forcible manner that cannot fail to impress, is more effective than to repeat the message continuously but in weaker fashion. There are a great many hardwaremen who are following this policy now, notably the Russill Hardware Co., of Toronto, who advertise only on Fridays, taking half-page space in all the daily papers on that day.

The case is recalled of a Western Ontario stove dealer who had been using a single column five-inch space in the daily papers in the stereotyped way—infrequent changes of copy and scant attention on the part of the printer combining to make the advertisement unattractive and comparatively ineffective. This dealer decided finally to try another method and he accordingly dropped his regular space and started in to advertise once a week in two-column full-page length space. He gave more attention to his copy and saw that it was set up carefully and attractively. And he got better results. There could be no doubt about that. The only unsatisfactory feature about it was that his business became centralized more or less on the days which immediately followed the publication of the advertisement. It is highly probable also that the meagre results obtained in the first instance were due rather to the careless methods pursued than to any fault in the system followed.

Perhaps the best system under all circumstances is to advertise in regular space and enlarge the size of the advertisement when there is anything special on hand. Undoubtedly the use of big space will bring big results but, for a general advertising policy, no business man can afford to overlook the substantial and regular benefits which can be gained only by regular unremitting effort.



The following items are taken from the issue of March 5, 1892:

"On Tuesday last, negotiations that had been long on foot for a consolidation of paint manufacturers, were brought to a conclusion when the Canada Paint Co. formally took over the properties of the houses it bought out. The manufacturers thus merged in the new company are: A. G. Peuchen Co., Toronto; Fergusson, Alexander & Co., Montreal; the William Johnson Co., Montreal."

Editor's Note.—The sequel to this amalgamation came last June when the Canada Paint Co. was merged with the Sherwin-Williams Co., of Canada. It has continued in operation under the old firm name.

"D. McKillop, for the past twelve years manager of the Toronto branch of the McClary Manufacturing Co., has resigned on account of ill health. His place has been taken by A. D. Kennelly, whose connection with the firm is of about as long standing as Mr. McKillop's."

Editor's Note.—Mr. Kennelly is still Toronto Manager and will, it is hoped, see many more years of service with the company.

* * *

"The Massey Harris Co., of Toronto, have just placed with the B. Greening Wire Co., of Hamilton, one of the largest chain orders on record. The order was for fifty thousand feet."

Editor's Note.—The size of this order shows that Canada's industrial development was marked at that time.

Hardware Letter Box

Common tables and chairs—Canada Furniture Co., Woodstock. Lawn seats—Stratford Mfg. Co., Stratford, Ont. Rubber tennis shoes—Canadian Consolidated Rubber Co., Montreal.

By "Mack."

I presume to say that occasionally the most of us are prone to the fault of endeavoring to pursue too many enterprises simultaneously.

From time to time the resolve is taken to finish one matter before taking up another.

But, perhaps, the next day many situations develop which clamor for attention and again the temptation to overstrain is presented, for each item of the lits appears to carry disastrous consequences in its train should it be neglected.

And in the excessively anxious state of the imagination all the rest of these business cares are similarly threatening. Therefore, a beginning is made on something nearest to hand and before long in the zeal for accomplishment, work initiated on the remainder and confusion is difficult to avoid.

Some business men are endowed with enough extra power to carry through the daily routine in this somewhat disorderly manner. Satisfactory returns are even obtained out of seeming confusion. But such men are not of the average level and we cannot use their achievements as good examples for our emulation. Rather, they are interesting in having received from nature a larger amount of vitality than she usually dispenses, by which means they are able to assimilate quantities of work and responsibility without unusual disturbance.

These enviably equipped individuals may even engage in ventures outside of their customary channels and do it successfully. They are like those happy people of whom we say "They can digest or eat anything and thrive," while less fortunate members of the human family find it necessary to discriminate in this respect very strictly. For if we act upon certain theories regarding the benefit of simplicity to our physical welfare it is soon proven that the long course banquet of many complicated dishes gives less pleasure than we anticipated.

Lesson 10--Complete Course in Cardwriting

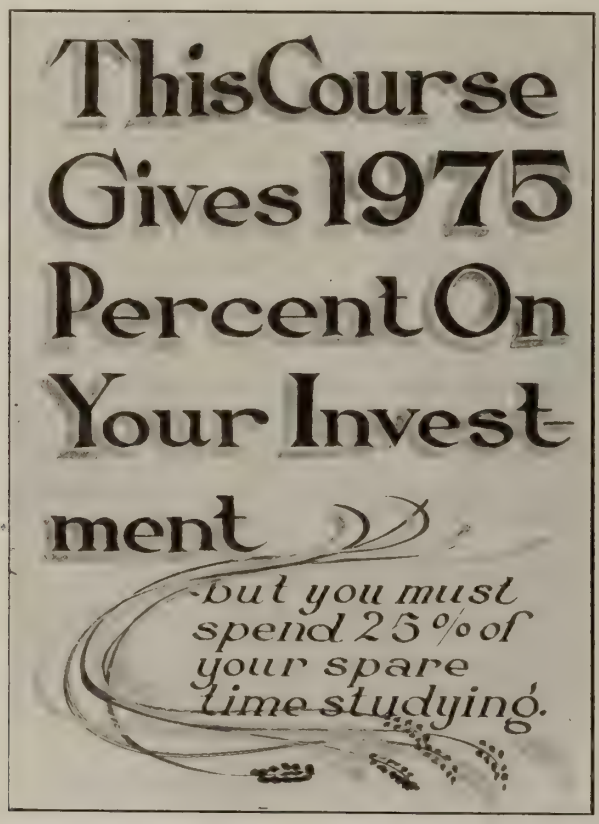
The Last Lesson on Brush Stroke Numerals — Speedy Price Ticket Styles Taught in the Edwards Short Cut System—Important Points to Observe.

(By J. C. Edwards.—Copyright, Canada, 1911.)

The call for the speedily-made price ticket to-day, is an urgent one, and must be heeded. Hundreds of stores all over the country use price tickets when they feel that show cards are too expensive a luxury.

The price ticket is a silent salesman and one needs only to parade to the city stores, the town stores and even the rural merchandising centres to find out to what extent this is true.

The department card is most valuable and varies in size from 1-8 which is 7 inches by 11 inches to the ¼ size (11 x 14 inches). The favorite way of writing the department card, whether it is used with lettering or just a price, is the "landscape" or in other words having the inscription running the long way of the card. This is the reverse to the card illustrated here, which is written in panel style, and will be referred to in the future in this course as such.



Show-card, Showing Applica tion of Brush Stroke Roman.

Price Tickets and How to Write Them.

We will deal exclusively in this lesson with department price tickets and will go into individual ticketing in lessons on pen lettering. The quarter size card is used to the best advantage in departments where large articles are displayed, such as piles of underwear, dress goods, in fact, almost any kind of goods except small articles where a great number of cards are needed, and would hide the display.

The inscription must always be written in the centre of the card with the price the most prominent, where the price is the main feature, but, where the price is only secondary, the name of the goods or whatever other phrasing be used, should be the most pronounced.

The cent mark should follow the price when the price is in cents only and the dollar sign should always precede the price when it represents dollars only. But where the price is in both dollars and cents neither mark is absolutely necessary; though it is advisable to use the dollar mark. Never use a decimal in front of a price such as .35—write it "35c."

In referring to the plate showing the two styles of prices, the straight Roman and the speedy slant Roman, we might draw attention to the slight difference in make-up of the two. You will notice, in the first place, that in the straight style, the spurs are pronounced, whereas in the slant style the absence of spurs is very noticeable. Spurs take time and when they are omitted greater speed is acquired.

The figure one in either case is only different as far as the angle of the stroke is concerned; "2" in the slant Roman has only three strokes while, in the straight, it practically represents four. Two strokes are saved in the "3," three strokes are saved in the "4;" there are three strokes less in "5" in the slant Roman than in the straight. This is quite a saving and enables one to gather more speed, for "5" is a very common figure in every day price tickets.

The "6," as in the "9," means a slight saving in the slant as compared with the straight style of lettering, but the eight, in both cases, is practically the same. The "0," too, has only two strokes in both styles. However, it can readily be seen that the latter style of numeral is planned with the idea to attaining greater speed. The slanting tendency of this lettering, as has been spoken of previously, tends to create speed owing to the natural instinct of the writer to follow the earlier teaching in handwriting.

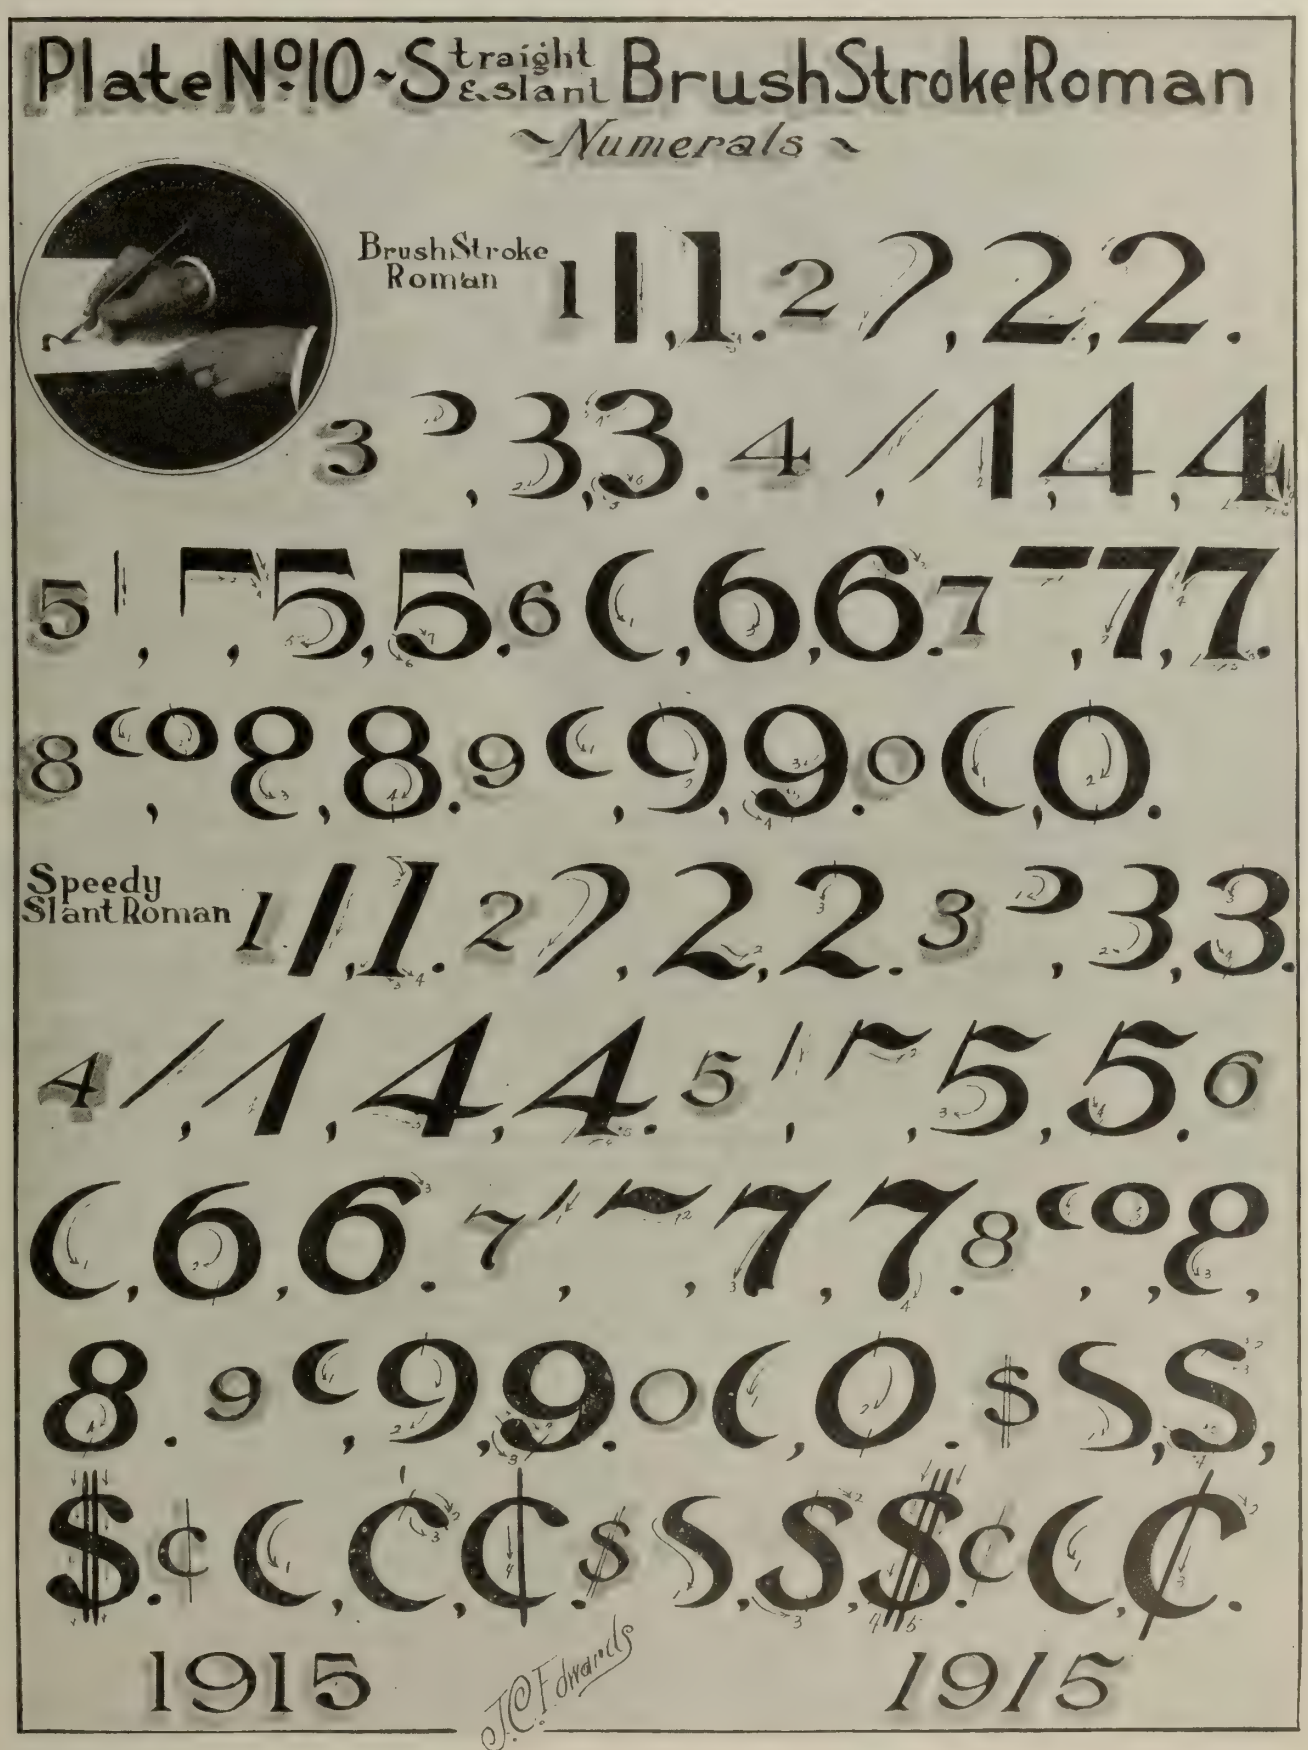
A very important point to be observed in writing cards with a price is this. Never write a card with a slanting price when the lettering above slants; always use the straight price and for any card with lettering at all we advise the use of the straight price only. The slanting style of numeral is adapted more for use on price tickets. This is not a hard and fast rule in cardwriting, but the outcome of years of experience in actual card-writing and one that the author adhered to rigidly in later years. There is strength in contrast, as you will find by experimenting.

The accompanying show card, though rather exaggerated in its statement, shows the use of the capitals anl lower case letters of the Roman and the speedy slant lower case letters along with the straight and slant figures.

The form of decoration is simple and easily executed; crude in fact, but effective. This is made more pronounced in the accompanying card than it would be in an actual card. For the purpose of illustrating, some delicate tint, such as grey, mauve or blue should be used.

Take a small quantity of white paint, mix in a slight quantity of blue (dry, or wet with mucilage), add a touch of red and work up thoroughly. Blue should predominate if purple is desired, but if a pale mauve shade is required, soften with more white. Don't forget that practice and experiment are the great teachers in card writing as in every other line.

Don't be afraid to waste paint; it is cheap. Try to improve on every letter, speed will come later.



Numbers of the speedy slant Roman type, valuable in making price tickets.

Veteran Figures in the Hardware Field

No. 10—J. Roger, Atwood.

Nothing succeeds like success.

The politician who has secured a majority on previous occasions, the writer who has turned out several best sellers, the business man who has worked up the best trade in town; all three can keep on succeeding with less effort than the beginner who has yet to score his initial success. It is equally true, however, that after a reverse, it is almost impossible to again strike the old stride. Success to be complete must be continuous.

There is a moral in this for the merchant. The man who gets out of the **rut,** who does things a little different from the rest, has everything in his favor. If he scores a success with one step, it will be much easier for him to make good everything that he tries thereafter. Nothing ventured, nothing won, is another proverb bearing on the same point. The man who ventures nothing, who pursues his staid old jog trot when the spirit of the times calls for a brisk gallop has little likelihood of ever getting more than the modest share of prosperity that has been his share always. He lacks the inspiration of success.

Periods of industrial depression may come and P.'s of I. D. may go, but J. Roger, of Atwood, goes on building up his uninterrupted series of business increases just the same.

Which brings us to J. Roger, of Atwood, Ont. Mr. Roger's experience in the hardware business is ample proof of the saying that "nothing succeeds like success." It is just twenty-five years ago this month since he started in business and he has had an increase every year. Periods of industrial depression may come and P.'s of I.D. may go. but J. Roger of Atwood goes on building up his uninterrupted series of business increases just the same. His success has been continuous and ample.

Mr. Roger's success has been due to the steady application of sound business principles and to his ability to keep up with the times. He has benefited from his success each year by applying the lessons that he has learned to the conduct of his business the following year. The impetus of the steady growth of his business has undoubtedly helped to keep him going and has spurred him on to renewed efforts and continued watchfulness. Mr. Roger has always been cognizant of the fact that the hardware trade is growing and he has striven to grow with it.

If a further lapse into a moralizing strain be permissible, we desire to say at this juncture that the hardware trade is the greatest grower on record. It grows over night. That day is counted lost whose low descending sun (as per quotation) sees not some new line on the market, or some new idea developed along trade lines. One can't run a 1912 hardware business on the accepted lines of 1902; that is, one can't if one covets success. The hardware merchant has to develop continually, if he desires to keep up with the trade.

Mr. Roger was born near St. Mary's, Ont. He entered the hardware business when a young man and in the year 1887 we find him starting in business at Atwood in partnership with R. Brooks, under the firm name of R. Brooks & Co. Four years later, he bought his partner out and has since run the business himself. He is acknowledged by all to be a good hardwareman, with a keen insight into trade problems.

Eight years ago, he decided to enlarge the scope of his business and added a furniture and undertaking department. This undertaking (a pun but quite unintentional), proved so successful that he has kept it on since and has a perfect average in yearly increases there also. He has found that, in a small town, these lines work together nicely.

Mr. Roger is not a veteran in point of years, even if he has been a quarter of a century in the trade. He is still in the prime of life and will, we trust, continue to achieve an increase every year for twenty-five more.

There is one respect in which he is a veteran. He has been a continuous subscriber to Hardware and Metal for 18 years. During that time he has read it regularly and has benefited by the advice and information which his weekly visitor has brought him.

Mr. Roger believes in taking part in public affairs. He is an active member of the Atwood Board of Trade and also serves in the capacity of treasurer of the public library.

HOW TO PHOTOGRAPH A WINDOW

Get two poles, each a little longer than the height of the window. Then cut strips of black cloth a little longer than the window is wide (lining cambric or calico will do), sew together and tack upon the poles. Now you have a large, black screen to cut off all reflection from across the street. Cut a hole in the cloth for the camera, get two boys to hold the screen and you are ready to take the photograph.

Best results in day-time photography are obtained in the early morning of a clear day or at the time when the window receives the greatest amount of light. Pictures of strongly illuminated windows may be taken at night by the use of an explosive or flash. In this case the film or plate should receive an exposure of from ten to twenty-five minutes to bring out the greatest amount of detail.

Have all lights in the windows well shaded and as high up and near the pane as possible. This will bring out the contrast between shadow and high light, making your picture many times more effective.—Exchange.

BANQUET TO W. T. COX.

Montreal.— A complimentary dinner was tendered Wilfred T. Cox, recently, the occasion being his departure to assume the duties of manager of A. C. Leslie & Co.'s new branch at Winnipeg. T. H. Jordan, vice-president, presided in the absence from the city of President W. S. Leslie. After the toast of the King had been honored, E. H. Copland with a few well chosen words presented Mr. Cox with a gold watch on behalf of the officers and staff. Mr. Cox left by the Imperial Limited, and was given a hearty send off. He is followed by the good wishes of a host of friends in the hardware trade here.

Getting Ready for Housecleaning Trade

Hardwaremen Should Begin the Campaign Early—Stocks Should be Ordered Well in advance—Some of the Goods to be Featured—A Vacuum Cleaner demonstration Will be Found Useful—Look After the Paint Trade.

Housecleaning time will soon be here. The housewife starts to work just as soon as the weather permits. As the weather prophets are predicting an early spring, the chances are that the annual household upheaval will begin early this year.

The hardwareman probably suffers at home during housecleaning time the same as other men. He has to accustom himself to eating off the kitchen table, dodging pieces of wet soap on dark stairways, beating carpets and moving pianos. But unlike other men, he has very substantial consolations for the discomforts that housecleaning entails.

Other men have to buy the implements used in the warfare against dust and germs; the hardwareman sells them. He can afford, therefore, to regard the approach of this season with equanimity, even with satisfaction.

Most of the goods which come under this category sell more or less regularly the whole year around. The demand is heavier in early spring than at any other season, however, and the dealer who goes after business in a thorough and aggressive manner can make the trade both large and profitable. The time to start the campaign is now. While an active demand will not start until the weather shows convincing proofs that spring is at hand, it is not too early to begin featuring the goods. Prominence to these lines now will result in bigger sales when the demand starts. At any rate, the dealer should see to it that he is stocked up and in a position to handle the trade when it comes.

The Lines to Feature.

There is a large variety of goods which can be featured for the housecleaning trade. Brooms, brushes, mops, pails, carpet stretchers and beaters, hammers, screw drivers, tack pullers, nails, tacks and so on ad infinitum, are found necessary in every household when the spring rejuvenation starts.

A good scheme was tried out by a dealer last spring with satisfactory results. One side of his store at the front he turned into a housecleaning department. A table was used for the smaller articles and the other lines were shown to best advantage. Over this section of the store, a large sign was suspended:

YOU WILL HOUSECLEAN SOON. WHAT DO YOU NEED?

The dealer found that every woman who entered the store displayed an instant interest in this exhibit. They looked over the goods and, with very few exxceptions, made a few purchases. He sold more brooms in one month than he had done in any previous three months. Most of the sales too, were of a particularly good quality of broom.

As a special attraction, he held a vacuum cleaner demonstration. The vacuum cleaner was a novelty in that town and he had a constant succession of visitors to see the new device. He sold a number of cleaners, rented more and succeeded in selling a great amount of other goods to people who called in for the sole purpose of seeing the vacuum cleaners. So the demonstration was a big success.

A Window Display Soon.

Undoubtedly, a great deal can be done by arranging a window display of housecleaning lines. Many people will notice it who would not have entered the store otherwise but who may be induced thereby to step in. This should be done very shortly. A display now to call attention to the fact that the hardware store carries the goods and one later on when the housecleaning season starts, would serve to give effective publicity.

Feature Polishes.

There is so much work incidental to housecleaning that the trade possibilities are wide. For instance, old stoves must be polished, and there will be, as a result, a big demand for stove polishes. Gloves are needed for use in applying the polish. Silverware, cutlery and brass goods, must also be brightened up and this creates a demand for the polishes used for that purpose.

A good method for use in featuring these lines is to place some article in the window, say a tea kettle, half of which has been brightly polished and the other half left in a dull and stained condition. The contrast will serve to show the splendid results which can be obtained. A dealer who followed out this idea last fall, placing the kettle on the top of a pyramidical formation of packages and tins containing polish of various kinds, sold a surprising amount and has been getting repeat orders ever since.

Push Vacuum Cleaners.

A strong effort should be made to get the public interested in vacuum cleaners. A complete change of house-cleaning methods is being brought about by the introduction of vacuum cleaners and the hardwareman who does not handle them will find that he is missing a splendid opportunity for profitable trade.

As the cleaner is still a comparatively new device, although coming into public notice with singular rapidity, the best method to be pursued in featuring it is to hold a demonstration. Most people have a skeptical vein and, while they may have heard of the wonders that the vacuum cleaner can perform in causing dust and dirt to vanish, they want to see it done themselves. Seeing is believing. It devolves on the dealer, therefore, to bring conviction through the medium of an actual demonstration.

As noted above, there are other advantages involved in the demonstration scheme. People drop in to witness it and they buy other goods before leaving.

Renting Vacuum Cleaners.

The question of the advisability of renting will arise. It has already been discussed in Hardware and Metal, but a further reference will be in order. The renting of machines undoubtedly helps to introduce the cleaner in sections where it is an unknown quantity. People rent a machine once and, finding how valuable it is, buy one. This happens sometimes. There is the danger, however, that they will continue renting at infrequent intervals instead of purchasing, as they might have done had the other way not been possible.

Renting should be done cautiously and should be used as far as possible as a means of effecting sales.

The Paint Question.

The possibilities of paint in connection with housecleaning should not be lost sight of. There is a great opportunity presented for sales of interior paints, varnishes and stains. Every home needs a certain amount of "touching up" in the spring. The steady winter wear has left its mark on floors and woodwork. Furniture has become scratched and dull. The proper time to look after this sort of work is when the carpets and rugs are up, the curtains down and the furniture out.

The dealer should see to it that interior paint lines are made a very active feature of his spring campaign.

Complete Course in Sheet Metal Work

By L. W. KOSER---Number 4

Place the T-square parallel to the line N-M and bring it successively against each number on the profile, and make a mark on the corresponding measurement line.

A line traced through these marks will give the pattern.

It will be noticed that at the bottom of the pattern we have shown a flange, that does not appear on the profile; this is for folding over to strengthen the bottom of the finial base. Try and set the work as near as possible to that shown on the plates.

Plate 6 gives a few problems which are done the same as Figures 7 and 8, Problem 2.

Fig. 1 is an ordinary OG eavetrough, and Fig. 2 is its inside and outside mitres. Fig. 3 is a half-round eavetrough and Fig. 4 is its inside and outside mitres.

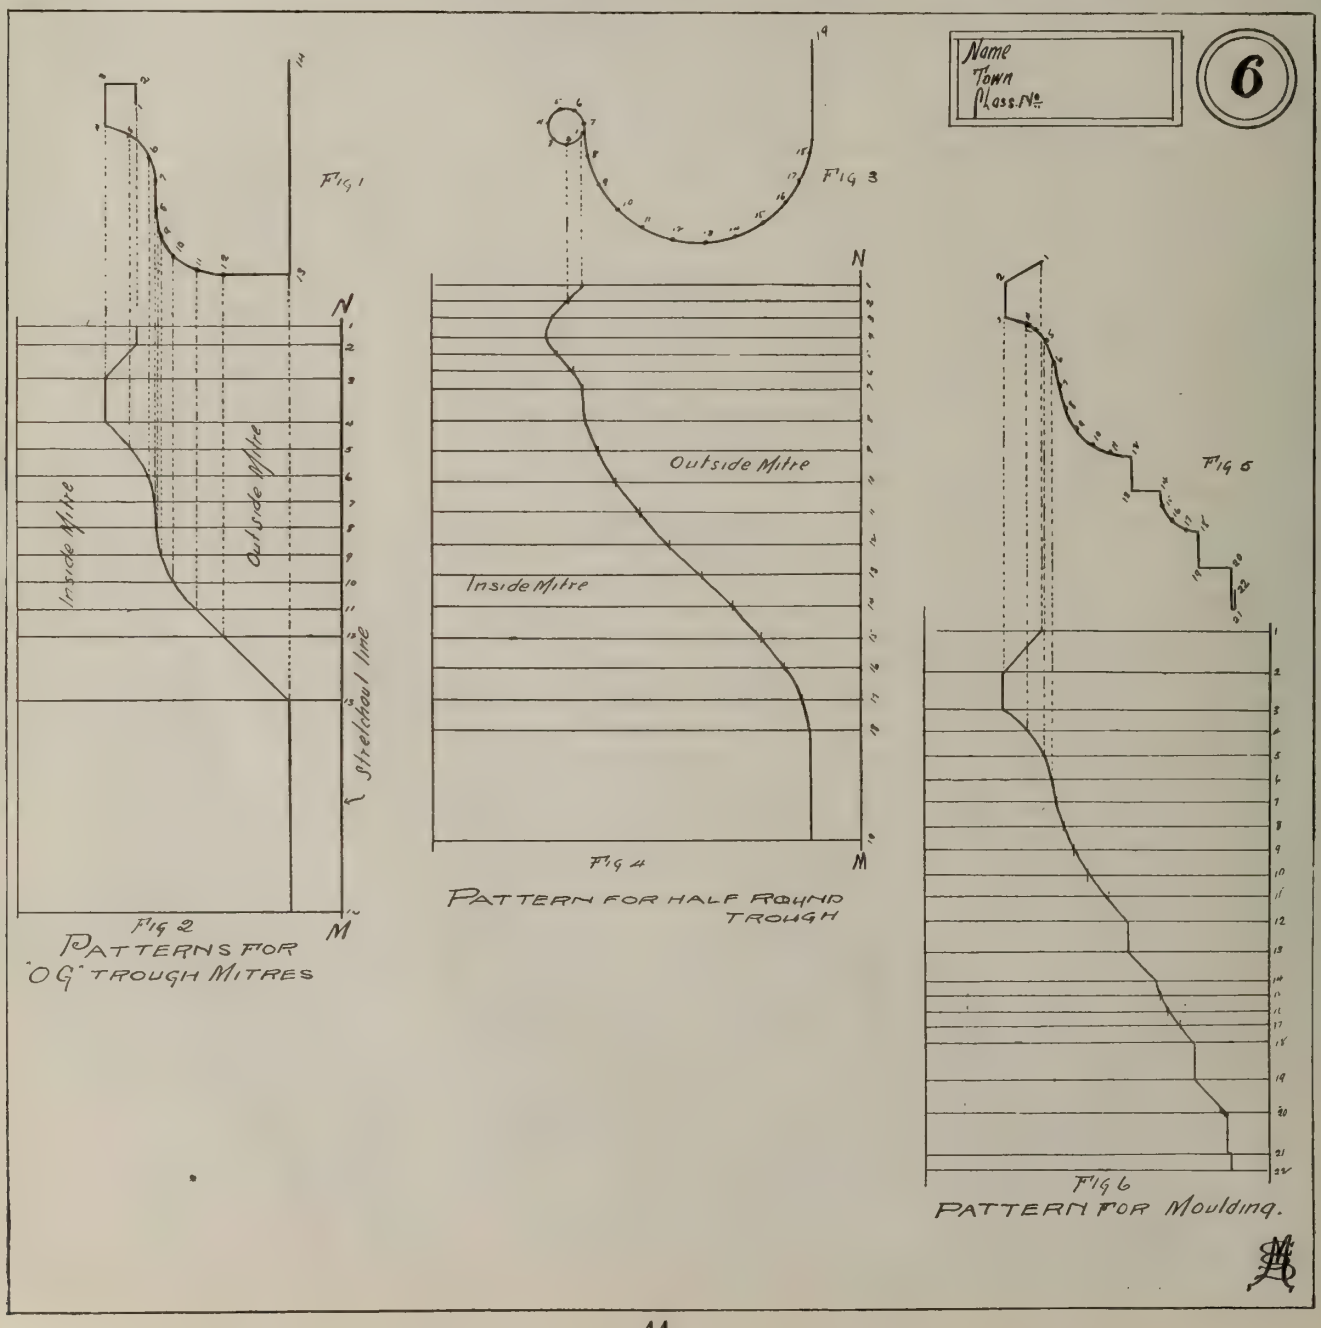
KEEP COURSE ON FILE.

For the benefit of all who are following Mr. Koser's course in sheet metal work, we have a suggestion to make. Tear out the pages devoted to the course and keep them on file. It will be found that references will be made to figures shown on plates used earlier in the series and it will be possible to follow the instructions more carefully if all plates are on hand for ready reference.

The metal worker will soon learn to drop the points on the profile to the measurement lines on the stretchout without using the dotted lines. Merely place the edge of the T-square against the different numbers on the profile and make a mark on the measurement lines directly below which have the same number, then a line traced through these marks gives the pattern.

Plate No. 7 shows the method of developing the pattern for any style of square ornament.

In problem 1, Fig. 1 is the elevation of a finial base and Fig. 2 is the pattern of



one side, the other three sides of course being the same.

In problem 2, Fig. 2 is the elevation of a small finial and Fig. 4 the pattern of one of its sides.

The method of developing a pattern for a square ornament is practically the same as getting a square mitre.

The elevation or profile of the object is first drawn, as Figures 1 and 3.

The curved parts are divided into any number of equal spaces; the spaces on the different curves do not, however, have to be the same distance apart. In fact, they could not very well be so; the width of the space depends almost solely on the sharpness of the curve. For instance, where the curve is small, it is necessary to divide it into smaller spaces so that the distance from one space to another is as near a straight line as it is possible to get it. On the other hand, if the curve is large the spaces can be fairly wide apart.

Now take Fig. 1. Begin at the top and number this 1, and where the first bend occurs, number it 2; divide the curve into any number of equal spaces and number each; divide the large curve into any number of equal spaces and number each. The next number occurs where the next bend comes.

Then comes another curve which is divided into equal spaces and numbered. Continue on to the end of the pattern, placing a number wherever a bend occurs in the profile.

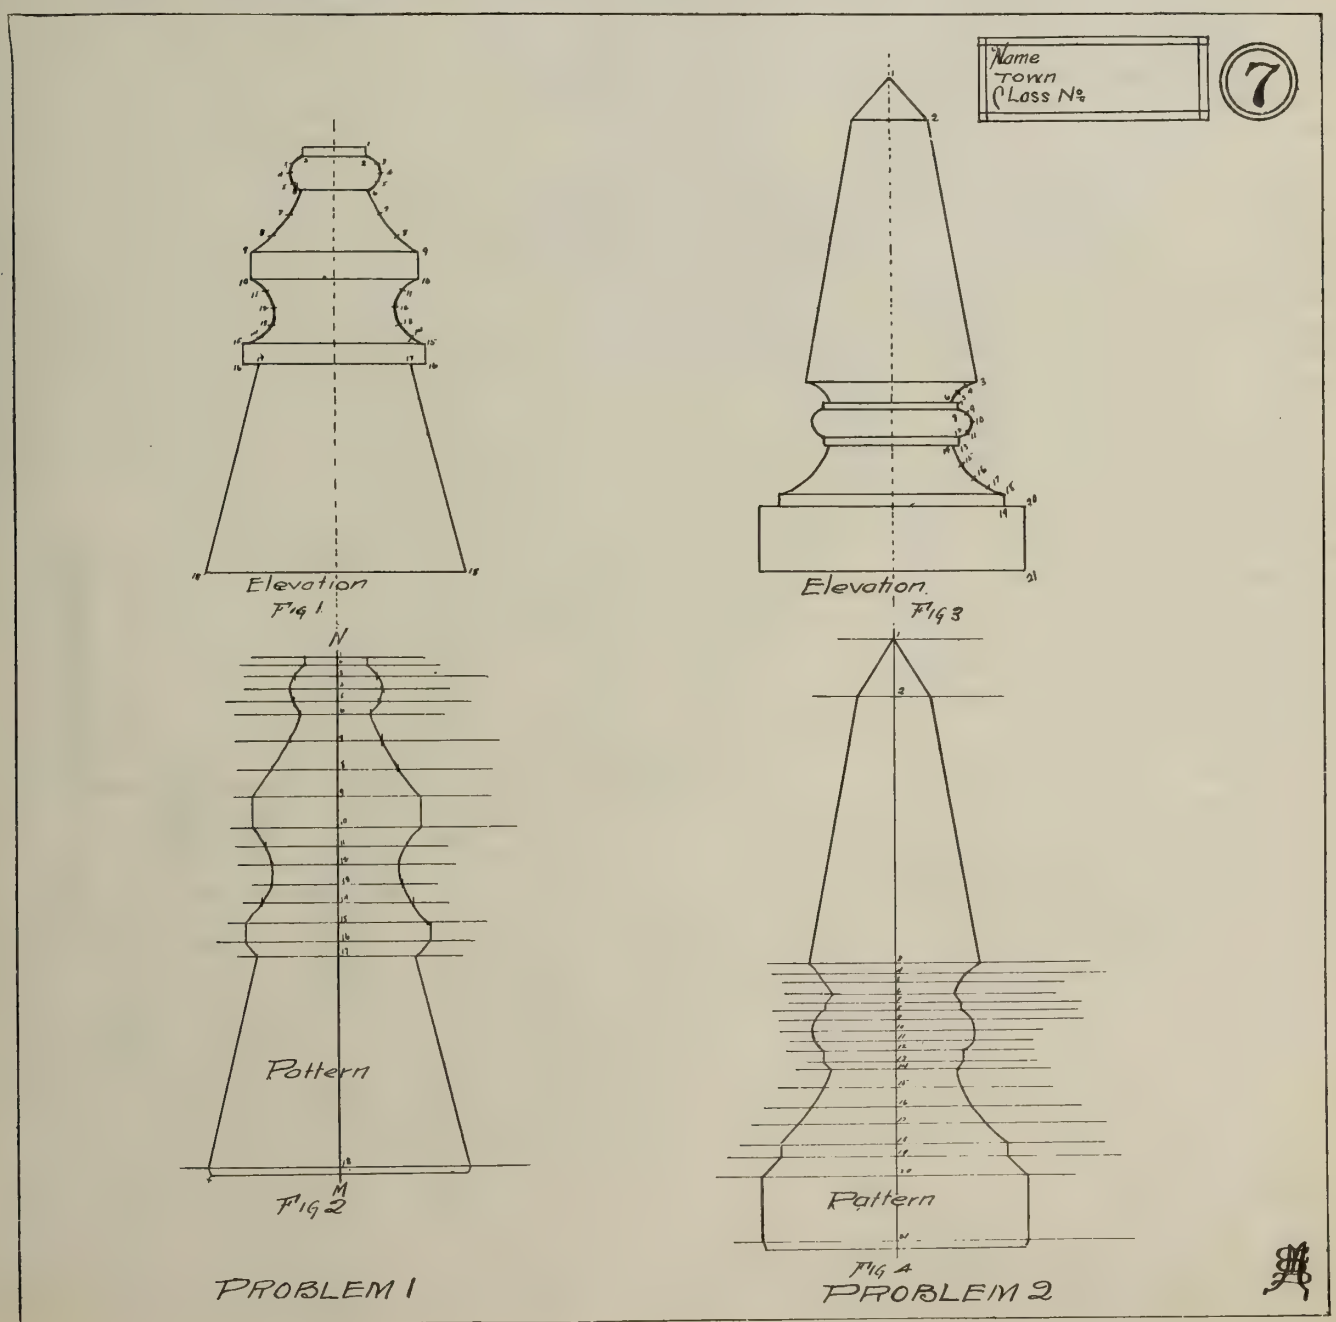
Lay off the line N-M and transfer the stretchout of the profile to this line, and draw the usual measurement lines through each number; in this case, the measurement lines are drawn about equal distance on either side of N-M.

ON CASH BASIS.

Camrose, Alta.—Storey's hardware store has been put on a strictly cash basis. This decision has been advertised, together with the announcement that there will be "one price to all and that price the lowest."

With the change in policy, they have adopted the slogan, "The store that saves you money," and are using it in all their advertising matter.

The firm also announce that they have added a line of crockery to their hardware stock.



Progressive Hardware Retailing

Merchants Are Beginning to Feature Spring Lines—This is Tool Time—Advertising Tools for Housecleaning Purposes—A Method of Preventing the Frosting of Windows.

THIS IS TOOL TIME.

Early spring sees a rapid and noticeable improvement in industrial conditions. There is a result, a larger demand for tools and mechanics' supplies generally. The present is a splendid time to push the sale of tools.

There is pretty general recognition of this fact and tool displays are budding forth, if such a term be permissible in hardware windows in great numbers. Tool advertising is also appearing and hardwaremen state that the sale of tools has been heavy. And it has only nicely begun.

The firm of Johnson Bros., Boissevan, have been conducting a vigorous campaign along this line. They have been advertising the fact that they have a $500 stock of tools on hand, which they intend to dispose of. If their methods can be accepted as an indication of the probable results, Johnson Bros. have disposed of that stock by this time.

SPRING CAMPAIGN STARTED.

Hardwaremen are already beginning to feature spring lines. Many dealers have already begun their campaign, among them being the following:

Caledonia, Ontario.—B. E. French, hardwareman, is advertising coiled spring wire, announcing the near arrival of the first car lot. He is also advertising axes, cross-cut saws, leather mitts and other seasonable goods.

Dundalk, Ont.—Russell Bros. are starting in after the sugaring trade. "Sap's runnin' " will soon be the signal and this will mean a demand for sap buckets, kettles and similar goods. Russell Bros. are anticipating the demand by advertising them under the caption, "Preparing for Spring." They are also advising for purchase of harness and harness parts before the spring rush starts.

Shelburne, Ont.—R. A. Jelly is already pushing a vigorous builders' hardware campaign. He has his full stock in and states that it is the best he has ever shown.

Carleton Place, Ontario.—Muirhead's hardware are out after trade in varnish stains. The near approach of the housecleaning season makes a good demand for stains a surety in the near future. Muirhead's are running attractive advertisements.

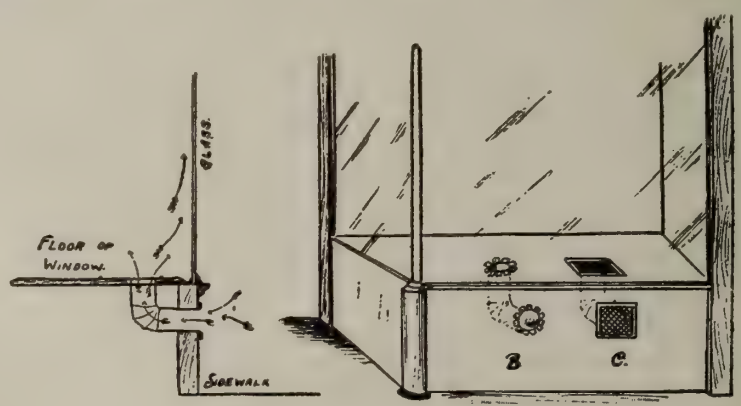
Dundalk, Ont.—In order to make room for spring goods, McDowell and Russell are making a clean-up on winter lines. They are offering special bargains in such goods as winter and driving mitts and heating stoves.

CLEARING OUT STOCK.

Melfort, Sask.—A "Monster Clearing Sale," is being held by Geo. B. Jamieson. It is his intention to enlarge and remodel his store and finds it necessary therefore. to reduce his stock considerably. He is making a special effort to dispose of his present stock of ranges and heaters and is offering a substantial discount.

TO STOP FROSTING.

It may be a little late to speak of methods of preventing the frosting of windows. Practical information must always be valuable, however. The Hardware Trade gives the following solution for the frosting problem:



Stop the frost with a stovepipe elbow. The accompanying illustration shows how.

To begin with, it is essential that you have an enclosed background—enclosed clear up to the ceiling with window glass. If you won't do this and still are determined to have frostless windows you had better move to Florida or California at once, for the frost will form whenever it is cold enough. All the stovepipe elbows in town—even all the "elbow grease"—could not make it any different.

The whole thing should cost less than $1.50. Have the carpenter cut a hole under the glass from the outside and a corresponding one near the glass on the inside. Put in the elbow, and the thing is done. No more frosted windows—if your background is enclosed.

Figure "A" in the illustration shows the simple principle of the ventilator—the admission of cold air from the outside to make the temperature the same on both sides of the glass. The enclosed background will prevent condensation and so there will be nothing on the window to freeze.

Figure "B" shows how the ends of the stove pipe should be cut into 1-inch slits, then folded back and tacked down on to the woodwork to hold it permanently in place. Both ends should be covered with fine wire screen to keep out the dust, insects, and the like.

Figure "C" shows the completed ventilator in position.

The opening in the window may be covered with canton flannel. This should admit air enough to keep the frost away. If it doesn't, cut a hole in it. If crepe paper covers the floor a hole should be cut in it.

One of these ventilators is sufficient for the ordinary window.

If you prefer to have the opening smaller, get the tinner to make you a couple of small elbows. It will take two if you have them smaller.

The enclosed background is valuable in other ways than helping keep out the frost. It also keeps out the dust that is continually forming in the store, and thus protects the goods on display.

Current News of Hardware Trade

Weekly Half-Holiday.

Kelowna, B.C.—The merchants of Kelowna have agreed to close their stores at 12.30 p.m. every Thursday, except in any week where a holiday occurs. The holidays start April 4.

May Locate in Lindsay.

Lindsay, Ont.—It is announced that the Industrial Commission have negotiations under way for the establishment of a steel rolling plant here. It is backed by American capital.

Remodeling Store.

Preston, Ont.—Bernhardt & Gies are having their store remodelled. When completed, it will be one of the finest hardware stores in this part of the country.

Bird's Store Burglarized.

Tofield, Alta.—R. O. Bird's hardware store was broken into a few nights ago. The till was broken open and a small amount of change taken. Entrance was effected by breaking the glass of the front door.

Pleased With Conditions.

Montreal.—Walter R. Cottingham, president of the Sherwin-Williams Paint Company, was in the city this week discussing business matters with C. C. Ballantyne, Vice-President of the Canadian Company. Mr. Cottingham commented upon the fine condition of affairs in the Dominion. In the States, he says, business lacks snap at the present time, owing to the political unrest.

Major Parsons Dead.

Shelbourne, Ont.—Major William Parsons, formerly a prominent Orangeville business man, died in Georgetown in his 71st year. Deceased ran a large hardware business on South Broadway some years ago. He was prominent in military affairs and was commanding officer of Orangeville Company of the 36th Regiment in the stirring times of the Fenian Raid. Mr. Parsons left here, going to Toronto where he was in the real estate business until about three years ago, when he retired from business, moving to Georgetown.

Entertaining Champions.

Toronto, Ont.—On Wednesday the employes of George Mathewson, hardware dealer, 734 Queen street east, were entertained at the home of Mr. Mathewson, 45 Hogarth avenue. Thirty-six employes of the firm spent an enjoyable evening, consisting of progressive euchre, and supper. The tables were tastefully decorated in red and grey, the colors of the Mathewson hockey team, who have won the championship of the Riverdale Manufacturers Hockey League, the prizes being won by E. Brown, B. Langston, L. Cole, M. Bronstein.

The St. John Dinner.

St. John, N.B.—The banquet held by the St. John Hardware Merchants' and Manufacturers' Association was such a successful event that it will undoubtedly be repeated in years to come. A report of the banquet has already appeared in

Menu card used at St. John Hardware Banquet.

Hardware and Metal but the menu cards used were quite worthy of special mention. The menu was printed on aluminum outlined to resemble an axe, and thus making a decidedly appropriate souvenir of the occasion.

Business Changes.

Stratford, Ontario.—D. Brickman & Co., hardware dealers and plumbers, have been succeeded by Brickman & Kennedy.

Yorkton, Sask.—Charles Beck has succeeded W. W. Badgly, hardware dealer.

Swan River, Man.—A. L. Ashdown, dealer in hardware, is reported to have sold out to G. Zimmerman.

Roche Percee, Sask.—A hardware store is being opened here by Arthur Whiddon.

Saskatoon, Sask.—The Saskatoon Heating Co. have started in business.

Borden, Sask.—A hardware and harness business has been started by A. Wensley.

Sutherland, Sask.—A hardware store has been opened here by Fleming Bros. who also have a store at Lanigan.

Halkirk, Alta.—Michael & Milne have opened a hardware store here.

Armstrong, Alta.—H. B. Morley, of the H. B. Morley Co., hardware dealers, has disposed of his interest to Geo. Smith.

Acton, Ont.—Jas. Symon, who recently bought the hardware business of R. F. Johnstone, has taken possession. Mr. Symon's father, the late Charles Symon, was in business here for many years, and sold out to Christie & Henderson, about forty years ago.

Picton, Ont.—Percy Bentley, for some years with J. Moxon & Son, has gone to Millbrook, where he has secured a hardware business of his own.

Simcoe, Ont.—Schaefer Bros., of New Hamburg, have purchased the hardware business of J. D. Murdock of this place.

Melville, Sask.—The hardware firm of Motter & Argue have been succeeded by E. J. Motter.

Rumsey, Alta.—Heddon & Backus, hardware merchants, have dissolved partnership.

Arkona, Ont.—Fuller Bros., general dealers, have sold their hardware department.

Fire Losses.

Herbert, Sask.—Fire damaged the lumber yard and hardware store of H. N. Klassen, in addition to other stores, all the buildings being practically destroyed. The total damage was estimated at $50,000, with about 75 per cent. covered by insurance. H. N. Klassen's loss was $15,000 with $5,000 insurance.

Kenora, Ont.—A bad fire broke out in the Pope block on Second street at 11 o'clock and before the fire was put out considerable damage had been done to the stocks of Robson & Peterson, hardware merchants, and C. G. Linde, photographer. When the brigade arrived on the scene things looked bad for a while. However, with two streams playing on the blaze it was soon subdued, and the building and considerable portion of the Robson & Peterson stock saved. Considerable damage was done to the building. The loss will be: Building, $500; hardware stock, $1,500; photograph gallery, $1,500. All parties carried insurance.

Wingham, Ont.—The business section suffered one of the heaviest fire losses in years in the burning of the Beaver Block. The total loss is placed somewhere in the neighborhood of $75,000. Schmidt's hardware store was totally destroyed. The loss is fixed at $8,000 with insurance of $3,000.

Who Should Get Benefit of a Good Buy ?

R. H. Blackmore, of St. Thomas, Brought Forward an Interesting Subject—Some, Indeed, the Majority, Believe That the Man Getting the Good Price is Entitled to the Extra Profit—A Few Think the Dealer Will Profit Most by Giving His Customers the Benefit.

Several hardwaremen were sitting at dinner in an hotel, when R. H. Blackmore, of St. Thomas, asked this question: "Supposing," he said, "a dealer got an opportunity to buy a certain line at a particularly good market, who should get the benefit of that?"

There was a moment's silence, and then one of those listening answered, "Why the buyer should get the benefit, of course."

"That is the way I looked at it," replied Mr. Blackmore, "but it seems the question appeals to others differently." Then Mr. Blackmore explained the particular case he had in mind.

Story of a Good Buy.

"Some time ago," he said, "another dealer and I got an opportunity to buy scissors at a remarkably low figure. We took quite a number. I did not see the man who had bought with me until I went to the Guelph convention. There he came up to me and asked: 'How did you make out with the scissors?' 'Fine,' I replied. 'So did I,' he remarked.

"Then the dealer said to me: 'By the way, at what price did you sell those scissors?'

" 'Why,' I replied, 'I sold them at the regular price.' I saw this remark surprised him, and in a moment I found that this man had merely added his usual percentage of profit to the buying price of those scissors. He had given his customers the benefit of his good purchase. All the extra profit he secured was by reason of the rapid sale which the good price brought, and at that he had not disposed of the scissors any more rapidly than had I."

Following Mr. Blackmore's explanation of this dual proceeding there started a general discussion. It would be useless to quote all the remarks made, but the ideas expressed will be worth noting.

Men of Both Opinions.

In the first place, let it be stated that the man who sold the scissors at his regular percentage advance was not without champions. Some thought he would in this way secure the patronage of many who before had not visited his store. Moreover, they argued, he would be getting a fair profit—a profit, which, were it secured on all lines, would make his year's earnings entirely satisfactory.

Here a remark was made on the other side. Would the earnings on all other lines be the same? The likelihood was that they would not. Every dealer knows that there are certain goods which he handles at little or no profit. Therefore, to keep the average right he must make largely out of other lines. He must seize an opportunity to make an extra profit when it offers.

Would Permanent Trade Result?

There was also some doubt expressed regarding the likelihood of permanent trade being drawn to a store by a special cut price sale of scissors. A special sale would be a good thing, but by putting the prices too low the future demand for scissors would be spoiled. The dealer, having bought at a particularly good market, would be able to sell at the low figure for the once—but he would have to put the price up again after his supply became exhausted.

"There's the trouble," said one retailer. "The people will think that you were getting a good profit upon those scissors that you were selling at a low figure. When you raise the price they will get the idea that they are being victimized. They do not understand the difference in the buying price. I think that special sale of scissors would tend to destroy the future sales."

Question of Special Sales.

"Cutting prices," stated one man who had listened to this story of the shears, "may bring good results if it is kept up—if a special sale is run to-day and another one next week—but a dealer is not going to get the opportunity to buy at a particularly advantageous market every few days. For that reason I cannot see that the merchant who sold those scissors at his regular percentage of profit was wise. Undoubtedly special sales are good, but it is better if there is some reason for these. At the end of a season people expect goods to go for cost or very near it. They are not surprised, therefore, when they have to buy similar goods at a higher price. But if an article sells at a low figure one week, and at a higher one immediately after—without any particular reason for the advance, or no reason which the buyer can well understand, the result in all likelihood will be a falling off in the demand for the goods."

Catalogues and Booklets

Handsome Hanger.

The Marlin Firearms Co., New Haven, Conn., have sent out a very handsome hanger. It shows a hunter behind a large boulder "stalking" a herd of deer in the distance. The artist's work has been very well done.

Pipe Threading Machines.

The Armstrong Manufacturing Co., Bridgeport, Conn., have issued a catalogue illustrating their complete line of pipe threading machines and parts. It is very fully illustrated, each machine being described in detail.

Brantford Roofing.

The Brantford Roofing Co., Brantford, Ont., have issued a very complete catalogue showing their many lines and brands of roofing. It contains, in addition, pictures to illustrate how the roofing should be laid and a large number of views of buildings where their roofing has been used. It is printed on coated paper, with an attractively embossed cover.

Lawn Mowers.

The Taylor-Forbes Co., Guelph, have issued their 1912 lawn mower catalogue. It is printed on coated paper and has an attractive three-color cover, which depicts a T-F lawn mower being run across the globe, with the words "Our field is the World."

The catalogue contains a description of each lawn mower made and, in addition, a concise description of all the parts.

Hand-made Tinware.

Soren Bros., Toronto, have issued their 1912 catalogue, showing the many lines of hand-made household goods manufactured by them. The list includes wash boilers of all sizes and shapes, tin dish pans, story cake tins, sink corners, tea kettles, steamers, covered pails, steamers and boilers, camp kettles, dairy pails, strainer pails, cream pails, lunch boxes, fry pans, dripping pans, chamber pails, gravy strainers, greaters, soup strainers, pie plates, bread pans, dust pans, stove shovels, cake turners, biscuit cutters, sieves, simplex roasters, cuspidors, pudding pans, garbage cans, coal hods, sprinkling pots, foot baths, buckets, wash tubs and stovepipes.

Here is REAL Selling Co-operation

The Power Behind the Can

Jap-a-lac Quality
Jap-a-lac Advertising

New and broader plans to help you, Mr. Dealer. Greater enthusiasm—more ginger—more genuine selling vim in the Jap-a-lac advertising campaign for 1912. That's the program.

The name Jap-a-lac is already a household word, and we are now using an educative campaign on the countless different uses of Jap-a-lac.

Did you ever stop to think that the constant year after year policy of our national advertising is a promissory note to your customers of the quality of Jap-a-lac?

(OVER)

Our Jap-a-lac Publicity will reach every home in Canada

Jap-a-lac has been advertised from the start, widely advertised. It has made its claims and made good on them.

Jap-a-lac stands by the dealer to-day—does this creative work for him—sends him buyers already convinced—good business because it is repeat business.

Ponder this over, Mr. Dealer. Isn't it worth while for you to co-operate in a campaign, the sole object of which is to make *more sales for you?*

A Better Deal on Jap-a-lac

Another thing, Mr. Dealer, we are able to deal with you this year even more liberally than in the past. Our list price is lower and our dealer's profit is larger than ever before. It will pay you to sell Jap-a-lac—not only in the prestige and good business you will build—but on immediate sales.

Lower Prices to the Consumer

New Prices on Jap-a-lac

(FULL IMPERIAL MEASURE)

	List Prices		List Prices
One-half Gallon Can	$1.75	No. 1 Gold	$ .25
Quarts	.90	No. 1 Aluminum	.15
Pints	.50	No. 2 Gold	.45
1/2 Pints	.30	No. 2 Aluminum	.25
1/4 Pints	.18	Model Floor Set	2.75

We are now offering Jap-a-lac for the first time in a special size which retails at 10c. each.

The Glidden Varnish Company
Toronto, Ontario

Gentlemen:
Please send us full particulars regarding your new Glidden proposition to retail Hardwaremen.

Name.....

Address.....

The Glidden Varnish Company

Factories:—Toronto, Canada **Cleveland, Ohio**

GLIDDEN'S Green Label Varnish Proposition to the Dealer Challenges Comparison

Why should you deal with Glidden? There's just one answer, Mr. Merchant, the quality of the goods and the profit to you.

The Glidden discount is so much more generous than the discounts offered by other varnish houses that not to handle this line means loss of money to you. In our advertising to the painters we challenge any painter in the land to send us a sample of any exterior varnish equal in quality to Glidden's M. P. Durable Exterior or any interior varnish equal to Glidden's M. P. Durable Interior or any floor varnish equal to Glidden's M. P. Durable Floor.

We give this Challenge bold advertisement in the Master Painter, The Painter and Decorator, The Modern Painter, Practical Decorator, Painters' Magazine, Cement World, American Carpenter and Builder, Building Management, National Builder, Etc.

This is the sort of challenge that shows **faith** in the **quality** of our goods and the Painter knows it.

Write for our new and most generous proposition to the trade on Green Label Varnishes, Endurance Wood Stains, Endurance Colorspar and specialties.

Glidden's Waterproof Flat Finish

Is a line of Washable Waterproof Flat Oil Coating to decorate interior plaster and metal surfaces, it is made in twelve colors and white, applied with a brush same as paint, produces the most beautiful and durable finish in the world. Flows out smooth and free under the brush, is specified and used by the Largest Architects and Master Painters. We are constantly advertising to, and personally calling upon, the Architects and Master Painters, demonstrating and convincing them of the superior quality of our finishes. This cannot **help but** increase the demand for these materials which must mean dollars for you. **Fill in Coupon on page 50.**

THE GLIDDEN VARNISH COMPANY

TORONTO CANADA

Glidden ENDURANCE WOOD STAINS

These wood stains mark a distinct achievement. They are superior in every way to any other wood stains that have ever been placed on the market. They are *better* than water stains, *better* than oil stains and *better* than spirit stains. They are absolutely *new, unique* and *original.* We are advertising them fearlessly—far and wide—as the finest wood stains in the world. On this page we reproduce, as closely as possible, the appearance of these stains, but no reproduction can possibly do justice to their richness and softness of tone, nor their wonderful wearing properties.

The demand for Glidden's Endurance Wood Stains grows greater every day and letters keep pouring in constantly complimenting us on their remarkable beauty and durability and on the fact that they do not raise the grain of any wood and that they do no injure the finest varnishes. But the point of special interest to you as a merchant is that our special offer on Glidden's Endurance Wood Stains makes it literally possible for you *to grow two profits where one grew before.*

If you don't take advantage of this proposition, you are overlooking the best offer that has ever been put before you.

Fill in the coupon on page 50 and full information will be sent you.

Weekly Western Market Report

Ideal Weather is Now Prevailing, and Business, as a Result, Has Become Very Heavy—An Earlier Spring is Anticipated, and Heavy Orders are Being Placed—A Change Anticipated in Rope Quotations—Shortage Feared in Tin Plates.

Winnipeg, March 7.—With the ideal weather conditions that have been prevailing throughout the west during the last two weeks nothing but an increase in trade could possibly result. The tone of the trade throughout the entire west not only in hardware lines, but in practically all lines, is directly affected by climatic conditions. It has been the experience of wholesalers and jobbers in all lines that if weather conditions are satisfactory they can depend on large orders, not only in the spring, but in the fall. This is, of course, due to the fact that all trades depend upon the agricultural industry for their maintenance, and, consequently, the feeling of the farmer is reflected in all lines. Indications at the present time point to an early spring, which in addition to the fact that there is enough moisture in the ground to mature this season's crop has a pleasing effect upon those engaged in agricultural pursuits. The result is that the trade this year is far in advance of what it was at this time last year, and we might sum up the situation by the expression of one large wholesaler this morning: "We are so busy that we don't know what to do."

Spring Rush at Height.

With conditions existing as stated in the above paragraph, there is little need to ask the question why great confidence prevails at the present time. The spring rush is at its height, and all spring lines such as builders' hardware, harvest tools, nails, rope, galvanized iron and all general hardware are moving out in large quantities. Two orders of fifty and thirty-six pages respectively were seen from Wainwright, Alta., and Kindersley, Sask., which had arrived in the afternoon's mail in one of the offices. When surprise was expressed at the size of these orders, the management replied that there was nothing exceptional about them, as similar ones were received every day. This will act as an illustration as to the extent to which the trade is moving at the present time.

The Rope Situation.

Rope—Considerable discussion has been in vogue during the last two or three weeks regarding the rope situation, and much misunderstanding appears to be in existence at the present time regarding the exact situation of this market. About ten days ago a readjustment in prices took place, which resulted in a decline of ¼ of a cent per pound in some lines. This did not mean, however, that the market was weakening, as conditions and indications point to a stronger market in the near future. Binder twine manufacturers are reported to have bought up all the raw material in sight, and as a result the market will be high until the new crop of fibre is received. The local market at the present time is, however, firm in spite of the fact that the lower prices as referred to before are prevailing.

A Shortage Possible.

Tin Plate—The conditions existing in this line are attracting considerable attention, and the market is being watched with much interest. The demand for this line is greatest in the spring, and, consequently, the strike existing in the Old Country is liable to have a very considerable effect on prevailing prices. Stocks at present are low, and with an increasing demand will aid the advance. It is the opinion of many of the large firms that American Canada plate will have to be brought in, as it will be impossible to secure any from the Old Country. In fact, one wholesaler expressed the opinion that galvanized iron would have to be used for stove pipes this spring, which as we all know, is decidedly more expensive.

Lumber Men's Supplies—Peaveys and pike poles are now in strong demand from the northern portions of the province, where lumbering is being carried on. Ball and heel calks are also moving freely for early spring use, when the drives will be started.

Winnipeg Hardware Quotations.

Ax Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.00; 2, $1.80; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts, 77½.

Bar Iron—Bar iron, $2.50; Swedish iron, $4,25; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $15.

Blocks—Steel, 50 per cent.; wood, 60 per cent.

Cut Nails—$3.15 per keg base.
Wire nails, base, $2.80 Winnipeg; $2.35 Fort William.

Copper—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire, 3-inch gage, 24c, to 20-inch gage, 29c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white, 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 6, $4.20; 28, $4.60; 30 gauge or 10¾ oz., $4.80; Queen's Head, 20, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—⅜ in., $3.25; ½ in., $4.05; ¾ in., $5.00; 1 in., $7.20; 1¼ in., $9.80; 1½ in., $11.80; 2 in., $15.30.

Galvanized Ware—Pails, 40 and 5 per cent. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2 and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." sold process—No. 3, $4.30; 4, $3.80; 5, $2.75; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 per cent.

Hinges—Light T and strap, 65 per cent.

Hooks—Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 40 per cent.; smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15; ¼ in., $2.30; ⅜ in., $2.35; ½ in., $3.15; ¾ in., $3.80; 1 in., $5.45; 1¼ in., $7.45; 1½ in., $8.95; 2 in., $11.55; 2½ in., $18.40; 3 in., $24.15; 3½ in., $32.25; 4 in., $36.75; 4½ in., $42.50; 5 in., $47.50; 6 in., $61.50; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8½c; Pure Manilla 10¾c; British Manilla, 8½c; Lath yard, 9¼c.

Weekly Market Report --- Metals

WILL TRADE SUFFER?

The feature of the market is the uneasiness expressed in some sections as to the effect of the strike situation in the Old Country. Will Canadian trade suffer? Some metal men believe that there are grounds for thinking so. At any rate, the situation is being watched with keen interest.

MONTREAL.

Montreal, March 8.—The English coal strike, and the effect which it will have upon the Canadian metal situation, is claiming the closest attention of local handlers this week. Generally there seems to be a feeling that relief will come before long. On Tuesday, indeed, there was a rumor that a settlement had been reached—a rumor which was followed by an advance in the New York market. But the true condition was soon learned, and prices fell off somewhat.

When word of the strike was first heard it was expected that the speculative markets—such as tin and copper—would fall rapidly; but no such decline came. This is surprising, but it gives body to the belief that those in England who are best informed expect an early settlement.

Higher Prices Seem Likely.

One thing seems quite certain, that is that the result of this industrial war will be higher prices. There appears little doubt that the men will get higher wages. That, of course, means a great increase in the cost of operation, and to offset this the mine owners will have to ask a higher price for coal. Follow this a step further. The manufacturers of metals will have to pay more for their power, so they, too, must get this extra expenditure back by lifting the price of their product.

But the question which is of the most vital importance here is supply. Let the sailings be interfered with— as seems likely—and there will be a metal famine, which will cause great inconvenience. At the present moment the stocks of spelter and lead are exceedingly low. Trail lead is practically unobtainable. This leaves the English market the source of supply. Only one boat is due to arrive in March, and should anything interfere with its sailing the situation would be serious indeed.

Pig iron also is none too plentiful. Indeed, copper and tin are about the only two metals with which the handlers are really well supplied.

Sales this week are quite satisfactory. For some metals, indeed, the handlers are not at all anxious to make sales.

No Fall in Copper.

Copper—News coming of the strike it was felt by many that copper would sink rapidly. But this has not been the case; a fact which admits of but two explanations; either the manipulators have stock to unload, and are, therefore, supporting the market, or the demand is really greater than was supposed. The latter seems the more reasonable conclusion. The amount of copper on hand is not really tremendously large—about a month's supply, to be exact.

Locally there is some speculation as to the future of copper, but no fear of a great drop is evidenced, some of the closest students of the market now buying quite largely.

Tin—Here the local supply is fairly good. There is no immediate cause to fear a shortage; yet should the sailing be interfered with prices must advance here, even if they remain stationary on the primary market. Indications are that there will be some shortage of tin plates, for already many of the English mills have been forced to close down.

No Trail Lead.

Lead—It is lack of supply here which is causing the alarm. Trail appears unable to fill any orders until April. The handlers, therefore, are compelled to look elsewhere for their supply. "I don't think there is a ton for sale in the city," remarked one handler. "If anything interferes with shipments there will be trouble.

Spelter—This metal, too, is scarce. It is a little higher in price than for the past few weeks, but the real difficulty is to get the metal.

Antimony—Business is fair and prices remain at the advanced figure of $8.50 quoted last week.

Iron—Orders are quite large, as large indeed as are wanted until the supply is greater. There is not the scarcity in this metal that there is with lead and spelter, yet should anything interfere with the shipments expected toward the last of the month the handlers would be hard put to it to fill orders.

TORONTO.

Toronto, March 6.—One of the main topics of conversation in metal circles at the present time is the imminence of the strike in the Old Country. Metal men are agreed that the situation presents many dangerous features but they are not showing any evidences of alarm. "It is too early to form any opinion," said one man. "I hardly think that we need apprehend any serious danger. A big strike in Great Britain would undoubtedly inconvenience us in some lines but it would not have the serious effects that have been predicted."

In the meantime, business is proceeding briskly. There is a satisfactory tone all around. Shortages are developing in some lines but as the demand is not insistent, no serious complications have arisen. Metal men agree that the prospects for the spring trade are of the best, as industrial conditions in all sections reflect unlimited activity.

Tin.—The only price change noted is in tin which is practically easier. Prices quoted here vary from 46 to 47 cents cents and taking it on the average, there has been a reduction of one-half cent. The general tone of the tin market is good and no uneasiness is manifesting itself as a result of strike troubles. The slightly easier price is due to manipulation rather than to a tendency toward weakness.

Lead is Firm.

Lead is active and a good buying movement has set in. There has been no change in price but the tendency is toward firmness. In fact practical increases have been made in some sections. While metal men are not attempting to look into the future they seem to feel assured that the future will see uninterrupted firmness in lead.

Holding its Own.

Copper is holding its own. The demand is keeping up with unabated force and that means the metal houses are turning it over pretty fast. The price has remained steady locally.

The primary markets show strength in copper. Consumption is heavy in all parts of the world and no talk is now heard of over consumption.

No Spelter in Sight.

Spelter is providing some food for thought and quite a little cause for anxiety at the present time. Stocks are extremely light and there is absolutely no spelter in sight to relieve the situation. Under the circumstances, there seems good ground to suppose that a shortage will develop. Prices have remained steady, nevertheless.

Plates and Sheets.—Stocks are light and new supplies seem slow in coming forward. The effects of the strike are more to be feared in this branch than in any other. The strike would undoubtedly affect the Canadian market as our imports from the Old Country are heavy.

Weekly Market Report --- Hardware

SHIPMENT RUSH STARTS.

The rush of spring shipments is now on, intensified by the delay caused by the severe weather conditions during the month of February. It will continue until well into May. The jobbing houses report that they are experiencing a heavier demand than at this time last year—a satisfactory and significant tendency.

MONTREAL.

Montreal, March 7.—The convention which was in progress here last week---drawing many dealers to the city--has brought a greater activity in purchasing. Many retailers called upon the jobbers while in the city, looking over the spring lines and placing good-sized orders. Some of the visitors who did not find time to look over the wholesalers' lines yet were impressed with the necessity of ordering early—a number sending requests for goods which were displayed prominently at the exhibition.

"There is no doubt," remarked the sales manager of one concern, "that this Montreal Exhibition has stirred up business. I can see that in many of the letters which came to my desk this morning."

Spring Lines Wanted.

It is for spring lines that there has been a particularly brisk call. With March well started, the coming of the open weather does not seem far off. Indeed there is already a heavy retail demand for certain classes of goods, and the retail dealers are hurrying to get well supplied with these.

Spring Goods.—Perhaps the greatest activity is shown in sap bits, sap pails, kettles and all the accessories needed in the sugar bush. Sap will begin to run shortly now. Many of the farmers are already making purchases of the equipment they will need to make the valuable syrup and sugar.

Egg crates, too, are still selling well. It is at this season of the year, especially, that farmers have to stock with these. Eggs are getting more plentiful now, but at the price now given it pays a handler better to have these properly packed than to take chances on their breaking.

For wire goods, too, a big demand is being felt. Wire screen is also in demand, as are screen doors, window shades and similar lines.

Refrigerators Wanted.

It seems a little early in the year perhaps, yet a large number of retailers are placing their orders for refrigerators. These do not call for immediate shipment, but by ordering now the dealers are sure to have the goods when they are wanted.

Sprinklers, lawn hose and lawn mowers are other lines which are moving well; while there is a big call for garden tools. Those having little plots of land will soon be thinking of getting these planted, and therefore they will be coming to the retailer with orders for spades, and similar implements. It is the wise dealer who prepared for this trade in good time.

Builders' Hardware.—For all this class of goods a satisfactory demand is being felt. Hinges are being ordered largely. Requests for scores of lock sets are reported, while there is a steady demand for window fittings, and other lines used by the small contractors.

Specialties.—Here the orders being received are satisfactory. Lighting fixtures are being largely ordered by those who handle these goods. Electric irons too, are in great demand. This latter article is greatly wanted during the summer, and the dealers are making sure of their supply now.

Baseball Lines Will Soon Move.

Sporting Goods.—It is the off season in the retail stores, but in the wholesale places orders are now coming in. Hockey is practically over. Few skates are being sold. Now there will be a little lull, and then will come the demand for baseball, tennis, and cricket goods as well as fishing tackles and shot guns.

The professional baseball teams have now gone south to train for the coming professional season. From now on the newspapers will be full of the doings of Ty. Cobb, Hans Wagner and Christy Mathewson. Local interest in the game will therefore be revived, and the retailers can expect orders to come as soon as the snow is off the ground.

TORONTO.

Toronto, March 6.—Shipping has now started with a rush. The severe weather which prevailed almost continuously through February held up shipments and delayed the filling of spring orders to a very considerable extent. The jobbers are now making up for lost time, and there is a heavy outward movement of all lines of hardware.

The spring demand is of sufficient volume to satisfy the wholesalers. It is larger in most lines than last year. If business continues right through the year on the same plane, a record for yearly volume will undoubtedly be set. The jobbers, however, do not discuss this probability; they are too busy.

Seasonable Lines—New business is coming in with every mail for spring goods. Consignments of axes, spades, hose, nozzles, reels, wheelbarrows, hose couplings, wire fencing, rakes, shears, snippers, lawn mowers and all other goods of a similar nature are being shipped out now. A demand for summer lines, such as refrigerators, ice cream freezers and screen doors is growing up. Enquiries indicate that trade will be brisk in these lines.

A Daily Growth.

Builders' Hardware—The demand is growing daily. It is now apparent that a big building year is ahead. Reports from all sections of the country are to the effect that building operations will be on a larger scale than, perhaps, ever before. Dealers seem to have realized the possibilities of trade in this line for they are ordering earlier than usual and, in many cases, estimating larger requirements.

There is a good demand for tools of all descriptions. The improvement in industrial conditions, which comes with the spring is extending to all trades this year, and there is a healthy call for tools and supplies.

Sporting Goods Prospects.

Sporting Goods—There is some improvement in the demand for sporting goods. Orders are being placed, and a number of dealers are stipulating early delivery. It seems to be taken for granted that there will be an early spring, and, consequently, an earlier call for fishing tackle, guns, ammunition, baseball and lacrosse supplies, etc.

Prospects are said to be very good. The hardware trade is taking up sporting goods more than ever before. This is the surest kind of proof that hardwaremen are finding that it pays them to carry these lines. Some dealers who have never gone in for sporting goods before, or have handled a meagre stock only, are placing good sized orders this spring.

Heavy Hardware—The demand is growing in all lines. Shipments of nails, bolts and screws is now heavy. Price quotations are:—Discounts on carriage bolts, 3/8 and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7 1/8.

Stoves, Furnaces and Accessories

Keep a Record of all Stove Sales

The Advantages of Such a System — New Business Can be Secured by the Use of the Information Thus Kept—Inspection of Stoves is also Productive of Good Results.

A splendid idea for the stove dealer is the keeping of records of sales. The matter was discussed briefly at the Guelph convention, when it was stated by Fred. Otton, of Barrie, that he had kept track of every stove that he had sold since 1897.

There are great possibilities behind this idea. By keeping a record, the dealer knows when his customers purchased the stoves they use, and can make a pretty shrewd guess as to the time when they will again be in the market. If he shows enterprise, he will anticipate that event. For instance, by looking back over the list, the dealer finds that W. P. Jones bought a range in 1898. He knows that W. P. Jones has gone on using that range ever since, and that the chances are he may be needing a new one. Accordingly, the dealer takes the first opportunity to speak to him, enquires how his range is working, and then proceeds to give him the benefit of the many arguments that present themselves. When a range has been kept in active service for 14 years, even if it still gives a certain measure of satisfaction, there are many very strong reasons which the dealer can find for the sale of a new one. Fuel economy is one of the strongest, for an old range will require more fuel than a new one to do the same work; if, indeed, it can do as satisfactory work even under the heaviest pressure. Jones may not have thought of buying a new range, but he can be brought to see the wisdom of it.

A progressive dealer could make profitable use of a record of this nature in a great many ways. He might apply it in the manner suggested by Mr. Gurney at the convention; that is, by organizing an inspection system. The idea was that someone should be sent every few months to all homes where stoves had been installed. The man deputed to do this work would inspect the stove, find out if it were giving satisfaction and, if not, where the trouble lay. In this way he would keep the people satisfied and would undoubtedly work up enough repair work to pay the expenses of the system at least. Some dealers may be inclined to dispute this statement on the grounds that repair work must be done anyway. The fact is that an experienced stove man will find numerous weaknesses in a heater or range which the householder was not aware of, although the results of the defect may have been felt for some time. The writer has heard of cases where a single day's tour of inspection has brought in repair work from every home visited and has, therefore, insured more complete satisfaction on the part of the owners with that particular make of stove.

One of the greatest advantages of a system of this kind, however, lies in the opportunity presented for canvassing. A range is inspected, say, which was purchased when the family lived in a smaller house. It is now doing its work only indifferently well. The inspector points out that the poor results are not due to any weakness in the stove, but to the fact that it was intended for a smaller place. If he is a good salesman, he can make a sale under such circumsances in nine cases out of ten.

A dealer who has followed this plan more or less for some years explains that, while he has found it yields direct results, he would keep it up even if it did not bring a dollar in. "It enables me to keep my customers in a good mood," he states. "If a stove does not work well, I want to hear about it at once. I don't want that customer to go on harboring a grudge against me and, perhaps, retailing his wrongs to all his neighbors and friends. If we hear what the trouble is, we can soon attend to it, only the owner will frequently not come to us with his troubles. The only way left then, is to go to him. If for that one reason alone, we would always keep up this system of calls."

The keeping of a record of stove sales can be used effectively in other ways. It provides the dealer with information which he can use to good effect in making other sales. A man drops in and looks over the stock of ranges, but the salesman discovers that he has rather a high opinion of another make. Learning the address of the man, the clerk turns up the record and finds that a neighbor purchased a range from them in the year 1899. "You want a range that will last," he tells the prospective customer. "Now, you know Mr. Smith, who lives up near you? He bought a range from us 13 years ago, and he's using it yet. What's more, he hasn't spent more than a couple of dollars on repairs in the whole time."

That is one of the strongest arguments that could be presented, especially when the salesman goes on to explain that the range now made is much more efficient and up to date that the one sold thirteen years before; the natural conclusion being that, if the old style range would give good service for that length of time, then the new model would last considerably longer.

The testimonial is one of the strongest arguments that can be presented. Many do not put much faith in it, but the testimonial continues to do wonderful work just the same, for those who are wise enough to employ it. The whole advertising campaign of many patent medicine concerns consists of the publication of testimonials, some of an extremely vague description. And the patent medicine concerns seem to flourish.

A book of stove sales would serve as a regular storehouse of testimonials. By delving into its contents, the dealer could find material for testimonials to meet every contingency and fit every case. If the inforamtion contained were mastered by the staff, they would be able to make a much more effective canvass than otherwise. They would be able to garnish their selling talks with a running fire of references to what Mr. So-and-so had done, and the results that a similar range to the one under discussion had given when purchased by some other townsman. Such arguments count, and count heavily.

As the last reason, the keeping of sales records would simplify the difficulties of repair work. A customer calls in and leaves orders for certain repair work to be done, or asks for some parts to be replaced. He probably knows the make of the stove, but cannot tell the size or the model. The consequence is that the dealer has to send someone to the house to ascertain the facts, or must wait until the customer returns himself with more explicit information. If records were kept, it would be a simple matter to turn back to the record of sale and find out what was required. Every stove dealer has more or less trouble in the matter of getting repairs. The system suggested would do away with much of it.

Now Little Invasion of U. S. Stoves

Canadian Manufacturer Estimates That There Used to be $4,000,000 Worth of Ranges Made Across the Border Brought into Canada Every Year—A Different State of Affairs at Present—How the Demand for Product of Canadian Foundries has Grown.

Sometimes there comes the word from the west that United States goods are being extensively sold there. Perhaps these statements have a fair foundation, in fact, yet it seems, as far as stoves are concerned at least, that the Canadian manufacturers are getting a firmer hold every day. They are selling more and more goods, and less and less are being brought from the makers across the border.

The head of one Canadian manufacturing house, after a careful study of the question, has come to the conclusion that a few years ago $4,000,000 worth of stoves were brought into Canada from the States each season. That seems a large estimate, yet the west was buying largely from across the border then, and probably it is as nearly accurate a statement as may well be secured. The manufacturer made a thorough investigation before he reached his conclusion.

The Canadian Stove Now.

Four millions dollars' worth of stoves! Makers in the Dominion would have reason to feel perturbed if ranges to this value were being brought in now. But this is not the case. Conditions have changed. It is the Canadian stove which is in greatest demand. The ranges from over the line are only secured when it is impossible to get prompt delivery from the Canadian manufacturers. The trade now seems to be going in the right channels.

While this manufacturer was investigating the import question he also made some inquiries regarding the stove trade in the older parts of Ontario. There he found the advance to be remarkable. Owing partially to the increase in population, partially to the growing desire for better goods, the demand for stoves has increased wonderfully.

"I was talking to a buyer for one of the large catalogue houses," remarked this manufacturer. "We got speaking of the increase in the stove business, and he said: 'We used to think we were doing a big thing if we placed an order for $25,000 worth of stoves. Now we take the whole output of two factories, each of which manufactures stoves to the value of some $125,000.' "

Where Business is Going.

This concern, it must be remembered, sells largely in the west as well as in the east, yet the figures show where a part of the old United States business is going.

Another instance of the business which is being taken from the United States manufacturers and brought back to the Canadian makers may be cited: A large jobbing house in the west last spring approached an Ontario stove concern asking for 500 ranges of a certain new model. The patterns were not ready, and the manufacturer told the jobbing house manager that he would be unable to supply any of these ranges until quite late in the summer.

"Oh, well," said the jobber, "we will have to order from the States. We must get a range like that; and we must get it early."

A Late, But Large Order.

The jobber did order from the United States factory. He ordered in quantity, too, that he might get a price, yet by the middle of August his supply was exhausted and he then asked the Ontario factory to send on some ranges. From that late date until the end of the season 455 stoves went from this manufactury to that western jobber. Had the patterns been ready early in the spring much more business would have come into the hands of a Canadian maker, but it is worth noting that as soon as the ranges could be secured in Canada there was no more ordering from the States.

Undoubtedly the call is now for Canadian goods. Perhaps the talk about supporting home industries has done something to bring about this end; but more still it is the fact that people have come to recognize that Canadian goods are honest—goods which will give satisfaction. After all there is not a great deal of sentiment in business. Dealers buy what they know they can sell, and what they know will bring repeat orders. It is because they have found Canadian made stoves are of this class that they have been calling for them, instead of for the ranges manufactured under the protection of the bewhiskered old gentleman with the striped pants.

NEW STYLE OF STOVE.

H. Beirer, Duluth, Minn., believes that he has found a method of radiating all the heat from a stove outward, instead of upward. He states that solving the problem of fuel economy is just finding some way to prevent any heat from escaping up the chimney and, with that idea in view, he has made a stove along certain lines. The stove is built along the ordinary lines, with the exception of the body, which instead of being a round sheet of steel or tin. is corrugated, with the projecting sides that are thus formed in plain view. When this body of tin is straightened out and made like an ordinary stove body, it will be twenty-two feet in circumference. This is a small furnace in itself, while it is only four and one-half feet in circumference when the tin is corrugated and connected to the stove proper.

METAL AND HARDWAREMEN HOLD ANNUAL BANQUET.

Montreal, March 5.—Members of the Montreal Metal and Hardware Association were not alone at their annual banquet, which was held in the Canada Club last evening. A number of visitors were present, and several of these gave addresses upon questions of interest to the Metal and Hardware men, not only as business men, but as citizens.

Robert W. Refors, president of the Board of Trade, spoke upon the work of that Association; then H. J. Fuller, president of the Hardware Association, called upon C. H. Godfrey, who has been chosen as candidate by the citizens' association for the position on the Montreal Board of Control, rendered vacant by the resignation of F. L. Wanklyn.

Mr. Godfrey outlined what he holds to be the duties of a controller. He assured all those present that he would give the city of his best, and that he would do everything possible to aid the other controllers in their efforts to have the citizens' money spent for the citizens without any rake-off or graft. Mr. Godfrey was enthusiastically applauded, as were the others who spoke briefly during the evening.

DEVELOPMENTS IN IRON.

Cleveland, O., March 6.—The Iron Trade Review to-day says:—

The past year was not a record breaker in the tonnage of ore moved from the Lake Superior region, but it was nevertheless a period of interesting developments. The adaptability of a mighty organization to changing conditions was never so impressively exhibited as during the past year, when the Oliver Iron Mining Co., a subsidiary of the Steel Corporation expects to increase its the Hill ore lands from 2,018,017 tons in 1910 to 5,326,643 tons in 1911, and prepared to make still greater shipments this year, so that it will not be surprising if 8,000,000 tons are moved from the Hill ore lands this year.

Weekly Market Reports---Stoves

WATCHING THE STRIKE.

There is increased activity noted in heating lines. Ranges, both coal and gas, are moving well and the improvement in climatic conditions has led to the resumption of building and in consequence to renewed activity in furnace work.

The outstanding feature of the week is the anxiety felt in regard to the strike situation in Great Britain. If prolonged for any length of time, it might cause a shortage in some lines.

MONTREAL.

Montreal, March 7.—An increased activity in stoves is now being noted, but this is small compared with the rush which is being experienced for tin ware. All the products n this line are in great demand. The manufacturers are able to fill orders all right—owing to the fact that they have a good reserve stock on hand—but the shipping departments are being kept busy.

There have been some changes in prices, all of these in an upward direction; though the advance is not as great as might have been expected considering the high prices at which metals have been selling.

For special spring lines, such as coal oil cooking stoves and refrigerators—handled by some stove houses—there is a good demand. The dealers throughout the country are becoming alive to the fact that this is the time to place orders if they would have their supply on hand when the retail ordering begins. The factories are making prompt delivery—though they are experiencing some difficulty in getting sap bits and similar lines out immediately, for every mail brings a large number of these orders.

Spring Goods.—Especially large is the demand for sap pails and for sap bits. Also the call for milk cans is satisfactory, greater almost than was expected. In this class of goods it is that the price changes are noted. Retinned stamped ware is now quoted at 75 and 5 per cent. discount instead of 75 and 12½ per cent. Galvanized pails are now quoted at 45 per cent. off instead of 50 per cent. Cheese factory milk cans, too, have advanced slightly, in place of the old 40 per cent., the discount now being 35 per cent. Trimmings have felt the same upward rise, the discount now being 20 per cent. in place of the old figure of 25 per cent. For coal hods the discount has been reduced from 40 to 35 per cent.

Ranges, Heaters and Furnaces.—Spring orders are commencing to come in, but as yet the demand has not been large. There will be but little activity in this line for a week or more yet.

Gas Stoves.—Here a somewhat different state of affairs exists. Always the spring of the year is a busy time both for the retail handlers of these ranges and for the manufacturers. This year, however, more than usual activity is shown. There is more competition in Montreal this year than for some seasons past. The companies are going after the trade harder than ever, and many dealers are booking their orders sooner than in other years. Several carload orders of stoves are reported.

Kitchen Furnishings.—For this line a great part of the demand comes from the West. There the merchants are preparing for the spring influx of immigrants. These will need complete outfits of kitchen ware, and those dealers who have not now a large supply are placing their orders so that they can get the goods on the first boat. In the east, too, merchants are waiting for navigation to open before they ask for shipment, but the orders are being booked regularly. Some, of course, call for immediate delivery; but where possible the dealers are trying to get along with the reserve supply which they have until the boats are running.

TORONTO.

Toronto, March 7.—There is a pretty general awakening shown in all lines of stoves and supplies. Large orders are being placed and considerable shipping is now being done.

Some anxiety is being felt locally on the score of the strike in the Old Country. It may limit, or even stop, all importation of pig iron from England and Scotland, and this would probably hamper most of the stove manufacturers to no small degree. It is understood that an effort is being made to get in stocks ahead in anticipation of any prolonged trouble.

The strike may also affect the local market for plates and sheets. Stocks are not as heavy here as could be desired and new supplies are coming forward very slowly. If the strike ties up this industry, it is altogether likely that considerable difficulty would be experienced locally. There is not at the present time, however, any reason for serious alarm.

Ranges.—An active demand is reported in the west and large shipments are being made. One manufacturer states that he is sending out all the ranges that his foundry is producing at the present time in order to meet the demand.

There is a gradual growth noted in the call from Ontario points. A northern merchant ordered a dozen ranges this week and stipulated immediate delivery. An active spring trade is anticipated.

Gas Ranges Selling.

Gas ranges have been selling for some time and the demand is now quite heavy. Shipments have begun and will continue heavily right through March. The trade in gas stoves promises to be larger than ever this year.

Furnace Activity Resumed.

The improved state of the weather has brought the furnacemen to the fore again. Many buildings which were abandoned in a preliminary stage when the cold weather set in, have been started again. The resumption of activity has started the furnacemen and the work of installation is going ahead briskly in many sections, particularly in Toronto where a great deal of building has been started already. There has been, as a result, a larger demand for furnaces than is usual at this time of year.

Death of Mrs. Castor.

Sympathy will be extended to John Castor, of Toronto, treasurer of the Ontario Retail Hardware and Stove Dealers' Association, whose wife passed away Thursday afternoon after a lengthy illness.

TOOLS FOR HOUSE CLEANING.

St. John, N.B.—Dealers in Fredericton are getting busy in preparation for the annual increase of trade in the spring, and the same might well be said of merchants in Moncton, Newcastle and Chatham, as well as in St. John. For some days past the hardware firm of R. Chestnut & Sons have been featuring the fact that with the coming of spring housecleaning will begin and there will be general repairs about the premises of most places, while much new building will be proceeded with besides. Using to good advantage the motto, "He that Works Without Tools is Twice Tired," they have greatly interested the trade in the disposal of tools for carpenters, millmen, automobilists, plumbers, blacksmiths and machinists. "Poor Tools," they say, "are better than none, but why not have good tools when they cost only a little more in the first place and are cheapest in the last place, because they do better work and are far more durable?"

Methods of Retailing Paints and Varnishes

Killing Two Birds With One Stone

A New Method of Helping Along the Sale of Wall Paints for Interior Decoration— Dealers Who Handle Wall Boards Can Use Them as Models for "Draping" Paints.

It is said of John D. Rockefeller that one of his most successful traits was in bringing together hitherto seemingly unrelated forces and combining them in such a manner as to produce the most astounding commercial results. Very often the displaying of combinations of goods brings about sales which could not have been effected had they been left to remain separate on the shelves. If the wide-awake paint salesman has ever observed with what readiness the women folk will begin to discuss and argue when a little scrap of nicely colored cloth is brought near to a fashion book, he will be quick to apply the same principle to the displaying of his paint.

There is at present a very decided movement in favor of the use of wall paints for interior wall and ceiling decoration. This growing popularity is being met and promoted by paint manufacturers in making special flat wall paints which produce extremely artistic effects.

Durability and permanency of color are two of the advantages which they offer over wall paper. At the same time they can be washed and cleansed with castile soap, a little warm water and a soft, clean rag. Just here the paint salesman has a splendid opportunity to use many of the strong arguments put forth for promoting more sanitary conditions in home and public life, by showing the hygienic value these paints have for this purpose.

Stencilling is very popular, and is used a great deal in connection with this class of work. A ready appeal is made to the artistic eye if a few stencils from a carefully selected stock can be shown at the same time, as they readily aid in selling these flat wall colors.

However, paint which, of necessity, is kept in a can, presents selling obstacles which are hard to overcome even with a color card. The hardware merchant who has had his store painted with the brand of paint he is handling has a decided selling advantage. But he cannot checker his store with every shade kept in stock. If the paint salesman had the advantage of his brother in the clothing trade who can display any or all of his stock on a model or even on the prospective purchaser before a mirror, paint selling would be a great deal easier.

A comparatively recent line of goods put on the market and which is largely handled by hardware men can be taken advantage of for this purpose. It offers a splendid model for the "draping" out of paint and also presents further opportunities for selling the model, too. Here is where we get the two birds. Those who handle wall boards such as beaver board, compo board, utility board, etc., can have sections of them cut to convenient size and given two or three coats of these wall colors. The effects are very pleasing and immediately catch the eye, presenting to advantage the merits of both the paint and the wall board. If a stencilled border design is applied it gives the effect of a side wall elevation which brings home to the customer the possibilities of such results in his or her own home. It places vividly before them the exact effect that can be produced in the room they wish to decorate and a good sale is bound to result sooner or later. Further, he can display the exact effect that can be produced on the wall board and can then bring to the customer's attention the advantages of its use.

Taking advantage of the display that can be made by combining these two lines is a ready method of attracting the attention of the prospective paint consumer and may divert a customer, who contemplates decorating by other means, into using this class of goods. A few of the best, or even all of the shades applied in this way present the possibility for innumerable display combinations. Each shade can be displayed alone or in combination with one or two other shades that harmonize with it, and in this way they can be separated from the usual confusion of shades found when using a more or less elaborate color card.

If reasonable care is taken in preserving these panels from year to year the quality and durability of the paint may be shown, this feature will increase in value from year to year. Small sections can also be exposed to light and samples of outside paint exposed to weather, thus enabling the merchant to make comparative tests of his own and establish for himself the relative merits of every kind of paint kept in stock. While the initial expense will be the greatest, yet the results obtained far outweight this, and the salesman has at hand samples as well as hard-hitting, personally experienced, ready-to-drive-home facts that he has himself carefully observed. At the same time he can show that the wall board he handles has come through the test better preserved by the use of the paint applied, than any samples not similarly treated. An excellent means of driving home an argument for the preserving power of paint. And it will only take the one stone for the two birds.

PRESENTATION AT ANNUAL BANQUET.

Toronto, March 5.—The second annual banquet tendered by the Imperial Varnish and Color Co. to the Toronto factory, office and selling staff, was held last night. The feature of the occasion was a presentation to Gavin Cooper, who had severed his connection with the company the previous week after twenty-five years' service, during which period he had worked up to the position of head of the varnish department. He was given a purse of gold and a silver-headed cane by the company, the presentation being made by the president, Mr. Sparrow. Two members of the sales staff then led Mr. Cooper to the cloak room, where he was divested of his coat and put into a smoking jacket. On his return to the banquet room, he found a leather armchair, a foot rest, a pipe and an unlimited supply of tobacco awaiting him. He was instructed to take his seat and the pipe was lighted and handed to him. J. D. Robinson then made a short speech, tendering the various articles to Mr. Cooper on behalf of the employees of the company. J. A. Weir added his testimony in a short address and read a framed testimonial from the employees.

Speeches of a reminiscent nature were delivered by Mr. Sparrow, T. F. Monypenny and Mr. Lundy, who had served as one of the earliest travelers for the company. The recipient responded briefly.

An excellent programme was then given, most of the numbers being contributed by "home talent."

There were considerably over one hundred in attendance. In his address, Mr. Monypenny referred to the increasing business of the company, a good share of credit for which he imputed to the loyal support of all employees of the company.

SHOULD TAKE STOCK.

The suggestion emanates from F. Ware, a clerk with T. M. Nash, Wellington, Ontario, that an inventory should be taken in the paint department now. The fact that the opening of spring is not far off makes it imperative that the department should be made thoroughly up to date. Mr. Ware's idea is that the paint stock should be gone through thoroughly to ascertain just what quantity there is on hand of each variety of paint and each color. The same applies to varnishes, stains and all lines of that nature.

The idea is a good one. Undoubtedly stock should be taken in the paint department, but the best time is undoubtedly earlier in the year. An inventory should be made before the spring orders are placed. All who have not yet seen to this should undoubtedly follow Mr. Ware's suggestion.

SAILORS APPRECIATE PAINT

Down east, in New England, and more particularly in Maine, painting is an annual function. The famous white houses with the equally famous green shutters are thus made new every year. True, the salt air of the Atlantic is a bit trying on paint. But that is not all. The coast population is composed largely of sailors, retired sailors, or the descendants of sailors. The sailor, for generation back, has painted his ship every year. Ashore, he clings to the practice. He has an unconsciously inherited knowledge of the value of paint, which he imparts just as unconsciously to the entire community. That is a striking instance of paint education. But, inland, it's necessary to educate property owners to the value of protecting their houses against the weather, just as the experience of ages has educated those who go down to the sea in ships.—The Building Age.

A Talk on Varnish Salesmanship

Well-known Salesman Gives Pointers—Always Stick to the Truth and Do Not "Knock" Other Lines—The Value of Advertising.

By W. H. Davy.

In the following article, the writer who is a varnish salesman himself, gives some valuable hints to salesmen generally and speaks convincingly of the value of advertising.

"The word 'Salesmanship,' is heard from the lips of everybody interested in commercial life. Many men have made a study of it, and now nearly every varnish organization of prominence is giving special attention to the training of men to efficiently handle this extremely important end of their business.

"A thorough knowledge of his article enables the salesman to concentrate his mind upon that subject and by this concentration he is enabled to inject the proper amount of enthusiasm without becoming over enthusiastic. He holds the attention of the customer and convinces him of his sincerity.

"Above all things the salesman should handle the truth fearlessly. He can make one hundred statements to a customer, ninety-nine of which are true, but if he trips on one mis-statement the customer discredits the ninety-nine.

"A salesman should never criticize another varnish by name. Every varnish should be good varnish. To salesman there should be but two varnishes—his own and the others—and all should be credited with being good value.

The Price of Varnish.

"Did it ever occur to you that in the face of sweeping advances in cost of all raw material the best varnishes to-day only cost a trifle more than they did ten, fifteen or twenty years ago? Here is something to think about.

"You've heard a great deal lately about the increased cost of living. Well, meats and eggs have not advanced any faster than oils, turpentine, gums and other raw materials entering into the manufacturing of varnishes. The cost of labor has advanced; in brief, it costs manufacturers more to use pure raw materials and skilled labor to-day than it did say twenty-five or even ten years ago.

"And yet, in spite of these advances in cost of materials and labor, varnish products are selling to-day at a very slight advance over the price quoted years ago.

"The average increase in prices during the past twenty-five years is a mere nothing in comparison with the increased cost of raw materials and labor during this period.

"The explanation is simple. The increased cost of production has been largely absorbed by the increased volume of business; the increase having been brought about largely by advertising. The larger scope of business enables the manufacturer to buy raw materials cheaper because it is bought in larger quantities and to reduce the overhead expense by spreading it over a larger volume of business.

"The modern manufacturer must have means of creating a demand of developing new markets, of finding an outlet for his products under all conditions to save himself from loss; and the best means of doing this is to advertise.

"Advertising is also a protection to the buying public. A trade name representing quality and value becomes a valuable asset which the manufacturer cannot afford to destroy by cheapening or varying the quality."

BANQUET AND ANNUAL MEETING.

Tweed, Ont.—A banquet was tendered by the officers of the Steel Trough and Machine Co. to the directors and their wives and to the staff of employees.

After the inner man had been fully satisfied, President W. S. Gordon, who was formerly a hardwareman here, was appointed chairman. He called upon the different officers for speeches and in response, excellent addresses were delivered by H. W. King, of Toronto, vice-president of the company; Rev. Wm. Johnston, J. E. Gordon and W. Cooke. Songs and instrumental selections were given by Messrs. Grier and Meiklejohn.

The affair was such a complete success that all present expressed themselves in favor of making it an ansual affair.

In the afternoon preceding the banquet, the annual meeting of the company was held. It was shown that splendid progress had been made during the year.

OPEN CALGARY BRANCH.

St. John, N.B., March 5.—Finding that their trade in the West has greatly increased of late, T. McAvity & Sons have decided to open a warehouse in Calgary, Alta., for the purpose of furthering their western business. They now have a warehouse in Winnipeg. Ronald A. McAvity is expected home in a few days after having completed arrangements for the opening of the Calgary warehouse in the spring. The firm have several contracts on hand in the West and that with the C.P.R. alone involves a large expenditure and a great amount of work.

There's Money in the ML Line

ML goods are made to build up trade for our dealers and ourselves. They have to be good, and they are good because we've been in business for 20 years—long enough to know that the way to succeed is to give full honest value for every dollar's worth we sell.

M L PAINTS

Under weather tests ML Paints have stood up better than the many "best" paints in the market. You can surely get particular trade with ML Paints.

M L FLOORGLAZE

A quick drying, glossy, wear-resisting finish—good for any paint purpose. In solid and transparent effects. Many shades. Well advertised.

ELASTILITE VARNISH

A favorite with folk who know that quality pays though it seems to cost more at first. Elastilite is splendid for any varnish need, indoors or out.

DECORATIVE AID DEPARTMENT---A Help for Every Decorator and Dealer. Color schemes, and technical information given, by which any dealer may sell exactly the right paints in the right shades to properly decorate any house. Stencil designs, etc., included in information. This plan helps you get more business. Services are free. Write for Decorative Aid Booklet.

Many other good members in the ML Line. Get price list, color cards ana samples soon, from

Weekly Market Report --- Paints

BREAKING RECORDS.

The tone to the paint market is exceptionally good. Paint manufacturers state that their business to date has been largely in excess of last year, and that they are looking forward to a record year.

Prices show a firm tone, with one exception. Lower quotations have been fixed on paris green.

MONTREAL.

Montreal, March 7.—Whatever winter lull there has been in the paint houses is over now. Retailers are already beginning to feel the spring demand, but more still they are feeling the demand which is to come. As a result they are ordering and ordering largely.

From various paint houses comes different word, but one and all state that the opening of the season of 1912 has been exceedingly auspicious. The general feeling is that this is to be a banner year. One house reports more business done in the first 24 days of February than was done during the whole month last year. The sales until the end of the month, the sales manager of this concern states, are more than $4,000 in advance of the February sales for 1911.

Uncertainty About Prices.

Every indication points to a continuance of these improved conditions. From all parts of the country the dealers seem to expect a great demand. They are placing large first orders because of this, but expect to order still more largely.

Prices have changed somewhat. Turpentine remains at 70 cents, but there seems to be an impression that a lower level will be touched shortly. Linseed oil is quoted a good deal lower than a week ago. Some handlers look for a change in quotation. Others seem loath to part with the oil they have. There does not appear to be any great certainty in this line.

White Lead—Here there have been no changes in prices. The demand continues large, and all the signs seem to be that the dealers have not yet awakened to the large orders they will have to fill.

Linseed Oil—Here a drop has been noted; yet a difference in price is still to be encountered, some houses selling higher than others. But the figure generally accepted is 91 for raw, and 94 for boiled oil. What has caused the lower level none attempt to say. The general opinion seems to be that the market will be lower. Some handlers feel so sure that this will be the case that they are buying very sparingly, counting upon getting better prices later on. Others are holding up their selling prices, evidently being unwilling to allow their supply to sink too low.

Turpentine—There is a belief that a lower price level will be fixed here, too, though turpentine is so uncertain that few predict its future with much confidence. There is little buying and selling in this material at the present time.

Big Demand for Putty.

Putty—For some time the call for this material has been large. It still continues large; indeed the plants are being worked to capacity to fill the orders, and to get a fair reserve on hand to meet the big demand which is bound to come later in the season, when building is well under way.

Mixed Paints—Here it is just a question of the retailer estimating what quantities he will need to enable his filling his early orders. Generally, the dealers seem to be counting upon a busier season than last, for the early bookings, almost without exception, are for larger amounts than were sought in the spring of 1911.

Paris Green Prices.

Paris Green—The present is the time for the sale of this material. Prices have now been fixed, and as was predicted some time ago they are slightly lower than those asked last year.

The quotations are as follows: F.O.B. Montreal, Moncton, St. John and Halifax (Yarmouth and P.E.I. 1/8c extra.)

1 lb. packets, 100 lbs. in case, 18½c lb.
1 lb. packets, 50 lbs. in case, 19c lb.
½ lb. packets, 100 lbs. in case, 20½c lb.
1 lb. tins, 100 lbs. in case, 19½c lb.

F.O.B. Hamilton, Toronto and London.

1 lb. packets, 100 lbs. in case, 18¾c lb.
1 lb. packets, 50 lbs. in case, 19¼c lb.
½ lb. packets, 100 lbs. in case, 20¾c lb.
1 lb. tins, 100 lbs. in case, 19¾c lb.

TORONTO.

Toronto, March 7.—Business is exceptionally good for this time of year. The paint manufacturers and jobbers state without exception that spring booking has been heavier by quite a margin than last year. If the demand continues as at present, it will be a record-breaking year in paints and oils.

There is a firm tendency noted in most lines this week. Lower quotations have been fixed on paris green, as noted in the opposite column, but in practically every other line there is a tendency toward firmness, although no actual advances have taken place.

Linseed Oil—There is very little movement in oil at present, and the price has remained stationary. The continued cold weather has prevented much stir in the oil trade to date. There is, however, a stiffening noted in the price of English oil.

The Turpentine Situation.

Turpentine—The market here is quite seasonable, with the price remaining firm at 67 cents. Reports coming from the Southern States are that this has been the coldest and longest winter in forty years, and that there is literally "nothing doing" on what are known as the turpentine farms in the matter of a new crop so far this year. Not even as far south as Florida is there any movement of the gum coming from the trees, and they say this means that the new crop is fully a month later than last year. It is said, if it were not for the fact that domestic demand in the United States has not been what was anticipated, there would certainly be a very material advance in turpentine. If the weather prospects change so that outdoor painting begins in the Northern States there will no doubt spring up a demand for all kinds of paint and a very considerable advance in spirits of turpentine may take place.

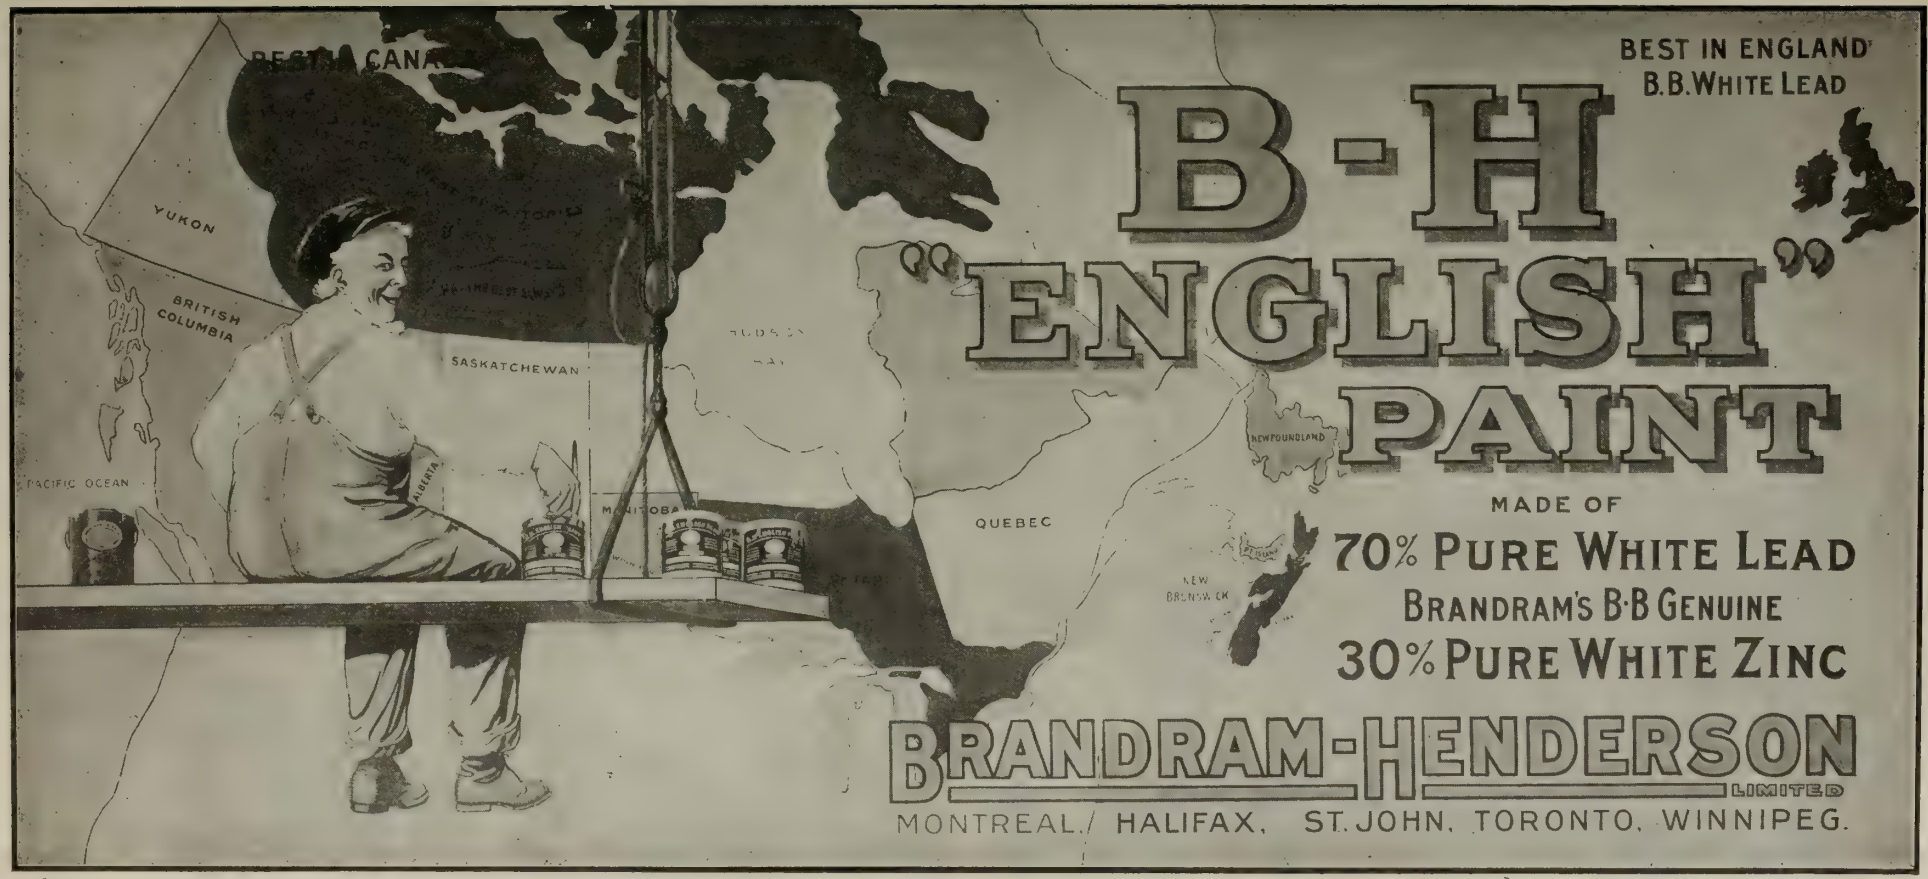
White Lead—Some orders are being placed for white lead, but the volume of business is not particularly large at the present time. There are no developments in regard to price, but the fact that dry lead has advanced in England is significant. Whether this will affect the price of white lead here remains to be seen, but it has had the immediate effect of making the price very firm.

Will Glass Advance?

Glass—This question is now being discussed freely. Word has been received that a small advance has been made in Belgium by the glass interests. Added to the fact that higher rates are now in force on the steamship lines, this makes an advance in the price of glass here almost inevitable.

The situation is being watched with interest, particularly as there is a growing demand for glass now.

Putty—The movement in putty is quite satisfactory, prices remaining the same as follows:—Standard bulk in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same. Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.00.



Strong, attractive, business-getting posters (24 sheet) on B-H Paint tell the story of quality in paint, and bring customers to the B-H Paint Agency.

B-H "ENGLISH" PAINT is 70% Pure White Lead—30% Pure White Zinc—mixed ready for use with Pure Linseed Oil, Pure Turpentine and dryer.

BUTTERMAKERS DEMAND
THE "FAVORITE" CHURN

because they know it is the best. A glance at its construction—that light, but rigid angle steel frame, the bolted trunnions, the tight and conveniently arranged cover, the combined hand and foot drive, the roller bearings—these very evident advantages convince one of its superiority, which is fully proven by actual churning tests As a natural result, more "FAVORITES" are sold in Canada than all other churns combined. 8 sizes, to churn from ½ to 30 gallons.

David Maxwell & Sons, St. Mary's, Ont.

"Presto" BASIN COCKS

Nickel-plated. With china index handle. "A quarter turn gives a full opening." Tail screwed for 1-4 inch iron pipe.

Flat Wall Colours

Will Add Tone to Your Business

Not an experiment but a proven success. They make the home attractive by giving that soft mat-like surface so highly prized—dry without gloss yet with plenty of life. Look like expensive ingrain wall paper. Can be stencilled over. No surface you can't use them on—No surface they won't cover well.

WASHABLE, SANITARY, ARTISTIC

A boon to housewives, as they can be washed without injury.

STORAGE, VANCOUVER, B. C.—STORAGE or space to rent, office if required; warehouse close to all wharves, with railway siding; two elevators. Martin & Robertson, Ltd., 329 Railway Street, Vancouver. (14)

MISCELLANEOUS

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS—ESPECIALLY made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for binders and monthly account systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

YOU CAN BUY A REBUILT TYPEWRITER from us. We have about seventy-five typewriters of various makes, which we have rebuilt and which we will sell at $10.00, $15.00 and $20.00 each. We have also a large stock of better rebuilts at slightly higher figures. Write for details. The Monarch Typewriter Co., Ltd., 46 Adelaide St. West, Toronto, Canada. (tf)

OFFICE MANAGER WANTED

AN OLD-ESTABLISHED AND SUCCESSFUL joint stock manufacturing company in Toronto wants an office manager who besides being an expert accountant is capable of following costs closely, stopping leaks in the manufacturing department and capable of introducing economic methods. For such a man there is a good future. He can in time acquire an interest in the business. State experience and salary wanted. Box 637 Hardware and Metal, Toronto. tf

MISCELLANEOUS

COUNTER CHECK BOOKS—WRITE US to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS ARE DEVISED to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE — INSURE IN THE Hartford. Agencies everywhere in Canada.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN pens. If you have fountain pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction, and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. Gage & Co., Limited, Toronto, sole agents for Canada.

PENS—THE VERY BEST PENS MADE ARE those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find pen to suit you.

THE MONEY YOU ARE NOW LOSING through not having a National Cash Register would pay its cost in a short time. Write us for proof. The National Cash Register Co., 285 Yonge St., Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

MONTREAL FACTORY, INCLUDING PAINT, VARNISH AND DRY COLOR WORKS

QUALITY - SERVICE - PRICE

Quality that is always dependable, practical, co-operative service; prices that are consistent with both, and meet the popular demand, that is the Canada Paint Company's policy in brief. Nearly 50 years' experience has proved its soundness.

Three large, well-equipped factories are required to turn out our complete line of paints, varnishes and colors. The C. P. standard of quality is maintained by modern facilities and a thorough system of inspection and tests. It is always satisfactory and dependable, and the goods sustain a well-established demand.

Our three factories in Montreal, Toronto, and Winnipeg insure prompt deliveries. When you want goods in a hurry you can get them. Your shipments come well packed and neatly labeled. We furnish well designed store displays and advertising literature, bearing your name, in whatever quantities you can use to advantage. We are always ready to extend special help by mail or through our representatives to get new business for you, and we never forget that our success depends upon yours. We make the word "service" mean something.

High price goods move slowly and low price goods cannot be made right. We make our own linseed oil and dry colors, which, with our enormous output, reduces our manufacturing cost to the minimum. Thus we maintain a satisfactory quality, and establish prices that move the goods and pay you a fair margin of profit. Is it any wonder the Canada Paint Company's policy is a success?

Push This Lawn Roller—Every Householder Can Afford It

OUR ADJUSTABLE WEIGHT LAWN MOWER

is a necessity to people who aim at keeping their lawn beautiful.

For the best results begin rolling when the ground is soft. By using the adjustable weight roller, this can be accomplished. When empty the weight is only 115 lbs. and weight may be added as the ground hardens until it reaches 1000 lbs. Can be loaded with water or sand to meet the required weight.

Dealers:—This roller can be retailed at from $15 to $20, and allows a good profit.

Nicely finished with aluminum and attractively striped.

Ask your jobber for further information or write us direct.

Here's Your "Cue" Mr. Paint Man

QUALITY

The Tale of Quality Has a long, long reach —

The tale of "quality" travels far and fast — if it is a tale of good quality it helps — if poor quality it *hurts*. Sell a paint that disappoints — that fades, chalks off, and does all the other things a poor paint generally does and you will be surprised how far and how fast the dissatisfied patrons spread the news and the dissatisfaction. On the other hand sell

Martin-Senour Paint
100% Pure

and you will wonder what it is that is building up your business so fast. Satisfaction delights in telling about the thing that satisfies so much. It is not a silent salesman — rather it gets up on the housetop and lets the neighbors all know what it is so pleased about. What will a hundred such salesmen do for you? Sell Martin-Senour Paint and see. Write today for the way to get them started talking for you.

The Martin-Senour Co., Limited
Pioneers of Pure Paint
Montreal Chicago
Winnipeg

We Are In Business to Stay

That is why we are putting the quality into our goods and building up a reputation for DOUGALL VARNISH.

If you want to build up a reputation for yourself, sell and recommend "The Varnish That Lasts Longest" to your customers. The benefits derived from carrying this line will soon be apparent to you.

There is a difference. DOUGALL VARNISH is just as different from other varnish as paint is from whitewash, and it is worth just as much more.

Do not delay—Act now—You are still in time to lay in a stock for your Spring Trade.

GET THE GENUINE

DOES THE REPUTATION of GARLOCK PACKING mean anything to you?

Does the fact mean anything to you that GARLOCK PACKINGS are giving eminent satisfaction the country over and everywhere Engineers who know insist on the installation of Genuine GARLOCK?

This big and insistent demand for GARLOCK PACKING is the demand for quality.

Imitators are making Packings that look like GARLOCK and are trying to sell them because they look like GARLOCK.

Sometimes these imitations are sold as being "just as good as GARLOCK." If they were as good, they would be sold on their own merits and not on the established reputation of GARLOCK.

Sometimes these imitations are substituted when "GARLOCK" is asked for. To prevent you getting an imitation and assist you in identifying the genuine, we have marked every piece of Spiral Packing with this mark of quality

TRADE

MARK

The GARLOCK Catalogue tells all about Genuine GARLOCK Products. WRITE FOR IT TO-DAY.

THE GARLOCK PACKING COMPANY
HAMILTON, - ONTARIO
PIONEERS IN THE PACKING BUSINESS

First--

it was the custom to sell whiting, glue and color separately for kalsomined walls.

Then--

the whiting, glue and color were sold ready mixed in packages under different names—all just kalsomine of course. After being applied, this kalsomine decomposed and in time rubbed or scaled off.

Now--

people who want a thoroughly satisfactory wall-coating—one that is pure, permanent and sanitary—buy

ALABASTINE

Alabastine, made from crystalline alabaster rock, is a cement that sets and hardens on the wall and improves with age. Your trade will know about it through our advertising, and we will help you with catalogues, show cards, banners, posters and tint cards. DON'T DELAY ORDERING. Your Jobber can supply you.

The Alabastine Co., Ltd.
Paris - - Ontario

Here's A Pointer

that will go a long way to boosting your varnish business. Tell your customers that

INTERNATIONAL

Varnishes and Varnish Specialties

are put up in cans containing full Imperial Measure, not wine or short measure.

Prices, too, compare favorably with any other brand of Varnish, and the quality of the International line is unexcelled. It has been the leader for over 40 years.

For over 40 years the goodness of International Products has been a household word the world over.

Don't take any chances. Feature the line that "makes good" on every kind of job and obtain the benefit of our strong selling co-operation.

And all other Canadian Cities.

Keep on the Right Side of the Builder

by supplying him with our guaranteed

LEEKNOTT ROOFING

as it will be nearly as good as new when most of the ready roofings are forgotten. It will cost you no more to stock Leeknott and it is by far the cheapest and most profitable in the long run.

Its high quality is due to the work of experts—the experts use the very best of long fibre woollen felt, which is thoroughly soaked and coated with the genuine Trinidad Lake Asphalt, specially prepared and tempered for the purpose. Leeknott has the wonderful weather and fire resisting qualities, qualities that most roofings lack. Every roll is absolutely guaranteed. Rust-proof, galvanized special roofing nails, extra quality lap cement, and illustrated printed directions packed in every roll. Anyone can successfully lay "LEEKNOTT."

We make sales easy by supporting the dealer and supplying him with circulars, etc. Our rolls are more attractive and are certain to invite enquiries.

Write for full details. **Agents wanted.**

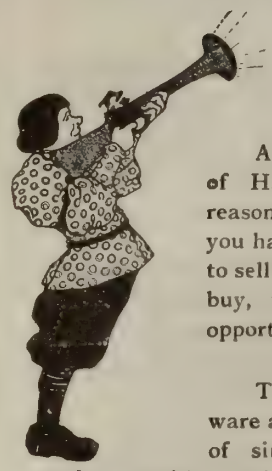
WEATHERPROOF CASCO PRODUCTS



Hits the Mark

Among the thousands of readers of Hardware and Metal it seems reasonable that someone wants what you have to sell, or that someone has to sell what you have tried in vain to buy, that someone is hunting the opportunity you have to offer.

The want ad. columns of Hardware and Metal are the simplest form of simplified advertising. No ad. writer need be employed, no drawing or cut need be made, no knowledge of display type is necessary, for display type will not be used in these columns. All that you have to do is state your wants, state them simply and clearly and send to any of our offices along with remittance to cover cost of advertisement. No accounts opened in this department.

Don't despise the want ad. because of its small size or small cost. Don't forget that practically all the hardware merchants, clerks, manufacturers and travellers read our paper each week.

RATES:—

2c. per word first insertion.
1c. per word subsequent insertions.
5c. additional each insertion for box number.

LOWER DOOR CHECK

The "LE PAGE" Patent OIL DOOR CHECK and SPRING

is a marvel of simplicity and has a mechanical action that is perfect.

It is the only door check made without packing in its working parts, which assures absolute freedom from packing friction.

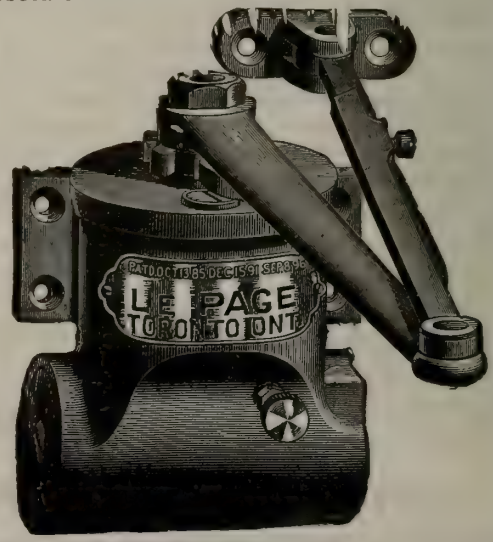
The door on which this device is used cannot slam, as the oil in the spring cup of the check forms a cushion, which keeps the door under perfect control and allows it to close quietly.

The spring tension is applied by means of the ratchet wheel on top; the checking power is controlled by the thumbscrew at the right.

The bearings are long and the spindle, with crank at lower end, is drop-forged from cold rolled steel.

Toronto public schools, Simpson's, Eaton's, etc., use this door check exclusively.

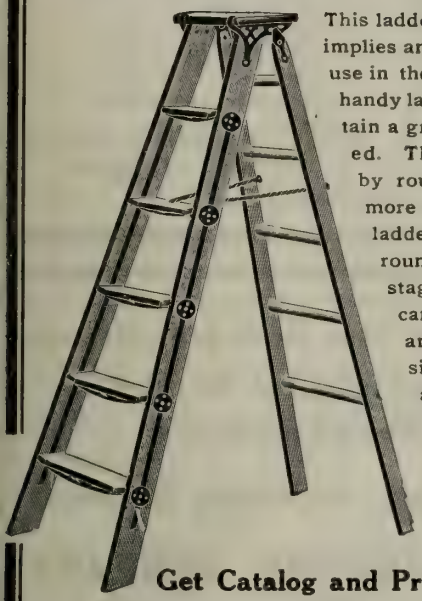
Write for circular and prices.



WM. KEATING

266 MACDONALD AVE. TORONTO

The Mechanic Special Service Ladder



This ladder is all that its name implies and is highly prized for use in the shop or wherever a handy ladder suitable to sustain a great weight is required. The legs are connected by rounds so that one or more may make use of the ladder at one time, and the rounds and steps are staggered so that a plank can be placed through and find support every six inches. The ears are of malleable iron and steps are trussed.

If you want to increase your profits, that ladder will help you.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

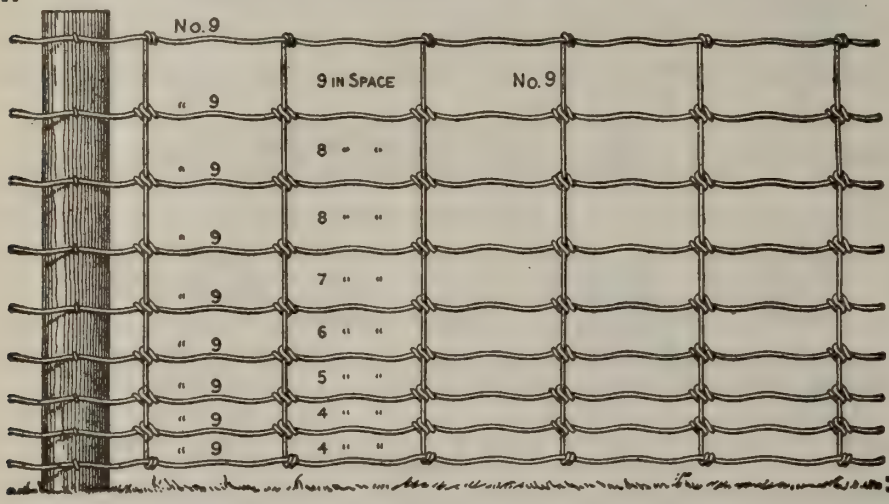
The "IDEAL" FENCE

is an effective Trade-Winner

The reason that there are more miles of Ideal Fence sold in Canada annually than any other make is not due to salesmanship or to advertising, but is due to the merits of the fence itself—to the quality of material and workmanship—to the protection it affords—to the service it renders and to our many satisfied customers throughout the Dominion.

QUALITY FIRST—LAST—ALWAYS

is what has made "Ideal" so popular. Ideal Fence is made exactly as represented and the price is always right. Send for our catalogue and price—then go after the farm trade.



"IDEAL" PRODUCTS:
Staples, Diggers,
McCloskey Grips,
Farm and Stock Gates,
Fence Stretchers, Tools,
Barb Wire, Coiled Wire,
Ornamental Fences and Gates,
Field, Hog and Poultry Fence,
Window and Stall Guards, Etc.

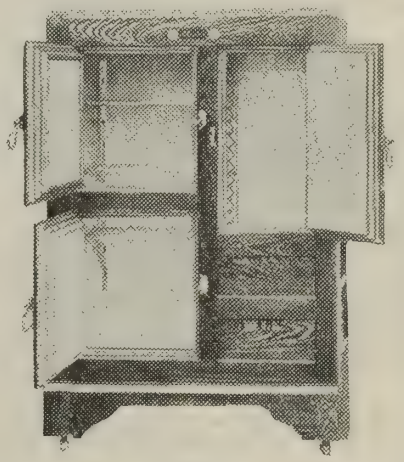
"Barnet" Refrigerators

Always Chosen---Always Yield Good Profits

The "Barnet" is the most up-to-date Refrigerator manufactured to-day.

The free ventilation and circulation of pure dry air, coldness in temperature (34 to 40 degrees), freedom from moisture, economy in consumption of ice, the "NEW PORCELAIN" linings, together with the perfect workmanship, piano finish, and style make the "BARNET" the "PEER" of all other Refrigerators. It is made in twenty different stock sizes, and in three different kinds of wood: Ash, Birch and Oak; will keep all goods from the least taint or odor, and are absolutely guaranteed in every respect. It is the only Refrigerator made that will stand a Medical Health Officer's Test.



Special Refrigerators and Cold Storages made to order

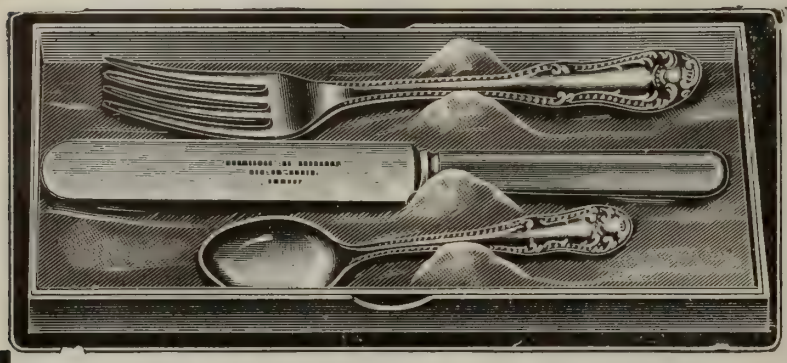
WINNIPEG

SIMONDS SAWS ARE THE BEST

Now that applies to any kind of a saw that the Hardware trade will have occasion to sell. Hand Saws, Crescent Ground Cross-cuts, Bands, and Circular Saws. These Saws are made in the Simonds factory in Montreal and prompt service is assured. Every Hardware Dealer should have Simonds Catalogue and trade discounts.

SIMONDS CANADA SAW CO., Limited, Montreal, P.Q. St. John, N.B. Vancouver, B.C.



Just the Thing for Gift Hunters

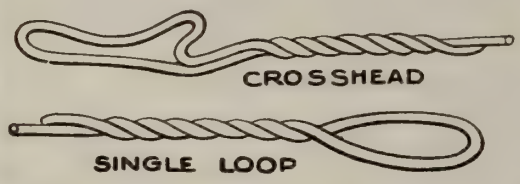
These three pieces in a neat satin-lined box, are the very thing you should handle as they are certain to attract the attention of gift hunters.

This ware is heavily plated with pure silver. It is very artistic and durable and makes an excellent set for a child.

The McGlashan, Clarke Co., Ltd., Niagara Falls, Ont.

AGENTS:—J. Mackay Rose, 88 McGill St., Montreal; N. F GUNDY, 61 Albert St., Toronto; David Philip, 291 Portage Ave., Winnipeg. Benj. Rogers, Charlottetown, P.E.I.

WIRE BALE TIES



Our wire, for baling hay, is made from the finest quality Bessemer Rods, and is 10 per cent. stronger than any other baling wire.
This is a line that brings the dealer clean, satisfactory profits with every sale, as it is not the come-back kind.
Get our prices and send us a trial order---we guarantee to satisfy.
We also recommend our WIRE NAILS and STAPLES as inferior to none.

The Laidlaw Bale-Tie Co., Hamilton, Ont.

Geo. W. Laidlaw, Vancouver, B.C. Harry F. Moulden, Winnipeg, Man.

WE PAY FROM $10.00 TO $50.00 PER WEEK

to our salesmen. To some of our best men we pay more.

Are you a $10.00 or a $50.00 man?

If you are a $50.00 man, we want you.

If you are a $10.00 man, with an ambition to be a $50.00 man, we want you.

You can devote your spare hours to our work, and make more money than you can make from any other commercial position in the same time.

Here is an occasion to reveal your capacity. You are not satisfied to be earning the same salary next year as now.

You want to know your own strength. After you have discovered it, you will be far better satisfied with yourself and will be more confident in your ability, which means steady progress on the ladder of success.

Pink's Lumbering Tools

Made in Canada

The Standard Tools in every province of the Dominion, New Zealand, Australia, Etc.

We manufacture all kinds of lumber tools.

Light and Durable
Send for catalogue and price list.

Long Distance
Phone No. 87

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

The Process Counts As Much As The Steel

Drills are backed by the full strength of the steel when W & B twisted-while-hot process is used.

Other methods of manufacture remove the strength-giving qualities of the metal and produce drills with only a shadow of the real toughness of the steel.

Why buy drills made from steel that has lost its backbone?

"HERCULES" HIGH SPEED TWIST DRILLS

are manufactured under the only twisted-while-hot process that retains all strength of Vanadium Steel in the finished drill.

This is the drill for general factory work where metal of different degrees of hardness makes up the day's output.

American Cans

IN SELECTING your PAINT and VARVISH Cans use the same careful judgment and criticism that you exercise in all other purchases. "American Cans" court such a test. Cans are not all alike, even if they do seem similar and look alike as "two peas in a pod." Satisfy every one of your needs in weight, strength, manufacturing detail and appearance; then consider price, promptness of delivery and possibility of a continuous supply without interruption. On the above basis we will take a chance on securing and holding your business.

American Can Company

Montreal, Que. Hamilton, Ont.

Write For The Wholesale Price
It is to Your Interest

This is an exceptional opportunity for any dealer to secure a high grade range made with your name on if you desire.

Our ranges are entirely different from other makes and are more effective and more economical in their service.

They are made in all styles, with mirrors, tiled backs, reservoir on either side if desired, and have other prominent features that make them winners.

WRITE, DON'T WAIT.

THE C. H. LePAGE CO., LIMITED
QUEBEC, CANADA

FLEXIBLE
Metallic Gas Tubing

This is an article that every dealer should handle—because it is the most economical to the user—because it yields a good profit as well. It will not kink, burn out or rot and is just as light and flexible as rubber. Made in either steel or copper. Write NOW for circulars and prices.

F. J. SCHUCH
19 JARVIS ST., TORONTO, CAN.

Every Fruit-Grower Needs It.

Pruning Time Is Almost Here

and the dealer who stocks and displays the

"Kansas" Pruning Knife
(Improved)

is the man who will realize quick sales and reasonable profits.

This PRUNING KNIFE absolutely eliminates all stretching and climbing that is caused through use of ordinary pruning knives.

Put it in stock at once. Give it a fair trial by learning its use and value, then you have another staple profit maker.

Drop us a card for more information, prices, etc.

STANLEY'S
CORRUGATED STRAP AND T-HINGES

ONE PAIR IN A BOX WITH SCREWS

Should be on your shelves.

STANLEY'S Corrugated Hinges are greatly superior to the old style hinges. Comparing the two lines, Corrugated Hinges have **greater strength,** consequently **longer life; lighter weight** with corresponding **lower freight charges,** and a neater appearance. The combination of these qualities of superiority readily explains the **widespread and ever-increasing popularity** of Stanley Corrugated Hinges.

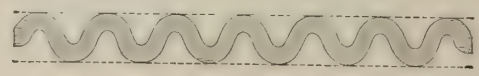

Figure 1

The greater strength with less weight of material is obtained by the application of the old principle of Engineering Design, illustrated in Figure 1. A piece of steel formed as shown by the shaded portion, has very nearly the same strength as a piece of the full area between the dotted lines. It is readily seen how this engineering principle has been used in designing Stanley's Corrugated Hinges.

Ordinary hinges, when they rust, bind on the pin and soon break at the joint.

The Corrugations Around The Joint

of Stanley's Corrugated Hinges absolutely prevent binding on the pin, no matter how rusty the hinges may become. It is in this feature particularly that Stanley's Corrugated Hinges are greatly superior in strength and wearing qualities to any other hinges.

Ask for **Stanley's No. 935 Heavy Strap Hinge**
Stanley's No. 937 Heavy T-Hinge

either loose or packed neatly one pair in a box with screws in a strong telescope box with the necessary screws of just the right size.

It's Worth While to KNOW The GILLETTE Safety Razor

Naturally, you make more money when you sell a Five-Dollar Gillette than when you hand a cheap make-shift safety over the counter.

Your customer wins, too, for his satisfaction with the Gillette is sure to be many times greater than it would be with the cheap article (usually imported.)

But the average customer is inclined, at first sight, to doubt if the extra value is in the Gillette. Here is where, in your own interests, you and your clerks ought to be able to clearly and forcefully show the Gillette's superiority, point by point. **Can you do it?**

At the recent Conventions we discovered a number of retail salesmen who did not know the advantages of the Gillette's adjustable feature—of the thin blade, gripped rigid in the curved holder—of the Angle Stroke.

In the stores where these salesmen work, low-priced razors, that give little profit and less satisfaction, are being **handed out**, where Gillette's might be **sold.** Is your store one of these?

The Gillette features, clearly understood and skilfully presented, win with every customer who appreciates quality. If your clerks do not thoroughly understand these features, our representative will be more than pleased to make them clear the next time he calls. ASK HIM—or WRITE US.

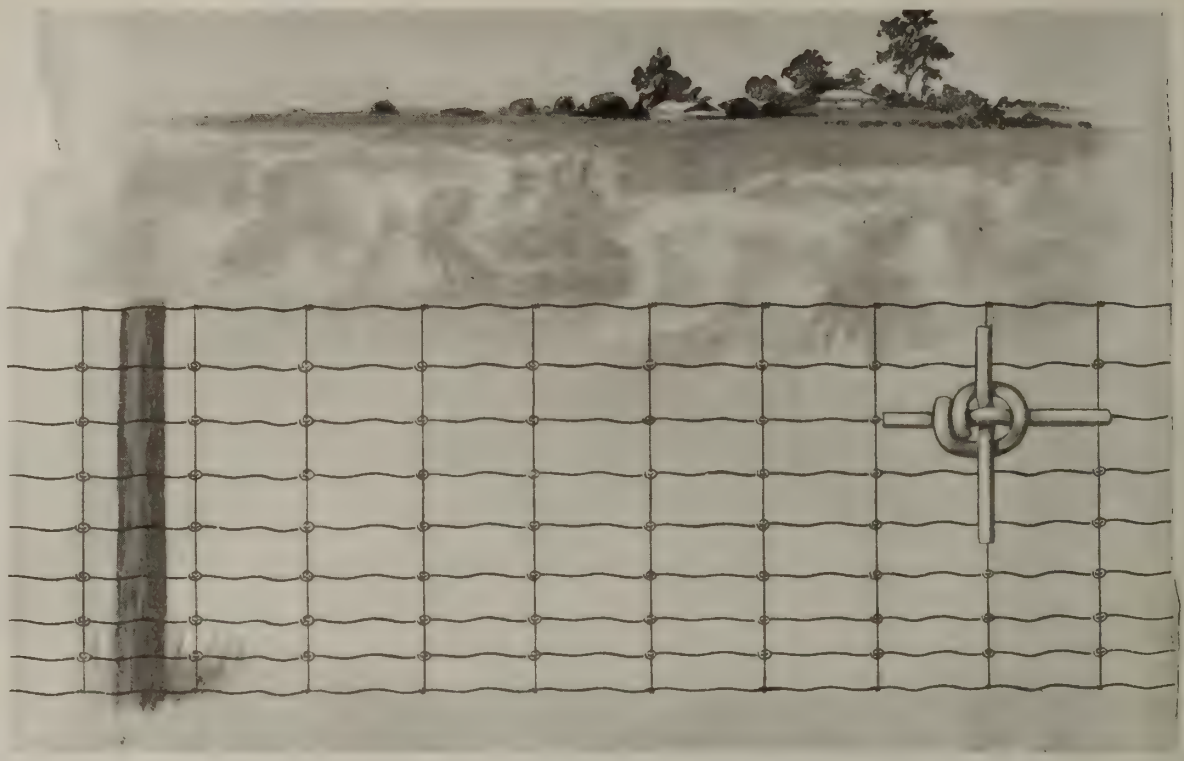
Catalog and Prices on request



Have You Considered

that Open Hearth Steel is demanded by railways and bridge builders, and by those who know, for all purposes where durability is required?

The way fence wire has rusted for years back is notorious.

Are you aware that Farm Journals are taking up the question and condemning Bessemer Steel for fencing, or that the United States Department of Agriculture reports Open Hearth Steel as being far superior in lasting qualities?

The new process Open Hearth Steel High Carbon Wire lasts like the old time iron wire. "INVINCIBLE" Fencing is made exclusively from Open Hearth Steel and heavily galvanized.

As makers of steel and wire, we are in a position to quote attractive prices. Which do you prefer to handle? Don't wait till your customers refuse anything else but our Open Hearth Steel Fencing. Write for our very latest discounts.

MACLEAN PUBLISHING COMPANY

TECHNICAL BOOK DEPARTMENT

143-149 University Avenue - - - TORONTO, ONT.

METALLIC PACKING

Steam pressure, sliding friction and moisture make it difficult to properly lubricate piston and valve stem rods, hence a self-lubricating metal like Magnolia naturally proves superior to other metals for packing rings. We recently published some splendid letters from Engineers on that subject, and here is another fine letter.

UNITED STATES ENGINEER DEPARTMENT
U.S. DREDGE "WALLOWA"

RIPARIA, WAS., OCTOBER 24th, 1911

Gentlemen:—I use Magnolia Metal for high-pressure steam packing on the main rods of the propelling Engines. These Engines have a piston speed of 150 feet per minute; diameter of rods, 3 inches; steam pressure, 225 lbs. per square inch: Four rings, or eight pieces, bevelled Magnolia Metal rings constitute the packing for each rod. I had a great deal of trouble with packing on the main rods, before using Magnolia Metal, with different kinds of Babbitt metals; the packing would melt or burn and crumble. I have at different times, when renewing packing, taken out from 30 to 48 pieces from each set, out of one stuffing box. Since using Magnolia for the rings, I have had no trouble whatever with the packing and after the rings got conditioned to the rods no steam leaked by. To-day I examined the packing rings and found them in as perfect condition as when I put them in four months ago, with hardly any sign of wear to them, and they look good for years of hard service. I cannot speak too highly of Magnolia Metal. Yours truly,

JOHN OWRE, Steam Engineer on U.S. "Wallowa."

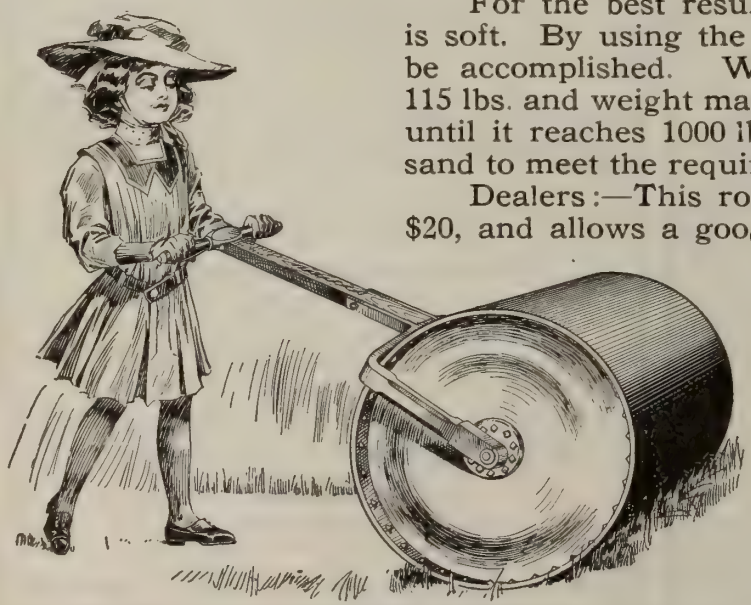
Write us for particulars and prices.

The James Morrison Brass Mfg. Co., Ltd.

93-97 Adelaide Street West, TORONTO

Push This Lawn Roller—Every Householder Can Afford It

OUR ADJUSTABLE WEIGHT LAWN MOWER



is a necessity to people who aim at keeping their lawn beautiful.

For the best results begin rolling when the ground is soft. By using the adjustable weight roller, this can be accomplished. When empty the weight is only 115 lbs. and weight may be added as the ground hardens until it reaches 1000 lbs. Can be loaded with water or sand to meet the required weight.

Dealers:—This roller can be retailed at from $15 to $20, and allows a good profit.

Nicely finished with aluminum and attractively striped.

Ask your jobber for further information or write us direct.

An Article Imitated is Quality Intimated

and we particularly call the attention of dealers to the attempts to imitate our

Stewart Ball Bearing Clipping Machine

Since Stewart machines were first put on the market a certain English manufacturer has never advanced any new or original feature in clipping machines. He has confined himself to imitating, so far as possible, the new inventions embodied in our product.

The inferior imitations have not found favor at home, and we feel certain the dealers of Canada will neither sanction nor support them.

When you handle Stewart machines you know you have the highest quality clipping machines, and priced fairly—machines that carry our unqualified guarantee that they must satisfy every purchaser or no sale—a policy quite contrary to that of a house whose imitations give continual trouble.

Most jobbers of Canada carry Stewart machines exclusively. Watch for a list of them next week.

How to Arrive at the Selling Price

A Simple Problem Which Caused Many Retailers to Arrive at an Erroneous Conclusion—An Interesting Question Introduced by F. C. Lariviere at the Guelph Convention.

At the Guelph convention, an interesting paper was read by Fred. C. Larviere on the results of an investigation into the methods of retailers in figuring profits. It provoked a lengthy discussion, involving as it did a number of vital points. The paper is reproduced in part.

A manufacturer of store equipment recently caused a question to be printed in a few of the national magazines, business, trade and newspaper publications, designed to find out what percentage of retailers figure their profit right.

The question had to be printed, of course, as an advertisement, even though it was not advertising in itself. Under the question was an offer to send a "48 page book for retailers" to any retailer who told how he figured the profit problem. Each retailer who answered the problem was also given another little book on the "Right Way to Figure Profits."

The publications used had a very wide circulation and of course went to a large number of retailers in every part of the United States and Canada.

The answers aggregated about 1,000, of which **750 were wrong.**

It is hardly believable that 75 per cent. of all retailers **do not know how to figure profits.** Some of the readers of this publication will doubt the possibility of such a condition.

Here is the question: A certain article costs $1 wholesale. What will it have to be sold for to allow a profit of 10 per cent., after allowing 22 per cent. for cost of doing business?

It is a very simple question—one that every retailer has to answer in his own business every day. But **750 out of 1,000 retailers answered it wrong.**

The answers ranged all the way from $1.10 to $1.60. The majority gave the selling price as $1.32 or $1.34, allowing a profit of one cent or less, notwithstanding an explanation at the bottom of the question that the answer was **not** $1.32.

A retailer in Dallas, Texas, answered like this:

> "In answering your question in the Saturday Evening Post, will say that if you had not stated that $1.32 was not correct, I would have put that price on the article, for I do not charge any profit on overhead expenses. But if you do, I cannot see any other way of figuring but to charge $1.34 on selling price. Will you please send me your book and please tell me what your selling price is, and oblige."

Is there any wonder that this man was not making money? He was on the straight road to bankruptcy and going fast. But he has slowed up now, and will soon be going in the right direction.

Perhaps some of the readers of this publication will think that there **would** be a profit in the article at $1.34, and to make sure that they will understand this Texas merchant's state of progress, it is well to explain why and how he was losing money instead of making ten per cent. profit as he thought.

If the wholesale price is $1.00 and the cost of doing business 22 per cent., $1.34 does not allow 10 per cent., but only 1.4 per cent. profit. On a gross annual business of $15,000, he will **clear** $150 a year, or a little better than $12 a month.

He said that if the ad. had not stated that $1.32 was not correct, **he would have put that price on the article.**

Selling the article at $1.32, he would **lose** almost 1 per cent. instead of making **10 per cent.**

His trouble was that he figured his profit and the amount which he wanted to take out for the cost of doing business, or his percentages, on the **cost price** instead of on the **selling** price.

Instead of adding 32 per cent. **of** the wholesale cost **to** the wholesale cost he **should** have added 32 per cent. of the **selling price** to the wholesale cost.

The wholesale cost is not something to be added to, but a portion of the selling price, in this instance, 68 per cent. of the selling price.

If the wholesale cost is 68 per cent. of the selling price, then the selling price is evidently $1.47, instead of $1.34, or $1.32.

If the cost of doing business is figured on the selling price, that is, 22 per cent. on the gross amount of business done during the year, the cost of selling the article is not 22 cents but **32 1-3 cents.**

If 10 per cent. profit is desired on the selling price, it is not sufficient to add 10 cents to the cost price. Instead, 14.7 cents, nearly 15 cents must be added.

To prove this, take 22 per cent. of $1.47, which is 32.34 cents, and 10 per cent. of $1.47, which is 14.7 cents. Add these to $1.00 and you have $1.47.

A dealer in Alabama said:

> "If my cost of doing business is 22 per cent. and I wish to make a sale to bear 10 per cent profit, I should figure it this way:
>
> Cost and cash ....$ 1.22
> Profit at 10 per cent..... 12.02
>
> Selling price ....$ 1.34
>
> "I would, therefore, sell for $1.34 all articles invoiced at $1.00 for 10 per cent. profit. Am I correct?"

He is **incorrect.** As stated before, instead of making 10 per cent. profit he would make a fraction over 1 per cent.

A Canton, Ohio, dealer in clothing and furnishing goods figured the problem in exactly the same way with the same result. So did a boot and shoe house at Goshen, Indiana.

A lumber, hardware and furniture dealer in a little town in Illinois gave a little different solution. getting very near to the correct method. He deducted 22 from 100, leaving 78. This 78 he construed as being 78 per cent. of the selling price, less his profit.

If $1.00 is 78 per cent. of the selling price, the latter, of course, would be $1.28, which he labelled as the selling price to cover the cost of doing business.

Then he deducted 10 from 100, leaving 90, and labelled $1.28 as 90 per cent. of the selling price to cover profit. $1.28, of course, is 90 per cent. of $1.42, which he gave as the answer.

He made the mistake of taking his percentage for the cost of doing business out of one sum and his profit out of another. He should have taken both percentages at the same time.

He went on to prove his figures, and undoubtedly did prove them, so far as his way of figuring is concerned. But proving that a wrong answer is correct by using a wrong method is like trying to prove that a horse is a horse by pointing out a pig.

This man's letterhead showed that he has a capital stock of $10,000, and that he is treasurer of the company.

But he has the wrong job, for he was figuring himself out of 5 cents on every dollar's worth of goods he bought. He isn't doing it now.

A druggist out in Iowa figured his $1.00 wholesale cost to give him a selling price of $1.43. He went about it in the right way but figured wrong. First, he subtracted 32 (both percentages) from 100, giving 68; then he multiplied $1.00 by 100 and divided by 68, giving him "$1.43."

His method is very much better than his arithmetic. While he goes about it in the right way, he gets the wrong answer by 4 cents. Multiplying $1.00 by 100 and dividing by 68 should give $1.47—does if the calculation is performed correctly.

Strike May Affect Glass Situation

Coal in England Low, Glass Plants May Close, so Belgian Product Will be Needed—Shipping May be Interfered With, Too—Unless This Occurs Canadian Situation Will Not be Greatly Changed.

While optimists are declaring that the English coal strike will be terminated within a week, both optimists and pessimists are agreed that the effect of this industrial war will be felt for months to come. Damage has been done already; the only hope now is that the consequence will not be too serious.

Glass handlers, in common with all other dealers in English and continental lines, are anxiously awaiting developments. The events of the next few days mean much to them—much also to the retailers throughout Canada; much to the contractors, and much to every user of glass. Some time ago it seemed that the price of this commodity must go up. The situation became better and no advance was made. Then came the strike, and upon its developments depends the future price of glass.

Good Supply to Date.

The one thing which has been keeping the figure down is a good supply. In spite of the shipping difficulties last year, good quantities of the various sizes were brought into Canada. These supplies are not yet exhausted, and as the handlers expect fresh shipments shortly, they have decided against any upward movement of prices. But here is the rub. It now seems that there may be some interference with the early glass shipments, and if this occurs, nothing can prevent an advance.

England, it has been said, had, when the strike commenced, only a fortnight's supply of coal. That supply has been well nigh exhausted. Even if settlement is made within a week it will take another week for production to recommence. So many of the foreign plants will be forced to close—the glass plants among others.

England's Need of Glass.

Last year, and for some years past, England has brought in about half her glass from Belgium. Let anything interfere with the English production, therefore, and it would be necessary for still more to be imported.

There is another consideration in this connection, of course. If the English supply of glass should be reduced, through the closing down of the plants, it is quite likely that the railroad service would be greatly disorganized, too. Therefore, there might be little use bringing in glass from Belgium at all, seeing that it would lie at the quays, awaiting better times before it could be transported to its destination.

So, after all, the continuance of the strike may virtually mean that more Belgian glass is wanted in England, but that less will really be brought in because it cannot be handled when once unloaded. This would mean that in Belgium there would be better supplies to meet the Canadian demand, rather than poorer; yet this does not mean that Canada would not suffer. In times of a strike it is not only failure of the supply which is to be feared, but also failure of the means of transportation. Something has already been said of how that failure in transportation facilities may affect England directly, and so Canada indirectly; but look at the question from Canada's side alone for a minute.

Depends on C. P. R. Ships.

At the present time glass is brought to Montreal from Antwerp by the C. P. R. boats. These go from Montreal to London; take on some cargo there, and then sail across channel to Antwerp and there complete their burden. The coaling is done in London.

Already some shipping has been interfered with on account of the shortage of coal. Let the strike continue much longer and there will have to be more cancellations. The question, of course, is, will the glass-carrying C.P.R. ships have to be withdrawn. Even if the coal supply in London gets so low that the bunkers cannot be filled there, it may be possible for the shipping officials to arrange for coaling in Antwerp. But things are in such a state of unrest in Europe that the spreading of the strike seems not impossible. Let this occur and shipping cancellation would immediately follow. Then supplies would decrease in Canada and prices would have to go up.

Future in the Dark.

To foresee what is going to happen is especially difficult just now. A settlement seems likely one day, the next it appears something far off. But if a settlement does not come, trouble will. Perhaps the glass works in England will not have to discontinue operations entirely. Perhaps the railways will not have to refuse to carry all glass brought from Belgium. Perhaps the ships bringing Belgium glass into Canada will not all be cancelled; but any one of these things seems likely to happen in a degree. Trouble is feared, and trouble always means that somebody pays.

By "Mack."

The recent very stormy weather, which delayed mails so much and blocked the railroads with snowdrifts, also kept many of us in the shelter of the house for days at a time.

Something about the mental condition which develops during a winter shut-in period of rough weather excuses procrastination.

With the furnace working well and the wind whirling the snow into the house paths, which will have to be shovelled out clear some time after the storm abates, the delights of a long day spent in reading are most appealing.

That which called for attention may without much compunction be postponed until some future time, even springtime will not seem too remote for our mood.

Philosophers have made it plain to us that "procrastination is the thief of time," as we know after looking backward and wondering for a moment at the flight of those days we could now use to better effect, we think.

An experienced account collector never never defers his visits to the homes of delinquents. If he should procrastinate, as I have done on certain occasions, his usefulness would be seriously impaired. Once upon a time a refractory instalment plan monthly account customer who had purchased a stove, decided to become a resident of the Republic to the south.

The family reached this important decision without taking us into their councils. In fact, a discreet silence was maintained.

Payments having become intermittent, a personal call was planned and the time set for the following day, which was extended to the next.

In this dilatory manner a few more days glided by and still nothing had transpired to relieve the situation.

When finally the house in which our former patrons had lived was visited, it was uninhabited. A neighbor volunteered the information they had taken their departure during the previous night.

In this instance delay had been proven dangerous.

Veteran Figures in the Hardware Field

No. 11.—John McKelvey, Kingston.

A MAN is no older than he feels and acts. Figuring on this basis, John McKelvey, of the famous old hardware firm of McKelvey & Birch, Kingston, although in point of time he is over seventy years of age—figuring on the basis of activity and enthusiasm, John McKelvey is not a day over thirty-five. In fact, he can show more energy than many a young fellow of twenty-five or thirty. He is a hard worker and is still one of the first to be at the shop in the morning and one of the last to leave at night.

It was in 1865 that the hardware store of McKelvey & Birch opened its doors to the public. A modest shop on Wellington street was the starting point of the firm. Their growth was rapid and in 1869 they moved to 71 Brock street into a larger establishment. The store was enlarged in 1874, and the premises underwent a complete overhauling in the year 1885, when the plumbing and steamfitting departments were added. The building increased so that the store next door had to be taken in as well, with the result that now the firm has one of the best equipped places in Canada. A remarkable feature in connection with this firm is that ever since the business was organized forty-four years ago, it has been under the same management and proprietorship.

A Fixed Policy.

The firm of McKelvey & Birch have had a fixed policy, an inkling of which can be found in the countenance of the subject of this sketch. One reads in the features of John McKelvey, the spirit of perseverance and indomitable purpose and the desire to fulfill every pledge. The reputation of the firm has been built up in just that way. They have made it a point to fulfill to the letter every promise made as to the quality of the goods sold, and the work turned out. "What we say, we do," is a golden rule which every merchant might adopt with profit both to his customers and himself.

Mr. McKelvey's life has been one full of various activities spread over a wide field. He has always been interested in public affairs and in his younger days actively participated. He still takes part but is more inclined to sit back and let the younger men have their fling. Serving in the capacity of alderman, he gradually acquired a grip of municipal affairs that entitled him to higher honors and his election to the office of mayor followed. That was thirty-five years ago. It is said of him that he made one of the best mayors

Figuring on the basis of activity and enthusiasm, John McKelvey is not a day over thirty-five.

that the city of Kingston has ever seen. Bringing the same power of concentration that he had always devoted to his business, to bear on the duties of the chief magistracy, Mr. McKelvey filled position with honor to himself and the city.

He served on the school board as well and is at the present time a director of the Kingston Shipbuilding Co.

Politics claimed a share of his time. He has always been a Liberal; one of the "old guard" of Liberalism, in fact. As president of the Liberal Association, he took an active part in the many desperate battles which have been waged in that political storm centre. His friends say—and events attest—that he is still ready to get out and fight for the cause he has always espoused.

The influence of both Mr. McKelvey and his partner Samuel Birch, has always been on the side of progress. They have kept up with the march of the times in their business and have given their support to any movement for the good of the community generally. The success they have won in business is a tribute to the soundness of their judgment and methods. They are both practical hardwaremen, knowing the stock from brass tacks to stoves.

They are known from one end of the country to the other and their friends hope to see the old firm conducted by the same well-known men for many years to come.

TALK ON COST ACCOUNTING.

At the recent convention of hardware and implement dealers at Oklahoma City, Okla., Harry Mead, a hardware merchant of Wichita, Kan., gave a chalk talk on "Cost Accounting." He maintained that it is the duty of traveling salesmen to instruct the dealers in the science of cost accounting, and that any dealer in need of such instruction should pay heed to it, says the American Artisan.

Mr. Mead said that he knew personally of eleven failures in the hardware and implement business, yet none of these men was addicted to bad habits or lack of industry. They simply did not know their cost of doing business. If this work of cost education had been begun intelligently and earnestly by the travelers two years ago, 90 per cent. of the failures which have developed since that time could have been avoided.

Mr. Mead also took a rap at indiscriminate buying, and said that he knew of one dealer who had on sale at one time fourteen different lines of enameled ware of fourteen different colors. That man had failed. Another man he knew of carried only one line of this goods and had met success.

On a large chart, in full view of everyone in the auditorium, Mr. Mead figured out that the average cost of doing business in Oklahoma was between 18 and 19 per cent. His conclusion, however, was challenged by S. S. Reed, of Paul's Valley, who asserted that he did a business of $53,000 last year at a cost of but 8 per cent. Mr. Mead, hailing not very far from Missouri, demanded to be shown, and Mr. Reed came forward to accommodate him. The cost educator then questioned him on every item of cost, which Mr. Reed gave for his last business year as follows:

Rent	$1,500
Salary	1,500
Amount to be earned in investment	2,000
Salary of head salesman	900
Salary of second salesman	780
Extra help	170
Taxes	250
Light, heat, water and ice	75
Telephones	100
Office Supplies	75
Advertising	300
Incidentals	1,150
Donations	150
Depreciation on stock, fixtures, etc.	240
Lost tools	10
Horse feed	120
Bad accounts	400
Total	$8,820

These figures proved that Mr. Reed's cost of doing business was about twice the amount of his own estimate, or nearly 17 per cent., and the gentleman from Paul's Valley admitted that the buttermilk was on him.

APPOINTED ASSESSOR.

Hamilton, Ont.—Ralph B. Baker, formerly Hamilton representative for Rice Lewis & Son, Ltd., has been appointed as a city assessor.

HOW TO FIX SELLING PRICE.

It seemed simple. At first glance, it looked as though an averagely bright scholar in part second book would be able to work it off-hand. But when retail merchants in all parts of America tackled that harmless looking little sum, seventy-five per cent of them went astray.

Some time ago the problem, given on another page of this issue, was submitted, and a prize offered to all dealers who got the right answer. There was a large response and most of the answers were wrong. This was doubly surprising, inasmuch as the problem had to do with the fixing of a selling price, in which question the retail dealer ought to be perfect.

Can it be that a majority of dealers do not know how to figure the selling price accurately? That they are not figuring the price on the right basis? It is a serious matter for the merchant who sets his selling price on the erroneous basis which so many took in answering this sum. It means a serious loss, perhaps a complete swallowing up of prospective profits.

Every hardwareman should con this problem over and study the method adopted to get the right answer. Are you following this plan in setting your prices? Or are you adopting the other and wrong method? It means much to you and is worth earnest consideration.

INSURANCE A DAILY CONSIDERATION.

Recently there was a fire in a hardware store, and when the flames had burned themselves out, and the owner of the store had time to figure his assets and liabilities, he discovered this distressing condition. He had bought the store a year or two before, and had then taken out an insurance policy covering the $6,000 worth of stock. Lately, he has added stock. He thought of adding to his insurance also, but put this off from day to day. So, when the fire came, this dealer had the $6,000 insurance and something like $14,000 stock. In other words he suffered an $8,000 loss.

Insurance is a peculiar thing. It is a safeguard—something which provides against future loss. This loss may or may not come, but it is practically as likely to come one minute as another. The dealer who lost this eight thousand, for instance, had intended to take proper precautions. He had simply delayed estimating what was his additional stock and taking out a policy.

This case simply shows the need which there is of keeping constant tab on stock. One up-to-date retailer keeps a tablet constantly before him. On this he has noted the stock on hand when a complete inventory was last made. Every day the sales and purchases are noted. By subtracting the sales from the stock, and adding the purchases, this dealer has constantly before him a statement of goods in his store that very day. If the value of this stock is greatly in excess of his insurance, a new policy is taken out immediately.

Such a system means a little expenditure of time and thought, but it also means true protection, and if insurance is worth buying, it is surely worth buying as wisely as a man would buy any other goods. Insurance in a hardware store is not something which may be secured in January for the whole year. The amount needed varies.

ENCOURAGING CLERKS TO TAKE INTEREST.

"I'm going to add this and that to our stock. I'm not sure such a thing is a good line. I believe we might well give more space to stoves."

It was a clerk in a hardware store who spoke, and the capital I's fairly dripped from him. His employer stood by and listened, nor did he say a word. Perhaps he saw the incongruity of this clerk stating what he was going to do; yet he was likely well satisfied, for he has a clerk who works as though the store were really his. It is not his weekly salary for which this man is serving, but for the business which he has come to regard as his.

Some dealers might object to the proprietary ways of this clerk, yet after all that proprietary feeling has money value. It means enthusiasm. It means planning. It means the exact opposite of time-serving. It means money to the employer. That feeling of proprietorship indeed is one of the things after which the employer may best strive. Perhaps the clerk quoted above was a little unwise to use the first personal pronoun as a repeating decimal, nevertheless, he had the right spirit—the spirit of genuine interest and pride in his work.

WATCH FOR SPECIAL NUMBER.

Next week the annual spring number of Hardware and Metal will be published. In past years, these special editions have contained such a wealth of interesting editorial matter and equally interesting advertising that they have been eagerly watched for by retail dealers in all parts of the Dominion and zealously read and kept for reference afterward. Each year the spring specials have advanced, both in size and interest. The present year will prove no exception for the issue promises to be the very best that has yet been published.

The editorial staff of Hardware and Metal have been engaged for some months in collecting information for this number. The reading pages will be filled with articles of a practical and interesting nature, having "Efficiency" as their main theme. Undoubtedly, the hardwareman will be able to secure many useful ideas and valuable information by perusal of these articles. The number will be handsomely illustrated from first to last. Watch for it. Do not by any chance miss this number, the largest and best of the fifty-two published during the year.

In the preparation of so large a number, a tremendous amount of work is involved. Every effort will be made to preclude delay in issuing the special, but it is not impos-

sible that, as a result of the heavy mailing list and the difficulty involved in that department, the issue may be a little late in reaching subscribers.

HANDING ON INFORMATION.

Something has been said in these pages on several occasions recently with reference to the relations between the retailer and the traveler. We have taken occasion to point out the duty of the retailer to the traveler. Perhaps a word on the other side of the question will now be in order.

The traveler owes it to the retailer to keep him posted on matters of interest to the trade. He should also do his best to impress the practical and selling points of the goods he handles on the hardware dealer and his clerks. He should endeavor to give them the benefit of the information which he himself possesses. It is not so much that he owes this to the dealer as that he owes it to himself. The benefits of instilling practical knowledge into the men who sell the goods to the public manifest themselves first in the business of the retailer. The traveler enjoys the benefit immediately, however, for he sells more of that line of goods to the retailer. It is, therefore, in his (the traveler's) own interests that his customers should be sufficiently versed in the goods to sell them intelligently.

A reciprocal attitude is what is needed. The dealer should be anxious to secure all the information that he can; the traveler should be just as willing to give it. Too often, unfortunately. there is neither desire on the one side nor compliance on the other. And both interests suffer as the inevitable result.

Intelligent salesmanship is one of the great necessities in the commercial world to-day. Undoubtedly, the establishment of a closer bond between merchant and traveler in the respect pointed out, would assist in putting selling methods on a higher plane.

RIGHTS OF THE TRAVELER.

A deputation of commercial travelers waited on Sir James Whitney, Premier of Ontario, during the week protesting against conditions of some of the hotels in local option districts which now do not come under control of the government.

Some of the things they complained of were the following:—

Rates out of proportion to the accommodation.

Food inferior, badly cooked and horribly served.

Dirty bed clothing, with some beds like a veritable rag bag.

Dirty sample rooms in many places.

Cold rooms with insufficient bed clothing.

Woeful lack of sanitary improvements and conveniences.

The Premier and Hon. Mr. Hanna, provincial secretary, promised to look into the complaints and gave the assurance that if further inspection were needed it would be attended to.

Certainly if the traveling man has to endure all or any of the hardships mentioned above something should be done. He is a necessary attribute to the carrying on of commerce and should be treated with respect.

If the placing of even a nominal tax on such hotels thereby bringing them under government control, would remove the inconveniences then it should be done without delay.

POINTED EDITORIALS.

Efficiency is the watchword of progress.

* * *

It is better to have a customer come back with a kick than never to come back at all.

* * *

Watch for the spring special, which is published next week. It promises to break all records.

* * *

Better to say too little to a customer than to over-urge him and digust him with your methods and your store.

* * *

A Sydney Hardware dealer has purchased an automobile delivery wagon. Perhaps the east isn't keeping up with the times!

* * *

There was plenty of "ginger" in the proceedings, despite the fact that ex-President Cinnamon did not arrive for the early sessions.

* * *

Improve the appearance of the paint department. Half an hour's work now will be rewarded by increased sales later on.

* * *

You cannot sell goods unless you know something about them. The hardware clerk has, therefore, a wide and varied field for study.

* * *

That heroic personage, the wearer of the first straw hat, has made his appearance in New York. What surer sign of the near proximity of spring.

* * *

What has happened to that famous hardware order, the Hookworms of the World? Was the order too true to it's own name, too lacking in energy to even continue in existence?

* * *

Handing on information is a great source of commercial strength; if it's the right kind of information. Travelers and retailers might model themselves on the fair sex in this matter. The ladies are always handing on information.

* * *

Never ask another to do what you would not do yourself. Many dealers urge customers to use paint when their own stores have been sadly in need of paint for these many long years. A freshly decorated store is one of the strongest possible arguments in favor of paint.

* * *

Dealers who thought that they knew all about arithmetic met with a shock when they discovered they could not work out the simple sum propounded in another part of this issue. It is probably true that nine out of every ten men would find the wrong answer. And yet the point is a vital one to the merchant.

Complete Course of Sheet Metal Work

By L. W. KOSER---No. 5

If the metal worker has practiced and studied the preceding plates he will by this time have become fairly familiar with a square mitre, or mitre at right angles. This is by far the most common mitre used. It often becomes necessary, however, to make a mitre at other than right angles, and for this purpose we employ what is known as the "mitre line" method.

We will suppose that the metal worker has a job of eavetroughing to do, and the corners on the building are at different angles, some being square or right angles, some being sharp or acute angles, as Fig. 3, plate 8, and some being obtuse angles as Fig. 5.

We first lay off the roof line, or line of eave or facia board, where trough is fastened to; this is shown by the dotted lines A, B, C.

Then draw the shape or profile of trough as shown, having the back part of trough against roof line, and the outside or beaded edge projecting out from the roof line the same distance it would project on building.

Then draw the outside line which represents the projection as shown by the lines E, F, G, and draw the mitre line F, B.

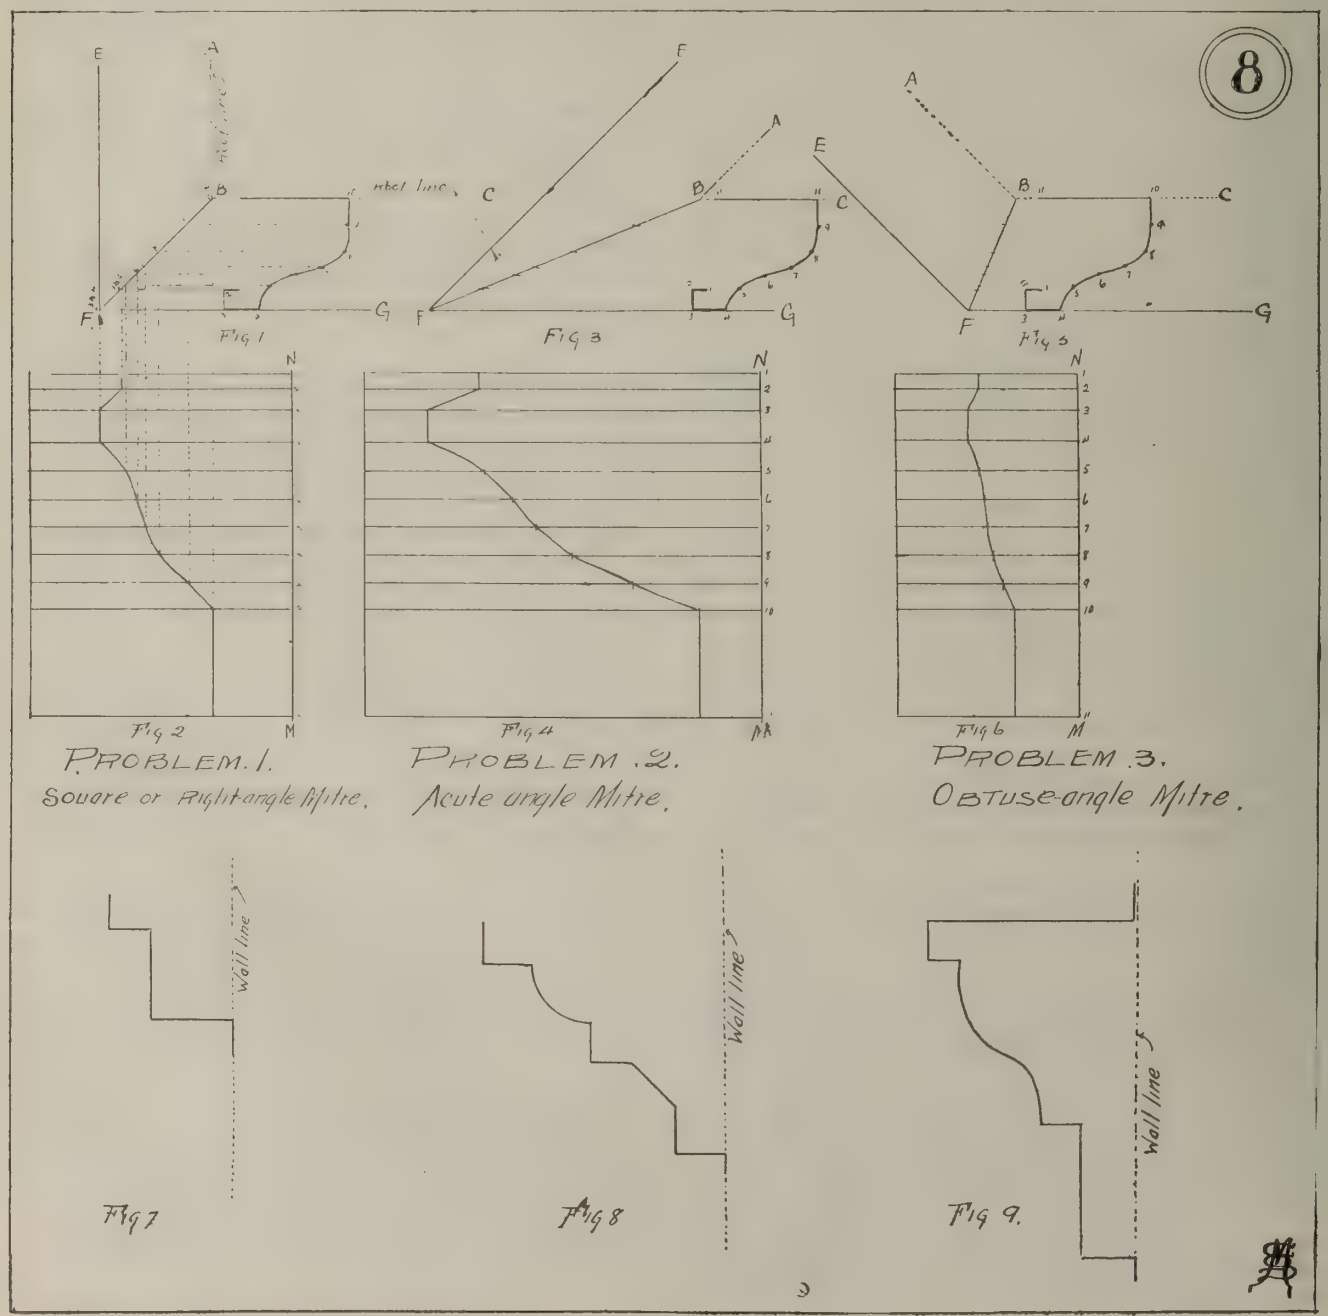
Now divide the profile into the different parts and number each.

Lay out the stretchout at right angles to the line B, C and F, G.

When drawing patterns by the "mitre line" method always have the stretchout line N-M at right angles to the line that the profile is drawn on. For instance, the profile on Fig. 1 is drawn on the lines B-C and F-G, so that the stretchout line would be at right angles to these lines.

With the T-sqr. placed parallel to the lines B-C and F-G carry a 1 line from each number on the profile to the mitre line F-B, and number each the same as on the profile.

Then with the T-sqr. placed parallel to the line N-M, drop a line from each of



the points on the mitre line to the measurement line having the corresponding number.

A line traced through these points gives the desired pattern.

Problems 2 and 3 are drawn the same as problem 1, the only difference being, that as the roof line is at a different angle, the mitre line is necessarily different, but the principle is the same.

For practice draw Figs. 7, 8 and 9 at each one of the different angles shown by Figs. 1, 3 and 5.

On plate 7 we show the method of developing the pattern for one side of a square ornament by dropping the points direct from the elevation to the stretchout, and on plate 8 we show the use of the mitre line.

The method outlined on plate 7 applies only to square or 4-sided figures. But where the figure has more or less than 4 sides it becomes necessary to use the mitre line method.

As this method also applies to the 4-sided figure, and as this is probably the easiest to understand, we will develop the pattern for a square ornament, and as before mentioned, as either way can be used we will develop the pattern both ways to show that the results are the same in each case.

On plate 9 Fig. 1 is the elevation of an ornament which we desire to make four-sided.

Fig. 4 shows the pattern developed as described for plate 7, the only difference being that in this case the stretchout is placed directly above the elevation instead of directly below it as on plate 7. The student can easily see that this makes no difference, as the parallel lines are of course the same distance apart whether carried up or down.

Having drawn the elevation Fig. 1 we will drawn the plan Fig. 2. This is an outline of the base of Fig. 1. Its sides A, B, C, D, being equal to the widest part of Fig. 1 as S.S.

Draw a line from the corner B to the corner C and from the corner A to the corner D, thus obtaining the mitre lines.

The centre O must be directly below the point 1 on the elevation and the side B, D must be parallel to the centre line O.P.

Now lay out the stretchout line N.M. at right angles to the line O.P.

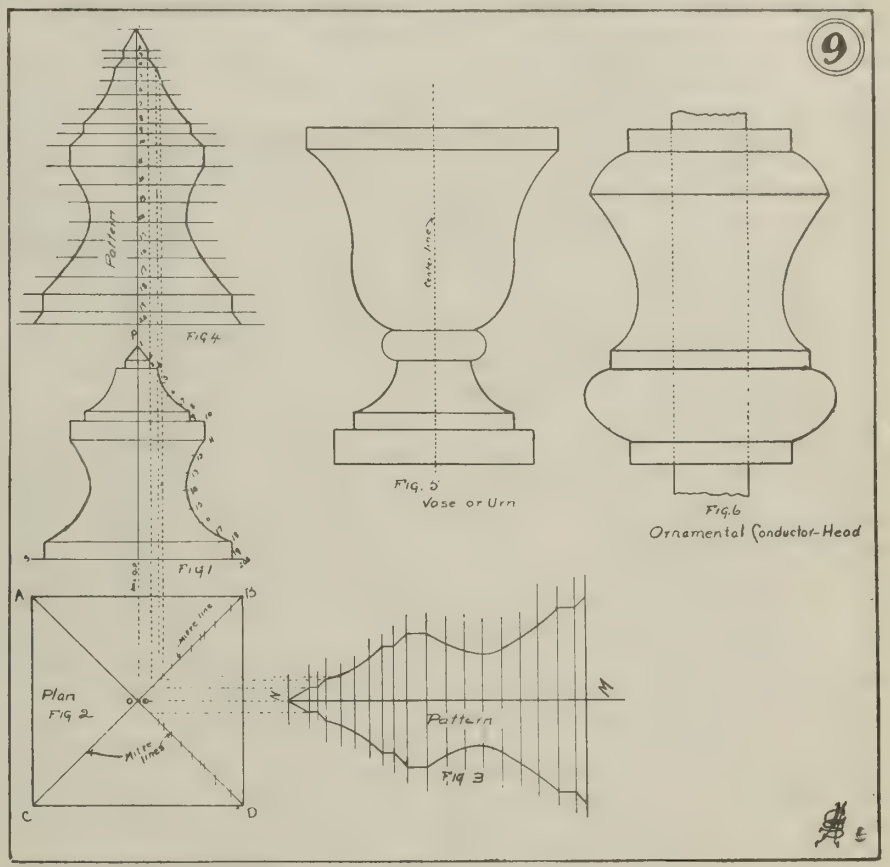
Transfer the stretchout to this line, number same and draw the usual measurement lines through each number.

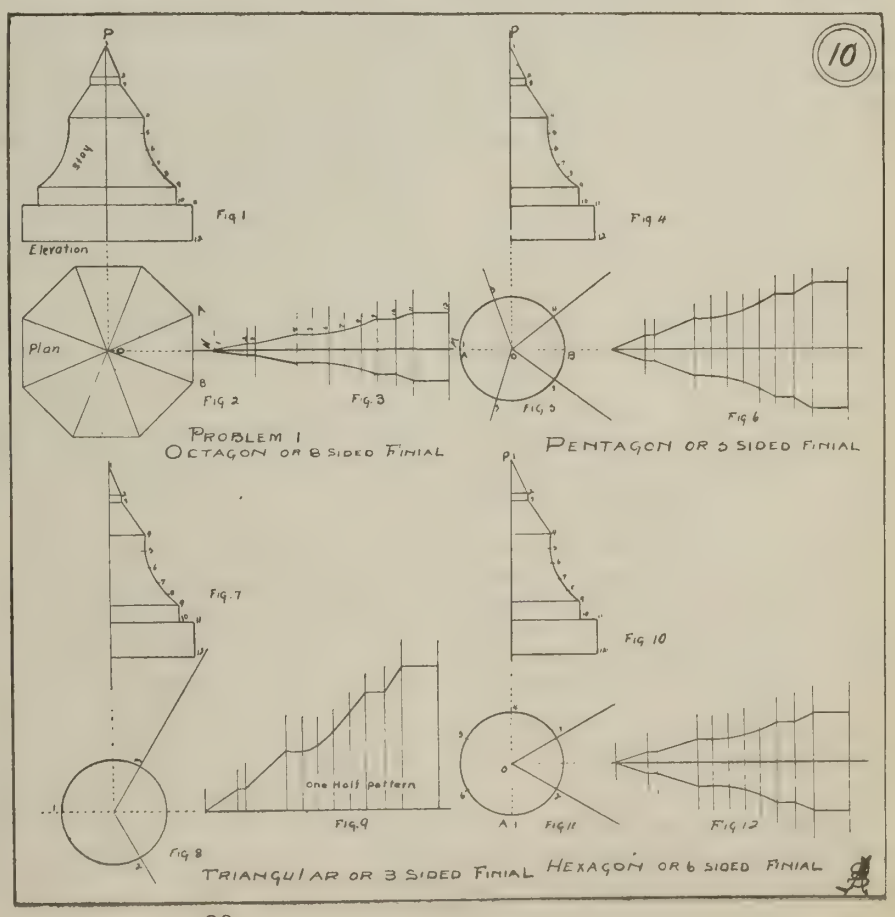
Now place the T-sqr. parellel to the centre line of Fig. 1 and either drop a line or make a mark on the mitre lines O.B. and O.D. directly below the numbers on the elevation.

It will be found necessary to rub out the mitre lines O.B. and O.D. and draw fresh lines during the operation, as otherwise there would be so many marks on the mitre lines as to cause confusion.

Trace a line through the different points on the stretchout and the pattern will be developed.

It will be noticed that the width of the pattern Fig. 3 is regulated by the





width of the angle or opening of the mitre lines O.B. and O.D. This fact kept in mind will help in understanding the succeeding examples.

Now develop the pattern for one side of a square figure for Figs. 5 and 6.

The method illustrated by Figs. 1, 2 and 3, plate 9 show the principle employed in getting the pattern for a figure having any number of sides, the only difference being in the angle of the mitre lines. For instance, on plate 10 Fig. 1 is the elevation of an ornament we wish to make octagon or eight-sided. The shape or profile of this makes no difference. It can be the same as Fig. 1 plate 9 or any other style wanted.

As we wish in this case to make the figure eight-sided we draw an octagon below the elevation instead of a square.

One of the sides as A.B. must be parallel to the line O.P. Fig. 1.

Then at right angles to the line O.P. and from the centre of the plan O. draw the stretchout line N.M.

Lay out the stretchout and draw the usual measurement lines.

Drop the points on the elevation to the mitre lines O.A. and O.B. and carry out to the stretchout.

Figs. 4, 5 and 6 show the pattern developed for a pentagon or five-sided figure.

Draw the elevation Fig. 4 and below it draw a pentagon. This can be drawn as explained for Fig. 44 plate 3.

To do this the vertical line O.P. is dropped down and a horizontal line A.B. is drawn. Set the points of the compass at O. and describe any size circle. Set the points of the dividers at A, where the straight line meets the circle, and step the circle off into five equal spaces, and number 1, 2, 3, 4, and 5.

Draw lines from the centre O out through these numbers, which will give the mitre lines.

The rest is done as explained for the octagon and square.

Figs. 7, 8 and 9 show the pattern developed for a triangular or three-sided figure.

The mitre lines are obtained the same as for Fig. 5, the only difference being that the circle is divided into three equal parts instead of five as for the pentagon.

Figs. 10, 11 and 12 show the pattern developed for a hexagon or six-sided figure, the only difference being that the line O.P. is drawn past the centre and where it touches the circle forms the starting point for stepping off the hexagon.

As only the lines O.2 and O.3 are required these only are shown.

VISITED CONVENTION

Montreal.—The Hardware Convention in progress at Montreal last week, was honored by a visit from Lieutenant-Governor Langelier of Quebec. With Madam and Mademoiselle Langelier, the Lieutenant-Governor inspected all the booths, taking note of the various places of especial interest pointed out by F. C. Lariviere.

Catalogues and Booklets

Saws and Knives.

The Simonds Canada Saw Co., Montreal, have issued a large catalogue bound in book form. It contains descriptions of the complete lines of saws, knives and files manufactured in the different Simonds factories. It is one of the most complete publications of the kind yet put out, giving full information as to tools and parts and all special lines.

Among the new pages which appear in this catalog and not in former issues of the Simonds Catalogue are those devoted to: Pit and Whip Saws, High Speed Steel Planer Knives, Cane Knives, Docking Saws, also a page showing a Simonds Crescent Ground Cross-Cut Saw fitted with the Double Horn Handle.

Fishing Tackle.

The Enterprising Manufacturing Co., Akron, Ohio, have issued a catalogue dealing with their extensive lines of fishing tackle. It contains nearly two hundred pages and the goods shown include practically everything that a fisherman could need, ranging from hooks to elaborate reels. The catalogue is handsomely bound and contains a great number of illustrations.

"Enterprise News."

A copy has come to hand of the "Enterprise News" which is published "every once in awhile" from the offices of the Enterprise Foundry Co., Sackville, N.B. It contains an optimistic forecast of the state of trade in Canada for the coming year.

Disston Crucible.

A copy of the first issue of the Disston Crucible has come to hand. This neat, newsy and instructive magazine is prepared for the use and benefit of the millman and it deals with many subjects

Household Hardware.

The Taplin Manufacturing Co., New Britain, Connecticut, have issued their catalogue No. 5, showing their lines of Dover egg beaters, general kitchen hardware and a number of specialties in wire and iron, brass, bronze and nickel goods. It is neatly gotten up and fully illustrated.

Nuts and Bolts.

The Graham Nut Co., Pittsburg, Pa., have issued catalogue No. 6, showing their line of nuts, bolts, washers, rivets, turnbuckles, weights, and screw threads. In submitting this catalogue, they make the announcement that their new bolt plant is now in full operation. The booklet is handsomely printed in several colors, fine coated paper being used.

Hardware Letter Box

Rockwall Plaster.

Cote, Brown & Cie, Chicoutimi, Que.—"Where can we get Rockwall plaster?"

The Alabastine Co., Paris Ont.; Stinson, Reib Supply Co., Eastern Townships Bank Building, Montreal; Alex. Bremner & Co., Bleury Street, Montreal.

Wall Board.

Sumner & Co., Moncton, N.B.—"Can you advise us if there are any manufacturers of wall board in Canada?"

Beaver Board Co., Ottawa; J. & R. Booth, Ottawa; Laurentide Paper Co., Grand Mere, Que.

Sheet Cardboard for Ceilings.

R. T. Holman, Ltd.—"Kindly let us know who are manufacturers of sheet cardboard for ceilings."

Beaver Board Co., Ottawa; J. &. R. Booth, Ottawa; Laurentide Paper Co., Grand Mere, Que.

Parker Guns.

Wright's Hardware. Hamilton.—"Will you give me address of Parker & Sons, maker of shot guns?"

Chas. Parker Gun Co., Minden, Conn.

Dexter Stains.

Owen W. Evans, Chester, N.S.—"Can you inform me who makes Dexter's stain?"

Dexter Bros., Boston, Mass., English shingle stain.

Tailor's Stove Manufacturer.

We are indebted to Mr. Alex. Ross, Yarmouth, N. S., for following:

"Re inquiry in March issue by Carnegie Bros., Port Perry, for maker of tailor's stoves at Truro, N. S., named J. Albert Lundstrom. This stove is now made by the Amherst Foundry Co., Amherst, N. S., and is called the Lundstrom Tailor Stove.

Vacuum Cleaners.

Sumner Company, Moncton, N.B.—"Can you give us names of manufacturers of Electric Vacuum Cleaners in Canada?"

Onward Manufacturing Co., Berlin; Geo. H. King, Woodstock, Ont.

Current News of Hardware Trade

New Stores Opened.

Dryden, Ont.—Hayes' hardware store has been opened in the new stand. An entirely new stock is carried.

Salmon Arm, B.C.—Ford Tyler & Co., hardware dealers, have opened their new store.

Extra Game Needed.

Montreal, March 13.—Last night the Wholesale Hardware Hockey League schedule ended, but an extra match will be necessary to decide the championship, as last night's game put the teams from the Canadian Fairbanks Morse Company, and the Thomas Robertson Company on an equal footing. The Thos. Robertson Co. after a hard struggle succeeded in defeating the Frothingham & Workman team, which has been leading the league to date.

Personal Notes.

F. G. Holden of Pryce-Jones & Co., Calgary, spent several days in Montreal this week. His visit was largely in connection with business matters.

Harry C. Martin, of Martin, Findlayson & Mather, Vancouver, was in Montreal on business this week.

W. A. C. Hamilton, secretary-treasurer of the Consumers Cordage Co., Montreal, has just returned from an extended trip to the West.

W. S. Fisher, of the firm of Emerson & Fisher, St. John, N.B., has gone on a trip to Upper Canadian and Western cities. Mr. Fisher was in Toronto last week.

Lawrence R. Greene, advertising manager of the Sherwin-Williams Co., called in at the office of Hardware and Metal on Saturday last. He was on his return to Cleveland after paying a visit to the head office of the Sherwin-Williams Co., of Canada, at Montreal.

F. Orr Lewis, of Lewis Bros., Montreal, has returned to England with his wife and daughter. He will likely be back in Canada for a few weeks during the summer.

W. C. Strouder, of Williamsburg, was in Montreal on business this week.

J. F. I. Thomas, Canadian representative of Vickers, Limited, has returned to Montreal from England.

Montreal.—Mr. Caniff, of Hose & Caniff, Kenora, spent several days in the city this week. With his wife and daughter he has been visiting New Orleans and a number of other Southern cities.

Among the retailers visiting Montreal on business this week were, L. J. Matk, Ferme Neuve; J. P. Lecroix, St. Lin; S. Robedoux, L'Anonciation.

Business Changes.

Hartney, Man.—Geo. Agnew will open a hardware store here.

Winnipeg.—F. W. Philips has started a plumbing business in this city.

Carman, Man.—C. Hemenway has bought the stock of Walton & Cleane, hardware dealers.

Pennant, Sask.—B. M. Hill is starting in the hardware business here.

Weldon, Sask.—A hardware store has been opened here by Larson & Torgerson.

Beatty, Sask.—A. A. Ferguson has started here in the hardware and implement business.

Cabri, Sask.—The Cabri Hardware Co. is the name under which Thompson & Denker, hardware dealers, will do business in future.

Lemberg, Sask.—The firm of Fletcher & Leitz, dealers in hardware and implements, has been dissolved. Mr. Leitz will continue the business.

Bassano, Alta.—Pierce Bros. have started in the hardware business here.

Emo, Ont.—Edward Tompkins, hardware dealer of this place, has sold the Barwick branch of his business to Black Bros.

Millbrook, Ont.—R. Halliday has sold his hardware stock to J. H. Bentley. The new proprietor was chief clerk with J. Moxon & Son, Picton, for a number of years.

Hastings.—E. Wilcox, formerly of the hardware firm of Wilcox & Lambert, has retired and will take a well-earned rest. He may go back into the insurance business, of which he made a success before going into hardware.

Fergus, Ont.—A. E. Nichols, hardware merchant, has purchased from T. J. Hamilton, also of this place, the old established business in coal, wood, tile, etc., conducted by the latter for the last 27 years. Mr. Nichols took possession on Monday.

Harrow, Ont.—The partnership between C. Richardson and F. E. Richardson has been dissolved. The latter will continue the business under the old firm name of C. Richardson & Son.

Calgary.—Lenton & Hall, of this city have dissolved partnership, the business now being carried on under the name of the Hall Hardware Co. E. C. Hall is manager.

Staff Changes.

St. John, N.B.—Harry Mundee, of the employ of W. H. Thorne & Co., Ltd., has severed his connection with that firm, and accepted a position in Kentville, N.S.

Campbellford, Ont.—C. H. Smith, who has been head clerk for D. W. Douglas for some years, expects to leave for Calgary in a few weeks. Mr. Smith has become a well-known figure in hardware circles, due chiefly to his ability as a window trimmer. He has on various occasions won prizes in window contests and has made a well-earned reputation as one of the best window trimmers in Ontario.

Peterborough, Ont.—O. Labelle, who has been with the Kingan Hardware Co. for a number of years, is leaving for Calgary in a few weeks.

Lewis Bros., Montreal, have added to their city selling staff, George Walker, formerly Mr. Fouret's assistant in the order department.

Fire Losses.

Kenora, Ont.—Robson & Peterson, hardware dealers, suffered a fire loss. Their loss is figured at $1,500.

Fort William, March 9.—Shortly after six o'clock last night, it was observed that the premises of the Hocking Hardware Company, on Gore Street, West Fort William, were on fire, and a pull at the nearest street alarm brought the West Fort William fire department quickly on the scene. The woodwork surrounding a stove pipe was blazing merrily, but in a few minutes a well directed stream of water quenched the flames. The damage done by the fire to the building was about $150, but it is estimated that the stock has suffered to the extent of $1,500 through smoke and water, $2,200 being carried in insurance.

AN EXCITED MARKET.

Cleveland, Ohio, March 13.—The Daily Iron Trade Review to-day says:—

With sales of 140,000 tons of Bessemer and basic pig iron recorded during the past week, and inquiries out for additional tonnage; prices stronger in plates and shapes; indications of heavy buying of steel cars by railroads in the immediate future and a generally stronger tone to other finished lines, the market finds itself in a somewhat excited state. Coke prices continue to show signs of climbing and a low point on furnace coke has gained 30 cents in a single week. Foundry grades have also gone up rapidly. Contract coke is almost impossible at this time. There is a quieter movement in the pipe market, though specifications are heavy and inquiries for much line pipe are coming out from week to week. The entire market is stronger and healthier than for some time.

Progressive Hardware Retailing

C. P. Moore Inaugurates Automobile Delivery System—Eastern Merchants Feature Farm Supplies—An Unique Display of Paint Goods—Counters Installed for Small Hardware.

UNIQUE DISPLAY.

Revelstoke, B.C.—One of the large show windows of the Revelstoke Hardware Co. store is being used for an unique display of paints. A miniature house is shown surrounded by a clever imitation of a lawn. The posts of the verandah are made by tins of wall color, the front of the porch is made of alabastine and the front of the house is constructed by an ingenious arrangement of paint cans. The lawn grass is made with fresco colors.

A 30-DAY SALE.

Orangeville, Ont.—S. A. McCartney, hardware dealer is conducting a 30-day sale for the reduction of winter lines. Among the various lines offered for sale are horse blankets, mitts, saws, files, axes and axe handles, feed and root baskets. He also includes in the list, "Something for the Ladies," giving a list of such goods as kettles, dish pans and pie plates. Special price reductions for the thirty days are offered.

COUNTERS FOR SMALL HARDWARE.

Chatham, Ont.—A local merchant who handles small hardware and kitchen utensils quite largely has taken a leaf out of the book of his 5-10-15-cent store competitors. He has provided a special counter, which occupies a broad open space in the centre of his store, for the display of small articles.

Each article thus displayed is ticketed with the selling price. This saves considerable time on the part of the selling staff which would otherwise be consumed in answering questions as to prices.

The merchant contemplates a number of improvements on the original idea in course of time. One is to provide separate counters for articles selling at 5c, 10c, 15c, 20c and 25c. In addition, the price tickets may be helped out by neat show cards, each bearing a few words of information concerning the article to which it is attached.

"My idea," explained the merchant, "is to make the counters as far as possible do the work which a salesman would do. The counter is to give the customer practically all the essential information about each article displayed. Of course, the clerk will complete the deal, and in doing so will endeavor to sell additional articles. The idea is still in the experimental stage. I rather think it will prove the better policy to shift the displays from time to time, in order to keep all the stock moving."

FEATURING FARM SUPPLIES.

St. John, N.B., March 12, 1912.—Local dealers during the last few days have begun to interest themselves in the featuring of supplies which the farmer will need before very long, such as woven wire fencing, spring wire and plain galvanized wire for fencing. All of these the dealers in St. John, Fredericton, Chatham and Moncton, are advising farmers to "take home while the snow lasts" in order to have it when the soft days of spring have arrived and fencing is needed for repairing about the premises. The maple sugar season will be on in a few days now and such articles as taps, pipings, etc., as are required for this work are being featured before the farmers interested, most of whom have already made purchases.

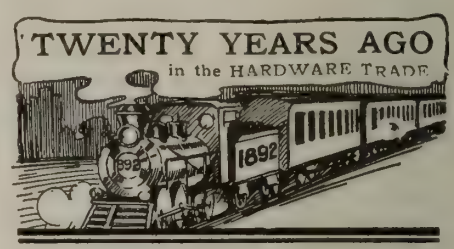
At present, business with local dealers is reported as being very quiet, though they look for it to improve before long. They are, therefore, promoting an interest in articles which will be required not just at present but in the very near future. It is their purpose to develop a trade in some lines which will have to be bought soon in order to keep business more alive. In this, in the lines mentioned, they have been fairly successful because there have been a large number of farmers in the city of late, due to the fact that the weather has been mild and the roads in good condition. Trade in builders' hardware, it is expected, will be well above the average this spring, and preparations to meet it are now being made.

AUTOMOBILE DELIVERY.

Sydney, N.S.—C. P. Moore has purchased an automobile delivery wagon in which the goods ordered in his hardware store are now being taken to his customers' homes.

AN EARLY PAINT DISPLAY.

Chatham, Ont.—The Willard Hardware Co. believe in booming the paint trade early in the season, instead of holding back till spring is actually here. This week they have a large and striking paint display. The display is arranged in their large middle window, four steps covered with cheesecloth being utilized. In addition to the regular Sherwin-Williams house paints which they handle, the display comprises a wide range of paint lines, including floor-lac, floorglaze, buggy paint, alabastine, varnishes, enameloid, and many kindred lines. In addition many variety of brushes are shown, while samples of work, color cards and advertising literature relative to paint is used to advantage in filling out the display.



The following items are taken from the issue of March 12, 1892:

"The James Smart Manufacturing Co.'s catalogue is an ornament to any office library. The issue of such trade publications is, in fact, the very best means of inducing traders to keep an office library."

Editor's Note.—It is not necessary to state that the James Smart Manufacturing Co. are still numbered among Canada's foremost manufacturers.

* * *

"W. R. Hobbs, president of the Hobbs Hardware Co., London, has been making a tour through the North-West and British Columbia en route to California.

* * *

"D. Shaw's new hardware store at Almonte was ready for occupation on Wednesday and since that time the heavy task of removing his big stock of hardware, stoves, etc., has been accomplished. The store is one of the largest and finest in the Ottawa Valley."

* * *

"G. B. Morris & Co., hardware merchants, Guelph, have dissolved. G. B. Morris continues the business."

Editor's Note.—Mr. Morris sold the business about six years ago to McMillan Bros., who have since been succeeded by the Guelph Hardware Co. Mr. Morris, after acting as manager of the Royal Bank at Guelph and Calgary, has gone into the real estate business at the latter place.

Weekly Western Market Report

Some Kinds of Rope Are Quoted at Lower Prices — A Heavy Demand for Stoves is Now Making Itself Felt—Linseed Oil is Down 5 Cents in Price—General Trend of Trade is Good.

Winnipeg, March 14.—With winter practically over the spring trade is on with a rush, all reports tend toward exceptionally busy season. Not only are spring orders coming in but the summer ones also, which is something very unusual at this early date.

The market this week shows very little changes. A slight decline in rope is perhaps the most noticeable. One-quarter cent a pound less is quoted in both Sisal and pure Manila. Other lines remain the same.

Wire the Same.

The wire market remains about the same with no further advances. It is not likely the advance in the United States will affect our market at all.

Stoves.

The demand for stoves is much greater than at this time in previous years. Gas ranges are still being called for, showing an even greater improvement. Wholesalers report many new hardware and tinsmith shops opening up, and are very busy stocking these.

Winnipeg Hardware Quotations.

Ax Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.00; 2, $1.80; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts, 77½.

Bar Iron—Bar iron, $2.50; Swedish iron, $4.25; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $15.

Blocks—Steel, 50 per cent.; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg; $2.35 Fort William.

Copper—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire, 3-inch gage, 24c, to 20-inch gage, 29c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white, 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 6, $4.20; 28, $4.60; 30 gauge or 10¾ oz., $4.80; Queen's Head, 20, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—⅜ in., $3.25; ½ in., $4.05; ¾ in., $5.00; 1 in., $7.20; 1¼ in., $9.80; 1½ in., $11.80; 2 in., $15.30.

Galvanized Ware.—37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2 and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." sold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 per cent.

Hinges—Light T and strap, 65 per cent.

Hooks—Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 40 per cent.; smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15; ¼ in., $2.30; ⅜ in., $2.35; ½ in., $3.15; ¾ in., $3.80; 1 in., $5.45; 1¼ in., $7.45; 1½ in., $8.95; 2 in., $11.55; 2½ in., $18.40; 3 in., $24.15; 3½ in., $32.25; 4 in., $36.75; 4½ in., $42.50; 5 in., $47.50; 6 in., $61.50; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope.—Siscal, 8¼; pure Manilla 10¼; British Manilla, 8½c; lath yard 9¼c. yard, 9¼c.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½, brass, 77½; round head, iron, 82½; brass, 72½; coach, 67½ per cent.

Terne Plate—I.C., $9.75; I.X., $11.75.

Tin Plate—I.C., charcoal, 20x28, full box, $10.25; ½ box, $5.50; I.x., full box, box, $10.25; ½ box, $5.50; I.x., full box box, $13.50; ½ box, $8; I.X., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Paints and Oils.

The spring rush in paints is on in earnest and an exceptionally busy season is being looked forward to. There is a decline of 5 cents in raw linseed oil and boiled oil the former is being quoted at $1 and latter at $1.03 in large quantities. Turpentine remains the same and there is little possibility of a change for some time.

VOTING ON BY-LAW.

Port Colborne.—On Wednesday, Mar. 27, the electors of Port Colborne will vote on a by-law fixing the assessment of the Canadian Furnace company for a period of twenty years at $50,000. The council met on Tuesday evening and gave the by-law its first and second readings, and the third reading will be given before March 27. The company is the branch in Canada of the Buffalo Union Furnace Company. The plant to be erected here on the lake front will cost one million dollars and the product will be pig iron and steel.

A WESTERN BRANCH.

The Brantford Roofing Co., Brantford, Ont., have opened a branch at Winnipeg. Wilton Hitchon is now in the west, and will take charge.

CARLITE FACTORY FOR COBALT.

Wallaceburg, Ont.—Following the explosion which a couple of weeks ago destroyed the plant of the Dominion Carlite Co., at this place, the industry will be re-established at Cobalt. Building operations for the new factory will be commenced at an early date.

Weekly Market Report --- Metals

UNEASINESS FELT.

Despite the uneasiness felt as a result of the strike in the Old Country—and it is feared that a dangerous pass may be reached—the metal markets show continued strength. Shortages are developing in some lines, however.

MONTREAL.

Montreal, March 15.—Still the strike, and the harm it may do trade, is the question of great importance with the metal handlers. As yet conditions have not been greatly altered by the industrial trouble. That the market has not been more affected is indeed strange.

There seems little ground for hoping that the satisfactory manner in which the strike is now being taken will continue. Its influence has not reached here as yet, that is all. But the result must be serious. Even if the contending parties come together shortly there will be considerable trouble. For instance, the galvanized sheet plants—or a number of them—have been forced to shut down. As there are good stocks of this material on hand here at the moment that does not mean any immediate hardship, but it does mean that orders will pile up on the manufacturers next summer, and there will almost certainly be delays in shipments.

Metals Exceedingly Scarce.

The great trouble locally at the present time is that caused by the shortage of supplies. Lead, there is none. Spelter stocks are exceedingly low. Iron, too, is hardly to be had. Tin and copper are fairly plentiful, and for that the handlers are thankful.

Tin—The prices in England have been varying slightly, but the position to-day is much the same as at this time last week. Tin, perhaps. is being less affected by the strike than any other metal. Generally, inquiries are being received from the makers of tin sheets. They have to fill contracts for these, and now, fearing shortage of supplies, are trying to book their stock of raw material.

Locally there are good orders for tin.

Consumption Decreases Somewhat.

Copper—The consumption of this on the continent, and in the States, has not been as good as was expected. The production, on the other hand, has increased. But this is only according to the statistics for the present month. Generally the demand for copper seems to be keeping up remarkably well. It is so in Montreal. The handlers all report good orders, but orders which they are, fortunately, able to fill.

Lead—This is about as hard to get as spelter, and spelter simply isn't to be had. The consumption of lead has been exceedingly large of late. Trail are unable to supply any until April. None is coming in from England for a little time. One firm has a cargo on the ocean, and this, when it arrives, will relieve the tension greatly.

Spelter Market Starved.

Spelter—Neither from the States nor from Europe is much to be secured. Locally, stocks are exhausted. A lot of 30 tons is on the way now, but this will likely be sold before it arrives. The market is really starved.

In the States the manufacturers of galvanized sheets are talking of curtailing the production. By this means they believe they would effect one of two things. Either the decreasing demand would force down the raw material to a more reasonable figure; or the decreased supply would force up the price of the finished produce. Either way the producers would get a profit larger than the narrow one which is at present theirs.

Iron None Too Plentiful.

Iron—Some of the handlers thought they had exceedingly large stocks of this metal when winter set in. But orders have been larger than for some years past, and there were evidently some in the business who were not very well supplied. At present the amount of this metal in Montreal is not large. A cargo is expected before very long, however, and unless this is delayed there will hardly be any serious shortage.

TORONTO.

Toronto, March 14.—Storm clouds are rolling up. The British mining strike has already had its effect on the mental situation here and grave misgivings are felt as to the possible results, if the strike continues. Metal men who were inclined to regard the situation as less grave than it had ben depicted are now beginning to realize hat the danger is both real and imminent

It is indeed curious that the effect on metals generally has been small so far. whereas weakness might have been expected, strength instead has developed. In some markets, in fact. the tone is much firmer than before the strike crisis developed. How this is to be accounted for is a mystery.

Tin.—Although it would reasonably be expected that tin would be one of the first metals to show the effect of the strike, there is absolutely no trace of weakness. The metal is firm and active. There has been a good demand here and so far no difficulty has been experienced in getting supplies.

Lead Firm and Active.

The same condition holds good with reference to lead. The metal is very active and enquiries denote keen interest on the part of buyers. No change has been made in the price of lead but a firm tendency is noted.

Copper is Up.

Copper.—The continued large consumption of copper has caused a stronger tone. Higher prices are prevailing here, an advance of ½ cent having been made during the week, thus putting the local price at 15¼ cents. This is a very high price for copper, considering the figures which have prevailed for the past two years.

The demand locally is very strong. There is a pretty general feeling of confidence in the strength of copper, and metal men anticipate continued strength.

Spelter "Cleaned Out."

The spelter situation is far from satisfactory. There is no March spelter in sight and, stocks are so low, that the prices quoted are purely nominal. There is practically none being sold because there is none to sell. Just what the outcome will be is hard to say. The metal supply houses fear that the shortage will continue for some time.

Trouble Ahead.

Plates and Sheets.—Trouble is being experienced here. The freight blockade is seriously handicapping trade. It is reported that stocks are very light and, as the demand keeps up strong, the natural assumption is that the supply will soon be exhausted.

It is feared that the strike will have a very detrimental effect on the plate and sheet trade. It will be one of the branches of industry to suffer first and worst. Local metal men stake their heads when the subject is mentioned and acknowledge that the results may be serious if the strike situation does not improve.

Pig Iron Unchanged.

The situation in pig iron is unchanged. Sales continue steady for the time of year. Prices are as follows: Canadian foundry, No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $50.25 for Clarence No. 3. Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Weekly Market Report --- Hardware

A GOOD TREND.

There is a good trend to trade in hardware lines. Although the spring demand has not yet reached its highest point, the demand is growing and there are sure evidences that last year's records will be exceeded in no uncertain measure.

Better weather conditions would bring business along with a rush now.

MONTREAL.

Montreal, March 14.—Business at the present seems all that could be desired. The retailers are finding that the demand for spring goods has started in earnest, and the jobbers and manufacturers are being deluged with orders. Spring goods especially are wanted, but there has come a demand for builders' hardware, too. A few orders for this class of goods has been received in the past few weeks, but now a larger and more general call is noted.

Effect of the Strike.

Retailers do not seem to have given much though to the effect the English coal strike may have upon Canadian prices; yet according to the manufacturers and jobbers there is some likelihood that this will necessitate a higher figure being charged for a number of lines. If relief does not come soon tin sheets will have to be advanced. Copper, too, will likely soar. Iron will be put upon a higher level, and as a result the discount on tinware, granite and copperware, and iron pipe will be reduced. When the metals advance in price the product made from them must necessarily advance correspondingly. Generally there is the hope expressed that a settlement will soon be reached, but failing this a higher scale of prices will surely come.

Moderate Weather Helping Trade.

Spring Goods.—The moderate weather which has prevailed of late makes sap-running seem near. Snow lies deep in the maple bush—all other signs point to a good flow, too, so those who regularly sugar off are now buying the sap bits, buckets and kettles which they need. Of late the orders for this class of goods have been exceedingly large. Shipping departments are being rushed to get them out. It is the old, old story of many dealers failing to put in their demand until they themselves feel the demand from their customers.

Largely it is from Quebec and Ontario that the call for sugaring supplies comes. The West, however, is not behind in the call for spring goods. Lawnmowers, hose sprinklers are being quite largely ordered, while garden tools are in great demand. It will not be long before the gardens will be in good workable condition in the West.

The early birds are now thinking of the call which there will be for refrigerators. Good-sized orders for these are being placed. Also the call for egg crates continues, while an increased activity is noted in wire screens and wire fencing.

Expect Early Building.

Builders' Hardware.—Evidently the dealers of the West are expecting operations to be started early out there, for they are now laying large orders. These call for prompt delivery, too. Eastern merchants also are seeking these lines—though it is from the West especially that the local jobbers are feeling the heaviest call.

The condition of affairs in this line is exceedingly gratifying. It would seem that the merchants who do the largest business are getting the idea of ordering ahead.

Specialties.—Electrical goods are proving good lines at this season. So are bath room equipments—indeed any articles for the interior improvement of the home are finding a ready market. The retailers are playing these lines up, and the sorting orders which are being received by the jobbers show that they are getting rid of their goods in satisfactory style.

This the Between Seasons.

Sporting Goods.—This is the between season time—the time when hockey goods are making their exit, and when spring goods have hardly yet arrived. But the temperature at present makes it appear that the season for greater activity is not far off. Already some baseball goods have been sold from the retail stores. More will be wanted soon. The fishermen will shortly want to replenish their store of tackle. For this coming demand the retailers must now prepare, so naturally the orders are coming in to the jobbers.

In all branches collections are reported as fair. There does not seem to be any great scarcity of money.

TORONTO.

Toronto, March 14.—Business is reported good. Shipments of spring goods have started now in large volume but it needs a real touch of spring to really liven up matters. The demand for shipments does not really manifest itself until the dealer finds out that the change in season is permanent.

There has been, however, a satisfactory stimulation in trade during the past week, due to the improved weather conditions. Plenty of orders are being placed for April and May delivery.

The jobbing houses state that the prospects for trade are exceptionally bright this year. There is a healthy tone noted all around. The retailers are placing their orders with confidence and are estimating their requirements at a large figure. In some lines especially there promises to be a bigger demand than ever before.

Prices are reported to be firm and no changes have been recorded this week.

Seasonable Lines. — The demand is heavy for spring goods. There is a good movement in spades, shovels, wire fencing, axes, rakes, hose, lawn mowers, sprinklers. This is due pretty largely to the improvement in weather conditions. It is significant that many of the orders placed for these lines have been for immediate delivery. The dealers apparently are expecting an early demand and are preparing accordingly.

There is also a larger call for summer goods. "We have already started to ship refrigerators," said one jobber. The conspicuous presence of a score or more refrigerators on the showroom floor of this firm testified to the fact that the demand is veering rapidly to summer lines. There is some demand also for ice cream freezers, screen doors, wire netting, etc.

A Record Demand.

Builders' Hardware.—In this department there is every evidence of a record demand. One jobber states that he has been making enquiries and has found that the retailers are confident of a larger trade than ever before and advance orders are of such proportions that this is amply borne out. Building operations in all parts of the province will be heavy; heavier in some parts than ever before. This, of course, means a corresponding demand for builders' hardware and dealers are stocking up in accordance.

Heavy Hardware.—There is a steady demand and large shipments are being made. Price quotations are:—Discounts on carriage bolts, $\frac{3}{8}$ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and $7\frac{1}{2}$.

Sporting Goods.—Better weather is required to bring along the demand for sporting goods. While some orders are being placed and some shipments made, the usual spring business has not yet started.

Methods of Retailing Paints and Varnishes

Improving Appearances of Paint Dept.

This is an Important Point in the Conduct of a Retail Store—The Use of "Selling Helps" Will be Found Effective in Making the Improvement.

One of the main points about running a paint department successfully is to store the goods in a prominent position and in attractive style.

There is one store in a large city which does a very good business in most lines, and yet but little paint goes out from it. A visit to the establishment gives some idea why this should be. Paint is hardly visible either on the walls of the store itself, or on the shelves. In the far corner the cans are arrayed. There is no attempt at careful arrangement. No color cards are to be seen on the walls or on the counters. None of the artistic wall posters turned out by the various paint companies are to be seen in the store. Those who come to buy paint, can secure it there; but none entering to purchase some other line will have their thoughts turned toward paint. They will not see an illustration of an interior which will make them think they might brighten one of their rooms in that way. They will not see what paint has done for the exterior of a house.

Mailing Possibilities Overlooked.

While other dealers do give prominence to paints, and to the posters illustrating the effects which may be secured from their use, many of them yet neglect a part of the helps sent out. A number of concerns furnish their agents with booklets which they expect to have forwarded to customers. In some cases these booklets are left on the counter, where those interested may pick them up. It is a good plan that, yet better results still are to be obtained by selecting certain people who seem likely to need paint, and sending the booklets to them through the post. A letter coming to a home stands a good chance of receiving attention. When the booklet is as attractive as are these paint-selling helps, it is fairly sure of the consideration of the mistress of the house. The home is her great interest. She is interested in anything which will help her to improve it.

This would seem the wise way for a dealer to use these helps. It would mean some trouble, but would repay this in profit-bringing business. Yet there are many dealers who disregard these pamphlets and booklets entirely. Their number is becoming fewer and fewer, still there are some—may their tribe decrease.

The use of selling helps brightens the department wonderfully. Attractive effects can be secured in that way and people are led to inspect the goods and to become interested in the subject of paint.

TO MAKE BRUSHES.

Fredericton, March 7.—J. H. Doody, John O'Regan and Henry Dolan, of St. John; Ed. Carter, of Erie, Pa.; and W. J. Emmerson, of Boston, are applying for letters of incorporation to do business under the name of the Canada Brush Co., Ltd. The company proposes to manufacture brushes and brooms of all kinds and to carry on a general wholesale and retail business in the same. The head office of the company is to be at St. John.

A. T. HIGGINSON PASSES AWAY.

Montreal, March 12.—A. T. Higginson, for many years connected with the paint house of R. C. Jamieson & Co., passed away yesterday after a short illness.

Born in Hawkesbury, Ont., in 1843, Mr. Higginson moved to Montreal as a young man, and at once took employment with Mr. R. C. Jamieson. From junior he worked up step by step, and finally was taken into partnership. Ten years ago failing health forced Mr. Higginson to retire from active business, but he kept up his interest in paint to the end.

Mr. Higginson took a deep interest in church affairs, being a member of the Episcopal denomination.

OFFERING A PREMIUM.

New Westminster, B.C.—James & McChighan are making a special effort to sell ranges and are making the offer of a premium. With every range sold within a period of thirty days, they are offering a galvanized iron garbage can.

A view of interior of the store of the Maritime Paint and Varnish Co., Halifax—In many respects a model department.

Wise Dealers Handle the ML Line Because They are Honest Goods That Build Trade.

Our New ML DECORATIVE AID DEPT. Helps You to Get Trade.

ML Paints—make good because they are made good—there's 19 years of practical experience mixed into them. ML Paints defy weather and last, and last, and last!

ML Floorglaze—a brilliant, quick drying, flint hard finish that withstands scruffing and scratches. Washable like glass. In solid and transparent colors.

Elastilite Varnish—the one varnish you can guarantee just as though you were its maker. Good for use indoors or out. Elastilite will get and hold the best varnish trade for you.

GET OUR HELP
Our Decorative Aid Dept. answers your problems in house decoration and painting with free color suggestions, estimates, stencil designs, etc. Stencils sold. You get the right goods in the right shades for best effects in any house. Send for Booklet.

THE ONLY WAY

Every Hardware Dealer is in reality the Purchasing Agent of his customers.

His mission is to secure for them the best goods obtainable.

His customers look to him to supply them with paint which will give the best service. They rely on his judgment.

So after all is said and done, what should interest every dealer most is what the paint will do.

He, being an honest man, should make comparative tests of the various brands of paint, so that HE may know which paint will give best results.

That's the only way to gain and hold the clientele of the best people of a community—"the spenders."

We seek dealer agents of a standard that befit the character of "High Standard" Paint.

IF THIS FITS YOU, WRITE US.

Weekly Market Report --- Paints

AN UPWARD TENDENCY.

The whole tendency of the market is upward. Rumors of advances are heard in several lines. Glass may sell at a higher figure as the result of the strike situation in the Old Country. An advance in turpentine is reported at Toronto.

There is a busy tone noted on all hands. Heavy business is being placed in all lines.

MONTREAL.

Montreal, March 15.—An optimistic note is now being struck by the paint travelers who are covering the country to book spring orders. They are meeting with success, and they write to their houses that the quantities needed this year seem likely to be well in excess of those used in 1911. Dealers are booking earlier this year The early break in the weather has perhaps had a good deal to do with this, but it appears that the hardwaremen are also realizing that it pays them to get their stock on the shelves in good time.

Prices have not changed during the week, although there was a slight upward movement in the English linseed oil market on Wednesday. There seems some likelihood that this upward movement will be continued, and that a higher price will have to be fixed for oil made and sold in Canada.

Glass is Uncertain.

There is also some thought of a change in the price of glass. This has been discussed, but the decision reached was that nothing should be done for the time being.

White Lead.—The trade is becoming brisker. This product will shortly be in good demand, and the dealers are now ready to place good sized orders. Carload lots are not unheard of.

Linseed Oil—Still the houses are not quoting exactly the same figures, but generally the price is put at 91c for raw and 94c for boiled oil. This price is somewhat lower than that for which oil has been selling, and it is not at all certain that it will not be raised. Some handlers are buying sparingly, in the belief that they may yet get better prices. Others, however, look for an advance. Let the strike continue and there will be a scarcity of English oil. While local manufacturers have now come to prefer that made in Canada, they yet bought some from the Old Land last year. If this supply is cut off, therefore, it would seem that the demand for the local product would be in excess of the supply. A decrease of the English supply would also remove the possibility of competition, and the local crushers might take this opportunity to elevate their prices to a point which would give them a little better margin of profit.

The next few weeks may mean much in this market.

Supply of Putty Needed.

Turpentine—Here there is but little activity—some buying, but no orders of great size.

Putty—Plants are still being worked to capacity, that the manufacturers may fill their present orders and get a supply on hand which will enable them to guarantee future shipments.

Glass—It is the strike which is causing the interest in this market. If nothing interferes with the shipments the price of glass is hardly likely to advance—though it was thought earlier in the winter that this would occur. The strike, however, may result in a greatly decreased production of English glass, and that, with the discontinuance of certain boats, would undoubtedly curtail the local supply and so cause an advance in prices.

Mixed Paints—Orders are coming in well. The usual varieties are wanted, though as yet the call for barn paint has not been very large. Some dealers are stocking this well, but others seem to be waiting until the large demand is felt, toward fall.

Paris Green—Good orders are being received. These come from widely separate parts of the Dominion.

TORONTO.

Toronto, March 14.—The market has seen quite a remarkable stimulation of activity during the past two weeks. The improved weather conditions has undoubtedly had something to do with this. Hardwaremen are beginning to realize that the spring painting season is not far off and are getting their supplies in.

Paint manufacturers and jobbers express themselves as delighted with the trend of trade. Spring booking has been heavy in all sections. It now seems assured that the year will be a record one in the paint trade.

Talk of advances is heard in several lines. The tendency of the market, in fact, seems to be toward firmness.

Linseed Oil.—There are no developments in the oil situation. The prevailing quotations here are still 92 cents for raw and 95 cents for boiled and there is quite a little being sold at those figures. Men who have kept closely in touch with the market state that they do not anticipate lower prices for some little time. There does not seem to be any immediate reason for expecting an advance, however.

Turpentine is Higher.

Turpentine has shown more strength than for some months back. There has been a steady upward trend on the Savannah market and this has resulted in an advance of two cents here, making the present quotation 69 cents. One jobber states that it is costing 65 cents to lay turpentine down here in carload lots. It will readily be seen, therefore, that the margin is much too small and, under the circumstances, lower prices for some time at least are stated to be quite out of the question.

The cause for the advance at Savannah is a gradual reduction of stocks. There is not more than the normal amount now on hand on the primary markets and the demand has grown very considerably. The local demand is seasonably large.

An Advance Talked.

White Lead.—Whatever talk is heard with reference to white lead, deals entirely with the possibility of an advance. The fact that dry white lead is higher lends substance to this supposition. In the meantime the price remains firm. There is a good demand here and some big orders are now coming in.

And Glass Also.

Will glass advance also? Much speculation on this score is heard. The strike situation in the Old Country will undoubtedly affect the Belgian glass industry and, perhaps, force up the price. Coming on top of the other good reasons for an advance, the strike bids fair to make higher quotations a certainty.

Putty.—There is a large demand for putty and shipments are now being made. Prices remain as follows:—Standard bulk in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same. Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

WHITE LEAD UP

As we go to press, word is received that an advance of 10 cents has been declared in white lead.

"Color Suggestion Book."—A Special B-H Selling Help.

¶ All B-H Agents are supplied with Color Suggestion Books that illustrate and describe modern methods of finishing floors, walls, ceilings and woodwork of the various rooms of the house, and give harmonious color combinations for outside painting.

¶ These Books enable the B-H Agent to place before the prospective buyer complete color schemes. The customer sees the finished effect of the different color combinations and is able to select the materials and colors best suited to his requirements.

¶ Write our nearest office for complete B-H Agency proposition.

A MESSAGE FROM MINERVA

Follow the dictates of Wisdom and buy the best. It means pleased customers and reputation for reliability.

Minerva Paints and Paint Specialties

are a line you can stock with confidence. They represent quality in the full sense of the word, backed by the most forceful, energetic selling helps in direct support of the Dealer's business.

Write for details of the Minerva proposition. It will pay you to investigate.

EVERY MINERVA CAN CONTAINS FULL IMPERIAL MEASURE.

PINCHIN-JOHNSON CO. (CANADA) LTD.

CARLAW AVENUE, TORONTO

Established in England in 1834 J-82

HOW ABOUT YOUR PAINT OIL DEPARTMENT?

If you could find a way to increase the profits in your paint oil department you would at least investigate it, wouldn't you? Then why not take the time during the winter months, NOW, to investigate the

BOWSER PAINT OIL SYSTEM

We have installed systems for many of your fellow merchants—it pays them—it will pay you.

You can get one outfit or a dozen, just as your requirements demand. You don't have to invest much money, but you get enormous returns.

The Bowser not only prevents all waste and over-measure, but it gives your store tone and attractiveness. It draws trade because you can give better service and cleaner oil. The pumps measure the oil directly into the customer's can—no measures nor funnels. It computes the charge and counts the gallons.

Send a card to-day for free book No. 15.

S. F. BOWSER & COMPANY, INC., TORONTO

66-68 FRASER AVENUE

For Twenty-seven Years Manufacturers of Self-measuring Pumps, Gasoline and Oil Storage Systems, Self-registering Pipe Line Measures, Dry Cleaning Systems, etc.

MISCELLANEOUS

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS — ESPECIALLY made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for binders and monthly account systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

YOU CAN BUY A REBUILT TYPEWRITER from us. We have about seventy-five typewriters of various makes, which we have rebuilt and which we will sell at $10.00, $15.00 and $20.00 each. We have also a large stock of better rebuilts at slightly higher figures. Write for details. The Monarch Typewriter Co., Ltd., 46 Adelaide St. West, Toronto, Canada. (tf)

SITUATIONS WANTED

GENERAL HARDWARE — HANDY YOUNG man with four years' experience desires position. Not afraid of work. View of advancement. Total abstainer. Good references. Box 645, Hardware and Metal, Toronto. (12)

ADVERTISER, AGED 35, TWENTY YEARS' experience general hardware and furniture, is open for position with view to partnership, as manager, buyer or salesman. Excellent testimonials. Box 640, Hardware and Metal, Toronto. (11)

STORAGE

STORAGE, VANCOUVER, B. C.—STORAGE or space to rent, office if required; warehouse close to all wharves, with railway siding; two elevators. Martin & Robertson, Ltd., 329 Railway Street, Vancouver. (14)

MISCELLANEOUS

COUNTER CHECK BOOKS—WRITE US to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS ARE DEVISED to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE — INSURE IN THE Hartford. Agencies everywhere in Canada.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN pens. If you have fountain pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction, and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. Gage & Co., Limited, Toronto, sole agents for Canada.

PENS—THE VERY BEST PENS MADE ARE those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find pen to suit you.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

Sherwin - Williams Advertising is prominent in the leading magazines

We send you attractive Field Signs for the highways

SHERWIN-WILLIAMS

THE Sherwin-Williams Selling Campaigns are at work day and night, creating and increasing the demand for S-W Paints and Varnishes. S-W Advertisements appear in the leading magazines, farm and home papers, circulating in thousands of homes each week and month; the big S-W Billboards flash before the traveler, entering the cities by rail; S-W Barn and Fence Signs, bearing your name, are seen by the farmers driving into town; your local property-owners and painters are reminded of the painting season, the best paint and the place to get it by our personal letters each Spring and Fall; your store is connected up with this publicity by attractive signs and window displays; we supply free electros to make your newspaper advertising effective; finally, our salesmen personally help to secure the most desirable jobs for you. The business thus created is retained year after year by the quality of every S-W Product sold. This combination of quality and service has made the S-W Proposition the biggest, strongest and most successful in the Dominion.

Glidden

Challenges Comparison

Our terms are Sixty Days—some varnish houses give four months.

Why should you deal with Glidden?

There's just one answer, Mr. Merchant: The quality of the goods and the profits to you.

The Glidden discount is so much more generous than the discounts made by other varnish houses that *the discount discounts the terms.*

The discount we offer the trade on Green Label Varnishes, Stains and Specialties makes it possible for you to *make more money* absolutely regardless of four months'—five months'—or six months' terms, and Glidden's Green Label Varnishes are in a class by themselves.

Have you been reading our advertising in the painters' publications?

We challenge any painter in the land to send us a sample of any exterior varnish equal in quality to Glidden's M.P. Durable Exterior, or any interior varnish equal to Glidden's M.P. Durable Interior, or any floor varnish equal to Glidden's M.P. Durable Floor.

We are giving this challenge bold advertisement in the Master Painter, The Painter and Decorator, The Modern Painter, Practical Decorator, Painters' Magazine, Cement World, American Carpenter and Builder, etc.

That is the sort of challenge that shows *faith* in the quality of our goods, and the painters know it.

Write for our New and Most Generous Proposition to the Trade on Green Label Varnishes, Endurance Wood Stains, Endurance Colorspar, and Specialties. Use the attached coupon.

IT'S A PROVEN SENSATION

Here is a noteworthy achievement in a Flat Wall Finish that is proving the biggest money-maker of the season. Judging from the numerous gratifying reports from painters, decorators, and the way the sales of this product are soaring, it is a proven sensation.

Like all our other specialties, we have carried the perfection of

NEU-TONE WALL FINISHES

to a logical conclusion—it is adaptable to every phase of interior decoration—artistically harmonizes with the most humble or elaborate appointments—works well on either wood, metal, wall paper, burlap or plastered walls and ceilings.

Do you wonder why hustling painters and contractors are getting acquainted with this finish? Now's the time to get the business for Mid-Summer and Fall decorating. You can't make money easier or quicker, so investigate—NOW.

Let Your Varnish Shelves Put the Stamp of Quality on Your Store.

What story do your varnish shelves now tell to your trade?

What does the array of labels mean to the average man or woman who comes into your store?

Perhaps you've never thought of these questions seriously—but it's time you did, now that the Berry Brothers' Label has become so well known to the buying public.

Through the persistence of large space advertising in which this grand old label looms large, the general public has come to know a Berry Brothers' Label at first sight, and to know that it stands for quality.

Let *your* shelves repeat this story to them.

GET THE GENUINE

DOES THE REPUTATION of GARLOCK PACKING mean anything to you?

Does the fact mean anything to you that GARLOCK PACKINGS are giving eminent satisfaction the country over and everywhere Engineers who know insist on the installation of Genuine GARLOCK?

This big and insistent demand for GARLOCK PACKING is the demand for quality.

Imitators are making Packings that look like GARLOCK and are trying to sell them because they look like GARLOCK.

Sometimes these imitations are sold as being "just as good as GARLOCK." If they were as good, they would be sold on their own merits and not on the established reputation of GARLOCK.

Sometimes these imitations are substituted when "GARLOCK" is asked for. To prevent you getting an imitation and assist you in identifying the genuine, we have marked every piece of Spiral Packing with this mark of quality

TRADE THE GARLOCK PACKING CO. HAMILTON CANADA MARK

Canadian Representative: D. G. ROSS, Saskatoon.

"Safelock" Stays *cannot* Slip

This is a mighty strong selling point. It means that the fence will stand up to the hardest usage from animals or the elements and still keep its height and shape unimpaired. And the fact that the strand wires do not have to be kinked, owing to the positive permanent grip of the lock, means that every wire will stand its full strain. The "Safelock" is absolutely the strongest wire fence made---you can sell it as such and the test of time will bear you out to the letter. There's good money in handling "SAFELOCK." Write us about the exclusive agency for your locality. Don't put it off---Write to-day.

For Increased Business
Sell the

SHELF LOCK STEP LADDER

This is the lowest priced step ladder we make. Galvanized steel ears fasten the legs and risers to the top.

The lock that holds the ladder from opening and closing when in use is made by using strips of steel to form a hinge with the arms that support the shelf.

The shelf is always up when the ladder is closed and horizontal when in use. This is a very convenient and practical house ladder where short lengths are used and it is certain to appeal to the public.

Made regularly 4 to 10 ft.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

The ROSS

"High Velocity" Sporting Rifle

justifies itself on every occasion where absolute dependability is required.

Where danger is met face to face its superiority is shown—

RETAIL PRICE, $70.00

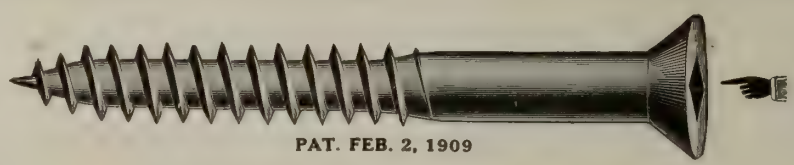
Other Ross Rifles from $25.00 up

The prestige of the Ross Rifle increases from month to month, and there are demands in every town in Canada for them.

Dealers will find them the most satisfactory to carry —no trouble with duties, no delay in securing parts. Liberal discounts and satisfied customers.

Send for Catalogue and Trade Discounts.

THE ROSS RIFLE CO., QUEBEC, QUE.



PAT. FEB. 2, 1909

ROBERTSON

SOCKET HEAD

WOOD SCREWS

have a new and very important feature in the square hole. It is a feature that wood workers are quick to notice, as it not only preserves the screw. but also saves much of their valuable time, as it does away with all possibility of the screwdriver slipping. It is certain to create a large demand in your vicinity after once introduced.

We also manufacture Hand Drivers, Yankee Bits, Brace Bits, Rivets, Burrs. Washers, Nails, Wire and other high grade products.

The P. L. Robertson Manufacturing Co., Limited, - Milton, Ont.

BLACK DIAMOND TARRED FELT

Is a necessity for every up-to-date house because it keeps the house warm in winter and cool in summer.

It is made of the highest-grade material and guaranteed to last as long as the house on which it is used.

We also make a full line of wrapping papers.

F. J. COX, - WINNIPEG

BLACK DIAMOND
ALEX. McARTHUR & CO.
LIMITED.
MONTREAL.
REGISTERED TRADE MARK

Pearson's Patent Poke No. 2

possesses several strong advantages over other makes, and will yield you a good profit.

It cannot slip off, doesn't wear the mane, and is very easily adjusted.

It is light, but very strong, and will prevent running in the field.

Does not interfere with the animal's comfort when lying down, and allows it to eat comfortably.

Guaranteed to be exactly as represented or money refunded.

Get our circulars and prices.

VALVE DISCS

For long and satisfactory service, nothing to equal them has ever been made.

"PRACTICALLY

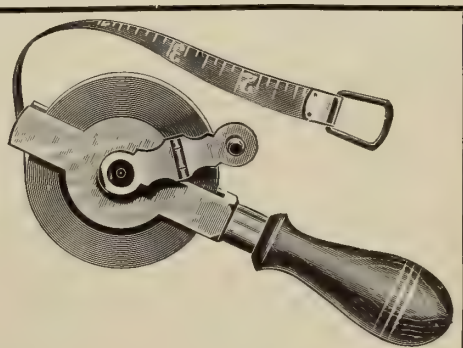
INDESTRUCTIBLE"

Manufactured solely by **THE GUTTA PERCHA & RUBBER MFG. CO.** *OF TORONTO, LIMITED*
Toronto Montreal Halifax Winnipeg Calgary Vancouver

MEASURING TAPES

MUST BE ACCURATE

To sell well they must also be of the most improved design; particularly adapted to the work they have to do; durable and reliable.

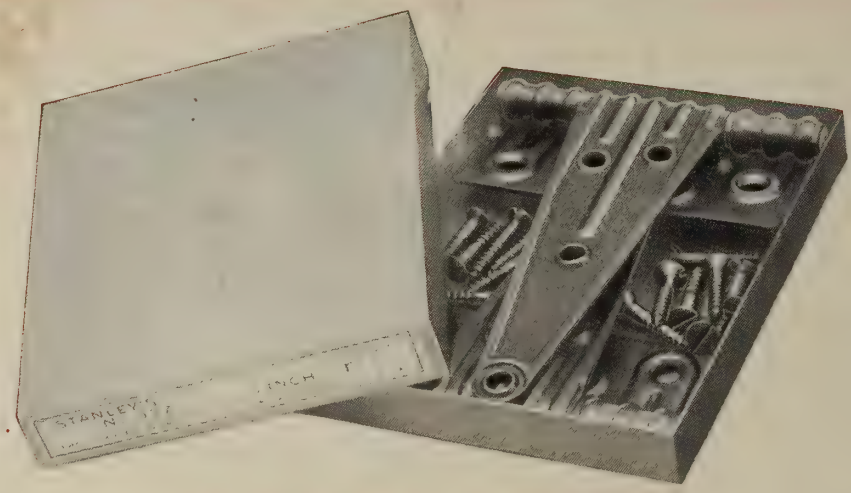


Those that bear this Trade-Mark **LUFKIN**

are the leaders of the field because they have always given satisfaction. THEY ARE DOMINION MADE.

FOR SALE BY ALL JOBBERS. **THE LUFKIN RULE CO. OF CANADA, LTD.** WINDSOR, ONT.

CATALOGUE ON REQUEST



STANLEY'S
CORRUGATED STRAP AND T-HINGES

ONE PAIR IN A BOX WITH SCREWS

Should be on your shelves.

STANLEY'S Corrugated Hinges are greatly superior to the old style hinges. Comparing the two lines, Corrugated Hinges have **greater strength,** consequently **longer life; lighter weight** with corresponding **lower freight charges,** and a neater appearance. The combination of these qualities of superiority readily explains the **widespread and ever-increasing popularity** of Stanley Corrugated Hinges.

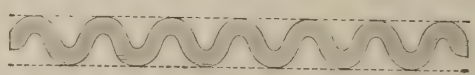


Figure 1

The greater strength with less weight of material is obtained by the application of the old principle of Engineering Design, illustrated in Figure 1. A piece of steel formed as shown by the shaded portion, has very nearly the same strength as a piece of the full area between the dotted lines. It is readily seen how this engineering principle has been used in designing Stanley's Corrugated Hinges.

Ordinary hinges, when they rust, bind on the pin and soon break at the joint.

The Corrugations Around The Joint

of Stanley's Corrugated Hinges absolutely prevent binding on the pin, no matter how rusty the hinges may become. It is in this feature particularly that Stanley's Corrugated Hinges are greatly superior in strength and wearing qualities to any other hinges.

Ask for **Stanley's No. 935 Heavy Strap Hinge**
Stanley's No. 937 Heavy T-Hinge

either loose or packed neatly one pair in a strong telescope box with the necessary screws of just the right size.

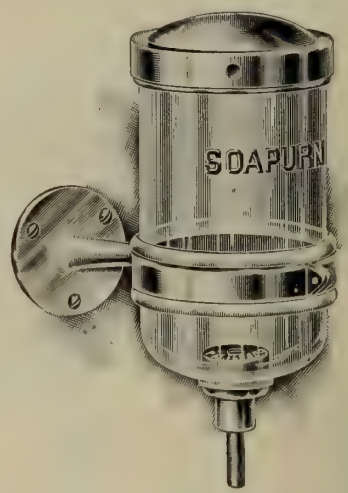
We are Headquarters for Disston Tools and Files.

LEWIS BROS., LIMITED, MONTREAL

OTTAWA TORONTO VANCOUVER

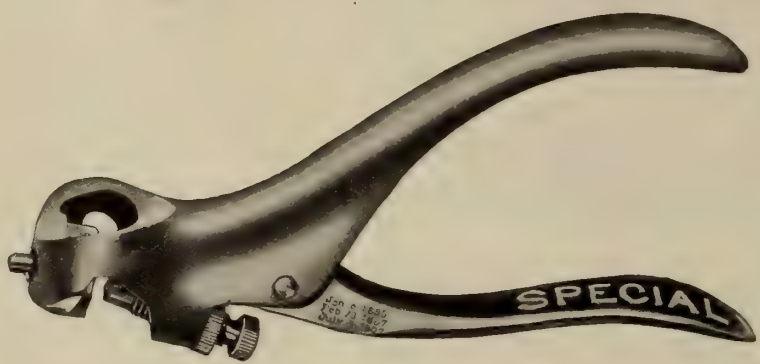
Almost Human—

The Morrill Nail Puller never misses a nail. The jaws are scientifically constructed of the best quality steel. It is carefully proportioned to give the greatest strength and most direct pulling power. It will not turn in the hand or roll off the case. There are no springs to break and it is impossible to pinch or bruise the hand. You can't pull nails with a soft metal nail puller—insist upon the Morrill—the best Nail Puller made.



The Soapurn is a sanitary and economical liquid soap dispenser, made of non-corrodible metal, nicke finished, with a strong glass urn—top is fastened with a key—the valve throws only so many drops at each operation, minimizing wastefulness. Send for sample outfit.

Send for CHAS. MORRILL'S Catalog



THE MORRILL SEW SET

For 30 years, the Morrill Saw Set has been recognized as the only Saw Set that meets the requirements of the dealer and user. It is the only Saw Set that will properly set a saw. There is a better margin of profit for the dealer who sells the original Chas. Morrill Saw Set. You should send for our new three color show-card for your window.

FREE Our booklet "Saw Points" has been compiled by experts and shows the way to get the best results from every kind of a saw. To obtain the best results, every saw demands the most expert attention. This book is invaluable — you should write for your free copy to-day. It will give you a better knowledge of how to set and sharpen Saws.

CHAS. MORRILL, 273½ BROADWAY NEW YORK

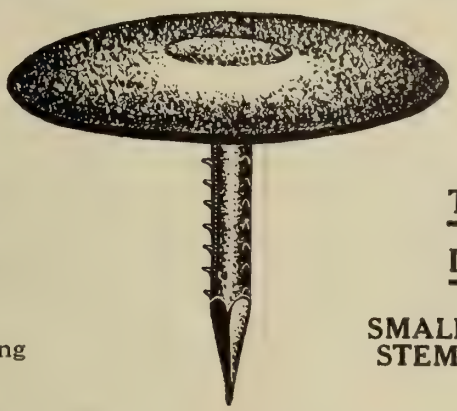
W. BRUCE MORROW, 100 Church St., Toronto

SOLE AGENT FOR CANADA

Simplex One-Piece Large Head Roofing Nails

Should be Used on Every Roof

ONE-PIECE
NOT TWO-PIECE
ALL IN ONE



SAVES TIME
SAVES ROOFS
SAVES MONEY

HEAD AREA
Means Roof Life

LARGE HEAD Will not Tear Roofing

TRIVIAL EXPENSE
Insures Life of Roof

SMALL STEM Will not Split Roof Boards

Has a Heavy Steel Head, 1 inch in Diameter; 21 Gauge Thick; Cupped Shape so as to give a Head Bearing equal to its Full Diameter.
The Small Stem 1 inch Long, 15 Gauge Diameter, is Barbed to Insure Greatest Holding Power.

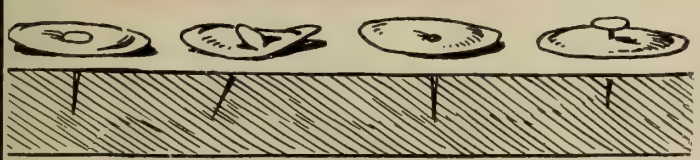
The very nature of Prepared Roofings demands a Nail with a Large Head. Being made of a substance which tears readily it is of **Vital Importance** to use a nail with a Great Head Area.

The Simplex has the Head Area

and besides it is a time saver, a One-Piece Nail.

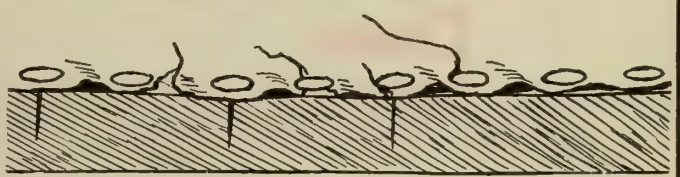
No time lost as occurs when handling separate nails and caps. No curling up at the edges of the cap. No leaking and rusting where nail goes through cap—the Nail and Cap are Welded into One-Piece.

Has Four Times the Head Surface of Large Head Roofing Nail



NO SIMPLEX HERE—Illustration of the **Tin Cap and Nail** Trouble.

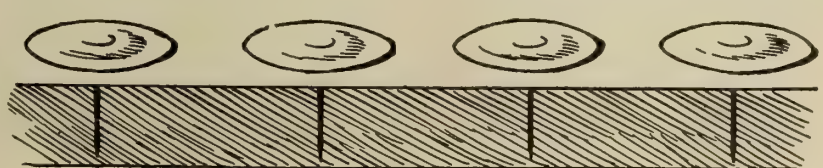
Caps curl up when nailed to roof and leave very little bearing on the roof. Tin Caps soon rust and leak. Caps and Nails require time to assemble and are difficult to handle on steep roofs.



NO SIMPLEX HERE—Illustration of the **Small Nail** Trouble

Four times as many nails to drive to get the same surface under head as with Simplex. Wind strain causes roofing to TEAR AWAY from head. Four times cost of applying in time.

Heavy Steel Head 1 inch Diameter; Won't Curl, Rust nor Tear Roof.



Small Stem, 1 inch Long and Barbed to Insure Greatest Holding Power.

SIMPLEX HERE—Illustration of **No Trouble at All** with **SIMPLEX Nails.**

Quickest to lay—Thick Heads Resist Rusting—Largest Bearing Surface—Edges don't curl up—No leaks around Head—All One Piece—Four Times Head Area of a Regular Large Head Roofing Nail.

Lasts Longer, Keeps Roof Better, and Costs Less—YOU TRY IT.

Educate Your Customers to Buy Goods "Made in Canada"

Why?

Not simply to keep the money in Canada, and thus increase the wealth and prosperity of our own land, but—

Because Canadian Made Goods are Worthy. The day has passed when "imported" meant "better." To-day Canadian brains are devising, and Canadian hands are making, goods that will hold their own with the world's best. Take, for instance,

The Gillette Safety Razor

which is manufactured in five different countries, and sold the world over. The Canadian Gillettes, made throughout in Montreal, by the Canadian workmen of the Gillette Safety Razor Co. of Canada, Limited, are in every way the equal of the Gillettes made in the Boston, Leicester, Eng., Paris or Berlin factories—and easily superior to any other razor made anywhere in the world.

Moreover, the Gillette is the only Safety Razor "Made in Canada"—the only Safety Razor in whose manufacture Canadian workmen make money, which they spend in Canadian stores.

The Gillette Safety Razor Co. of Canada

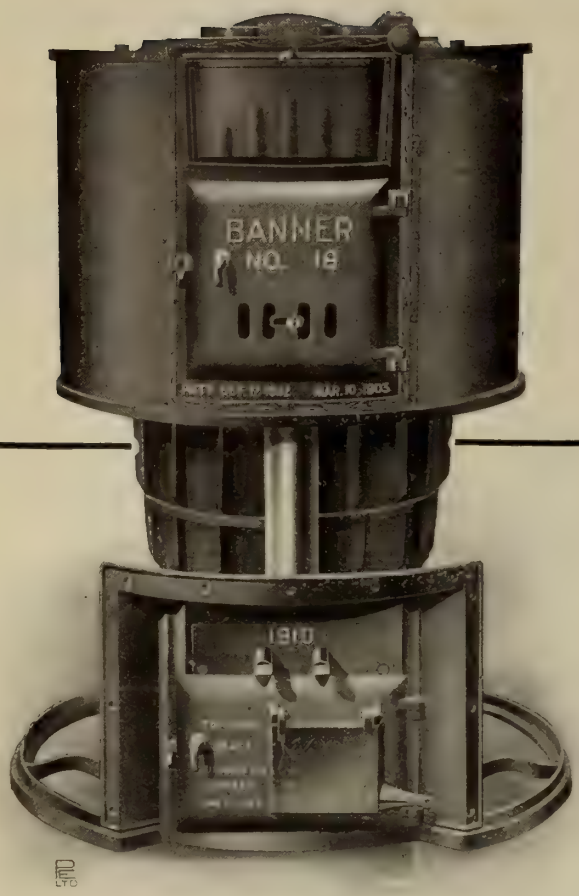
MANUFACTURING CO., Limited

WOODSTOCK, Ontario

DISTRIBUTORS:
Hardware Co., Nelson, B.C. Ross Bros., Ltd., Edmonton, Alta.



The Banner Furnace

ITS PROMINENT FEATURES:—

THE ARCHED CAST IRON DOME connected with the Radiator gives it an exceedingly large radiating surface.

THE FIRE POT is reinforced with heavy ribs on the outside to give the pot additional strength and radiating surface.

THE GRATE BARS are triangular in form, and this is the best designed grate for furnace requirements. They operate in pairs and will break clinkers, etc. without any difficulty.

THE CAST IRON DOME is made in one piece, and is indestructible.

THE DIRECT DRAFT DAMPER is fitted with a gas damper.

THE ASH PIT is large and roomy and is fitted with a suitable ash pan.

THE STRAIGHT CASING. The furnace is fitted with a straight casing which gives a large space for the circulation of the cold air supply.

It is simple in construction and easily installed.

MADE IN FIVE SIZES.

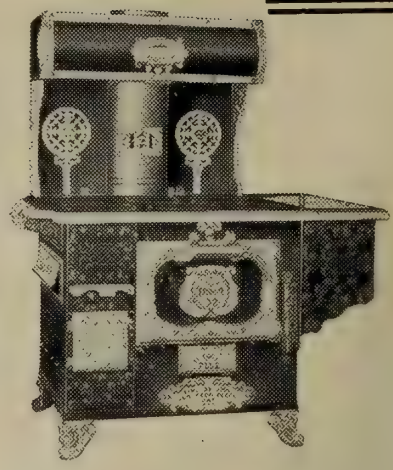
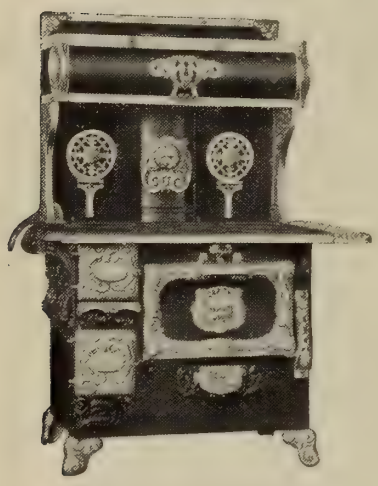
CROWN FAVORITE
16 and 18-Inch Ovens



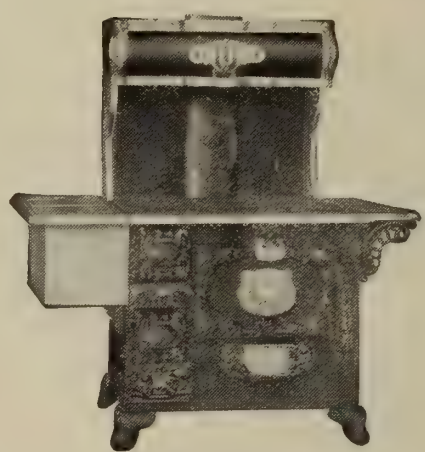
CROWN FAVORITE
16 and 18-Inch Ovens



CAPITAL FAVORITE
16, 18 and 20-Inch Ovens

A Range to Suit Every Class Both as to Quality and Price

These Ranges are very attractive and represent the best value for the price that you can handle.



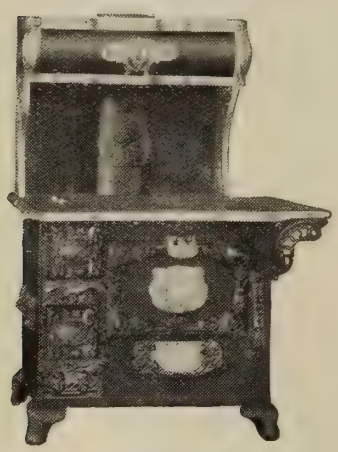
COLONIST—16 and 18-Inch Ovens

THE CAPITAL FAVORITE is a medium priced Range, substantially built, a great business getter, and very popular with the trade.

THE CROWN FAVORITE is a Six-Hole Range. It looks well, it works well and is the kind to have on your floor to meet competition.

THE COLONIST is a Six-Hole Range and shows up big for the money. This Range will enable you to meet the competition of Catalogue Houses and at the same time net you a fair profit.

THE GLEANER is a Four-Hole Steel Cook fitted with Flat or Duplex Grates, and the price for which it is sold is practically giving it away.



COLONIST
16 and 18-Inch Ovens

The road to success has a myriad of forks, and the man who once turns in the wrong direction must either go back or fail. Now, MR. DEALER, one of the main arteries to success in your business is a good line of STOVES and RANGES. If you are not satisfied with your Stove Trade, write us.

GLEANER—14 and 16-Inch Ovens

Sussex, N.B	Toronto, Ont.	Calgary, Alta.	Edmonton, Alta.	Vancouver, B.C.

Make Quality the Foundation of Your Stove Trade

EVERY dealer knows from experience that there is no other article he sells that will give him more trouble and loss of trade than a poor Range, while on the other hand the sale of a good Range makes satisfied and increased customers, and brings a lot of other business to his store.

A Range should not be judged entirely from its external appearance. The dealer must rely largely upon the knowledge and responsibility of the maker to know that all internal parts are absolutely correct.

THE UNIVERSAL FAVORITE has built up, for DEALERS who handle them, a most satisfactory and profitable STOVE TRADE. The sale of a UNIVERSAL FAVORITE in a district means the sure sale of a number of others.

The Appearance, the Finish, the Workmanship, and the High-Grade Material in this Range put it in a class by itself. You have the courage of your convictions when selling it, it has so many strong points.

Every Dealer has customers who are willing to pay the price for a Range that will give absolute satisfaction and last for years. THE UNIVERSAL FAVORITE is specially built to meet the demands of this class of buyers, and the price is no higher than many other ranges offered in competition.

Put THE UNIVERSAL FAVORITE on your floor—it will prove the most profitable Range you ever handled.

The best made anywhere, and the fastest and most satisfactory blacksmiths' selling line of any on the market

Quality

We will not talk about **QUALITY,** because every horseshoer in the land has used **CAPEWELL HORSE NAILS,** and the vast majority are using them exclusively. **THEY KNOW.**

Manufacture

We will not talk about manufacturing facilities and systems, as it is well known that we are the only concern in the Dominion making horse shoe nails exclusively and able to concentrate the whole of our efforts on the perfection of our product.

Service

But we do want to say a few words about the kind of service we are in a position to render our customers, jobbers and retailers. We are not content with selling them a carload, 100 boxes or 20 boxes of **CAPEWELL HORSE NAILS,** as the case may be. Our salesmen, all picked and able men, cover the country regularly and systematically. They create a steady demand for **CAPEWELL HORSE NAILS,** which quality und satisfaction maintain and increase. We see to it that the nails we sell you are marketed promptly and to your satisfaction. We prove all our statements and look after your interests, not spasmodically, but all the year round. This kind of service is expensive and costs us a good many thousand dollars per month. But the volume of our business warrants it, and it is the only kind of **SERVICE** that counts.

By virtue of what we have done, and what we can continue to do in an ever-increasing degree, we solicit your business.

THE CAPEWELL HORSE NAIL CO.

TORONTO **WINNIPEG** **VANCOUVER**

Make Your Store MORE ATTRACTIVE Than Your Competitor's

A More Attractive Store Will Influence MUCH VALUABLE TRADE YOUR Way

A number of our METAL SHELF BOXES when nicely arranged will not only act as drawing cards but will enable your clerks to keep system and give your customers quicker and more satisfactory service.

With these Patent Metal Shelf Boxes, the articles are displayed on the outside of each box, a system which greatly facilitates selection by the customer and often recalls needs to him which he would forget were it not for this display.

Great strength prevails in all these boxes—they will last a lifetime. Supplied in any finish desired.

Tell us your requirements and we will sketch a plan for an assortment of boxes and quote you prices on same. We also handle shelving, counters, screw cases, etc.

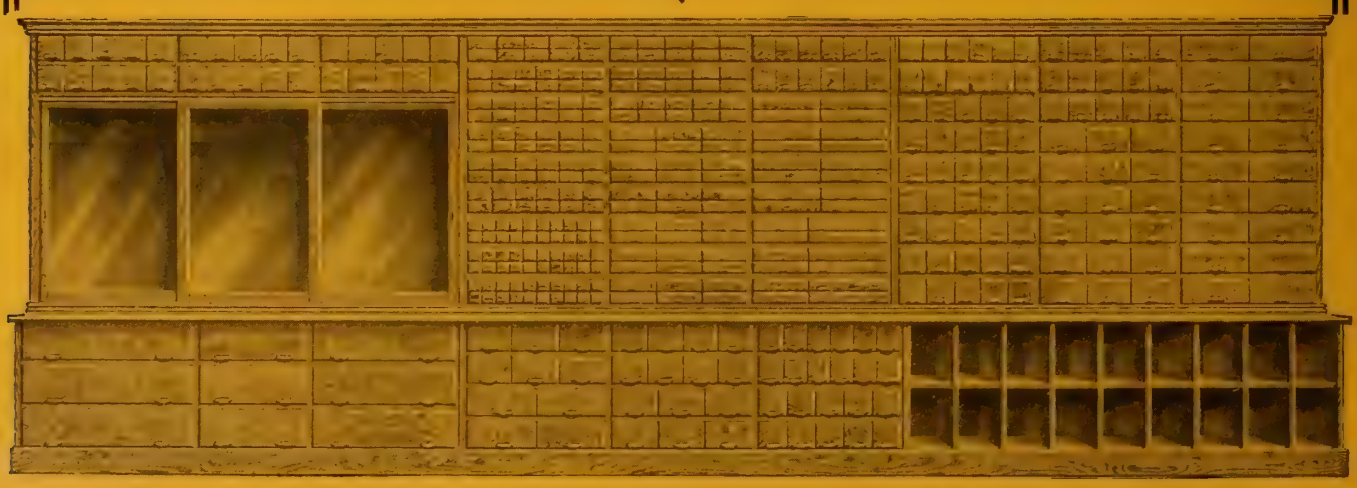
Cameron & Campbell, Sole Manufacturers Toronto, Canada



A Stock of "Plymouth" In Your Store—

Means a great deal more for your business than the profit on rope sales. PLYMOUTH Manila rope *attracts* trade and sells itself—together with the many other lines that sympathize.

"My customers drive twenty miles to get the ship trade-marked rope," a dealer writes us. "If they come for a hay-rope, they buy pulleys as well—if they want a well-rope, they also want a bucket. But it's *the rope* that *brings them.*

PLYMOUTH ROPE

"The Rope You Can Trust"

is not merely "one of the ropes" but is, instead, *the one best rope;* a high-grade specialty, offering more strength to stand strain, more length to the pound, and more durability than any other rope on the market. PLYMOUTH rope draws trade that might go elsewhere.

The heaviest demand is always for *best quality.* Many dealers have learned the wisdom of handling PLYMOUTH alone. If you have not, tell your jobber to send a few coils for you to put in stock as a test.

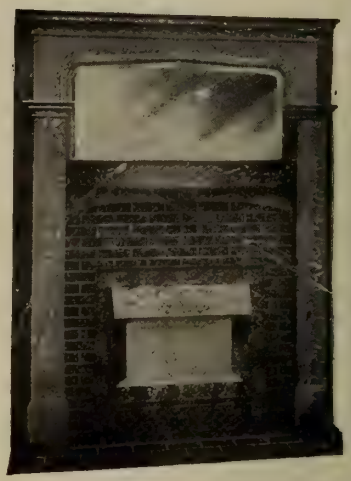
Barton-Netting

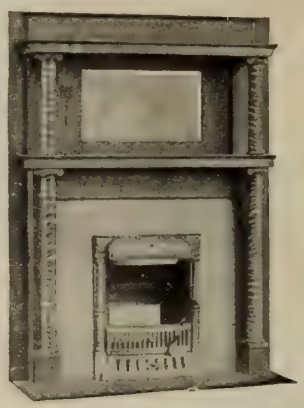
Mantels, Grates & Lighting Fixtures

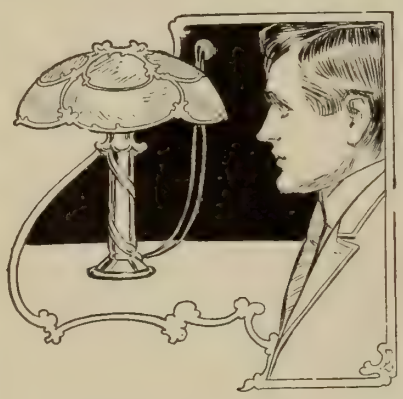
Are of Highest Prevalent Quality and Yield a Profit Worth While.



Mr. Dealer, let us solve that larger profit problem:—There will be no limit to your profits if you handle our line of goods.

There is no need for you to carry a large stock, just keep our catalog on your desk. It contains cuts and descriptive matter of our entire line, which is, we believe, the most attractive and reliable on the market.





When it comes to installing these mantels, let us do the worrying. All you have to do is to send us measurements and we will cheerfully send you full instructions to instal any work of this description. The quality of our goods will appeal to you and your customers. Do not hesitate—write us at once for catalog and proposition.

DO YOU EVER get inquiries for Tile Floors for Bath Rooms, Stores, Theatre Fronts, Hotels, Office Buildings, etc. If so, DON'T TURN THEM DOWN. Get the plans and specifications and send them to us. We will figure, either to furnish you the tile or on the work installed complete. We are installing floor and wall tile everywhere and always have a corps of competent workmen at your disposal.

DON'T FAIL TO GET OUR FIGURES.

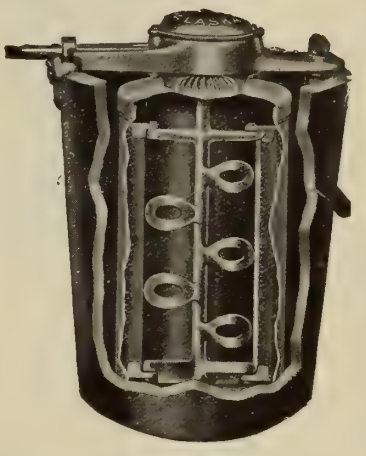
The 3-MINUTE ALASKA FREEZER

"The freezer with the aerating spoon dasher"

is the easiest freezer to sell because its selling points are irresistible.



THE woman who knows what an Alaska Freezer will do, will buy an Alaska Freezer, and no other. And let one Alaska Freezer get into a neighborhood, and there will be a dozen there before the season is over.

BECAUSE—the Alaska Aerating Spoon Dasher has given a new meaning to ice cream making in the home. It makes smoother, more delicious ice cream than any ice cream freezer ever made before.

This isn't a mere assertion. The aerating principle—the open mesh of the egg-beater or the beating spoon—is familiar to every housewife.

But this isn't all. The Alaska has other points that no housekeeper can resist.

It is a *real* 3-minute freezer. No other freezer makes perfect ice cream so quickly. It operates much more easily than any other freezer made. It is the first freezer to transform ice cream from HARD WORK TO NO EFFORT WORTH TALKING ABOUT.

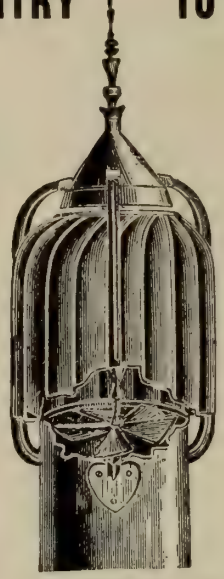
THE J. W. HARRIS ROTARY VENTILATORS



J. W. HARRIS ROTARY

They are acknowledged, by all who know, to be the best obtainable, and the reason for their popularity is that they are made to give satisfaction and made to last.

They keep all buildings clean, wholesome and healthy and are insurance against bad air. Architects and builders everywhere specify these ventilators because they never fail.

HARDWAREMEN SHOULD BE READY TO MEET THE DEMAND

Here are a few Testimonials

Montreal, Jan. 21st, 1909.

J. W. Harris Mfg. Co., Ltd., Montreal

Gentlemen :—

Your favor of 11th inst received, and am pleased to report that "Zephyr" Ventilator which you installed on my property two years ago has done good service and is working well.

Yours truly,

EDWARD MAY,
434 Elm Ave.

St. John, N.B.
February 8th, 1909,

J. W. Harris Mfg Co., Ltd., Montreal

Gentlemen :—

We have had no complaints from any of our customers regarding your "J. W. HARRIS ROTARY VENTILATORS" we purchased from you Company.

Yours truly,

J. E. WILSON Limited.

Montreal, Dec. 4th, 19 9

Messrs. J. W. Harris Mfg. Co., Ltd.,
City

Dear Sirs :—

In answer to your letter of the 25th ult., I must say that I am very much satisfied with the results of the "ZEPHYR" Ventilators.

Yours truly,

W. CHAMPAGNE,
191 St. Paul St.

Montreal, Dec. 4th, 1905
J. W. Harris Mfg. Co., Ltd.
Montreal, Que.

Gent'emen ;—

It pleases me to be in a position to state that the "Zephyr" Ventilator placed on my chimney is giving me the greatest satisfaction.

The smoke which we used to have in the house has completely disappeared owing to the good work of your "Zephyr" Ventilator

I remain, gentlemen,
Yours truly,

T. A. GAUTHIER,
128 St. Elizabeth St.

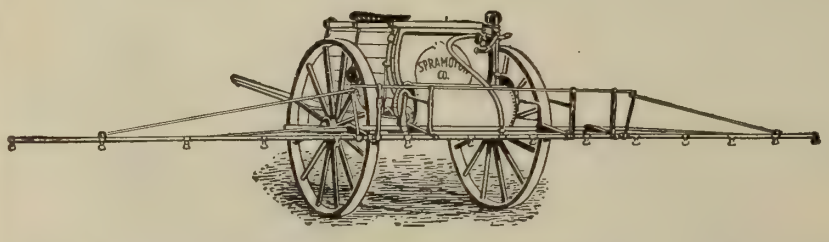
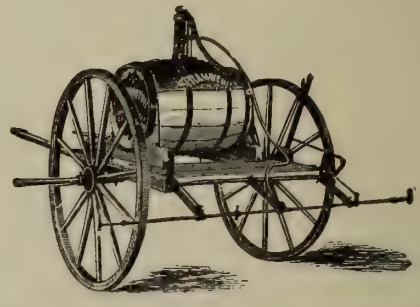
Horse Power SPRAMOTOR



The Horse Power Spramator shown above will thoroughly spray 2 acres of potatoes or row crop in 30 minutes. The horse does all the work. 12 nozzles that will not clog, spraying both tops and vines with 125 pound pressure, get after the parasites. Full control from the driver's seat. Has automatic regulator and agitator nozzle protector, pressure relief, 12 gal. air pressure tank, draining, air and controlling cocks. Equally efficient on row crops or orchards. Made for 1 or 2 horses or hand. Awarded gold medals at National Horticultural Congress.

Hand Power SPRAMOTOR



Nos. 1 and 2 with horse-drawn cart, can be used for orchards, vineyards, row crops, or weed spraying. As shown, it is arranged for row crops and weeds, but all attachments are interchangeable. Has steel axle, 52 inch wheel of best hardwood, adjustable width of track and rows, all brass spramotor, with brass ball valves, mechanical agitator, compensating plunger. All of the highest grade throughout, for one horse only. 2 Gold Medals National Horticultural Congress.

We have an interesting money-making proposition for every wide-awake dealer. Write for it at once—it will pay you. Write for booklet on "How to destroy crop pests."

LOWER DOOR CHECK

The "LE PAGE" Patent OIL DOOR CHECK and SPRING

is a marvel of simplicity and has a mechanical action that is perfect.

It is the only door check made without packing in its working parts, which assures absolute freedom from packing friction.

The door on which this device is used cannot slam, as the oil in the spring cup of the check forms a cushion, which keeps the door under perfect control and allows it to close quietly.

The spring tension is applied by means of the ratchet wheel on top; the checking power is controlled by the thumbscrew at the right.

The bearings are long and the spindle, with crank at lower end, is drop-forged from cold rolled steel.

Toronto public schools, Simpson's, Eaton's, etc., use this door check exclusively.

The STANDARD EARTH AUGER

Defies Comparison

This is an auger that is certain to appeal to farmers, contractors, etc., as it has many advantages over other makes.

The dealer who handles it will realize quick, satisfactory sales which yield an attractive profit—a profit that he cannot afford to miss under any circumstances.

The Standard Earth Auger has been time tried and tested and has always made good its claims.

Twelve Reasons Why They Are The BEST

The **STANDARD** is the **ONLY** Earth Auger that really bores. That will enter hard earth. That has an **EXPANSION** blade. That will hold fine dry sand. That does not bind in the hold. That opens to discharge the contents. That bores in all conditions of earth. That has double "V" point cutting blades. That is guaranteed to save half the time. That individually bores more than **ONE** size hole. That individually bores **NINE** different sized holes. That is guaranteed to do the work with half the effort.

Larger holes can be bored with the same auger for corner fence posts or for concrete filling around posts. Of great advantage in planting trees, vines and shrubs, as well as in monumental, cemetery and cement work.

The Bowser Way To Handle Paint Oils

Do you suppose we could have induced so many of your business associates and competitors to invest their money in

Bowser Paint Oil Systems

if they were not a good investment?

Many of the largest hardware and paint stores in the Dominion are using Bowser equipment for retailing oils. There are many installed in the smaller stores as well. If Bowser Systems make money for them, they will just as surely make money for you.

It doesn't make any difference how much you handle nor how small your business, there is a Bowser System adapted to your needs in size and price. You can buy one tank and pump or you can get a battery, and every system will pay for itself.

The paint season will soon be upon you. Why not get ready now so you can make a better profit this year? Don't be satisfied with just a living profit, get all of it. The Bowser gives it.

This is the first floor style. You can install the basement style if you want it. The tanks are then in the basement with the tanks only on the first floor.

"For twenty-seven years manufacturers of Self-measuring Pumps, Gasoline and Oil Storage Systems, Oil Filtration and Circulating Systems, Dry Cleaning Systems, Self-registering Pipe Line Measures, Etc.

66-68 FRASER AVENUE

Opening Day in Handsome New Store

Thornton Bros., Bradford, Supply Music and Refreshments to Customers on Throwing Open the Doors of Their Remodeled Establishment—Full Description of the Store and its Many Creditable Features.

ONE of the largest and finest hardware stores north of Toronto, and one that will in time take a prominent place among the foremost enterprising retail hardware establishments of Ontario is that of Thornton Bros., at Bradford. While the firm is a new one, having purchased last October the business formerly conducted by A. T. Howes, the Thornton boys are not novices in the business world, W. H., R. H. and C. H. having been in the general store business at Sundridge, where they traded under the name Gordon & Thornton.

They have shown their enterprise and abiding confidence in their ability to make their business a success by spending several thousand dollars on their store premises in remodeling and bringing them up to date.

To celebrate the completion of these improvements a grand opening was planned and held on Friday last, March 15, the ceremonies in connection therewith being of a high character. The affair was a success, though on account of a severe snowstorm not so many country people attended as was anticipated. For the benefit of these, however, the Thornton brothers propose a celebration later on, when the weather is likely to be more favorable.

Customers Were Entertained

An orchestra, stationed at the back of the store, played a selected programme in the morning, afternoon and evening, and a couple of gramophones filled up the intervals with varied selections. Lunch was served from noon on, and demonstrations were held in different parts of the store by various paint and oil companies, which served to interest the visitors and give color to the celebration. The Ohio Varnish Co. gave exhibitions of the uses and methods of applying Chi-Namel; J. M. Glover, of the Queen City Oil Co., demonstrated the baking and cooking qualities of the Peerless oil stove, and R. J. Spalding, of Sherwin-Williams, told the story for S. W. P.

The New Store.

Thornton Bros.' new store is a two-storey and basement solid brick building 108 feet long by 30 feet wide, the entire ground floor of which is given over to the hardware store. The lay-out plan is a good one. The light stock is displayed and carried at the front of the store, while the paint and heavy hardware are stocked at the back.

What may appear strange in a hardware store is the book and stationery department, which is given a prominent position at the front on the left-hand side of the store as one enters. A complete line of school books, magazines, daily and weekly papers, copy and note books, scribblers and novelties, Bibles and prayer books, tissue and writing papers, sheet music, picture post cards and paper cookery bags is carried, as well as souvenirs, toys and smallwares. Besides paying for itself, the department is an aid to the rest of the store, paving the way for the sale of other wantable things

In this department, too, are displayed the better lines of silver and plated ware for the dining room and for ornamental purposes, fruit dishes, glassware, mirrors, etc., these goods being set out in an elaborate glass case serving the double purpose of counter and silent salesman. A fine display case also sets off the better grades of books carried.

Two large plate glass windows set off the front of the store splendidly, the corner one, especially, with glass front-

An interior view of the new store of Thornton Bros., Bradford.

ing two streets being helpful for both display and demonstration purposes. These with other side windows give ample daylight all over the store, and at night a gasoline lighting system makes the store almost as bright as in the daytime.

The building is heated by steam, the system being a standard boiler, developing direct heat by either steam or hot water, the patent rights for manufacturing which is held by Thornton Bros. This steam plant is located in the basement, where also is stored a quantity of the surplus stock done up in the smaller packets. A new hardwood floor has been laid, and new metal ceilings are put all over the building. The store ceiling is 12½ feet high.

The front of the store has been refurnished with new fixtures, shelves, silent salesman, etc., at a cost of $500. They are of cherry wood, and the coloring of the whole store furniture has been made to harmonize with those new fittings. The shelf drawers have cherry front, bottom and back with metal sides, and actual size illustrations of the contents of each drawer are fitted to the front.

The right-hand side is devoted to hardware stock. A large shelf case with sliding glass doors holds and displays builders' supplies, then come the drawer cases containing the shelf hardware; and then another glass wall case for steel cutlery, guns and sporting goods. Above all these on an immense shelf is the tinware sample display, and in front are the display cases containing the finer kitchen and household supplies, table cutlery, bathroom supplies, and aluminum, brass and nickel plated goods. A fine showing is made of toilet articles for ladies and men, with especial mention of shaving and smokers' sundries. Resting almost on the floor and below the counters are the nail bins graded in rotation from the smallest to the largest size.

Behind the hardware stock farther down the store is the paint stock, colors in oil being displayed on shelves and in powder in drawers. Axle grease, putty, seeds and similar stock is also grouped in this department. Then follows flower pots, horse blankets, woodenware, window glass and pipe fittings, etc. Fishing rods and whips suspended from circular racks hang about the pillar supports throughout the store.

On the left-hand side after passing the stationery department is the store office, where the cashier and accountant are located. A cash carrier system is being installed to facilitate the work of the store and keep check on the sales. A large fireproof vault keeps all the records and valuable papers.

To Supply Automobiles.

A Bowser tank system takes care of the oil stock, and a good feature is a tube leading from the gasoline tank through the store wall outside, so that automobiles may draw up on the side street, and the gasoline be delivered right into the machine without any handling beyond turning the Bowser crank.

Behind the cashier is a private office entirely shut in for the use of the manager. The wall between this office and the rear of the store is given over to the display of chains, rakes, forks and other long-handled agricultural implements, spades, scoops, shovels, axes, etc., being set off on the floor below In this back part of the store are also set off the surplus stove stock, household goods, washing machines, wringers, brooms and sweepers, fly screens and doors, egg cases, rope, kitchen sinks, closets and sanitary and plumbing goods. The back wall contains the lamp and chimney stock.

In the front centre is a three-decked bargain counter for 10, 15 and 25 cent goods. This is the first thing seen as one enters the store. Behind this is a display stand of 5 cent articles—a variety of little things always useful, but apt to be forgotten unless drawn to one's attention in a manner similar to this. Back of these stands again is the display of coal and wood stoves, ranges and heaters, coal oil stoves, etc., and suspended from the ceiling are a choice lot of hall lamps and chandeliers.

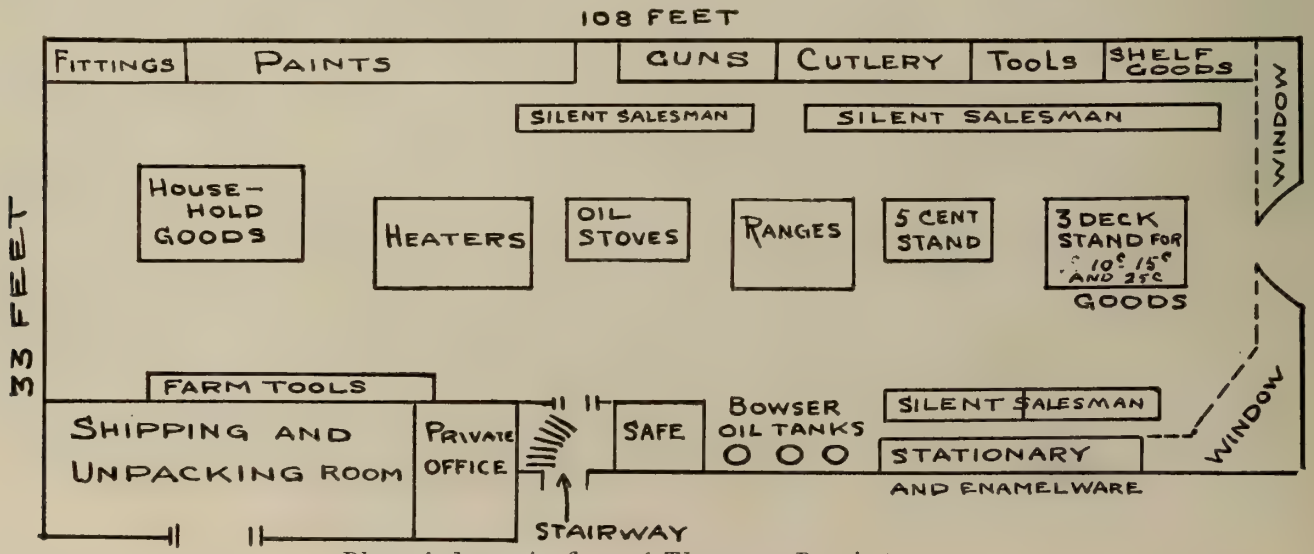
The Receiving Room.

One of the best features of the remodeled store is a receiving room at the back of the store in the room where had been the old tinshop. Through the use of this room a carload of goods can be stored, their cases opened and the goods put into stock without in the least interfering with the ground space of the store proper. A side door, too, gives opportunity for deliveries without encroaching on the selling or display space of the store, and without interfering with the comfort and convenience of shoppers.

Since taking over the business Thornton Bros. have greatly enlarged the tinshop by increasing the size of the department, installing new and up-to-date machinery for doing all kinds of repairing, tinsmithing, eavetroughing and general sheet metal work. The tinshop has been moved up-stairs and occupies a space half the size of the store.

The front part of the second storey has been set apart and furnished as an amusement hall for the holding of meetings, concerts, etc., until such time as the space is required for business purposes. Here, as throughout the rest of the building, taste has been displayed. Hardwood finish is everywhere in evidence.

Continued on page 81.



Plan of the main floor of Thornton Bros.' store.

Sydney Store which has Grown with the East

It is Not Only in the Far West That Rapid Progress has Been Made, a Fact Which is Well Illustrated by the Efforts of C. P. Moore in the Hardware Field —Starting in a Small Store 21 Years ago He Soon Secured a Larger Establishment, and This Being Burned in the Sydney Fire the Present Fine Place of Business Was Erected—Some Profitable Lines—Mr. Moore a Believer in Proper Publicity.

FIRE, in many cases, means a terrible setback for a town, yet there are occasions when a conflagration appears to bring good. Sydney, Nova Scotia, would seem one of the places which was able to draw benefit from misfortune. Sydney was swept by fire some ten years ago, but the flames seem to have had only a purging effect. The fire saved dealers the necessity of pulling down their barns to build greater. The coming of the Dominion Iron and Steel Company had made this course seem advisable, so on the charred ruins of their stores the merchants started to build on a larger scale—trusting in the future of Sydney. This trust was not misplaced. In 1899, just a year or two before the fire, the town's population was 3,200. Last year the city of Sydney had a population of 20,000; and planned industrial expansion makes it appear that the inhabitants at the end of 1912 will number 25,000.

Had Faith in Sydney.

C. P. Moore was one of those who was not dismayed by the flames. He had worked up a fine hardware business in this eastern town, and was sure there were still bigger things in store. He built with this in view, and has since had ample proof of the wisdom of his course.

It was 21 years ago that Mr. Moore started business in Sydney. Then he carried on operations in a little store 22 feet by 30 in. size. At this time Sydney was a place of about 3,000 inhabitants. It was the centre of a rich farming country, and consequently did a fine volume of business.

But these were the days of the general store. Every merchant felt he must carry a little of everything—hardware among the other lines. Mr. Moore was the first to strive for other things. Little by little he secured the hardware business. Some stocks he purchased. Other merchants found that they could make more by letting hardware go and confining their attentions to the other lines. So the business became centralized.

This change in methods brought Mr. Moore a larger trade. He felt the necessity of expansion, and five years after opened his doors he purchased a good-sized frame building; had this enlarged, and continued operations there.

Fire Upset All Plans.

But still business grew rapidly. The coming of the Dominion Iron and Steel Company meant much to the town. All lines of business boomed — hardware among the others. Mr. Moore's larger store was fairly packed with goods. Attic and cellar were utilized, and still there seemed need of more room.

Probably an enlargement would shortly have been undertaken; but about this time the fire came, upsetting for the time being all plans. It was only when the smoke had cleared that the merchants began to see that they might, like the ancient Carthagenians, raise a better Sydney from the ruins. They set about this work, Mr. Moore among the others.

It was in 1902 that the brick building at present occupied was erected. At first only one side of it was used for hardware, but since then the business has kept on expanding, and now the whole structure, 40 feet by 98, is used for the display of hardware lines.

Lines Well Displayed.

The pictures which are here reproduced give some idea of this store. It will be seen that the windows are not neglected; and the interior view reproduced, shows clearly the attention which is given to inside display. The stock is not lost. Cutlery is carried, and cutlery is to be seen in the show cases. Brass goods, too, are prominently shown; while specialties, such as clocks, thermos bottles, and similar lines are brought before all coming inside the store.

Mr. Moore is a believer in proper publicity. He thinks it wise to let people know everything possible about his goods; and to this end he makes free use of price cards. A special display has a special card. Customers do not have to

Interior of C. P. Moore's store, showing a part of the paint department and silent salesman devoted to silverware, brassware and cutlery—The insert shows Mr. Moore himself.

ask a clerk to find out the price of every article. Nor do they have to enquire about discounts, at seasons when discount sales are advertised—those goods which are to be sold at lower price than usual are placed together and denoted by a sign.

Mechanical tools are an especially good line for Mr. Moore. In the machine shops of the steel and coal companies scores of first-class mechanics are employed. These men are constantly on the look out for improved tools. A display of these immediately attracts their attention; and knowing this Mr. Moore does not forget to make numerous displays.

A Boom in the East.

Builders' hardware is another line which has proved exceedingly profitable. From time to time some remarks have been dropped to the effect that there is a rapid expansion going on in the West. There appears to be good ground for these statements; but right in Sydney—right in the far east—a rapid development has also been taking place. To keep pace with the fast growing population, new houses have been necessary; and to render these houses habitable there has been a heavy call for builders' hardware. It is a line which has proved and is still proving exceedingly profitable.

Where building operations are being largely undertaken there is sure to be a fine demand for paint. It is so in Sydney, and the interior view shown of Mr. Moore's store indicates very clearly that this line is kept well to the front. There is no disorder in this department. Samples are carefully arranged, and from these whatever is wanted can readily be selected.

Only last year Mr. Moore added sporting goods to the lines he regularly carries. Skates and hockey sticks were handled before, but the other sporting requirements had not been stocked. A year is hardly enough time to thoroughly test a new line; yet already Mr. Moore has found his sporting department profitable. It brings him just so much business which he did not get before; and, he believes it is only by reaching out for this wider business that the expansion which has been experienced from year to year can be continued.

Mr. Moore believes in keeping up with the times. As the trend is toward motor trucks and automobiles for delivering goods, he has purchased an auto and is using it for that purpose. He, therefore, enjoys the distinction of being one of the first retail hardwaremen in Canada to own a delivery motor.

He has not had time yet to draw accurate conclusions but is more than delighted with the improved service which it enables him to give his customers.

The store of C. P. Moore, Sydney, C.B.

Up-to-Date Western Store is Acquired By Three Young Hardwaremen

A New Western hardware firm—Rea ding from left to right: S. E. Fawcett, T. W. Fawcett and O. W. Fawcett.

ONE of the latest firms in the West is that of the Fawcett Hardware Limited, of Saskatoon, Sask. A short time ago they purchased the hardware business of S. T. Kempthorne, of that place, and leased his premises for a term of five years.

T. W. Fawcett, the president, has been residing in Saskatoon for the past six years, and is well known in the trade. S. E. Fawcett, who is the manager, has had twelve years' experience in the hardware business. He was connected with Wood-Vallance Limited for about two years, was with the Marshall-Wells Co., for a similar length of time and for the past four years has been manager of the Kelly Hardware Co., of Brandon. O. W. Fawcett, the junior member of the firm has had five years' experience, for the most part with Moore & Browne, of Sault Ste. Marie. He was with the J. H. Ashdown Co., when they first opened their branch in Saskatoon.

The Fawcett Hardware Co., is one of the largest and most up-to-date in Western Canada. It comprises in all 12,000 square feet of floor space and is fitted up with oak shelving of the latest and most efficient design.

J. H. Cameron, of the Winchester Repeating Arms Co., New Haven, spent several days in Montreal last week.

New Store in a Hustling Western Town

A Description of the Establishment of Landreth Bros., of Lemberg—it is Well Laid Out and Fitted With Modern Appliances—How the Stock is Arranged.

A NEW store with many creditable features is that of the Landreth Hardware Co., Lemberg, Saskatchewan. Lemberg is not a large place yet. It will become quite a populous centre in time, of course; all western towns will. In the meantime, Landreth Bros. have anticipated the future by erecting a hardware store which would be a credit to a place many times the size.

As will be seen from the accompanying illustration, the store is of unusual length. It is not narrow by any means and there is plenty of room to display the stock carried both neatly and effectively. The store is fitted up in modern fashion, with silent salesmen, glass cases and up-to-date shelving. A metallic ceiling lends an attractive appearance to the interior and aids materially in keeping the rear section light.

The arrangement of the stock has been planned with an eye to salesmaking. To the right on entering shelf hardware is found, with a silent salesman containing silverware in front. Back of that are open shelves containing ammunition and all varieties of package and case goods. In front of this section is a counter, with a glass showcase on top. After that comes the paint department. Landreth Bros. carry a large stock of paint and make effective use of the fixtures and hangers supplied by the manufacturers. Although the paint department is rather far to the rear, customers in the front of the store cannot fail to notice the paint signs prominently displayed in a number of places.

To the left, on entering, the wall is covered with shelves containing tinware, enamelware and household supplies generally. These shelves extend more than half the length of the store, and the rest of the space is occupied by racks and stands for farm tools, shovels, etc. In front of the tin and enamelware shelving the stove stock is ranged. A stand is also found here for the display of cutlery. At the rear all variety of household goods are found.

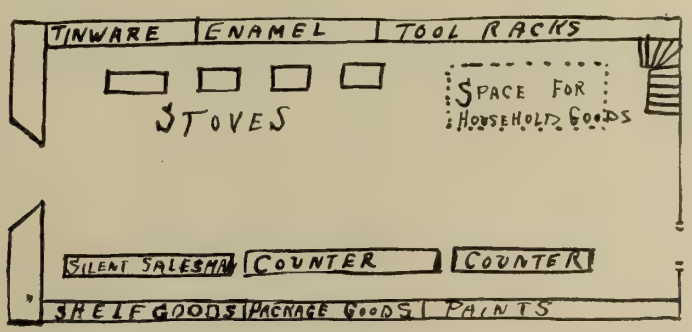
The Tinning Department.

Landreth Bros. do a big tinning business. Their shop is at the rear of the store. Their patronage in the tinshop is not limited by any means to Lemberg for they do a great deal of work in the surrounding district.

Lemberg is in the centre of a splendid farming country and is situated on the Pheasant Hills branch of the C.P.R. It is stated that the future holds out bright promise for Lemberg. It is growing with the usual western speed and Landreth Bros. are keeping right up with it. They have now one of the finest stores on the Pheasant Hills branch.

The firm is made up of John Landreth junior, and Geo. Landreth.

An interior view of the new store of t he Landreth Hardware Co., Lemberg.



A plan of the new store of the Landreth Hardware Co., of Lemberg, Sask.

OPENING DAY IN HANDSOME NEW STORE.

Continued from page 78.

Throughout the whole establishment order reigns. From the receipt of goods in bulk until they are placed in their customers' hands it is possible to tell just where every article is placed. This is a great convenience, as it enables the stock-keeper to know almost exactly at any time the quantity of stock on hand.

If one were to commend any particulars about the Thornton store they are these: the splendid facilities for receiving and shipping goods; the enterprises shown in developing such a side line as books, stationery and toys; and the adoption of the best means of helping the buyer by encouraging inspection through window and interior displays. Nor are other conveniences wanting. There is plenty of light day and night for those who come to the store; counter seats to induce one to stay, and the latest helps in the business world to facilitate trading.

Eastern Ontario Hardwaremen Organize

A New Association Formed for the Purpose of Holding Quarterly Meetings and Discussing Trade Problems—Officers Elected at Meeting Held at Sterling —Aims and Objects of the New Body.

STERLING, March 15.—A new organization came into existence today. Hardware dealers from various sections of Eastern Ontario assembled in the Sterling House and the Eastern Ontario Retail Hardware Association was formed.

It has been felt for some time that associations of a more or less local nature should be formed to carry on more intimate work than is possible in provincial organizations. The greatest object of association work is to bring members of the trade together and this can be accomplished more thoroughly in associations composed of dealers within a near enough radius to permit of regular and frequent meetings. The truth of this has been demonstrated in British Columbia, where the B.C. Association, composed almost entirely of Vancouver and New Westminster hardwaremen, hold their meetings once a month.

The dealers throughout the east had been approached and had signified their approval of the idea. It was anticipated that the attendance at to-day's meeting would be very large. The storm however, kept quite a number away. Even at that there was a representative attendance, the following being on hand: L. Meiklejohn, and R. W. Meiklejohn, of Sterling; C. McGee, representing McGee & Lagrow, M. W. Connor and W. E. Connor, representing M. W. Connor & Son, Madoc; Frank Dafoe, Madoc; Dan Shannon, Marmora; Harry Connor, representing Connor & Grey, Marmora; R. C. Chown, Belleville, representing the W. W. Chown Co.; Wm. McGie, John Lewis & Co., and J. W. Walker, the Stafford Hardware Co. Many others had signified their intention of being on hand and doubtless would have been had not the storm prevented.

The work of organization was proceeded with. Mr. Chown was able to assist very materially, giving the benefit of his experience as president of the Ontario Association. It was unanimously decided that it would be of benefit to the trade to organize and all present pledged their support.

R. C. Chown, of Belleville, was elected the first president and W. E. Connor, of Madoc, was chosen as secretary. Other offices will probably be filled at the next meeting.

It was decided to hold the next meeting at Sterling some time in May. The date will be decided by the president and secretary.

Organization to Proceed.

In the meantime, every effort will be made to get all hardwaremen in that district in line. It is not anticipated that there will be any difficulty in this, for the dealers have signified their almost unanimous approval of the plan and will doubtless lend their active support and co-operation.

Hold Quarterly Meetings.

It was decided to hold quarterly meetings. In this way it will be possible for the members to keep closely in touch with one another.

The object of the new association is, briefly, to bring the hardwaremen together at regular intervals for the discussion of trade problems and to deal with questions which may have arisen. In this way, it will be possible to deal in a thorough way with trade evils. One of the first questions taken up will be the elimination of price-cutting on staple lines of hardware and tinware. It is felt that dealers should not pursue the course of selling some lines at or below cost. This is done pretty generally, however, and the only way to eliminate it is for the dealers to be educated to the folly of giving away goods. This can best be done by the holding of regular meetings, at which the discussion of merchandizing problems will assist to a better understanding. It would be fairer to both consumer and dealer if such methods were abandoned.

Such grievances can be handled better by organized effort than by individuals. It was decided that all members having grievances should write the secretary without delay, giving full particulars. These matters could then be discussed at the next regular meeting.

Write the Officers.

Retailers in that section who desire to join the Eastern Ontario Retail Hardware Association are requested to write the officers at once. Further information can be secured from them.

A MAPLE SUGAR WINDOW.

London, Ont., March.—J. A. Brownlee has a striking "maple sugar season" window this week. The main feature is a large fireplace, in which cloth colored red and striped with white makes a good imitation of brick. A large sap-pan rests on the brick and the sides of the windows are piled high with sap pails of various sizes. "S-P-I-L-E-S" is spelt in large letters by rows of those necessary articles, and a couple of evergreen trees provide the finishing touches. Price cards do the rest.

HAYR HARDWARE CO.

The new store of the Hayr Hardware Co., Lethbridge, Alta., is one of the largest and best equipped in that section of the West.

The most modern fittings have been installed and the ground floor is laid out for the display of practically all lines. On the first floor a showroom for stoves, graniteware, etc, is being arranged. The basement is being used as a storeroom for all lines and an oil storage and measuring machine has been installed. A freight elevator is to be installed shortly.

The building is of fireproof construction throughout.

TO KEEP A PAINT BRUSH SOFT.

After finishing a job of painting and not desiring to have a can of oil standing around the house, I filled the bristles of the brush with a good supply of paint, carefully wrapped it in paper, tied it securely with a string and placed the brush on a shelf. A short time ago I wished to use the brush and upon unwrapping it I was surprised to find the bristles as soft as when put away. The oil in the paint having soaked the inner wrappings of the paper, thus preserving the brush in first-class shape for two years.—Hardware Reporter.

Northern Hardwaremen to Organize

A meeting of the hardwaremen of Northern Ontario is being arranged, to organize an association in that section.

It is probable that a convention will be held at North Bay on Thursday and Friday, April 4 and 5. Arrangements are being made with that object in view. An invitation has been extended to the president and secretary of the Ontario Retail Hardware and Stove Dealers' Association to attend and lend them aid in the organization of the body.

The idea of the northern men is to form a branch body which will meet at regular intervals and keep the members in that section interested in association work.

Is Canada on Verge of Record Year?

Summary of Conditions Indicates That Prosperity Reigns Supreme in all Sections of the Country—Marked Stimulation of Demand Has Already Been Felt —Some Facts Which Indicate the Trend of Trade—Comparison with Conditions Ten Years Ago.

IT is conceded that the opening of spring will usher in a trade of record proportions. Industrial and commercial conditions were never better in Canada than at the present time. The growth of the country, the irresistible evidences of a wonderful expansion serve to convince that complete prosperity is ahead.

Hardware manufacturers and wholesalers perceived the promise of an active year as early as last fall and laid their plans in accordance. Developments so far this year show that the prospects were not overestimated. Business has been considerably in excess of past records in practically every line. An almost unprecedented confidence is found pervading the retail ranks; and the retailer is in the best position to judge of the attitude of the consumer. "The biggest year yet is ahead," asserts one hardware wholesaler. "We are going to break all records," declares a paint manufacturer. "We are assured of the biggest demand in the history of the country," confidently states a maker of stoves. The opinion is unanimous; not a dissentient voice heard anywhere.

One of the main factors in creating the activity and the resultant optimism is the all-pervading prosperity of the West. Good crops last year, together with the fact that immigration is heavier than ever, insure greater activity out there than ever before. New stores are opening up daily and new towns are heard of almost as frequently. The demand for manufactured goods in the West is going up by leaps and bounds. In some lines it more than doubles each year. Is it any wonder that the eastern manufacturer has to increase his plant and improve his facilities to fill this ever-growing demand?

But the full credit cannot be attributed to Western growth. The eastern provinces are demonstrating that they are far from effete or stagnant. In fact, the growth in even the oldest communities has been surprisingly large during the past few years. When a town or city which has been standing still for twenty years suddenly comes to life and begins to widen out and liven up, it is a sign that a new order of things has been brought to pass. The irresistible tendency toward growth noted in Canada has spread to the most unlikely, out-of-the-way places, infusing new life and energy into them.

Manufacturers state that they had large increases last year in practically every section of the east—sometimes as large as twenty per cent. What is more they are expecting just as good results this year.

SALIENT POINTS.

Trade so far this year in hardware lines has averaged about 20 per cent. larger than for the same period last year.

Big increases are reported in some lines.

Bank clearings in Winnipeg went up over 50 per cent. last month.

The retail demand is large and characterized by a call for new goods and specialties.

Some Concrete Evidences.

Now for some facts. The trade so far this year, as compared with the same period last year, has shown an advance of close on to 20 per cent. This percentage is fixed as an average; in some lines it has been higher and in others lower but no manufacturer or jobber has been heard from who reports a decrease in any line. One paint manufacturer states that his orders are forty per cent. higher than last year. In one branch of another paint house, business has been doubled and a few thousand added to that. One hardware wholesale house estimate that they have done fifteen per cent. more business than up to this time last year. These are but a few of the concrete instances which might be adduced to show the distinct upward trend in trade.

Interest in New Line.

The demand so far from the retail trade has had several outstanding characteristics, in addition to the increased proportions. There has been a marked interest shown in new lines and specialties. The trade, in fact, seems to be more fully alive to the possibilities of pushing new goods and improvements. Hardwaremen are enlarging the scope of their trade and are adding to their stocks a variety of the newer lines which have lately found their way into the hardware store. Another characteristic is the incresaed demand for good quality lines. It is quite apparent that the dealer is endeavoring more to-day than ever before to push goods which have quality to them.

One of the surest evidences of continued prosperity is the increase in bank clearings. January showed an increase of 46.0 per cent. over last year in the Winnipeg clearing house. February jumped ahead 58.4 per cent. The figures for February, 1911, reached $63,141,978, while this year the total is $100,037,962. No more conclusive proof could be secured of the soundness of conditions and the rapidity of commercial and industrial growth.

A Retrospective Summary.

It is interesting to note that the steady advance of past years has brought the country to a stage which would have been deemed impossible ten years ago. Enormous increases have been made in consumption. Stove men state that the demand has been multiplied many times in the last twenty years. In the West the demand is probably twenty times as large to-day as it was two decades ago. Even in the east, the stove demand is about four times as large; in some sections more than that.

The sale of ready prepared paints has been practically doubled in the last ten years. When it is considered that the increase in population has not exceeded much the 20 per cent. mark, the increase in paint consumption speaks well for the exploitation of that article by the manufacturers.

An increase of 50 per cent. in ten years is estimated in glass. Metals are being used in very much larger bulk, especially those needed for plates, sheets, roofing and sidings. The development of the tinplate consumption has been enormous.

Hardware has been featured during the decade by a multiplication of lines and by a steady growth. It is impossible to estimate the extent of the growth owing to the great variety of goods which come under the head of hardware. The demand of tinware is said to have doubled and the quality of the goods most sold has improved to an appreciable extent.

A few lines have shown marked progress. Gas stoves have come to the front of late years. The demand has more than doubled; some say that it has been quadrupled at least, this showing being due to the rapid introduction of gas for heating and cooking as well as lighting.

The list might be indefinitely continued but the figures would lack variety, for the trend has been all in the same direction, ever upward.

EFFICIENCY MEDIUM OF THE TRADE.

The world wakened up one day not so long ago to the necessity for conservation of energy and effort. Man realized that he had not given thought to finding the best ways of doing things; and that he was, as a result, doing more work at a greater cost and achieving smaller results than he would if better methods could be found. He felt the need for Efficiency.

Since that broad truth has been fully realized, the business world has been most persevering and determined in its search for short cuts to best results. Unnecessary labor, ineffective methods are being eliminated. Business systems are being improved. Methods, bared of superfluous work and detail, are taking the place of red-tape and the round-about, cumbersome forms. It was found, for instance, that, whereas the work of the bricklayer had always consisted of seventeen distinct actions, he could do his work neater, quicker and with less labor in seven. That is Efficiency; and but one of the almost countless improvements which have been effected since man began to work down to the first principles of expediency and efficiency.

The MacLean Publishing Co. organization has always been recognized as one of the most efficient of its kind. It was felt within the organization, however, that improvements could be effected in the mechanical department, and in other respects as well. An Efficiency man was secured to look over the plant and system—an expert who had spent many years in studying the problems which arise in the management of large organizations. He was paid a high salary and remained several weeks. As the result of his investigation a number of practical systems were put into effect.

He will be followed by another Efficiency expert, for whose services an application has already been made.

The need for Efficiency is felt in every business, profession, trade or occupation. No man can find by himself all the best ways of improving his methods and work, but there is generally an efficiency medium from which he can secure the necessary ideas and advice.

Hardware and Metal is the Efficiency Man of the hardware trade. For twenty-four years this paper has been closely in touch with hardware conditions. It has served as a clearing house of ideas. Information has been collected from dealers in all parts of the country, the facts have been marshalled in concise and readable form and published for the benefit of all members of the trade. As the years have passed new departments have been added, until to-day the reading pages of Hardware and Metal contain many features of a highly practical and instructive nature. Every branch of the business is touched upon, in addition to which our news service is complete and reliable. By following the paper closely, every dealer can glean ideas which, when applied to the conduct of his own business, prove of value and perhaps solve some difficulty which has been causing worry.

In the present issue an effort has been made to present efficient ideas on every phase of hardware retailing. The articles are based entirely on methods employed by progressive Canadian hardwaremen. In a matter of such practical interest, mere theorizing does not do. We are presenting facts.

In another and very important, respect, Hardware and Metal assists the dealer in attaining to greater efficiency. The advertising pages are a key to efficiency in buying. The hardwareman studies the advertising matter carefully and gains thereby a better knowledge of the goods on the market. This is particularly the case with the present issue. Advertisers are presenting their arguments in a particularly comprehensive way. They are giving a great amount of information which every hardwareman should know.

It will pay the dealer to read the issue through from cover to cover.

LOCAL ASSOCIATIONS.

There is a strong movement at the present time in Ontario toward the formation of associations in different parts of the province. The Eastern Ontario Retail Hardware Association has already been formed, and the men of

the north are holding a convention for organization purposes early next month.

The advantage to be derived from local bodies is that the members can get closer together. Meetings can be held quarterly, monthly or as often as is desired. Conditions purely local can be discussed, and grievances threshed out. The scope of association work thus becomes wider and the members receive more direct benefits.

The success of the B. C. Hardware Association has been due largely to the fact that the members have been meeting every month. They become well acquainted all around and have found that their interests are mutual. Grievances have been settled as they have arisen. Experiences have been exchanged. Each member has been benefited by his close contact with his fellow hardwaremen.

The development of the idea in Ontario will be watched with interest.

DEVELOPING TEAM WORK IN THE STORE.

To-day it is team work that wins in sport or business. This is why so-called "All Star" aggregations are so often defeated. It is a case of star players competing with a "star team." There can be but one result. Co-operation, concerted action, this is needed in sport, and it is the crying need of business.

The necessity of co-operation among the human links which go to make an effective staff is well known. Only if each man is enthusiastic can the best results be obtained. But there is another way in which co-operation is needed—a way which some have realized, but which many have neglected—it is co-operation among the goods themselves.

Goods, being inanimate, many may think, are incapable of team work. But such is not the case. They can reach out a hand and help one another; and in doing this they can help the business as a whole.

Certain goods appeal to certain classes. Sporting goods, for instance, are of great interest to the young men and to the boys. The young men and boys go into the store to secure these, and while there they naturally look about to see what else is shown. If, adjoining the sporting department, is a display of carpet sweepers, they will go away uninterested. But if they see razors, pocket knives, and such articles, in a near-by case, they are very likely to pause and examine. Perhaps they will purchase immediately. Perhaps they will leave, apparently forgetful of what they have seen; yet when the need of a razor or knife arises they will remember where they saw that display. The sporting goods, then, will be entitled to some credit for selling the razor. Of course, the contrary is true, for the reverse of this transaction is likely to occur.

Co-operation among the goods may be secured by placing in close proximity lines which will hold a customer's attention—lines which will draw a customer on from one show case to another. This is a branch which cannot be too carefully studied. What may be good team-mates at one season would not be so effective at another. The goods are really the storekeeper's players in the game of business. He must move them about, from time to time, to secure their greatest effectiveness.

"THE PATHMAKERS."

The cover design of this issue tells its story in more direct and forcible manner than tabulated figures, no matter how comprehensive, could ever do. It tells the story of Canada's wonderful development; of the rapid encroachment of civilization on nature's fastnesses; of the advance of the steel rails which typify progress into the virgin lands of the West, bringing in their wake industrial activity and causing new towns and communities to spring into existence. "The Pathmakers," the artist has called his work; and the title sums up everything that the painting teaches. The railroad engineer and his blue-shirted workers are the pathmakers of commerce and industry.

Canadian railway companies will spend sixty million dollars during 1912 in the construction of new lines in the western provinces alone. This fact has a deep significance. Immense tracts of arable land will be opened up and scores of new towns will be founded before the year is out. The increase in the consumption of all goods will be incalculable as a result of the railroad operations.

The growth of the West has exercised a wonderful effect on the industrial life of Canada. The wheat crop might be termed our trade barometer. If there is a bumper crop, conditions all over the Dominion feel the stimulus of prosperity assured; if gloomy reports are heard from the West, confidence falls with a suddenness that presages an industrial storm. And yet civilization has reclaimed but a small part of that wonderfull country. What will be the effect on trade when the whole of the land has been opened up and its wonderful resources trained to man's needs? It is impossible for the mind to conceive or grasp the full possibilities of the Canadian West.

To manufacturers, then, the growth of Canada has a significance which they cannot escape. Here is a land of unlimited promise, a field of unlimited growth. It is worth their full attention.

The artist, C. W. Jeffreys, has made a special study of pioneer life. He can depict camp and trail with an accuracy and realism which no other artist has yet attained. Mr. Jeffreys has, in the past, painted other covers for Hardware and Metal, but his last effort is the best that he has done.

THE INFLUENCE OF THE OWNER.

Ever notice the resemblance between a man and his store?

There are always points of similarity between a man and his common environment. Whether it is the effect of the man on the environment or vice versa is sometimes hard to say. However, the resemblance creeps in somewhere. Go into a store where the goods are kept in haphazard shape, where dust obscures the showcases, and the floors show scant acquaintance with the broom, and you will find the proprietor sporting a three days' growth of beard and a dirty collar. On the other hand, a man neat and tidy in his personal habits will have a neat and tidy store.

But it goes still further. The effect of the owner's personality makes itself manifest in everything about the establishment. A dealer from the far west made the statement recently that there were certain lines of goods which he took a big interest in and certain others which did not appeal to him in the least. His store records showed that sales of the former goods were continuously heavy, while the latter lines languished on the shelves. In other words, his likes and dislikes had been communicated to his staff and showed themselves in the record of sales.

Such being the case, every dealer should endeavor to make the influence, he thus unconsciously exerts, for the very best. He should consider that his store and business are going to be just what he makes them. He has the power to infuse energy, initiative and love of order

into his staff or to create a feeling of careless lassitude. His own example and personal influence will decide which it is to be.

A HELP TO SPRING BUYING.

One of the main objects of publishing a spring special number of Hardware and Metal is to give every assistance to the dealer in his spring buying.

The spring is the season when the hardwareman makes his most extensive purchases. He has to stock up for the heavy spring and summer trade. Now the buying end of the business is one of prime importance. The man who buys "not wisely but too well" is quite as likely to suffer reverses as the timid merchant who has not the courage to keep pace with the vagaries of demand and who buys on an extremely restricted scale. The successful merchant is the one who buys cautiously and yet sees that he is carrying everything that an up-to-date hardwareman should have.

He could not possibly have a better guide than the advertising pages in the Spring special number of Hardware and Metal. By studying them carefully he can learn a great deal about goods, their qualities and selling points. He can find in the advertising sections matter dealing with practically everything that is sold in a hardware store, hints on new goods and information as to selling helps. The special number serves, in fact, as a complete book of reference which the dealer finds of incalculable value in his spring and subsequent buying.

HOTELS AND CITIZENSHIP.

With travelers going before the Ontario Provincial Secretary protesting at the manner in which certain hotels are run, and with those who have to call at certain places once or twice through the year, carefully planning their trips so that they will not have to stay over night at those towns where they know the accommodation to be poor; it becomes very evident that this question of hotels is one which needs attention.

A bad hotel can do great harm to a city or town. A good hotel can bring the municipality much good. There is little proof of this needed. Anything which tends to keep people away from a place does that place harm. Anything which attracts people, and makes them desirous of getting to that place in preference to others, does the place good.

This being so, it becomes very evident that the business men of a city or town, are, or ought to be, interested in the hotel accommodation which is afforded. In many local option towns, where the regular hostelries have been closed or allowed to run down, citizens' committees have bought and operated hotels. They have done this not to secure direct gain, but to afford entertainment for visitors—to keep the town on the map.

If no improvement is brought about in the present hotel conditions it would seem that municipal hotels must become more common. Business men, by uniting to establish a good house, could make their town attractive, instead of repulsive to visitors. They could get fair interest for the money they had invested, and they would get the greater benefit which would result from making their town an attractive place.

To-day, when there is so much traveling, hotels mean much to the life of a community. When, therefore, the citizens become awake to the fact that they as citizens have an interest in providing for the proper accommodation of the visitors, a better day will have dawned for all.

GROWTH OF BRITISH IMPORTS.

British imports into Canada have been steadily on the increase. The improvement has been particularly marked of late years. Even in the far west the demand for British-made goods has been growing. Distance apparently is no obstacle.

The fact of the matter is that the development of the Dominion has been on such an unprecedented scale that this country presents a splendid field for commercial exploitation. The west is expanding so rapidly that in many lines the consumption has been doubled, trebled, even quadrupled, within the last few years. New towns are continually springing into existence. It is no wonder, then, that British manufacturers are awakening to the fact that the Canadian field is one of unlimited possibilities.

THE LONG ARM OF HARDWARE AND METAL.

The press has a long arm. It reaches to all parts of the world. It has frequently and truthfully been said that, in Hardware and Metal "you can talk across the continent for two cents a word." As a means of disseminating or collecting information, a newspaper with a national circulation has striking power.

This has been demonstrated by the response to queries published in the "Letter Box" department in Hardware and Metal. On countless occasions, replies volunteering information have been received from points in the extremes of east and west. Here is an instance. Two weeks ago a query was received as to the maker of Lundstrom tailor stoves. As the desired information was not available, a note was inserted asking if any readers could supply it. Three replies were received inside of a week from points in the Maritime Provinces, giving the information.

The "Letter Box" has been the means of bringing to light most interesting information on many points. It is true that an answer can be obtained somewhere to every question. If the editor cannot find it, some reader of Hardware and Metal is certain to do so.

The "Letter Box" has become a most interesting department of the paper. It is being extensively used and questions of all kinds are being sent in. We have received questions varying from the sale of hay in Scotland to the management of a state asylum. Readers are invited to send in questions on any knotty problem that crops up. We will do our best with them. If the information cannot be secured, some other reader can be depended upon to come to the rescue.

REGARDING TRADE MARKS AND PHRASES.

A certain newspaper, it is stated, prohibits mention of the Bible, claiming that to do this is to advertise the American Tract Society. This brings to mind the story of a managing editor who clipped a picture of the Rock of Gibraltar from his paper and sent it to his city editor, with this note: "Don't use Gibraltar again; the insurance people don't advertise."

Instances like this are somewhat amusing, yet they have underlying them a great principle. That insurance company, for instance, has so rung the changes upon the phrase, "as strong as the rock of Gibraltar," that a picture of Gibraltar naturally brings to many minds the thought of insurance in general and of that one company in particular. Ideas are so associated that it is necessary this should be so.

It is hard to estimate the value of a trade mark or phrase. Think of the far-reaching advertising worth of

these words: "Alas, my poor brother." Think of the trade marks, a glimpse of which brings to mind a whole story. These are the things which remain constant in every advertisement of the product. They are the things which reach out and force the goods upon the attention of the passersby.

A good trade mark, or a good phrase, is worth much to the manufacturer, and it is also worth much to the retailer who handles the goods. Some people may not believe in signs, but there are few nowadays who do not believe in trade marks. It is by reference to these, in many cases, that the article wanted is identified.

FINDING THE LEAKS.

The article "Tinshop has been put to a test" suggests the thought that the retail dealer should always be in a position to tell what each department of his business is worth to him. There are countless hardwaremen who have no idea where their profits come from or where their losses occur. Their whole business is run loosely, and there is no way of tracing back results. Consequently, if there is a dead limb which threatens the continued safety of the whole, they cannot get to the seat of the trouble and find the remedy.

A small ailment will pull down a man's health and, if allowed to run on unchecked, saps his vitality. It is the same with one profit-draining department in a retail store. It must be located and put on a better basis or else dispensed with entirely.

SELLING PAINTS IN SPRING.

An important part of the spring campaign is selling paints, varnishes and specialties. The importance of this feature has, we fear, been overlooked by many hardwaremen.

It is significant of the growing demand for paint that the consumption in Canada has increased by 100 per cent during the time that the population has gone up by 20 per cent., and the world is only just beginning to waken up to the need and the possibilities of paint. Specialties are being introduced which fill long felt needs in house decoration. The value of paint as a preservative and as an insurance measure is being slowly but surely recognized. It is safe to assert, then, that the future will see a wonderful growth in the demand for paint.

The dealer should keep pace with the present development by improving his methods and by paying more attention to the line. In this connection, it will pay every hardwareman to read the articles on paint salesmanship appearing in this issue. Good ideas, followed by certain dealers with marked success, are outlined.

POINTED EDITORAIALS.

Let-well-enough-alone is next door neighbor to Stick-in-the-rut.

* * *

"Sap's risin'." So are stocks, and so, it might be added, are prices.

* * *

To be a good paint salesman, it is necessary to have more than a superficial knowledge of paints and painting.

* * *

It is a good plan to keep the stove stock as much together as possible. Scattering goods is poor policy.

Never let prejudice interfere with profits. After all, you are in business for profits.

* * *

Rope has advanced 25 cents a hundredweight. Giving a person too much rope will, therefore, be more costly than ever.

* * *

There is no keeping a good town down. Cochrane's recovery from the recent fire has been nothing short of marvellous.

* * *

You cannot improve on plain business terms in presenting a business proposition. The advertising writer should bear this in mind.

* * *

"The sale of gas stoves commences with St. Patrick's Day," remarked a Montreal dealer. The wearin' of the green probably reminds people forcibly of the coming summer.

* * *

The higher level which is being struck for some commodities is not to be wondered at. The strange thing is that the English coal strike has affected Canadian prices so little.

* * *

The motor craze is one of the most marked developments of the past ten years. It has created a tremendous demand for motor supplies, accessories and repairs. Is the hardwareman getting his share of the trade?

* * *

There are methods by which the depredations of slow pay and "dead-beat" customers can be checked. There is only one way to absolutely guard against them, however. Put the "Cash" sign up over the door.

* * *

It is quite apparent that hardwaremen are waking up to the possibilities of the gasoline trade. The demand does not come from owners of automobiles alone. The farmers are plowing and threshing by gasoline nowadays.

* * *

A small leak can sink a big ship. A small leak can wreck a big business. Watch out for leaks. They may seem insignificant at first but the larger the breach grows the harder it is to stop and the more disastrous the results.

* * *

"Fitting in" is the secret of success in business. Brilliant men frequently fail because they do not fit in with the work that falls to them. See that each member of your staff "fits in"—with the business, with you, and with each other.

* * *

A manufacturer states that the business in paint durthe past ten years has more than doubled. This speaks well for the educational work which has been pursued, for during that decade the country's population has increased only some 20 per cent.

* * *

In a Montreal hardware store is arranged a window trim bringing prominently forward curtain pole ends, coat hooks, window catches, and similar lines. Then at the back are shown skates. It would be hard to think of two classes of goods which would go so ill together. Window catches, coat hooks and such articles are in great demand now, but he must be a remarkable salesman who can dispose of skates.

EFFICIENCY
IN
BUSINESS MANAGEMENT

Some Benefits of the Cash System

Dealers Who Have Adopted This System Tell of Their Experiences—F. E. Hendershot, of Mount Forest, Has Found it a Success—H. J. A. Sylvestre, of Montreal, Draws the Cash Line Rigidly.

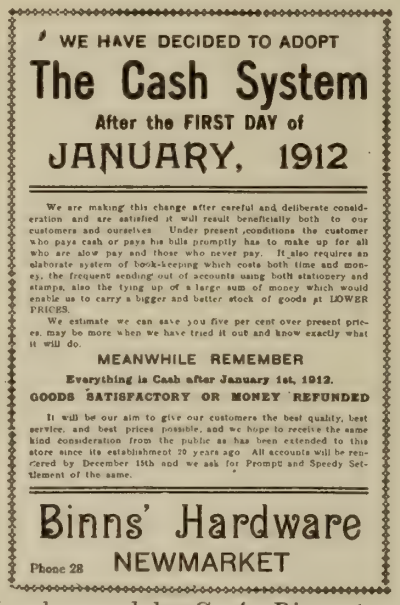
A MOOT point about the conduct of any retail business is whether the cash or credit basis is to be adopted. Hardwaremen are agreed that the cash basis is the ideal method of doing business, but they are not agreed on the practicability of the same. Many frankly disbelieve in the possibility of doing business permanently on the cash plan.

It is true, nevertheless, that many firms are doing this. There are scores of the best hardware stores in Canada in which charge slips are unknown. Every week or so it falls to Hardware and Metal to chronicle the fact that another dealer has "taken the plunge." While some firms have gone back to the credit system after trying out the cash plan of doing business, the number is comparatively small.

It is quite true that in some localities it would be difficult, almost impossible, to refuse credit. In the long run, however, there are few dealers who could not make the change if they could summon up the necessary courage.

The experience of many dealers who have changed over from credit to cash constitutes perhaps the strongest possible argument which could be adduced in favor of the latter. Last winter F. E. Hendershot, of Mount Forest, Ont., decided to sell for cash only, and, after giving due notice to customers, the change was effected. Mr. Hendershot now writes: "So far as general hardware and all counter goods are concerned, I am still operating a cash system and consider it a success."

In this connection, it might be pointed out that the locality in which Mr. Hendershot is located is not an ideal one for the operation of a cash business. A good percentage of his trade is drawn from the country surrounding Mount Forest, and farmers, as a class, expect a certain amount of credit. Many hardwaremen, who declare that local conditions preclude all possibility of their making the change, have nothing more adverse to contend with.



WE HAVE DECIDED TO ADOPT

The Cash System

After the FIRST DAY of

JANUARY, 1912

We are making this change after careful and deliberate consideration and are satisfied it will result beneficially both to our customers and ourselves. Under present conditions the customer who pays cash or pays his bills promptly has to make up for all who are slow pay and those who never pay. It also requires an elaborate system of book-keeping which costs both time and money, the frequent sending out of accounts using both stationery and stamps, also the tying up of a large sum of money which would enable us to carry a bigger and better stock of goods at LOWER PRICES.

We estimate we can save you five per cent over present prices, may be more when we have tried it out and know exactly what it will do.

MEANWHILE REMEMBER

Everything is Cash after January 1st, 1912.

GOODS SATISFACTORY OR MONEY REFUNDED

It will be our aim to give our customers the best quality, best service, and best prices possible, and we hope to receive the same kind consideration from the public as has been extended to this store since its establishment 70 years ago. All accounts will be rendered by December 15th and we ask for Prompt and Speedy Settlement of the same.

Binns' Hardware

Phone 28 NEWMARKET

Circular used by G. A. Binns to announce impending change.

The experience of Mr. Hendershot is noteworthy in another respect. When he first made the change, he attempted to conduct the whole business on the one basis. It was a case of cash for everything. He found that this did not pay in some departments. In the stove line, quite a little business was lost because people were not in a position to pay the whole price "on the nail." Accordingly, he modified his terms somewhat. With stoves and a few other heavy lines, which run into big sums, he makes terms with the customer and generally takes settlement by rental agreement or note. The same plan is carried out with reference to contract work. In all other lines, however, the cash provision is still enforced.

Is Trying System.

A more recent convert to the cash system is G. A. Binns, of Newmarket. Mr. Binns started at the first of the year and has not had time yet to "try it out" thoroughly, or to speak of the results. So far, however, he has found no reason for going back to the old way of doing business.

Mr. Binns took the precaution of preparing his customers well in advance of the impending change. It is not considered wise to change over without due warning.

Draws Line Rigidly.

J. H. A. Sylvestre, of Montreal, is one of those who does not believe it a very hard thing to change from a credit to a cash system. For years Mr. Sylvestre gave goods to all and sundry without any immediate return in money. Then he decided that this system was working against his best interests. At once, without even warning his customers, he changed his mode of procedure, and from that day to this—some five years—he has sold goods only when money has been given in exchange. Nor, according to Mr. Sylvestre's own statements, has he suffered as a result of this change. He has lost a few accounts. He has, on the other hand, gained some, and the leakages caused by bad debts have been stopped.

How, some will wonder, was trade gained by the adoption of the cash system? Here is the answer as Mr. Sylvestre himself gives it:

There is a good trade with small contractors in the district in which Mr. Sylvestre's store is situated. When he adopted the cash system he feared he might lose a part of this trade, yet be determined not to give credit even to these men. He had a reason for coming to this decision. It was this class of men who had been responsible for a number of his losses.

But the cash basis did not result in the loss of as many contractors' accounts as might have been expected. Here is one instance, however, where an account was lost. It is one of those instances for which any dealer would be thankful.

"A painter came in here last fall," related Mr. Sylvestre. "He looked over my stock and said, 'Your prices are the best.' Then he said, 'I suppose you give thirty days to contractors?' 'No,' I replied, 'I do not. You men are some of the worst risks we have. You may be worth $20,000 to-day. In thirty days you might not be worth anything.'"

It was plain speaking, that, and the contractor went away without leaving his order. But in thirty days he had made an assignment, and Mr. Sylvestre was shaking hands with himself to think that he had escaped.

"Oh, there are some disadvantages to the cash system," remarked Mr. Sylvestre, "but the advantages more than counterbalance these. I have had larger profits and more peace of mind since I adopted this system."

Where Advantage Lay.

One dealer who made the change over ten years ago and who has stuck to his guns ever since, explains his reasons in this way:

"When I allowed credit, I always had large sums of money out. Sometimes there would be as much as fifteen thousand dollars on the books. That may seem a pretty stiff figure, but it is correct, nevertheless. I was always losing a certain amount through bad debts, and estimated that three per cent. had to be written off every year on that account. So I decided to turn over, and during the first year my business fell off some. The lost business, as far as I could estimate, just balanced up what I had been losing before on bad debts. In reality, then, I was not losing and had, in addition, the advantage of getting the cash down on all that I sold. My financial worries were considerably less, I can assure you. At the end of the first year I figured the change a success and decided to stay with it. Each year since the conditions have improved. The business came back in short order and has stayed ever since. I meet my bills on time, and my surplus is a whole lot better than it was in the days when I let every slow-pay customer in the country run up accounts with me."

Comprehensive Summary.

A good summary of the situation was contained in the notice sent out by Mr. Binns. It read in part:

"We are making this change after careful and deliberate consideration and are satisfied it will result beneficially, both to our customers and ourselves. Under present conditions the customer who pays cash or pays his bills promptly has to make up for all who are slow pay and those who never pay. It also requires an elaborate system of bookkeeping, which costs both time and money, the frequent sending out of accounts, and also the tying up of a large sum of money which would enable us to carry a bigger and better stock of goods at lower prices."

System Which Limits Credit Accounts

How Purvis Bros., of Sudbury, Put a Check on Credit Buying —Slips are Used on Which all Time Transactions are Entered and Submitted to the Firm for Approval—Some of the Advantages.

WHILE all dealers concede that to do business on the cash basis is infinitely preferable to any other system, they are not unanimous in their belief that they personally can undertake it. "It may be all right in some places, but not here," scores of dealers will tell you.

Some will even assert that it is impossible to do business on the cash basis anywhere permanently. They are wrong. It is only necessary to point to instances where it has been done—they are very numerous—to prove that the cash system has been found wonderfully effective.

It is probably true that there are some sections where it would not be advisable to absolutely refuse all credit. In a manufacturing district many good accounts would be lost. The average mechanic needs credit at times, and he is honest enough to pay—in a large majority of cases, that is. Instances are known, however, where hardware stores have been conducted on a strictly cash basis in districts which were literally credit hives.

For sake of argument, however, let it be conceded that there are cases where the hardware man could not afford to demand cash on every purchase. It is obvious that he should lose no time in adopting the next best system, viz.: a proper method of limiting credit.

Unlimited credit is synonymous with bankruptcy. The dealer who never lets his right hand know what his left hand is selling on a time basis, who sells everything and everybody promiscuously, is skimming under a full head of sail for the reefs of insolvency. The bigger the business he does, the faster will his Nemesis overtakes him.

One of the best systems for the limitation of credit is that followed by Purvis Bros., of Sudbury. James Purvis will be remembered by all who attended the convention at Guelph, where he took a prominent part in the discussions, and showed considerable accumen and shrewdness. That the same qualities are shown in his handling of the business is evidenced by the plan adopted to keep down the bad debt percentage.

Credit slips have been prepared, which must be made out before any goods can be sold on a credit basis. The salesman who is handling the transaction enters the name and address of the customer and the amount of the goods, and then submits the slip to the proprietors. If it comes back signed, the transaction goes through. If the firm signature is not obtained, the customer either has to pay cash or go to another store.

The advantages of this system will be patent to all. It precludes the possibility of any member of the staff giving credit on his own responsibility. In fact, no account can be started or added to without the firm's consent. The system serves as an automatic check on credit customers. The proprietor sees the slips as they come along and, if any name is found on too many of them, the clamps can be at once applied. In fact, further credit can be refused just as soon as it is thought a customer has been allowed as much credit as is safe.

Without a system of this nature, book accounts accumulate with bewildering rapidity. Customers keep on purchasing and requesting that the amounts be entered on their bills and the dealer, not knowing to just what proportions those bills have attained, accedes. When he looks over his books at the end of the month, he is astounded at the amount of goods some of these slow-pay customers have managed to secure without any payment. He collects all—in time—on some accounts. But his losses cannot help but prove heavy. The law of averages proves that a certain number of the people who run accounts are "dead beats," and the more accounts the dealer has on his books the wider

his experience with the dead beat element is going to be.

Would Rather Pay.

There is another point which emphasizes the value of the system followed by Purvis Bros. It is the easiest thing in the world to pocket your parcel. murmur a half-apologetic request to "charge it to me," and slide out of the door. Many otherwise respectable citizens with the cash in their pockets to pay for the goods, will do this. It is so easy. And it postpones the evil day of settlement.

But it is a different thing to make your request to a clerk who pulls out a printed slip, takes down your address and other particulars and then sends the slip on to the office, where the proprietor is sitting in judgment on yourself and similar delinquents. There is the delay, the feeling that the proprietor is "sizing you up," the natural shrinking from making a formal appeal for assistance from the dealer; for that is exactly what it amounts to. Most men would be willing to make every effort to secure the necessary cash rather than to go through this formality.

The system should serve, therefore, as a most effectual check on the fast-ordering, slow-paying customer. It should help to place a good proportion of the business done on a cash basis.

Purvis Bros. have found it to be eminently successful. While not inclined to turn over to the cash basis, they are still less inclined to let irresponsible persons run away with the profits of the business. They have found that the credit slip plan does away with most of the losses.

Office Methods Safeguard the Dealer

Forms Adopted for Checking All Goods Purchased, and the Payments on Same, and Also for Keeping Track of Sales—Office Methods Which Make for Efficiency.

TIME after time men have found their business going behind, and why they could not tell. Faulty buying and selling has occasionally been given as the cause; but in nine cases out of ten the trouble has been with the office system—the system of keeping track of what is done, so that waste may be avoided, and so that advantageous deals may be repeated and foolish deals avoided. Success or failure, indeed, depends in no small degree upon a proper system of bookkeeping.

Many—the majority of hardwaremen perhaps—are now running their offices upon thoroughly up-to-date methods. But there are a number of whom this cannot be said. They will welcome some suggestions, while even for those who have a systematic method of procedure there may be suggestions in the following description of the methods employed by Taylor Bros., Ltd., of Carleton Place.

Special Order Sheet.

Frank Taylor gives special attention to the ordering end of the business, and that he may check this better, and that he may secure certain rights to which he believes himself entitled, he writes every order upon their especially prepared order blank. Never does he use the traveler's order blank. Copies of the order issued are kept, and carefully filed away on a special binder.

In the course of a few days, when the invoice for the goods comes in, this is checked with the duplicate of order. Then the record is entered in a book set aside for the purpose, called an invoice book, while the invoice itself is filed on the top part of cabinet.

The goods arriving are at once checked with the invoice and put away with other invoices, and should an error be detected, notice of this is at once sent the shippers so that the mistake will be rectified at once and not at time of settlement.

Speaking of accounts, by the way, brings to mind a peculiarity of Mr. Taylor's systems. He will accept no draft, claiming this to be a great nuisance. On his order blank it is clearly specified that payment shall be by check only.

funds are available to meet these obligations.

Keeping Track of Uncashed Checks.

Not only is it necessary to know what funds are in the bank. A cursory glance at a pass book will show this—but it is also necessary to know what checks are out against that bank balance. Otherwise checks might be issued for a larger amount than is really on hand; and such a state of affairs, as every business man knows, may be exceedingly embarrassing.

But precautions can easily be taken. Mr. Taylor adopts a simple method, and one which is quite commonly used. The stubs of the checks are all kept, and as the amount for which they were made out is drawn from the bank account, this stub is checked off with a

TAYLOR BROS. LIMITED Invoice No.

Carleton Place, Ont., 191

Bought of **TAYLOR BROS. LIMITED**

Invoice which is made out with every sale—This enables weekly and monthly statements to be compiled readily.

blue pencil. So, when checks are to be made out, Mr. Taylor can easily see what he has on hand to pay these with. He consults his bank book, and finds the balance there. Then, by referring to the check books, he sees the checks which are unmarked. He knows the money to meet these has not yet been taken from his account, so by a sum in addition he finds the value of the checks out against him, and by subtracting this from his bank balance he finds the exact funds which he has on hand to settle his bills.

Care of the Selling Branch.

The foregoing part of this system relates to the buying end more especially; but Mr. Taylor also keeps close track of the goods which he sells. For every sale made an ordinary check book is used. Now notice the use that is made of these slips. Every day the bookkeeper totals the sales of the day before, and every morning she lays this statement before Mr. Taylor. He can compare with the corresponding date of the year previous. This is not very enlightening, for weather or some similar conditions might account for a big discrepancy in the transactions. But these daily sales are totalled for the week and month. Then they can be compared with the corresponding period of the year preceding, and the dealer is enabled to see how his sales have grown.

Estimating the Profits.

"I do not try to ascertain the exact profit every week," said Mr. Taylor, when speaking on this point, "but I can estimate this roughly. For instance I know that my profit was, say 5 per cent. on gross sales last year. Taking it for granted, therefore, that the rate will be about the same now, I can tell what my profits on the week's business will be. It is not accurate work, as I have said, but it gives me an idea—gives me something to go upon."

Figuring the Selling Price of Goods

How to Reach Prices Which Will Cover all Expenses and Leave a Fair Margin—Some Common Mistakes Pointed Out—How to Determine the Cost of the Goods and the Cost of Running the Business—Application of the Rule.

ONE of the most important considerations that every hardwareman has to face is the fixing of selling prices. A merchant might have a genius for salesmanship, he might turn over an immense amount of stock in the year; but if he had failed to figure correctly how much his goods had cost him and at what price he ought to sell to make a profit, he would "fall by the wayside," nevertheless. His skill as a salesman would avail him nothing.

It will thus be seen that the dealer who aims at success must have a proper system of figuring and cost accounting. Free-and-easy methods will never bring success. Some men in an off-handed way add a certain amount to the cost of the goods, putting it high enough, as they believe, to cover all possible expense and still leave a margin of profit. Not having gone to the root of the matter, they have no idea what it is costing them to do business and, although they may add what looks like a liberal margin, in nine cases out of ten they will fall short of the requisite amount.

Take for instance the problem discussed in last week's issue of Hardware and Metal. It was, briefly, as follows:

> "A certain article costs $1 wholesale. What will it have to be sold for to allow a profit of 10 per cent., after allowing 22 per cent. for cost of doing business?"

The free-and-easy figurer would think he was fixing a pretty safe price if he marked the article at $1.40. "I am allowing the 22 per cent. for business expenses and 18 per cent. profit for myself," is the way he would probably figure it out.

As a matter of fact he would be making less than 10 per cent. profit. Figured on a proper basis he would have to charge $1.47 to make a 10 per cent. margin.

The Proper Method.

The first step in arriving at the selling price of an article is to determine accurately the laid down cost of the ar-

ticle—what it has cost when it reaches the store.

The cost of the goods should be determined on the following basis:—The invoice price, less the trade discount but not less cash discounts, plus the freight or express and cartage but not plus demurrage charges or breakage losses.

The cash discount must not be deducted from the cost price if the merchant desires to be fair to himself. Cash discounts constitute a profit accruing to the merchant who runs his business on a proper financial basis. It does not affect the cost of the goods either one way or the other. If the dealer writes the amount of his discounts off the cost of the goods he is giving away something that he has earned for himself and is losing the interest on his money. If he fails to secure the discount, he does not add it to the cost.
